# NATO and the European Union

## Summary

Since the end of the Cold War, both NATO and the European Union (EU) have evolved along with Europe's changed strategic landscape. While NATO's collective defense guarantee remains at the core of the alliance, members have also sought to redefine its mission as new security challenges have emerged on Europe's periphery and beyond. At the same time, EU members have taken steps toward political integration with decisions to develop a common foreign policy and a defense arm to improve EU member states' abilities to manage security crises, such as those that engulfed the Balkans in the 1990s.

The evolution of NATO and the EU, however, has generated some friction between the United States and several of its allies over the security responsibilities of the two organizations. U.S.-European differences center around threat assessment, defense institutions, and military capabilities. Successive U.S. administrations and the U.S. Congress have called for enhanced European defense capabilities to enable the allies to better share the security burden, and to ensure that NATO's post-Cold War mission embraces combating terrorism and countering the proliferation of weapons of mass destruction. U.S. policymakers, backed by Congress, support EU efforts to develop a European Security and Defense Policy (ESDP) provided that it remains tied to NATO and does not threaten the transatlantic relationship.

Most EU member states support close NATO-EU links, but also view ESDP as a means to give themselves more options for dealing with future crises, especially in cases in which the United States may be reluctant to become involved. A minority of EU countries, spearheaded by France, continue to favor a more autonomous EU defense identity. This desire has been fueled further recently by disputes with the United States over how or whether to engage international institutions, such as the United Nations, on security matters and over the weight given to political versus military instruments in resolving international crises.

This report addresses several questions central to the debate over European security and the future of the broader transatlantic relationship. These include What are the specific security missions of NATO and the European Union, and what is the appropriate relationship between the two organizations? What types of military forces are necessary for NATO's role in collective defense, and for the EU's role in crisis management? Are NATO and EU decision-making structures and procedures appropriate and compatible to ensure that there is an adequate and timely response to emerging threats? What is the proper balance between political and military tools for defending Europe and the United States from terrorism and weapons proliferation?

This report will be updated as events warrant. For more information, see CRS Report RS21864, *The NATO Summit at Istanbul, 2004*, by Paul Gallis, and CRS Report RS21372, *The European Union: Questions and Answers*, by Kristin Archick.

# NATO and the European Union

## Background

Both NATO and the European Community (EC), now the European Union (EU), had their origins in post-World War II efforts to bring stability to Europe. NATO's original purpose was to provide collective defense through a mutual security guarantee for the United States and its European allies to counterbalance potential threats from the Soviet Union. The European Community's purpose was to provide political stability to its members through securing democracy and free markets. Congress and successive Administrations have strongly supported both NATO and the EC/EU, based on the belief that stability in Europe has engendered the growth of democracy, reliable military allies, and strong trading partners.

Evolution of NATO and the EC/EU after the collapse of the Soviet Union in 1991 has brought with it some friction between the United States and several of its allies over the security responsibilities of the two organizations. These differences center around threat assessment, defense institutions, and military capabilities.

European NATO allies that were also members of the EC/EU have sought from 1990 to build a security apparatus able to respond to developments believed to threaten specifically the interests of Europe. In 1990, after Iraq's invasion of Kuwait, some European governments — led by France — concluded that they lacked the military capabilities to respond beyond the North Atlantic Treaty area to distant threats. In consultation with the United States, they sought to establish the European Security and Defense Identity (ESDI) within NATO, in which they would consult among themselves and with NATO over response to a threat. Both the first Bush Administration and the Clinton Administration asked that ESDI not duplicate NATO structures, such as headquarters and a planning staff, but rather “borrow” NATO structures for planning and carrying out operations. Initial reluctance of the Clinton Administration to involve the United States in the emerging conflicts accompanying the break up of Yugoslavia led some allies to redouble their efforts to enhance their political consultation, unity, and military capabilities. They saw a threat in the form of large refugee flows, autocratic regimes, and the spread of nationalist ideas emanating from the conflict-ridden Balkans.

In 1994-1996, NATO endorsed steps to build an ESDI that was “separable but not separate” from NATO to give the European allies the ability to act in crises where NATO as a whole was not engaged.

In 1998-1999, the EU largely adopted ESDI as its own and began to transform it into a European Security and Defense Policy (ESDP), given greater definition by more detailed arrangements for the Europeans to borrow NATO assets for the “Petersberg tasks” (crisis management, peace operations, search and rescue, and

humanitarian assistance). Britain, in a major policy reversal, joined France in moving forward discussions of these new arrangements within the EU. ESDP's principal differences with ESDI were in the effort to secure more independence from NATO tutelage and guidance in the event that the United States expressed reluctance to become involved in a crisis, a renewed discussion of more carefully outlined EU decision-making structures, and consideration of forces appropriate for potential crises. The Kosovo conflict of 1999 further spurred this effort, when most EU members of NATO conceded that they still lacked adequately mobile and sustainable forces for crisis management. All EU members express a wish to see a strong U.S.-led NATO. However, there are disputes with the United States over how or whether to involve international institutions, such as the UN, in international crises. There are also disagreements over the weight given to political versus military instruments in resolving these crises. These disputes have fueled European desires to develop a more independent ESDP.<sup>1</sup> The United States maintains that ESDP must be closely tied to NATO, given the large number of states that belong to both NATO and the EU (see membership chart in Appendix) and limited European defense resources.

Congress is actively engaged in the evolving NATO-EU relationship. While Congress has supported the greater political integration that marked the European Community's evolution into the European Union, many Members have called for improved European military capabilities to share the security burden, and to ensure that NATO's post-Cold War mission embraces combating terrorism and WMD proliferation. In 1998 and again in 2003 the Senate approved the addition of new members to the alliance as a means to build European stability through securing democratic governments and adding states that shared concerns over emerging threats.

During the 1998 NATO enlargement debate, Senator Jon Kyl offered an amendment to the instrument of ratification that described terrorism and the proliferation of weapons of mass destruction (WMD) as new threats that NATO must counter. The Kyl amendment called on the European allies to develop capabilities "to project power... and provide a basis for ad hoc coalitions of willing partners...." Member states should "possess national military capabilities to rapidly deploy forces over long distances, sustain operations for extended periods of time, and operate jointly with the United States in high intensity conflict."<sup>2</sup> The amendment passed by a wide margin. Its essence was apparent in NATO's Strategic Concept, the alliance's strategic guidelines, adopted at the Washington summit in April 1999, and in subsequent NATO agreements to redefine the alliance's mission and to improve capabilities.

The issues raised in the 1990s debate over European security remain the essence of the debate today. What are the missions in security affairs of NATO and the European Union? What is the proper weight to be given to political and military instruments in defending Europe and the United States from terrorism and

---

<sup>1</sup> For a detailed examination of ESDI and ESDP up to 2000, see CRS Report RL30538, *European Security: The Debate in NATO and the European Union*, April 25, 2000, by Karen Donfried and Paul Gallis.

