1000 INTRODUCTION

1200 Geographic Boundaries

MOBILE MARINE INSPECTION ZONE AND CAPTAIN OF THE PORT ZONE

The following zone description can be found in Title 33 CFR Part 3.40-10:

THE NEW SECTOR MOBILE INSPECTION ZONE, CAPTAIN OF THE PORT ZONE, AND AREA OF RESPONSIBILITY STARTS AT THE FLORIDA COAST AT LONGITUDE 83 50'W; THENCE NORTHERLY TO LATITUDE 30 15'N, LONGITUDE 83 50'W; THENCE DUE WEST TO LATITUDE 30 15'N, LONGITUDE 84 45'W; THENCE DUE NORTH TO THE SOUTHERN BANK OF THE JIM WOODRUFF RESERVOIR AT LONGITUDE 84 45'W; THENCE NORTHEASTERLY ALONG THE EASTERN BANK OF THE JIM WOODRUFF RESERVOIR AND NORTHERLY ALONG THE EASTERN BANK OF THE FLINT RIVER TO LATITUDE 32 20'N, LONGITUDE 84 02'W; THENCE NORTHWESTERLY TO THE INTERSECTION OF THE GEORGIA-ALABAMA BORDER AT LATITUDE 32 53'N; THENCE NORTHERLY ALONG THE GEORGIA-ALABAMA BORDER TO THE NORTHERN MOST POINT OF DEKALB COUNTY, ALABAMA, THENCE WESTERLY ALONG THE NORTHERN BOUNDARIES OF DEKALB, ETOWAH, BLOUNT, CULLMAN, WINSTON, FRANKLIN COUNTIES, ALABAMA TO THE MISSISSIPPI-ALABAMA BORDER; THENCE NORTH ALONG THE MISSISSIPPI-ALABAMA BORDER TO THE NORTHERN BOUNDARY OF TISHOMINGO COUNTY, MISSISSIPPI AT THE MISSISSIPPI-TENNESSEE BORDER; THENCE WEST ALONG THE NORTHERN BOUNDARIES OF TISHOMINGO, ALCORN, TIPPAAH, BENTON AND MARSHALL COUNTIES, MISSISSIPPI, THENCE SOUTHERLY AND WESTERLY ALONG THE EASTERN AND SOUTHERN BOUNDARIES OF DESOTO, TUNICA, COAHOMA, BOLIVAR, WASHINGTON COUNTIES, MISSISSIPPI; THENCE EASTERLY ALONG THE NORTHERN BOUNDARY OF HUMPHREYS AND HOLMES COUNTIES, MISSISSIPPI, THENCE SOUTHERLY ALONG THE EASTERN AND SOUTHERN BOUNDARIES OF HOLMES, YAZOO, WARREN, CLAIBORNE, JEFFERSON ADAMS AND WILKINSON COUNTIES, MISSISSIPPI; THENCE DUE EAST ALONG LATITUDE 31 00'N FROM THE SOUTHERN MOST INTERSECTION OF WILKINSON AND AMITE COUNTIES, MISSISSIPPI TO THE WEST BANK OF THE PEARL RIVER; THENCE SOUTHERLY ALONG THE WEST BANK OF THE PEARL RIVER TO LONGITUDE 89 31.8'W (AT THE MOUTH OF THE RIVER); THENCE SOUTH ALONG LONGITUDE 89 31.8'W TO LATITUDE 30 10'N; THENCE EAST ALONG LATITUDE 30 10'N TO LONGITUDE 89 10'W; THENCE SOUTHEASTERLY TO LATITUDE 29 00'N, LONGITUDE 88 00'W; THENCE SOUTH ALONG LONGITUDE 88 00'W TO THE OUTERMOST EXTENT OF THE EEZ; THENCE EASTERLY ALONG THE OUTERMOST EXTENT OF THE EEZ TO THE INTERSECTION WITH A LINE BEARING 199 T FROM THE INTERSECTION OF THE FLORIDA COAST AT LONGITUDE 83 50'W; THENCE NORTHEASTERLY ALONG A LINE BEARING 199 T FROM THE FLORIDA COAST AT LONGITUDE 83 50'W TO THE COAST.

Federal On Scene Coordinator (FOSC) responsibilities for Sector Mobile AOR are stated below in a Memorandum of Understanding with the EPA. MOU will be updated to reflect changes in Sector Mobile AOR boundary.

U.S. Coast Guard Captain of the Port (COTP), Mobile, Alabama will be the pre-designated OSC in the following areas within Region 4. When a roadway is used to delineate a boundary, that boundary shall be to, but shall not include, the roadway.

The Coastal Zone boundary begins at the intersection of the southern limit right of the Right-of-Way on US Highway 98 (US-98) with the COTP Mobile-COTP Tampa boundary (083-50 West Longitude). The intersection is twelve (12) miles west of Hampton Springs, FL on US-98. Then, westerly on US-98 to St. Marks, FL, then southwesterly along US-98 to the junction of the John Gorrie Memorial Bridge and the north shore of the Gulf Intracoastal Waterway (GICW) at Apalachicola, FL, including Ochlockonee Bay, East Bay, navigable portions of East and West Bayou, Blounts Bay, Shoal Bayou, and Alligator Bayou.

