Part VII

The President

Executive Order 13180—Air Traffic Performance-Based Organization
Title 3—
The President

Executive Order 13180 of December 7, 2000

Air Traffic Performance-Based Organization

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to further improve the provision of air traffic services, an inherently governmental function, in ways that increase efficiency, take better advantage of new technologies, accelerate modernization efforts, and respond more effectively to the needs of the traveling public, while enhancing the safety, security, and efficiency of the Nation’s air transportation system, it is hereby ordered as follows:

Section 1. Establishment of the Air Traffic Organization. (a) The Secretary of Transportation (Secretary) shall, consistent with his legal authorities, move to establish within the Federal Aviation Administration (FAA) a performance-based organization to be known as the “Air Traffic Organization” (ATO).

(b) The ATO shall be composed of those elements of the FAA’s Air Traffic Services and Research and Acquisition organizations that have direct connection and give support to the provision of day-to-day operational air traffic services, as determined by the Administrator of the Federal Aviation Administration (Administrator). The Administrator may delegate responsibility for any operational activity of the air traffic control system to the head of the ATO. The Administrator’s responsibility for general safety, security, and policymaking functions for the National Airspace System is unaffected by this order.

(c) The Chief Operating Officer (COO) of the Air Traffic Control System, established by the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (Air-21) (Public Law 106-181), shall head the ATO and shall report directly to the Administrator and be subject to the authority of the Administrator. The COO, in consultation with the Air Traffic Control Subcommittee of the Aviation Management Advisory Committee, shall enter into an annual performance agreement with the Administrator that sets forth measurable organization and individual goals in key operational areas and describes specific targets and how such goals will be achieved. The COO may receive an annual bonus not to exceed 30 percent of the annual rate of basic pay, based upon the Administrator’s evaluation of the COO’s performance in relation to the targets and goals described above.

(d) The COO shall develop a 5-year strategic plan for the air traffic control system, including a clear statement of the mission and objectives for the system’s safety, efficiency, and productivity. This strategic plan must ensure that ATO actions are consistent with long-term FAA strategies for the aviation system as a whole.

(e) The COO shall also enter into a framework agreement with the Administrator that will establish the relationship of the ATO with the other organizations of the FAA.

Sec. 2. Purpose. The FAA’s primary mission is to ensure the safety, security, and efficiency of the National Airspace System. The purpose of this order is to enhance that mission and further improve the delivery of air traffic services to the American public by reorganizing the FAA’s air traffic services and related offices into a performance-based, results-oriented, organization. The ATO will be better able to make use of the unique procurement and personnel authorities that the FAA currently has and to better use the additional management reforms enacted by the Congress this year under Air-21. Specifically, the ATO shall:
(a) optimize use of existing management flexibilities and authorities to improve the efficiency of air traffic services and increase the capacity of the system;

(b) develop methods to accelerate air traffic control modernization and to improve aviation safety related to air traffic control;

(c) develop agreements with the Administrator of the FAA and users of the products, services, and capabilities it will provide;

(d) operate in accordance with safety performance standards developed by the FAA and rapidly respond to FAA safety and security oversight findings;

(e) consult with its customers, the traveling public, including direct users such as airlines, cargo carriers, manufacturers, airports, general aviation, and commercial space transportation providers, and focus on producing results that satisfy the FAA’s external customer needs;

(f) consult with appropriate Federal, State, and local public agencies, including the Department of Defense and the National Aeronautics and Space Administration, to determine the best practices for meeting the diverse needs throughout the National Airspace System;

(g) establish strong incentives to managers for achieving results; and

(h) formulate and recommend to the Administrator any management, fiscal, or legislative changes necessary for the organization to achieve its performance goals.

Sec. 3. Aviation Management Advisory Committee. The Air Traffic Control Subcommittee of the Aviation Management Advisory Committee shall provide, consistent with its responsibilities under Air-21, general oversight to ATO regarding the administration, management, conduct, direction, and supervision of the air traffic control system.

Sec. 4. Evaluation and Report. Not later than 5 years after the date of this order, the Aviation Management Advisory Committee shall provide to the Secretary and the Administrator a report on the operation and effectiveness of the ATO, together with any recommendations for management, fiscal, or legislative changes to enable the organization to achieve its goals.

Sec. 5. Definitions. The term “air traffic control system” has the same meaning as the term defined by section 40102(a)(42) of title 49, United States Code.

Sec. 6. Judicial Review. This order does not create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person.

THE WHITE HOUSE,

William J. Clinton