<sup>2</sup> Executive Amendment no. 2310, *Congressional Record*, April 27, 1998, p. S3657.

proliferation? What types of military forces are necessary for NATO's role in collective defense, and for the EU's role in crisis management? Are NATO and EU decision-making structures and procedures appropriate and compatible to ensure that there is an adequate and timely response to emerging threats? What should be the role of other international institutions in responding to these threats? Issues raised by these questions are the subject of this report.

## **NATO's Mission and Response to Threats**

There is a consensus in NATO that terrorism and the proliferation of weapons of mass destruction are the principal threats facing the allies today. NATO's 1999 *Strategic Concept* states that the allied "defense posture must have the capability to address appropriately and effectively the risks" associated with the proliferation of nuclear, biological, and chemical weapons. The document also describes terrorism as a threat, but indicates that political and diplomatic means should be the main instruments against both terrorism and proliferation. The attacks of September 11, 2001, on the United States led to a refinement of the allied posture on these threats.

In a May 2002 communiqué, NATO agreed that the allies must "be able to field forces that can move quickly to wherever they are needed, sustain operations over distance and time, and achieve their objectives." The communiqué marks the moment that NATO decided to assume responsibilities around the globe should an ally be threatened.

In November 2002, at the Prague summit, the allies made a commitment to build the capabilities necessary to go out of area. They agreed to establish a NATO Response Force (NRF) of 20,000 troops for rapid "insertion" into a theater of operations. The NRF consists of highly trained combat units from member states, and could be used to fight terrorism. In addition, the allies agreed to a scaled-down list of new capabilities, called the Prague Capabilities Commitment (PCC), that declining European defense budgets might be able to sustain. Under the PCC, some allies have agreed to develop consortia to fund jointly such systems as strategic airlift and aerial refueling, meant to provide mobility for combat operations distant from Europe, or specialized "niche" capabilities, such as special forces or units to detect chemical or biological agents.<sup>3</sup>

## **U.S.-European Differences over Threat Response**

Despite the transatlantic agreement on the new common threats, the NRF, and the PCC, there are significant differences between the United States and its allies over appropriate responses. Most allied governments contend that the Administration places excessive emphasis on military over political means to counter a threat, and that the allies have other domestic budget priorities (such as pension plans) that compete with allocations for defense.

---

<sup>3</sup> For a detailed analysis of the PCC, see CRS Report RS21659, *NATO's Prague Capabilities Commitment*, by Carl Ek.

The allies' response to the Bush Administration's doctrine of "pre-emptive attack" in the face of an imminent threat captures elements of the transatlantic debate over response to the threat. The Administration's *National Security Strategy* (2002) notes that the United States reserves the right to take military action "to forestall or prevent... hostile acts" by an adversary. While most allies would concede such a right, some view the doctrine as an example of U.S. unilateralism at the moment of U.S. global military pre-eminence. In general, they believe that military action must be undertaken within a multilateral framework.

The allied debate over pre-emptive attack has been affected by the U.S. decision to terminate UN weapons inspections and to go to war against Iraq in March 2003, a conflict Administration officials indicate was undertaken to prevent the Hussein regime from developing and using weapons of mass destruction against the United States and other countries. The initial refusal by France, Germany, and Belgium to approve NATO military assistance to Turkey in February 2003 in anticipation of a possible attack by Iraq sharply divided the alliance. The three allies contended that such assistance would amount to tacit approval of a U.S. belief that war with Iraq was necessary. Most allies said then, and maintain now, that a UN resolution is a requisite step, whenever possible, for NATO military action. The inability of the Bush Administration to locate WMD in Iraq has led to renewed insistence among the European allies that their opposition was correct and that a UN imprimatur should be sought for NATO operations.<sup>4</sup>

Allied insistence on involvement of international institutions in "legitimizing" conflict has its origins in the aftermath of the 20<sup>th</sup> century's two world wars. Europeans remain wary of arguments justifying the crossing of borders and resorting to military action. Establishment of the United Nations in 1946, under U.S. leadership, was one means to ensure that international diplomatic and public opinion could be brought to bear to enhance understanding of an impending danger and how to respond to it. The North Atlantic Treaty's (1949) reliance on the consensus method of decision-making was another.

The allied debate over pre-emptive attack, out-of-area engagement, and "legitimization" of military operations has been brought to a head by the Bush Administration's frustration with cumbersome alliance decision-making procedures. The Administration believes that NATO military actions should mostly be conducted by "coalitions of the willing." In this view, the allies, of which only a small number have deployable forces capable of high-intensity conflict, should use coalitions of member states that agree upon a threat and have the means to counter it. Most European allies believe that "coalitions of the willing" would undermine the solidarity of the alliance and the consensus decision-making principle. Their support for the principle of consensus centers upon a desire to maintain political solidarity for controversial measures. In this view, the consent of 19 sovereign governments,

---

<sup>4</sup> Interviews with officials from allied states, November 2003-December 2004; Jacques Chirac, "Nul ne peut agir seul," *Le Monde* (LM), September 24, 2003 (speech before the U.N. General Assembly); and General Henri Bentegeat, "Le problème des armes de destruction massive peut être résolu par des voies diplomatiques," *LM*, December 21-22, 2003. General Bentegeat is chief of staff of the French armed forces.

each taking an independent decision to work with other governments, is a formidable expression of solidarity and in itself provides a measure of legitimization for an operation. Some allies believe that this view was given weight, for example, in NATO's decision to go to war against Serbia in 1999 when Russian resistance prevented passage of a UN Security Council resolution approving intervention on behalf of Kosovo.<sup>5</sup>

In February 2005, German Chancellor Schroeder proposed a stronger role for the EU in international political affairs. He said that NATO is "no longer the primary venue where trans-Atlantic partners discuss and coordinate strategies." He suggested that such issues as Iran's nuclear program and European weapons sales to China should be discussed with the United States in the European Union. Some European officials add the Arab-Israeli conflict to this list. More quietly, the French government is pursuing the same perspective. Officials from a number of allied governments have said that the United States has been reluctant to discuss major international political issues at NATO that fall outside the security field. U.S. officials counter that they are now willing to talk about some political issues, such as Pakistan's and India's futures, in NATO's North Atlantic Council (NAC).<sup>6</sup>

## Capabilities and "Usability"

Most allies lack mobile forces that can be sustained distant from the European theater.<sup>7</sup> In October 2003, former NATO Secretary General George Robertson said that "out of the 1.4 million soldiers under arms, the 18 non-U.S. allies have 55,000 deployed on multinational operations..., yet they feel overstretched. If operations such as the International Security Assistance Force in Afghanistan are to succeed, we must generate more usable soldiers and have the political will to deploy more of them in multinational operations." NATO Supreme Allied Commander (SACEUR) General James Jones told Congress in March 2004 that only 3%-4% of European forces are "expeditionarily deployable."<sup>8</sup> The Bush Administration proposed both the NATO Response Force (NRF) and the Prague Capabilities Commitment in 2002 to help remedy this problem. The purpose of the two initiatives is to create forces that integrate, for example, aerial refuelers and airlift capacities that would allow troops and equipment to be moved to a conflict. The allies believe that shared funding of some of these capabilities will moderate the costs to individual governments.