Then, continuing from the junction of the southern limit of the Right-of-Way at the John Gorrie Memorial Bridge and the north shore of the GICW to its intersection with Alabama State Highway 59 (AL-59). Responsibilities also include: East Bay, St. Andrews Bay, West

Bay, Choctawhatchee Bay, Santa Rosa Sound, East Bay (Blackwater Bay), Escambia Bay, Pensacola Bay, Perdido Bay, and Wolf Bay.

Then, north on AL-59 to its intersection with Interstate 65 (I-65). Then, west and southwesterly along I-65 to its intersection with US Highway 90 (US-90) near Theodore, AL.

Then, westerly along US-90 to 89-10 W longitude (near Long Beach, MS); Thence south to the Mississippi coast, the boundary with COTP New Orleans.

Additionally all discharges or releases originating from waterfront facilities within the city limits of Panama City, Fort Walton Beach, and Pensacola, Florida; Mobile, Alabama; and Pascagoula, Biloxi, and Gulfport, Mississippi are the responsibility of the U.S. Coast Guard COTP Mobile as the pre-designated OSC.

1300 Area Committee

Mission Statement

Our mission is to ensure the highest state of readiness of the spill response community within our area of responsibility. We will strive to accomplish this by developing comprehensive and useful contingency plans, preparing the response community through training and exercises, developing coordination mechanisms to facilitate effective responses, and educating our stakeholders and the public.

Vision Statement

We will function as an efficient organization for ensuring effective response to environmental threats in our Area. Our regulatory members and non-regulatory participants will include all stakeholders representing the federal, state, and local levels and the maritime, natural resource and academic communities.

We will collaborate, sharing information and resources, to produce the best possible plans and creative solutions to problems. We will employ state of the art research and technology in both our problem solving and our decision-making.

We will learn from our responses and activities, improve our processes and develop as individuals and as an organization. We will be proud of our accomplishments and make great contributions toward the environmental protection of the Alabama, Mississippi and Northwest Florida coastal areas.

1310 Purpose

This charter establishes the Alabama, Mississippi, Northwest Florida Committee pursuant to the Oil Pollution Act of 1990 (OPA90) and Alabama, Mississippi and Florida State law. OPA90 established Area Committees to serve as spill preparedness planning bodies responsible for developing strategies for coordinated responses to the discharge, or threat of discharge, of oil or hazardous substances, in pre-designated Inland and Coastal zones. This Area Committee was established to cover Alabama, Mississippi, and Northwest Florida coastal waters.

1320 Organization

The Alabama, Mississippi, Northwest Florida Area Committee is comprised of representatives from federal, state, and local governments as members and representatives from the marine industry as advisors.

Executive Steering Group (ESG) and Chairmanship: The ESG is the ultimate decision making body of the Area Committee and provides direction as appropriate. The ESG consists of the Federal On Scene Coordinator (FOSC) and the three State On Scene Coordinators/Incident Commanders. The Sector Commander of Sector Mobile, as pre-designated FOSC, shall be the Chairman of the ESG and Area Committee. The Deputy Commander of Sector Mobile shall each serve as Alternate Chairman. The appropriate State On-Scene Coordinators (SOSC) shall each serve as Vice Chairmen concerning their appropriate state. The Chairman shall conduct each meeting of the Area Committee and provide an opportunity for participation by each regulatory member, each non-regulatory participant, and any public attendees; ensure adherence to the agenda; maintain order; and review recommendations submitted to the ESG and Area Committee. In the absence of the Chairman, the Vice-Chairmen shall perform these duties.

Area Committee Members: The duties and responsibilities of the members of the Area Committee are to set goals, assign and monitor projects assigned to subcommittees and working groups, vote on issues, and represent all local, state, and federal government entities that participate in the Area Committee.

Area Committee Advisors: Advisors have been selected to allow non-regulatory participants in the Committee an opportunity to actively voice their concerns and comments. They provide comments to the Area Committee and Executive Steering Group. Each non-regulatory participant in the Committee is aligned in one of the Advisory Groups: Industry, OSRO, Natural Resources, Media, Volunteer, and Academia. The interest of the Advisors are conveyed to Area Committee and discussed at the meetings.

Area Coordinator Duties: Facilitate Area Committee meetings, record meeting minutes, draft meeting minutes for review by the Area Committee Chairman and distribution by the Coast Guard, prepare meeting agenda notices for distribution to the Area Committee members and advisors, and make notifications of date and time changes to meetings.

Subcommittees and Working Groups: These have been established to work on functional items pertaining to the Area Committee. They are specifically tasked to complete assigned projects, tasks, and goals that are developed by the ESG and Area Committee. The number of working groups can change as needed for the work projects established by the ESG and Area Committee.

Area Committee Members and Advisors selection: The ESG will select personnel to fill the Area Committee vacancies. In addition, the ESG will select Area Committee Members to fill the Chairmen positions of the Subcommittees. The Subcommittee Chairmen will select members or advisors to serve as Co-Directors of the Subcommittee's Work Groups.

