COMMERCE IN EXPLOSIVES

Commerce in Explosives; List of Explosive Materials

Updated: 4/26/02

Pursuant to the provisions of section 841(d) of title 18, United States Code (U.S.C.), and 27 CFR 55.23, the Director, Bureau of Alcohol, Tobacco and Firearms, must publish and revise at least annually in the Federal Register a list of explosives determined to be within the coverage of 18 U.S.C. chapter 40, Importation, Manufacture, Distribution, and Storage of Explosive Materials. This chapter covers not only explosives, but also blasting agents and detonators, all of which are defined as explosive materials in section 841(c) of title 18, U.S.C. Accordingly, the following is the 2002 List of Explosive Materials subject to regulation under 18 U.S.C. chapter 40. It includes both the list of explosives (including detonators) required to be published in the Federal Register and blasting agents.

The list is intended to include any and all mixtures containing any of the materials on the list. Materials constituting blasting agents are marked by an asterisk. While the list is comprehensive, it is not all inclusive. The fact that an explosive material may not be on the list does not mean that it is not within the coverage of the law if it otherwise meets the statutory definitions in section 841 of title 18, U.S.C. Explosive materials are listed alphabetically by their common names followed, where applicable, by chemical names and synonyms in brackets.

In the 2002 List of Explosive Materials, ATF has added five terms to the list of explosives, has further defined two explosive materials, and has made amendments to two explosive materials to more accurately reference these materials.

The five additions to the list are as follows:

1. Azide explosives
2. HMTD [hexamethylenetriperoxidediamine]
3. Nitrate explosive mixtures
4. Picrate explosives
5. TATP [triacetone triperoxide]

We have added these explosive materials to the List because their primary or common purpose is to function by explosion. ATF has encountered the criminal use of some of these materials in improvised devices. "Nitrate explosive mixtures" is intended to be an all-encompassing term, including all forms of sodium, potassium, barium, calcium, and strontium nitrate explosive mixtures.

The two explosive materials that we have further defined by including their chemical names are listed as follows:

1. DIPAM [dipicramide; diaminohexanitrobiphenyl]
2. EDNA [ethylenedinitramine]

The two amendments to previously listed explosive materials are as follows:

1. "Nitrates of soda explosive mixtures" has been deleted and replaced with "Sodium nitrate explosive mixtures" to reflect current terminology.
2. PBX was previously defined as "RDX and plasticizer." We are changing the definition to reflect that PBX is an acronym for "plastic bonded explosive."

This revised list supersedes the List of Explosive Materials dated September 14, 1999 (Notice No. 880, 64 FR 49840; correction notice of September 28, 1999, 64 FR 52378) and will be effective on April 26, 2002.