The NRF now has 18,000 troops; General Jones has declared that it reached an "initial operational capability" in October 2004, and is the "engine for NATO

<sup>6</sup> "U.S. brushes off German NATO plan," *International Herald Tribune (IHT)*, Feb. 14, 2005, p. 1; U.S. official speaking at Brookings Institution conference on "Europe's Global Role," May 11, 2005; interviews.

<sup>7</sup> The United States, France, and Britain are the notable exceptions.

<sup>8</sup> George Robertson, "NATO's Transformation," speech in Geneva October 13, 2003, p. 1-2; "Afghanistan Stabilization and Reconstruction," 108<sup>th</sup> Congress, 2<sup>nd</sup> sess., Senate Foreign Relations Committee hearing. General Jones' testimony. January 27, 2004.

transformation.” Small contingents of the NRF were quietly deployed for securing the Olympics in Greece in August 2004, and two months later in Afghanistan during the presidential elections there.<sup>9</sup> The force is expected to reach a full capability by summer 2006. While most the NRF’s contingents are European, the United States has begun contributing some troops.

General Jones has pressed an idea that more NATO assets be funded jointly to ensure availability of needed equipment and forces. Today, NATO for the most part follows the concept of “costs lie where they fall,” meaning that governments pay the costs for forces they send to an operation, such as in Kosovo in 1999. Such a practice translates into the larger countries with more military capabilities and political will bearing disproportionate costs in providing security for all. General Jones is urging that more assets, as is already the case with AWACS, be funded jointly. Otherwise, he believes that NATO risks failing to develop appropriate forces, such as the NRF, as governments decline to contribute troops because they might be used for expensive operations.<sup>10</sup>

The NRF is thus far generally regarded as a success, but the second Prague initiative has been a different affair. The Prague Capabilities Commitment (PCC) succeeded an earlier capabilities initiative deemed to have had too many unrealistic goals. The PCC is a slimmed-down version, with eight capability goals targeting the allies’ principal deficiencies.

The list of PCC capabilities includes strategic lift (air and sea), aerial refueling, precision-guided munitions, secure communications, ground surveillance systems, and special forces. At the Istanbul summit in June 2004, NATO announced that a Chemical/Biological, Radiological, and nuclear defense battalion had become fully operational, fulfilling one of the capability goals. There has been some progress in purchase or leasing of sea lift, and the acquisition of precision-guided munitions is on schedule. While some U.S. officials say that the PCC is on schedule, others say that there remain serious shortfalls in aerial refuelers and air lift, where PCC goals are unlikely to be met in the foreseeable future.<sup>11</sup>

The allies designed the capabilities list to form an integrated set of systems; because allies are not acquiring some systems, other systems’ effectiveness will be diminished. For example, improved lift capacity is necessary if equipment, munitions, and forces are to reach a theater of operations in a timely fashion. Some governments, such as the German government, have pleaded that competing budget necessities, such as pension programs, are forestalling plans to modernize their militaries. The German parliament has also reduced and capped defense expenditures for the next several years.<sup>12</sup>

<sup>10</sup> “Top general seeks radical overhaul of NATO’s finances,” *Financial Times (FT)*, Feb. 15, 2005, p. 7.

<sup>11</sup> Interviews of U.S. officials, Nov.-Dec. 2004.

<sup>12</sup> “Defense Policy Guidelines,” German Ministry of Defense, May 21, 2003; and “Defense (continued...)

The United States may be in the early stages of altering the nature of its troop deployments in NATO Europe. The Department of Defense is considering reducing the number of U.S. troops in Germany, and placing part of those troops at small bases in Poland, Bulgaria, and Romania in 2007-2008. U.S. troops would fall from the current figure of 71,000 to 42,000. The new bases would be barebones, with equipment dispersed around NATO Europe. Under the proposed plan, U.S. forces would be lighter and more mobile, and able to move quickly to new trouble spots. It remains unclear whether the United States would pay for the modernization or development of sites that might become new bases, or whether central European countries would be expected to bear part of the burden.<sup>13</sup>

A congressionally authorized commission, the Commission on Review of Overseas Military Facility Structure, has urged the Pentagon to proceed more deliberately with this plan. The Commission believes that the United States may lack the strategic lift to move forces quickly back into Europe to deal with a crisis.<sup>14</sup>

Some analysts worry that NATO and the EU might “compete” for the use of more mobile, high-readiness forces. The EU is developing its own rapid reaction forces for crisis management. Some of these units are “double hatted” for use either by the EU or by NATO. The EU also has embarked on an initiative to enhance its military capabilities and equipment procurement, including, for example, greater strategic lift and weapons for suppression of enemy air defenses. The issue of which organization, NATO or the EU, could use national forces if there were simultaneous crises has not been resolved.

General Jones believes that the EU places more restrictions on use of its forces than does NATO, and that these restrictions are reflected in the training of those forces. In his view, NATO and the EU train their forces to different standards, and EU forces have a different “language” of command and operations; these hurdles must be cleared for forces trained for the EU to be useful to NATO.<sup>15</sup>

### **“National Caveats”**

General Jones has been increasingly critical of NATO governments that commit forces to an allied mission, then impose restrictions on tasks those forces may undertake. Such “national caveats” have troubled operations in the Balkans, for example. In March 2004, when Albanians rioted against Serbs in Kosovo (see below), German troops refused orders to join other elements of KFOR in crowd control; only 6,000 of KFOR’s 18,000 troops were eligible to use force against the rioting crowds. NATO is attempting to overcome this problem by providing more riot-control training for troops designated for assignment in Kosovo.

<sup>15</sup> Gen. Jones, question-and-answer session, NATO Parliamentary Assembly meeting, Venice, Nov. 16, 2004.

Other problems are evident as well. When some NATO governments vote in the North Atlantic Council to support a politically sensitive operation, those same governments sometimes tell their officers who are within NATO's integrated command structure (and therefore technically not under national control) not to participate in carrying out the operation, a step General Jones has described as highly disruptive of operations. Allied officials point to Germany as the principal culprit. For years, German governments have worked to place their officers and civilians on NATO's international staff, and now have a disproportionate number of such individuals on the staff; in the view of some NATO governments (not only the view of some U.S. officials), the Germans have also tried to limit the number of U.S. citizens on the international staff. General Jones has openly expressed irritation at Germany's refusal to allow its nationals on the international staff to assume posts in Iraq for the NATO training mission.<sup>16</sup>

## Multinational Deployments

**Bosnia.** NATO has had peacekeepers in Bosnia since 1995. The initial Stabilization Force (SFOR) there numbered 60,000. As Bosnia has stabilized, NATO reduced the force. In December 2004, the EU took over stabilization operations in Bosnia.