Area Committee Meeting Frequency and Location: The Area Committee meets bi-annually, although special meetings may be called when needed. There will be a combination of open meetings, open to all members of the Area Committee and the general public and closed meetings, which only the Area Committee members and advisors will attend. Meeting locations will be alternated around the COTP Mobile area in order to balance interests.

1330 Charter Members

Area Committee

- Executive Steering Group (FOSC & SOSCs)
- Members (Voting & Decision Making Body)
- Advisors (Advise Members on Issues)
- Subcommittees & Work Groups

Executive Steering Group

Chairman: Sector Commander, Sector Mobile

Alternate: Deputy Sector Commander, Sector Mobile

Vice Chairman: Alabama State On Scene Coordinator

Vice Chairman: Mississippi State On Scene Coordinator

Vice Chairman: Northwest Florida State On Scene Coordinator

- Jefferson County EMA

- Taylor County EMA

- Harrison County EMA

- Jackson County EMA

- Hancock County EMA

- Area Coordinator [Non-voting member]

USCG Eighth District Response Advisory Team (DRAT)

2000 COMMAND

2320 Joint Information Center (JIC)

An initial site for the JIC should be quickly designated to expedite the set-up and the rapid dissemination of initial incident information.

The location of an oil spill or hazardous substance release cannot be pre-determined because the Area Contingency Plan encompasses a vast area of potential locations. The initial site of the JIC for any oil or hazardous materials spill may be located at the offices of the Federal On-Scene Coordinator (FOSC).

For incidents occurring in waters of Mississippi and Alabama under the jurisdiction of Sector Mobile, the initial JIC can be established at:

USCG Sector Mobile
Brookley Complex
South Broad Street
Mobile, AL. 36615-1390
Phone: (251) 441-5196
Fax: (251) 441-6169

For incidents occurring in waters of Northwest Florida under the jurisdiction of Marine Safety Office Mobile, the initial JIC can be established at:

USCG Detached Duty Office Panama City
Panama City, 1700
Panama City, FL. 32407
Phone: (850) 234-1957
Fax: (850) 230-1937

The Sector or DDO's Media Relations Officer or Public Affairs Officer should invite public affairs representatives of each Command organization (Federal, State and RP) to respond at the initial JIC location and/or remain in frequent telephone and fax communication to coordinate information activities.

2320.1 Family Relations

Any incident may raise concerns among family members about the safety of employees, contractors, vessel crew or passengers, affected community residents, and even responders to the incident.

In general, such inquiries should be directed to the public affairs representative of the organization where the family member is employed. Inquiries about a facility or vessel crewmember should be directed to the Responsible Party, while inquiries about a Coast Guard responder should be directed to the Coast Guard.

Media or family inquiries concerning the identification of any fatality should be referred to the Medical Examiner or Justice of the Peace of the county where the death occurred.

Family inquiries concerning the identification or condition of any injuries should be referred to the Patient Care Coordinator or Nursing Supervisor of the hospital where the injured is being treated.

In the case of multiple fatalities, the Medical Examiner or Justice of the Peace should be invited to provide an agency representative to coordinate response activities with the Liaison Officer and/or a public affairs representative to coordinate information activities with the Investigations Officer (IO).

In the case of multiple injuries treated at multiple hospitals, each hospital should be invited to provide an agency representative to coordinate response activities with the Liaison Officer and/or a public affairs representative to coordinate information activities with the IO. The IO may assign an Assistant Information Officer and/or other JIC staff member(s) to coordinate family relations activities with the Responsible Party and appropriate agency representatives.

The American Red Cross can coordinate and manage family support services such as crisis and grief counseling, transportation, housing, meals, child care services for families that bring young children, and cost accounting to provide such family support services. The point of contact for Alabama is (251) 436-7910, Mississippi (228) 896-4511, Northwest Florida (850) 438-9971.

In the case of an airline, marine vessel, railroad or other transportation incident involving a "significant" number of fatalities or injuries, other directives should be referenced. Presidential Executive Memorandum on "Assistance to Families Affected by Aviation and Other Transportation Disasters" (September 9, 1996) as well as Public Law 104-264 "Family Assistance Act of 1996" may apply.

This law and presidential directive has assigned the Director, Family Support Services, of the National Transportation Safety Board (NTSB) to coordinate the integration of local, state, federal, responsible party, and other organization's resources to provide family support services. Such services may include family transportation and logistical support, psychological counseling, victim identification and forensic services, daily briefings to families on the progress of recovery and identification, communicating with foreign governments, and providing translation services as may be required. The point of contact is the Director, Family Support Services, NTSB at (202) 314-6185 or the NTSB Communications Center at (202) 314-6290.

Upon activation of this Federal Response Plan for a major transportation disaster, the Federal Emergency Management Agency (FEMA) has been tasked to provide FEMA personnel to assist in public information dissemination. This assistance includes establishing and staffing external media support centers such as the incident site, family support operations center, and other areas that may attract media interest. The regional point of contact is the FEMA Region IV at (770) 220-5200.

2320.2 News Release

As soon as possible, the IO should prepare a News Advisory identifying the IO (or JIC, if established) as the official source of information about the incident. By definition, "news advisory" contains information solely for the news media to plan their story coverage. A news advisory is not for broadcast, publication, or release to the public.

If initial incident information is readily available, the News Advisory should be accompanied by a News Release written in "bullet point" or Fact Sheet format summarizing the key facts about the incident. The time required to compile, write, and obtain Command approval of such a Fact Sheet will be substantially faster than needed to produce a narrative News Release.

As time permits, a more detailed news release should be prepared describing the incident, identifying the Responsible Party and response agencies, containment and cleanup efforts, future plans and other details as necessary. An updated news release or fact sheet should be prepared for distribution at each news conference or media briefing. By definition, a "news release" is information for broadcast, publication, and release to the public at the time identified on the news release.

Each media advisory, fact sheet, and news release should be approved by the organization's Incident Commander or On Scene Coordinator (if speaking only for that organization) or by Unified Command (if issued as a joint news release.) Pre-approval is also required for posting any information on a website. Approval authority may be delegated by Command to the IO.

These written products should be faxed to the major media outlets, government agencies, and external organizations listed in Section 9900 and other media outlets that have inquired about the incident. Sector Mobile, DDO Panama City, and USCG District 8 Public Affairs have these lists pre-programmed into their broadcast fax systems. Coordination will be required among federal, state and RP information specialists to minimize duplicative faxes that can create transmission bottlenecks and indirectly weaken the joint information message. Photocopies should be provided to all Command Staff and Section Chiefs and any other key players who may end up speaking with the media such as the Coast Guard Sector Duty Officer.

Updated fact sheets or news release should be prepared at regular intervals until the incident has been concluded or there is no more media interest. Distributing such updates by 0500, 1000, 1500, and 2000 hours will place timely information in the hands of the media to meet radio, television, and newspaper deadlines. For a small incident, once-a-day updates by 1500 hours or twice-a-day updates by 0500 and 1500 hours may be sufficient. (*See following pages for sample news release, fact sheet and advisory.*)

2320.3 News Advisory Example

NEWS ADVISORY #1 (Name of Incident)

Issued December 11, 1999 at 10 a.m.

For more information, contact:

(Information Officer)

Joint Information Center

(xxx) xxx-xxxx

JOINT INFORMATION CENTER NOW OPEN

The U.S. Coast Guard in cooperation with the list agencies opened a Joint Information Center (JIC) to communicate information about the (name of incident).

The JIC was established at U.S. Coast Guard Sector Mobile located at Brookely Complex, South Broad Street, Mobile, Alabama.

The purposes of the JIC are:

1. Compile the latest, most accurate incident information,
2. Answer questions from the media and the public,
3. Verify and correct any rumors about the incident,
4. Schedule media tours, interviews, & joint news conferences.

A news conference has been scheduled for _____ at the _____.

Parking for media vehicles is available at the facility in the parking lot north of the main building.

News media representatives should bring proper media credentials issued by local or state law enforcement agencies for access to media areas of the JIC.

All media and public inquiries about the incident should be directed to the JIC. The JIC will be staffed 24 hours.

UNIFIED COMMAND LAUNCHES SPILL RESPONSE

MOBILE--The U.S. Coast Guard, Alabama Department of Environmental Management (ADEM), and (RP), established a Unified Command Post in response to a 42,000-gallon oil spill into Mobile Bay Ship Channel from a damaged barge.

At approximately 8:45 this morning, the tugboat Lucky Lady, pushing 6 barges outbound on the Mobile Bay Ship Channel, ran aground near the entrance to the Theodore ship channel. The tugboat and barges, owned by (RP), were transporting crude oil when one of the barges, barge AT-411, suffered a rupture in the #3 port cargo tank. No injuries have been reported.

The Coast Guard has restricted vessel traffic on the Mobile Bay Ship Channel below the Theodore Ship Channel until further notice.

The Coast Guard Federal On-Scene Coordinator (FOSC) and the State on-Scene Coordinator (SOSC) are working with (RP) ensuring cleanup efforts are underway. (RP) activated its Spill Management Team and mobilized cleanup personnel and equipment from ABC Responders and XYZ Incorporated.

Two oiled egrets were sighted near Galliard Island. The U.S. Fish and Wildlife service and Alabama Department of Environmental Management will set up a wildlife rehabilitation trailer on Deer River Point. The oiled bird wildlife number is (251) xxx-xxxx.

The cause of the incident is under investigation.

-end-

Mr. John Doe, RP (xxx) xxx-xxxx

Ms. Anne Wilson, ADEM (xxx) xxx-xxxx

2330 Media Contacts

2330.1 City Government Offices

During an incident, determine the county(s) that could be impacted by the spill. Contact that county's Emergency Management Coordinator to determine if the spill could impact unincorporated areas under the county's jurisdiction, or if the spill could impact areas under the jurisdiction of one or more incorporated cities.

If one or more cities might be impacted, ask the county Emergency Management Coordinator for the name, title, phone, and fax number of each impacted city's Emergency Management Coordinator, Environmental Health Supervisor, or other appropriate municipal contact person.

The appropriate city and county officials should be added to the fax distribution of all news releases about the spill, and should be invited to send a city or county public affairs official to the Joint Information Center to serve as a local Information Officer.

2330.2 External Organizations

These organizations are non-governmental agencies such as non-profit response agencies, industry associations, environmental organizations, and academic institutions that the media and public may contact for validation or additional information during a spill.