**Afghanistan.** NATO Secretary General Jaap de Hoop Scheffer has said that the stabilization of Afghanistan is the alliance's primary mission. There are two military operations in Afghanistan. NATO leads the International Security Assistance Force (ISAF); its mission is to bring stability to Afghanistan. The United States leads a separate, non-NATO mission, called Operation Enduring Freedom (OEF); its mission is to eliminate Taliban and Al Qaeda remnants, primarily active in the eastern part of the country. The United States has proposed that these two missions be merged under NATO leadership, a move that some allies oppose.

ISAF now has 6,500 troops; overwhelmingly, however, the forces are from NATO's member states, above all from Germany, Canada, Britain, and France. ISAF had surged temporarily to approximately 8,800 troops to provide security for the October 2004 presidential elections and will likely have to increase again for the September 18, 2005, parliamentary elections. U.S. forces in ISAF are minimal. ISAF provides security for Kabul and several outlying regions, and is a stabilization force not geared for combat operations.

NATO wishes to extend ISAF's reach in Afghanistan. Warlords are re-exerting authority in parts of the country. ISAF is attempting to establish Provincial Reconstruction Teams (PRTs), composed of soldiers and civil affairs officers, in parts of Afghanistan. The objective of the PRTs is to extend the authority of the central government, provide security, and undertake projects (such as infrastructure development) that would boost the Afghan economy. This effort has met with only mixed success, in part because allied governments have been slow to sponsor PRTs

---

<sup>16</sup> Ibid.; "Powell slams Iraq mission boycott," *WP*, Dec. 10, 2004, p. A24; "NATO-Afghanistan: Gen. Jones supports ISAF regrouping...," *Atlantic News*, Oct. 30, 2004, p. 2; interviews.

and to provide troops for them, in part because some allies lack deployable, sustainable forces. NATO has designated 21 PRTs, but only five are fully operational. A key element lacking in some PRTs is quick-response combat and medical units that could assist PRTs that find themselves in danger.

The allies are struggling to combat Afghanistan's growing poppy crop. Afghanistan supplies 87% of the world's opium, which accounts for an estimated 60% of the country's GDP. The crop therefore is a major factor in the economic life and stability of the country. The United States and the allies are debating means to eliminate opium production. Measures being considered range from finding viable replacement crops to developing more "eco-tourism" in the long term. The allies believe that the Afghan government must take the lead in reducing the poppy crop, as only Afghan leaders can have long-term credibility in the country. Afghanistan's weak institutions, including minimally functional military, police, and judicial systems, retard any significant progress, as does the virtual absence of a market infrastructure that could support a modernizing economy.<sup>17</sup>

Operation Enduring Freedom has approximately 18,000 troops. Most Enduring Freedom forces are from the United States, but France, Norway, Italy, and several other allies also provide special forces for combat operations.

With continuing uneasiness from some governments, NATO has agreed in principle to merge ISAF and OEF under an allied command, but not on the command's structure. The Administration contends that the factors affecting Afghan stability are interrelated and require a unified command structure to make steady progress. The German government says that the Bundestag approved ISAF forces for peace operations and that mixing stability forces with combat forces would blur the mission of all; the merger would also require a new, contentious debate and vote in the Bundestag. France has forces in both operations but believes that a unified command might lead the United States to withdraw from Afghanistan and send its forces to Iraq, leaving European NATO members to bring order to Afghanistan.<sup>18</sup> NATO may "double-hat" the command, with one commander for the stabilization operation, and another for the counter-terror operation, and leave it to each member to join the mission they please. An agreed structure for the merger is unlikely before 2006.

**Iraq.** The U.S. invasion of Iraq and subsequent efforts to stabilize that country have caused great controversy in the alliance. From at least early 2002, some allies, particularly France and Germany, were contending that the principal threats to the allies lay elsewhere, in the nuclear programs of Iran and North Korea, and from instability in Pakistan and Afghanistan. They contended that Iraq could be contained through sanctions and, after the fall of 2002, U.N. WMD inspections.<sup>19</sup>

---

<sup>17</sup> CRS Report RL32686, *Afghanistan: Narcotics and U.S. Policy*, by Chris Blanchard.

<sup>18</sup> Interviews with French and German officials, June 2004-May 2005.

<sup>19</sup> "The Future of Transatlantic Security: New Challenges. A European-American discussion," Occasional Paper, the American Council on Germany, based on a conference (continued...)

Transatlantic differences over Iraq touched off a bitter dispute in NATO in February 2003, shortly before the war, when France, Germany, and Belgium blocked initial U.S. efforts to provide NATO defensive assistance to Turkey. They argued that such assistance would be tantamount to acknowledgment that war was necessary and imminent at a time when U.N. inspections were still underway. The Iraq conflict and ensuing failure to locate WMD sharpened a debate among the allies over an appropriate NATO role in Iraq, and Iraq's effect on allied interests.

The Administration contends that stabilization of Iraq is in the interest of all allies. The insurgency and general disorder in much of Iraq has opened the door to a terrorist foothold in the country. Administration officials believe that anchoring democratic institutions in Iraq will have a positive, reverberative effect on Middle Eastern governments that have authoritarian traditions.<sup>20</sup>

Many allies, led by France and Germany, recognize that an unstable Iraq is an unsettling force in the already volatile Middle East. However, they believe that the Arab-Israeli conflict must first be settled before there can be stability in the region, and that U.S. policy favors Israel excessively and is thus an impediment to peace.<sup>21</sup> They are skeptical that an outside power like the United States can develop democracy in Iraq, a country that has sectarian and tribal divisions and no rooted legacy of representative government. They also believe that the U.N. should have a larger role in Iraq. French President Chirac said before the Iraq war that a U.S. invasion of Iraq would lead to the growth and spread of anti-Western terrorism.<sup>22</sup>

The Bush Administration has gained a measure of NATO involvement in Iraq. The alliance provides logistical and communications assistance to Poland, which will lead a multinational force of 8,500 troops in a stabilization effort in southern Iraq until the Iraqi elections on January 31, 2005.

NATO has also agreed to a training mission for Iraqi security forces. At the Istanbul summit in June 2004, the allies agreed in principle to train elements of Iraq's army, police, and national guard.

The issues of the trainers' precise mission and their command structure were paramount in the allies' debate. France, Germany, and Belgium did not want the training mission to evolve into a combat mission. They successfully insisted that the training site in Iraq be clearly an Iraqi and not a U.S. installation. Several allies also insisted that training be open to all sectarian, ethnic, and tribal groups. Finally, France, backed by several other governments, wanted U.S. General David Petraeus,

who heads training in Iraq, to lead the mission, and not U.S. General George Casey, commander of the Multinational Force and the Bush Administration's choice for mission commander. General Casey directs combat operations, and most allies that support the training mission wished to avoid any appearance that their forces would be sent to Iraq to engage in combat. The French government did not wish the training mission to be associated with the Multinational Force, the heir of the force that fought the Iraq war. The French view prevailed, and General Petraeus will answer directly to the NATO chain of command, led by General Jones

The allies will send 160 trainers to Iraq; 151 were in place by May 2005. France and Germany have offered bilateral training, not under a NATO flag, outside Iraq for Iraqi police and other security forces. At the same time, Paris and Berlin are contributing money to the NATO training mission in Iraq.

There are approximately 135,000 U.S. troops in Iraq. Another 30,000 are being contributed by other countries. All of these troops are under the U.S.-led Multinational Force (MNF), which is not under NATO auspices. Except for Britain (12,000), Italy (3,120), and Poland (1,700), these contingents are small. Deployments to Iraq are highly unpopular in most European countries. In Italy, Silvio Berlusconi's government is increasingly unpopular for a range of reasons; he has said that he may withdraw much of Italy's contingent in September 2005. Poland will likely withdraw its forces by December 2005, as will Bulgaria. Spain and Hungary have already withdrawn their forces.<sup>23</sup>

## Enlargement

On March 29, 2004, seven countries (Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia, and Slovenia) became the newest members of NATO upon submission of their instruments of ratification in a ceremony in Washington, D.C. Albania, Croatia, and Macedonia are candidates for the next round of NATO enlargement.

## U.S. Leadership under Challenge

The Bush Administration's effort to shift NATO's mission to combating terrorism and proliferation, with a strategic center of gravity in the Middle East, has led to uneasiness and a series of challenges by some allies. While all allies view terrorism and proliferation as serious threats, and all have embraced the need for more "expeditionary" forces, several key allies nonetheless have questions about the Administration's leadership and its commitment to NATO.

International political considerations play an important role in some allies' questioning of U.S. leadership. Most allies are members of the European Union. They place great importance on international institutions as a means of solving transnational problems, from economic dislocation to narcotics trafficking to

---

<sup>23</sup> For troop numbers, see CRS Report RL32105, *Post-War Iraq: A Table and Chronology of Foreign Contributions*, by Jeremy Sharp; interviews.

prevention of conflict. The legacy of two world wars in Europe remains a central factor in shaping governments' policies; prevention of illegitimate violations of sovereignty was a principal reason for their support of the establishment of the UN, the EU, and NATO. This view lies behind the general European opposition to the Bush Administration's doctrine of "pre-emptive action." Some European observers today believe that there is an "absence of anything that could be called an international security architecture," in part because the United States, in this view, avoids reliance on the UN. U.S. global leadership was once "embedded in the international rule of law that constrained the powerful as well as the weak." However, in this view, the U.S. resort to force in Iraq, without clear support from the UN, has made the United States "a revolutionary hyperpower."<sup>24</sup>

Some U.S. officials counter that there is good cooperation with the allies on the use of law enforcement to combat terrorism,<sup>25</sup> but that there are moments when the danger of impending catastrophic developments or an imminent attack justifies the use of force without "legitimization" through the often time-consuming process of obtaining a UN resolution. The Clinton Administration (and ultimately all the allies) reached this conclusion when it decided that NATO must act to prevent ethnic cleansing in Kosovo without explicit U.N. authorization in light of a threatened Russian veto, and the Bush Administration reached this conclusion when it went to war in Iraq in the belief that the Hussein regime possessed a WMD arsenal.

The terrorist bombing in Madrid on March 11, 2004, which killed approximately 200 people, has led to severe repercussions for the Administration. Approximately 90% of the Spanish population had opposed Prime Minister Aznar's support for the invasion of Iraq, and his subsequent decision to send forces as part of the U.S.-led coalition.<sup>26</sup> Spain held scheduled elections three days after the bombing. Voters turned out the sitting government and elected a Socialist-led coalition. Some analysts attribute this result to the belief among some voters that the government's Iraq policy invited the terrorist attack. Others assert that the perception among many voters that the Aznar government badly mishandled the bombing aftermath — by sticking to claims that the Basque terrorist group ETA was behind the attacks in the face of mounting evidence of an Al Qaeda link — was a key factor in the election's outcome. Regardless, the Socialists have sharply criticized U.S. Iraq policy. The Socialist Prime Minister-designate, José Luis Rodríguez Zapatero, reportedly said, "The war in Iraq was a disaster and the occupation continues to be a disaster." He accused President Bush and British Prime Minister Blair of "lies" over leading a coalition to war on the basis of inaccurate intelligence information. Zapatero said he would withdraw the 1300 Spanish forces from Iraq by June 30 unless the UN is given

Doug Bereuter and the House Permanent Select Committee on Intelligence.

<sup>26</sup> "Those awkward hearts and minds," *The Economist*, April 1, 2003.

clear authority to replace the U.S. occupation.<sup>27</sup> Zapatero has not indicated what his government will do if the United States requests a NATO deployment in Iraq.

Some allies contend that the United States is seeking to use NATO as a “toolbox.” They object to Defense Secretary Rumsfeld’s repeated advocacy of “coalitions of the willing” to fight in conflicts as a means of using allied resources and supportive NATO governments to endorse U.S. interventions on foreign soil. They argue that the Administration’s contention that “the mission drives the coalition” undermines allied solidarity; such a doctrine weakens the long-held view that all member states must believe that they have a stake in allied security operations.

Most allies have been critical of Secretary Rumsfeld’s division of Europe into “old” and “new,” a formulation that chastised the former (such as France and Germany) for having opposed the U.S. invasion of Iraq and lauded the latter (such as Spain under Aznar, Poland and the Baltic states) for having supported it. The criticism has come, quietly, even from countries such as Poland because Warsaw objects to any division of the continent. Central European governments view both NATO and the EU as means to unite the continent and to promote stability, and object to any attempts to divide the Europeans.<sup>28</sup>

Some allies believe that the United States relies too heavily upon military power to resolve issues that may have a political solution. They place the issue of proliferation in this realm, and cite the long-term economic pressure of sanctions against Libya, followed by U.S. and British negotiations with Tripoli, as evidence that a patient policy based on political initiatives can be effective.<sup>29</sup>

At the same time, all allies underscore the importance of their strategic relationship with the United States. While the European Union, including its nascent defense entities, is of great value to them, they nonetheless contend that the transatlantic partnership remains vital to countering global threats.