Copies of the latest news releases should be faxed to these external organizations so they can respond to questions from the media and public and so they can re-fax the same information to their members, resource personnel, or additional contacts.

Refer to section 9200 for contact information for the following agencies:

- A. AMERICAN RED CROSS
- B. ALABAMA DEPT. OF ECONOMIC AND COMMUNITY AFFAIRS

- G. WEEKS BAY, NATIONAL ESTUARINE RESEARCH RESERVE
- H. MOBILE BAY NATIONAL ESTUARY PROGRAM

2330.3 News Media Outlets

SELECTION CRITERIA

During an oil spill or hazardous materials release, it would be a very time-consuming and staff-intensive task to individually notify and regularly update all media outlets by telephone or fax, so the following media list has been prioritized to identify:

1. Primary broadcast stations authorized by the Federal Communications Commission to activate the Emergency Alert System (EAS) in case of a life-threatening emergency such as toxic fume release or explosion danger from an oil or chemical spill.
2. Radio, TV, and daily newspapers which both have a full-time news staff with on-scene news capability and reach large general population audiences in the Alabama, Mississippi or Northwest Florida area. Network affiliations are included, so radio and TV affiliates can contact their own networks if the spill is of national media interest.
3. News services which serve as multiple distribution points to other news media outlets which don't meet the #2 criteria above.

Other media outlets, cable TV systems, and business and oil/petrochemical trade publications NOT included in this Contact List may contact the Joint Information Center to request that they be added to the broadcast fax distribution list for news releases about a specific incident.

News releases can be posted on the Internet by 8th District Public Affairs for media and public to access. The 8th District's home page is <http://www.uscg.mil/d8/uscgd8/htm>.

NEWS MEDIA CONTACT LIST - Refer to Section 9200

3000 OPERATIONS

3200 Recovery and Protection

3210 Protection

3210.1 Strategy Checklist

1. Evaluate level of response needed for incident (ref RP's VRP or FRP)

- a. Most probable discharge
- b. Maximum most probable discharge
- c. Worst case discharge

2. Evaluate if special circumstances exist requiring special action.

- a. Fire/explosion
- b. Vessel grounding
- c. Lightering operations
- d. Salvage operations

3. Implement support infrastructure.

Determine response structure that will be used, and from there determine level of support needed to fill positions in the structure. Forward needs to Resource Unit Leader.

4. Mobilization of personnel

Determine personnel needed for response, and identify source of personnel. Ensure personnel are properly trained, and health and safety issues are addressed.

- a. Special Teams

- b. Reserve augmentation
- c. District Response Group (DRG) support
- d. Spills of National Significance (SONS) augmentation
- 5. Mobilization of equipment
- a. Type of equipment needed
- b. Quantity
- c. Location - staging area
- d. Support needed
 - (1) Boats for hauling and positioning boom
 - (2) Aircraft support for transporting equipment
- e. Additional requirements
- f. Contact list
- g. Forward equipment needs to Resource Unit Leader
- 6. Logistics
- a. Logistics needed to support personnel
 - (1) Food
 - (2) Lodging
 - (3) Additional clothing
 - (4) Transportation
- b. Logistics needed to support response
 - (1) Adequate communications
 - (2) Command post - Establish command post in location to support response. Command post must be adequate in size to support the anticipated number of personnel.

- (3) Air support (overflights)
 - (a) Coast Guard and Auxiliary
 - (b) Other agencies
 - (c) Private sources

7. Local impacts

- a. Impact on water intakes
 - (1) Drinking water
 - (2) Industrial
- b. Transportation of fresh water supply

8. Funding issues

- a. On Scene Coordinator (OSC) access to the fund
- b. State access to the fund
- c. Vendors - Basic Ordering Agreement (BOA) policy

9. Volunteers

10. Fish, wildlife and habitat protection and mitigation of damage

11. Ensure coordination with natural resource damage assessment personnel

3320 Salvage/Source Control

3320.1 Salvage Survey

Vessels Name: _____ Official Number: _____

Vessel Type: _____ Flag: _____

Owner/Operator: _____ Ph. _____ Builder: _____

Class Society: _____ Year: _____

L _____ B _____ D _____

Brief description of casualty:

a. Date/Time of casualty: _____

b. Extent of damage: _____

c. Hazardous Cargo Spill? _____

d. Structural details (double bottom): _____

e. Number of Tanks/Holds (tank soundings): _____

f. Drafts (strandings) before Fwd: ____ Aft: ____

g. Drafts (strandings) after Fwd: ____ Aft: ____

h. Tides at time of casualty: _____

i. Type of bottom (mud, sand): _____

j. Condition of vessel's propulsion: _____

Aim/Intent of salvage operation: _____

- If vessel is foreign flag, then USCG will need plans such as Lines Plan, General Arrangement, Tank Tables, T&S Booklet, etc... for detailed calculations.

3500 Staging Areas

REFER TO THE MS, AL, & FL Panhandle Digital Area Contingency Plan, located at the following website:

This application is also available on DVD, and master documents and data are maintained by USCG Sector Mobile.

4000 PLANNING

4610 **Natural/Physical Protection Environmental Sensitivity Maps**

The Area Committee has developed a comprehensive GIS-based digital response resource called the Digital Area Contingency Plan. The Geographic Specific Tactical Response Plan is designed to provide an effective environmental response based on specific area biological, ecological, physical, chemical, archaeo-cultural and socioeconomic concerns. The end user can query the document for specific geographic divisions of an area as to its descriptive (biological, ecological, physical, chemical, archaeo-cultural and socioeconomic) and clean up (driving directions, staging areas, access points, collection points, and response resources) information. You can access Sector Mobile's Geographic Specific Tactical Response Plan for Alabama, Mississippi or Florida online at:

The link to the Digital ACP will be posted on CG Homeport and is also available on DVD.

4620 **Natural Collection Areas and Boom Sites**

REFER TO THE MS, AL, & FL Panhandle Digital Area Contingency Plan.

ONLINE:

The link to the Digital ACP will be posted on Sector Mobile's Homeport website, and the entire application is available on DVD.

4870 **Disposal**

4870.1 **Removal and Waste Disposal Checklist**

A. WASTE DETERMINATION

(Circle One)

Y N Has the RP determined if the material being recovered is a waste or a reusable product? (40 CFR 262.11)

Y N Has all recovered waste been containerized and secured such that there is no potential for further leakage while the material is being stored? (40 CFR 262.34)

B. WASTE CHARACTERIZATION

Y N Has the RP identified each of the discrete waste streams? (40 CFR 262.11
**** (Attach a list of the waste streams)**

Y N Has a representative sample of each waste stream been collected? 40 CFR 262.11(A)(c)(1)

Y N Has the sample been sent to an approved laboratory for the appropriate analysis, i.e., hazardous waste determination?

C. WASTE CLASSIFICATION

Y N Has the RP received a temporary EPA identification number if they are not already registered with the EPA? 40 CFR 262.12(a)

Y N Has the RP received an appropriate waste classification and waste code number for the individual waste streams? 40 CFR 262.12(a)

D. STORAGE

Y N Has the RP obtained preapproval for the temporary storage locations? 40 CFR 262.10 (b)/ 262.34

E. TRANSPORTATION

Y N Has the RP retained the services of a registered hazardous waste transporter, if the waste is hazardous? 40 CFR 262.12(c)

Y N If the waste is nonhazardous, is the transporter registered?

F. DISPOSAL

Y N Is the waste being taken to an approved waste disposal site? 40 CFR 262.12(c)

Y N Has the RP maintained documentation that the waste/product arrived at the designated facility, i.e., manifest or bill of lading.

G. MANIFEST

Y N Is the waste hazardous or Class I nonhazardous?

Y N If the waste is hazardous or Class I nonhazardous is a manifest being used? 40 CFR 262.20

Y N If the waste is a Class I nonhazardous is a manifest being used? 40 CFR 262.20 *

Y N Is the manifest properly completed? 40 CFR 262.23

*** No responses require further explanation and investigation.**

5000 LOGISTICS

5200 Support

5220 Facilities

5220.1 Command Post

An incident command post will initially be established at either Sector Mobile or DDO Panama City. The responsible party is invited to combine his command post at these locations to institute a unified command at the earliest opportunity. This will allow the responsible party time to locate and organize an incident command post. The actual location of the spill may determine whether the Sector or the DDO will take the lead in formulating a response to a spill and where the command post will be located. In addition to an incident command post, field command posts can be established to supervise response efforts. Field command posts should be close to the spill site or work area to monitor and supervise the cleanup.

5220.2 Command Post Establishment Procedures

General - Several basic features must be considered when selecting potential incident command post sites. These considerations include:

Location - The incident command post should be in the general area of the incident. It does not need to be at the incident site and for many reasons should be located away from the incident, including preventing the administrative activities surrounding a spill from interfering with operations. Above ground facilities may enhance radio communications and antenna placement.

Size - The command post must be capable of accommodating the number of people anticipated. For major incidents the number of people can easily reach 200. An estimated need of 50-sq. ft./person results in a requirement for about 10,000 sq. ft. Additional support area for food service, etc. should be considered.

Layout - The command post should be compatible with the NIIMS organization. Individual spaces for the following are desirable:

- Unified Commander Private Rooms
- Unified Command Center
- Planning Section
- Logistics Section
- Operations Section
- Finance Section

Public Affairs (should be separated from the above)

Meeting Room (should be separated from the above)

Parking - Parking for the above 200 personnel plus visitors and command vehicles should be present. For planning purposes a minimum of 300 parking spaces should be available.

Electricity - Power demands at command posts are heavy. Computers, cell phones, and radios are becoming standard equipment for responders. Each person in the command post will likely have need for at least one outlet, or a total of 200 outlets. Power strips can decrease the number of building outlets provided the electrical supply is adequate for the load. Estimated power load may exceed 400 amps.

Telephones - Telephones are critical. For planning purposes one phone line for every two people in the command post is used, or 100 lines. Some of these phones should be designated "incoming only".

Air Operations - Air overflights will be a normal part of the incident response daily routine. Helicopter landing areas should be in close proximity to the command post. This will reduce staff and unified commanders' travel time to and from overflights.