## **A New Security Actor: The European Union**

For decades, there has been discussion within the EU about creating a common security and defense policy. Previous EU efforts to forge a defense arm foundered on member states’ national sovereignty concerns and fears that an EU defense capability would undermine NATO and the transatlantic relationship. However, U.S. hesitancy in the early 1990s to intervene in the Balkan conflicts, and UK Prime Minister Tony Blair’s desire to be a leader in Europe, prompted him in December 1998 to reverse Britain’s long-standing opposition to an EU defense arm. Blair joined French President Jacques Chirac in pressing the EU to develop a defense identity outside of NATO. This new British engagement, along with deficiencies in

<sup>28</sup> Interviews of European officials.

<sup>29</sup> Interviews; *Military Role in Countering Terrorism*, op. cit.

European defense capabilities exposed by NATO's 1999 Kosovo air campaign, gave momentum to the EU's European Security and Defense Policy (ESDP).<sup>30</sup>

EU leaders hope ESDP will provide a military backbone for the Union's evolving Common Foreign and Security Policy (CFSP), a project aimed at furthering EU political integration and boosting the EU's weight in world affairs. They also hope that ESDP will give EU member states more options for dealing with future crises. The EU stresses that ESDP is not aimed at usurping NATO's collective defense role nor at weakening the transatlantic alliance.

Most EU members, led by the UK, insist that ESDP be tied to NATO — as do U.S. policymakers — and that EU efforts to build more robust defense capabilities should reinforce those of the alliance. At the NATO Washington Summit in April 1999, NATO welcomed the EU's renewed commitment to strengthen its defense capabilities, and acknowledged the EU's resolve to develop an autonomous decision-making capacity for military actions “where the Alliance as a whole is not engaged.”<sup>31</sup> Nevertheless, France and some other countries continue to favor a more independent EU defense arm. French officials have long argued that the EU should seek to counterbalance the United States on the international stage and view ESDP as a vehicle for enhancing the EU's political credibility.

U.S. support for ESDP and for the use of NATO assets in EU-led operations has been conditioned since 1998 on three “redlines,” known as the “three D's:”

- No decoupling from NATO. ESDP must complement NATO and not threaten the indivisibility of European and North American security.
- No duplication of NATO command structures or alliance-wide resources.
- No discrimination against European NATO countries that are not members of the EU. The non-EU NATO members were concerned about being excluded from formulating and participating in the EU's ESDP, especially if they were going to be asked to approve “lending” NATO assets to the EU.

## ESDP's Progress to Date

At its December 1999 Helsinki summit, the EU announced its “determination to develop an autonomous capacity to take decisions and, where NATO as a whole is not engaged, to launch and conduct EU-led military operations in response to international crises.” At Helsinki, the EU decided to establish an institutional decision-making framework for ESDP and a 60,000-strong “Headline Goal” rapid reaction force to be fully operational by 2003. This force would be deployable within

---

<sup>30</sup> For more information on Blair's decision to reverse the UK's traditional opposition to ESDP, see CRS Report RS20356, *European Security and Defense Policy: The British Dimension*, October 7, 1999, by Karen Donfried.

<sup>31</sup> See Article 9 of the NATO Washington Summit Communiqué, April 24, 1999 [<http://www.nato.int/docu/pr/1999/p99-064e.htm>].

60 days for at least a year and capable of undertaking the full range of “Petersberg tasks” (humanitarian assistance, search and rescue, peacekeeping, and peace enforcement), but it would not be a standing “EU army.” Rather, troops and assets at appropriate readiness levels would be identified from existing national forces for use by the EU. In addition, EU leaders at Helsinki welcomed efforts to restructure European defense industries, which they viewed as key to ensuring a European industrial and technological base strong enough to support ESDP military requirements.

The EU has also sought to bolster its civilian capacities for crisis management in the context of ESDP. In June 2000, the EU decided to establish a 5,000-strong civilian police force, and in June 2001, the EU set targets for developing deployable teams of experts in the rule of law, civilian administration, and civilian protection. In December 2004, EU leaders reached agreement on a Civilian Headline Goal for 2008, which aims to further improve the EU’s civilian crisis management capabilities by enabling the EU to respond more rapidly to emerging crises.

**New Institutions and NATO-EU Links.** On the institutional side, the EU has created three new defense decision-making bodies to help direct and implement ESDP. These are: the Political and Security Committee (composed of senior national representatives); the Military Committee (composed of member states’ Chiefs of Defense or their representatives in Brussels); and the Military Staff (consisting of about 130 military experts seconded from member states).

The EU has also established cooperation mechanisms with NATO, intended to enable the EU to use NATO assets and meet U.S. concerns about ESDP. These include regular NATO-EU meetings at ambassadorial and ministerial level, as well as regular meetings between the EU and non-EU European NATO members. This framework allows for consultations to be intensified in the event of a crisis, and permits non-EU NATO members to contribute to EU-led operations; the EU agreed to establish ad hoc “committees of contributors” for EU-led missions to give non-EU participants a role in operational decision-making. The NATO-EU link was formalized in December 2002; this paved the way for the implementation in March 2003 of “Berlin Plus,” an arrangement allowing the EU to borrow Alliance assets and capabilities for EU-led operations and thereby prevent a needless duplication of NATO structures and wasteful expenditure of scarce European defense funds. “Berlin Plus” gives the EU “assured access” to NATO operational planning capabilities and “presumed access” to NATO common assets for EU-led operations “in which the Alliance as a whole is not engaged.”<sup>32</sup>

**The EU’s Rapid Reaction Force and Capability Challenges.** Enhancing European military capabilities has been and remains a key challenge for the EU as it seeks to forge a credible ESDP. As noted above, the 1999 NATO war in Kosovo demonstrated serious deficiencies in European military assets and the widening technology gap with U.S. forces. European shortfalls in strategic airlift,

---

<sup>32</sup> “Berlin Plus” was originally outlined at the 1999 NATO summit in Washington, D.C. See Article 10 of the Washington Summit Communiqué, April 24, 1999 [<http://www.nato.int/docu/pr/1999/p99-064e.htm>].

precision-guided munitions, command and control systems, intelligence, aerial refueling, and suppression of enemy air defenses were among the most obvious. In setting out the parameters of the EU rapid reaction force, EU leaders sought to establish goals that would require members to enhance force deployability and sustainability, and to reorient and ultimately increase defense spending to help fill equipment gaps. The most ambitious members envisioned the EU's rapid reaction force developing a combat capability equivalent, for example, to NATO's role in the Kosovo conflict.

In 2000 and 2001, the EU held two military capability commitment conferences to define national contributions to the rapid reaction force and address the capability shortfalls. Member states pledged in excess of 60,000 troops drawn from their existing national forces, as well as up to 400 combat aircraft and 100 naval vessels as support elements. In 2001, the EU also initiated a European Capability Action Plan (ECAP) to devise strategies for remedying the capability gaps. In May 2003, the EU declared that the rapid reaction force possesses "operational capability across the full range of Petersberg tasks," but recognized that the force would still be "limited and constrained by recognized shortfalls" in certain defense capabilities.<sup>33</sup> As a result, ESDP missions in the near to medium term will likely focus on lower-end Petersberg tasks rather than higher-end peace enforcement operations. EU officials maintain that enhancing European defense capabilities remains an ongoing, long-term project.