Security - A security control station will be needed, along with sufficient security personnel to control access to the command center and associated peripheral equipment/facilities.

Sanitary Facilities - Provisions should be made to accommodate large numbers of people on site around the clock.

5220.3 Field Command Post Establishing and Potential Sites

Refer to the **Geographic Specific Tactical Response Plan** online at:

<http://www.uscg.mil/d8/mso/mobile/Gstrp/mainGSTRP.htm>

Sector Mobile Digital Area Contingency Plan

Establishing:

1. Contact owner of property.
2. Arrange for utility activation:
 - a. Electric
 - b. Telephone
3. Anticipate period before utility activation with portable generators, cellular telephones, and VHF radios.
4. Have command post delivered.
5. Items that should be considered when choosing a field command post site:
 - a. Hard surface road with adequate parking
 - b. Helicopter landing area
 - c. Accessibility to the waterway
 - d. Proximity to the actual incident

For field command posts, either modular buildings (portable) or motor homes (RV) can be used. Many of the cleanup contractors, major oil companies, and response agencies have ready response mobile command posts available. One advantage of motor homes is they allow the command post to be easily moved as the oil spill response changes.

5400 Communications

5410 Coast Guard Communications Capabilities

Sector Mobile Command Center maintains VHF Radios that can be activated for an incident. Sector Mobile is also equipped with Satellite phones that can also be activated if needed. Contact Sector Planning Department.

5410.1 Gulf Strike Team Command Trailer

The Gulf Strike Team has a Communication/Mobile Command Post trailer with various VHF and UHF radio and multiple telephone lines. This resource may be requested by contacting (251) 441-6601.

5410.2 Communication Frequencies

<u>Channel</u>	<u>Frequency</u>	<u>Use</u>	<u>Remarks</u>
6	156.3	Ship-to-Ship Safety	Use for Ship-to-Ship safety and Search and Rescue
12	156.6	Vessel Traffic Service (VTS)	Not currently in use.
13	156.65	Bridge to Bridge	Message must be about ship navigation
16	156.8	International Distress, Safety, and Calling	Only for hailing, distress, and Search and Rescue
21A	157.5	U. S. Coast Guard Only	
22A	157.1	USCG Liaison & Maritime	Use this Channel to talk to Coast Guard and public
23A	157.05	U. S. Coast Guard Only	Working Frequency

6000 FINANCE

6200 Finance and Resource Management Field Guide

Refer to the “U. S. Coast Guard Federal On Scene Coordinator’s (FOSC) Finance and Resource Management Field Guide” for requirements and policies concerning contracting and financial management of oil and hazardous substance response activities.

<http://www.uscg.mil/hq/npfc/npfc.htm>

7000 HAZARDOUS MATERIALS

7100 Introduction

The spill, release or discharge of hazardous substances is unique compared to an oil spill that hazardous substances have a greater potential to impact human health. In general, oil spills are of great concern due to their potential to cause long-term damage to the environment. Oil spills do not routinely pose an immediate threat to human life. On the contrary, hazardous substance spills can pose an immediate danger to humans when discharged in even the smallest quantities. This chapter of the ACP provides general guidelines for initial response actions necessary to abate, contain, control, and remove the spilled material and describes some of the unique issues associated with a hazardous material spill..

The definition of hazardous substances is: any substance designated as such by the administrator of the EPA pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S. C. Sec 9601 et seq), regulated pursuant to Section 311 of the federal Clean Water Act (33 U. S. C. Sec. 1321 et seq), or designated by the appropriate state authority.

The definition of harmful quantity is: a quantity of a hazardous substance the discharge or spill of which is determined to be harmful to the environment or public health or welfare or may reasonably be anticipated to pursuant an imminent and substantial danger to the public health or welfare by the administrator of the EPA pursuant to federal law, or by the appropriate state authority.

The following assumptions are made regarding HAZMAT responses:

1. A unified command structure will be established as soon as possible.
2. Responders will be adequately trained in hazardous substance response and will operate within the level of their training, expertise, and capabilities as described in 29 Code of Federal Regulations, Part 1910.120.
3. There will be sufficient resources locally available to adequately respond to hazardous substance incidents.

In addition to the Coast Guard and the Environmental Protection Agency in their Federal On-Scene Coordinator roles, many federal, state, and local agencies and other organizations will be providing assistance with hazardous substance response operations. These organizations may include:

1. Vessel and/or waterfront facility owners and operators*
2. Fire and Police Departments
3. Port Authorities
4. Mutual aid organizations
5. Product experts
6. Cleanup contractors

* Vessel Response Plans (VRP) and Facility Response Plans (FRP) provide supplemental chemical response guidance to the ACP.

7400 Incident Command

In executing this portion of the Area Contingency Plan (ACP), the senior emergency responder is designated the Incident Commander until relieved by a more senior responder, or until such time as a unified command structure is established. At a minimum, the unified command structure will consist of the Federal On-Scene Coordinator (FOSC), State On-Scene Coordinator (SOSC), and the Responsible Party On-Scene Coordinator (RP-OSC). See Section 2200 for details describing unified command responsibilities.