Many military analysts assert that overall levels of European defense spending are insufficient to fund all ESDP requirements. European leaders are reluctant to ask legislatures and publics for more money for defense given competing domestic priorities and tight budgets. In light of the dim prospects for increased defense spending in the near term, EU officials emphasize that they do not need to match U.S. defense capabilities exactly — which they view as increasingly impossible — and stress they can fill critical gaps by spending existing defense resources more wisely. EU leaders point out that rationalizing member states' respective defense efforts and promoting multinational projects to reduce internal operating costs have been key goals of ECAP. Some options under consideration in ECAP include leasing commercial assets (primarily for air transport); sharing or pooling of national assets among several member states; "niche" specialization, in which one or more member state would assume responsibility for providing a particular capability; and more joint procurement projects. In June 2004, EU leaders agreed to establish a European Defense Agency (EDA) devoted to improving European military capabilities and interoperability. A key focus of the EDA will be to help the EU's 25 member states to stretch their scarce defense funds farther by increasing cooperation among members in the areas of weapons research, development, and procurement.<sup>34</sup>

Critics, however, charge that promises to spend existing defense resources more wisely have not yet materialized in any substantial way. They doubt that EU member states will be willing to make the hard political choices that could ultimately produce

---

<sup>33</sup> See the Conclusions from the EU's May 19-20, 2003 General Affairs and External Relations Council Meeting.

<sup>34</sup> "EU defense agency agreed after last-minute snag," Reuters, June 14, 2004.

more “bang for the euro” because these could infringe on national sovereignty. For example, they point out that “niche” specialization would require some member states to forego building certain national capabilities, while proposals to pool assets may require members to relinquish national controls. Some question how effective the EDA will be in promoting harmonization of equipment purchases given that many member states remain wedded to fulfilling national requirements and may be reluctant to expose their own defense industries to competition from other European weapons producers. Skeptics also criticize European leaders’ continued devotion to the increasingly expensive but still non-existent Airbus’ A400M military transport project, in which seven European allies are investing large portions of their procurement budgets. They argue that it would be cheaper and quicker for these countries to buy U.S.-built transporters such as the C-130 or C-17, but many European leaders resist this option because European defense industries create European jobs.<sup>35</sup>

**ESDP Missions.** Despite the capability challenges still facing European militaries, the EU has sought to keep up momentum for ESDP. The EU has launched several civilian and military missions in the Balkans, an area long assumed by EU observers to be the most likely destination of any EU-led operation. In January 2003, the EU’s civilian crisis management force took over U.N. police operations in Bosnia as the first-ever ESDP mission. With “Berlin Plus” arrangements finalized, the EU launched in March 2003 its first military mission — Operation Concordia — that replaced the small NATO peacekeeping mission in Macedonia. Operation Concordia was supported by NATO headquarters (SHAPE) in Mons, Belgium and NATO operational reserves already located in Macedonia. In December 2003, Operation Concordia ended, but the EU established a police mission to help train Macedonia’s police forces. In early December 2004, the EU took over the NATO-led peacekeeping mission in Bosnia within the “Berlin Plus” framework. The EU-led Operation Althea of 7,000 troops constitutes the largest ESDP military mission to date. NATO retains a small headquarters presence in Sarajevo to assist with Bosnian defense reforms, counterterrorism efforts, and the apprehension of war criminals. Operation Althea is viewed as an important test for the evolving NATO-EU relationship.<sup>36</sup>

The EU has also sought to play a role beyond the Balkans. From June to September 2003, the EU led an international peacekeeping force of 1,400 in the Democratic Republic of Congo that sought to stop rebel fighting and protect aid workers. The Congo mission was requested by the United Nations and headed by France in a “lead nation” capacity. This mission came as a surprise to many EU observers, NATO officials, and U.S. policymakers because it was geographically farther afield than they had thought the EU would venture, and because it was conducted without recourse to NATO assets. The Congo operation was planned by French military planners in national headquarters. Some NATO and U.S. officials

---

<sup>35</sup> The first A400Ms are not scheduled for delivery until 2008 at the earliest. Belgium, France, Germany, Luxembourg, Spain, Turkey, and the UK remain committed to the A400M, but Italy and Portugal withdrew amid program uncertainties and cost constraints.

<sup>36</sup> For more information, see CRS Report RS21774, *Bosnia and International Security Forces: Transition from NATO to the European Union in 2004*, by Julie Kim.

were annoyed, asserting that the EU should have first formally asked NATO whether it wished to undertake the Congo operation. EU officials did consult with NATO about the mission, but maintain they were not obliged to ask NATO for its permission given that the EU was not requesting to use NATO assets.<sup>37</sup>

In December 2004, the EU announced it would deploy a modest police mission to the Congo to assist in setting up a Congolese police unit. This mission was officially launched in late April 2005 following some logistical delays. The EU plans on establishing another small mission in May 2005 to provide advice and assistance to Congolese authorities on security sector reform. Additionally, the EU is considering options to help strengthen African Union efforts to quell the ongoing violence in Sudan; EU discussions have reportedly focused on offering logistical support and air surveillance to monitor the 2004 ceasefire.<sup>38</sup>

In February 2005, the EU announced a one-year civilian rule of law mission to help train about 800 Iraqi police, judges, and administrators. Training will take place primarily outside of Iraq because of ongoing security concerns. The mission is expected to begin in July 2005. The EU will establish a small liaison office in Baghdad, and may consider future training in Iraq if security conditions improve.

In March 2005, the EU dispatched three security experts to assess ways to help Georgia monitor its volatile border with Russia. Georgia (and the United States) is urging the EU to establish a formal monitoring operation along the Russian-Georgian border to fill the void left by the end of the five-year mission run by the Organization for Security and Cooperation in Europe (OSCE) after Russia vetoed its extension in December 2004. Some EU members, however, are hesitant to undertake such a monitoring mission given Russia's likely opposition. The EU continues to run a small civilian rule of law mission in Georgia, which was set up in July 2004, in support of the judicial reform process.

## The Future Shape of ESDP

**European Viewpoints.** EU leaders view ESDP as one of the next great projects on the road to European integration, and will likely seek to enhance ESDP further over the next decade. As noted above, most EU members assert that EU efforts to boost defense capabilities should complement — not compete with — those of the alliance. The UK hopes that bringing more and better military hardware to the table will give the European allies a bigger role in alliance decision-making. Italy and Spain, among others, hope that ESDP's military requirements will eventually provide the necessary ammunition to pry more defense funding out of reluctant legislatures and publics more concerned with social spending and struggling economies. Incoming EU member states from central and eastern Europe, such as Poland and the three Baltic states, back ESDP but maintain that it must not weaken NATO or the transatlantic link. The EU's four neutral members (Austria, Finland, Ireland, and Sweden) prefer to concentrate their efforts on ESDP's civilian side.