The Responsible Party for a chemical release impacting waterways within the coastal zone described in Section 1400 will be notified by the Federal On Scene Coordinator (FOSC) by Notice of Federal Interest issued in accordance with 40 Code of Federal Regulations, Part 300. (See Section 3400) The Responsible Party is expected to provide timely and accurate notification, and cooperate with the FOSC's response effort.

Other agencies, organizations, or parties with interest in the response but not designated to serve in the unified command will be engaged by way of the command staff Liaison Officer (see Section 2200).

As soon as practicable, the Incident Commander will establish a command post. (See Section 5400 for predesignated response command post resources and locations)

The primary initial means of communication will be determined by the principal response organization that has jurisdiction to respond to the hazardous substance event. Refer to Sections 2000 and 5300 of this plan for general command, control, and communications procedures common to any sustained response within the Mobile COTP zone.

The Mobile Captain of the Port, in the role of FOSC, will:

1. Be prepared to assume the role of Incident Commander if the response is inadequate or nonexistent.
2. Be prepared to assume the role of Incident Commander following conclusion of firefighting response operations if the incident involves pollution or is classified as a marine disaster.
3. Work in cooperation with the State On-Scene Coordinator to direct the employment of resources in conjunction with an Incident Action Plan.

Resources

Refer to Section 9200 for a list of Hazardous Material resources.

8000 MARINE FIRE FIGHTING

Introduction

9100 Emergency Notification

A substantial spill of oil usually has a responsible party (RP) who is aware the discharge has occurred; i.e., a vessel grounding or collision, or a tank or pipeline rupture at a facility. The party responsible for a discharge of oil into the navigable waters of the United States is required by federal law to immediately report the discharge to the National Response Center. Time permitting, the parties are recommended to contact the local Coast Guard Marine Safety Office or Sector. If the discharge occurs within the jurisdiction of a state, then the RP is required to report it to the appropriate state. The number below is provided to help facilitate this process.

NRC USCG**800-424-8802**

9400 Area Planning Documentation

9410 Discharge and Release History

9420 Risk Assessment

The Sector Mobile AOR contains 5 deepwater ports (Gulfport, Pascagoula, Mobile, Pensacola, and Panama City). Primary transportation routes and the navigational risks associated with each can be found in the NOAA Coast Pilot 5, Chapter 5. In addition to deep draft vessel traffic transiting the ports, there is a high volume of tugboat and barge traffic transiting the Gulf Intracoastal Waterway and the inland rivers of the Mobile COTP zone.

Of the five deepwater ports, the greatest risk for a major spill is in the Pascagoula area. The Port of Pascagoula has the highest volume of tank vessel traffic in the Mobile COTP zone, and has several large refineries and chemical plants.

There are numerous fixed platforms in the Mobile COTP zone, all of which are located in the western portion of the AOR. These platforms transfer petroleum products to shore via thousands of miles of pipelines.

Vulnerability Analysis

The entire coastline of Mississippi, Alabama and Northwest Florida can be considered environmentally sensitive due to salt and freshwater marsh areas that make up the coastal wetlands.

A large part of the Mobile Coastline consists of the Gulf Islands National Seashore, which stretches 160 miles from Cat Island in Mississippi to the eastern tip of Santa Rosa Island in Florida. Horn and Petit Bois Islands located in Mississippi are federally designated wilderness areas. The deepwater entrance to Pascagoula harbor is the Horn Island Pass.

For more information on environmentally sensitive areas, reference the Sector Mobile Geographic Specific Tactical Response Plan.

Seasonal/ Weather Considerations

While navigating the Gulf of Mexico presents few weather hazards, the ones that occur can be treacherous. Winter storms and cold fronts can generate gales and rough seas. Sea fog, frequent from December through April, can plague the mariner in open and coastal waters. During summer and fall, there is the threat from hurricanes.

9430 Planning Assumptions – Background Information

Subcommittees review applicable sections & are evaluated by Chairman and Steering Committee for final approval. Area Contingency Plans shall be reviewed and updated annually by the Area Committee. Plans shall be reviewed to ensure all information is current, and in particular, the following areas shall be looked at: emergency notification list, response equipment information (type and amount of equipment available), sensitive areas, hazard/risk assessment of the area, response strategies (changes based on new technology, new equipment, etc.), dispersant approval. Any changes to the plan must be noted on the record of changes page.

The FOSC shall periodically conduct drills of removal capability, without prior notice, in areas for which Area Contingency Plans are required, to assess the effectiveness of such plans and relevant tank vessel and facility response plans. These drills may include participation by Federal, State, local agencies, owners and operators of vessels and facilities in the area, and private industry. The NSFCC will act as a clearinghouse for these exercises, participating in the development, execution, and evaluation to the fullest extent practicable, with the cognizant program managers of the USCG and

EPA. The NSFCC may, in conjunction with the cognizant program managers of the USCG and EPA, impose unannounced area or multi-area exercises.

[NOTE: The NSFCC is responsible for executing the National Response System Pollution Exercise Program (NRSPEP). All Coast Guard participation in exercises will be coordinated with and/or through the NSFCC.]

All responses will be in the Sector Mobile COTP AOR unless conducted jointly with other AOR's (as in SON's exercises). All other assumptions will be as decided by the drill committee.

9440 Planning Scenarios