---

<sup>37</sup> Interviews of U.S. and EU officials, July 2003.

<sup>38</sup> "EU wants to strengthen its role in Darfur," Agence Europe, May 5, 2005.

Germany, given its size and wealth, is considered critical to the success of ESDP, but has played a rather passive role in much of ESDP's development. Although always supportive of the initiative, Berlin was keen to tread carefully in light of U.S. concerns. However, some analysts suggest that Germany and other states that opposed the U.S.-led war in Iraq may be increasingly receptive to French efforts to forge a European defense arm independent of NATO. They point to the April 2003 meeting of French, German, Belgian, and Luxembourg leaders to discuss creating a separate European military headquarters, planning staff, and armaments agency. Although not under EU auspices, this four-power meeting suggests that France is still intent on slowly developing a more autonomous European defense identity; whether Germany will support this position in the future remains an open question.

**Boosting Planning Capabilities.** As part of ongoing efforts to build ESDP, the EU in December 2003 adopted a new agreement on enhancing the EU's military planning capabilities. This agreement represents a compromise negotiated by the UK, France, and Germany. It entails:

- Establishing a British-proposed EU planning cell at NATO headquarters (SHAPE) to help coordinate "Berlin Plus" missions, or those EU missions conducted using NATO assets.
- Adding a new, small cell with the capacity for operational planning to the existing EU Military Staff — which currently provides early warning and strategic planning — to conduct possible EU missions without recourse to NATO assets.
- Inviting NATO to station liaison officers at the EU Military Staff to help ensure transparency and close coordination between NATO and the EU.

Some observers criticize the British for agreeing to this deal, accusing UK Prime Minister Blair of bowing to French demands for a more independent ESDP to help burnish his European credentials following the rift with Paris and Berlin over Iraq. UK officials are keen to point out that the deal considerably scales back the early proposals in April 2003 for a separate European headquarters. They claim language in the agreement reaffirms NATO as Europe's preeminent security organization. They stress that the new cell will "not be a standing headquarters," and that national headquarters will still remain the "main option" for running missions without NATO assets, such as the French-commanded EU mission in the Congo. UK officials likely judged that if they had blocked this initiative, Paris and Berlin would have gone ahead with some sort of European headquarters outside of the EU structure, which would have been even more objectionable to UK and NATO interests.<sup>39</sup>

Press reports indicate that the December 2003 deal to enhance the EU's planning capabilities was also linked to a compromise in the EU's constitutional

---

<sup>39</sup> "Straw defends joint Euro force," BBC News, November 29, 2003; Charles Grant, "Europe can sell its defence plan to Washington," *FT*, December 2, 2003; also see the text of the EU agreement, "European Defence: NATO/EU Consultations, Planning, and Operations," December 2003.

treaty on two defense provisions that aim to further the development of a common EU defense policy. The UK had initially strongly opposed the French-German-backed proposals in the treaty for a “mutual assistance clause,” and for “structured cooperation” to permit a smaller group of member states to cooperate more closely on military issues. British (and U.S.) officials worried that the “mutual assistance clause” would undermine NATO’s Article 5 defense guarantee, and that “structured cooperation” could weaken EU solidarity as well as that of the alliance given the large number of overlapping members.

The UK reportedly acquiesced on both of these defense provisions, however, after securing some revisions. The “mutual assistance clause” now includes stronger language reiterating that NATO remains the foundation of collective defense for those EU members that are also NATO allies. “Structured cooperation” activities have apparently been refocused mostly on efforts to boost military capabilities rather than on conducting operations. The constitutional treaty was signed in October 2004, but must now be ratified by all 25 member states; thus, the treaty will not take effect until late 2006 at the earliest. Ratification is proving controversial in some member states, especially those holding public referenda. A “no” vote in one or more member states could further delay or kill the constitutional treaty.<sup>40</sup>

The EU is currently working to implement its new civilian/military cell within the EU’s Military Staff. This cell is expected to have the ability by January 2006 to rapidly set up an operations center, as needed, which would be capable of running an autonomous EU military operation on the scale of the French-led EU operation in the Congo in 2003. The EU is also collaborating with NATO to establish the EU cell at SHAPE and to finalize the arrangements for a NATO liaison team at the EU.

**Enhancing Rapid Response Capabilities.** At the June 2004 EU summit in Brussels, Belgium, EU leaders endorsed a new Headline Goal 2010 aimed at further developing European military capabilities. The Headline Goal 2010 is focused on improving the interoperability, deployability, and sustainability of member states’ armed forces. A key element of the Headline Goal is the “battlegroups concept,” which seeks to enhance the EU’s ability to respond rapidly to emerging crises and undertake the full spectrum of Petersberg tasks. The EU envisions that each battlegroup will consist of about 1,500 high-readiness troops capable of being deployed within 15 days, for up to 4 months, for either stand-alone missions or as a spearhead force to “prepare the ground” for a larger, follow-on peacekeeping operation. The conceptual model appears to be largely based on the French-led EU mission to the Congo in 2003, which paved the way for a U.N. peacekeeping force.

In November 2004, at the EU’s third military capability commitment conference, EU officials announced plans for the creation of 13 battlegroups, which may be formed by one or more member states, and may also include non-EU members. The EU intends to be ready to field at least one battlegroup during 2005

---

<sup>40</sup> “Arguments on defence further complicate negotiations on an EU constitution,” *The Economist*, December 6, 2003; for more information, see CRS Report RS21618, *The European Union’s “Constitution,”* by Kristin Archick.

and 2006, and has set 2007 as the deadline for all 13 battlegroups to be fully operational. The EU has not specified a geographic area in which these battlegroups might operate, but most observers believe that trouble spots in Africa or the Balkans are the most probable theaters for the battlegroups.

Many European and American military experts view the EU's battlegroups as more sustainable and practical than the EU's 60,000-strong rapid reaction force. They hope that the emphasis on highly trained, rapidly deployable multinational formations indicate that the EU is growing more serious about enhancing its defense capabilities and seeking new ways to stretch existing defense resources farther. EU officials stress that the battlegroup concept is intended to complement rather than compete with the new NATO Response Force (NRF), and note that the EU and NATO have already begun discussing ways to ensure that the battlegroups and the NRF are mutually reinforcing. Some analysts predict that the NRF will likely undertake higher-intensity operations than the EU battlegroups in the near to medium term.<sup>41</sup>

**ESDP Post-September 11.** Following September 11, 2001, the EU struggled with whether to expand ESDP's purview to include combating external terrorist threats or other new challenges, such as countering the proliferation of weapons of mass destruction. In June 2002, EU leaders agreed that the Union should develop counter-terrorism force requirements, but stopped short of expanding the Petersberg tasks. Increasingly, however, EU member states appear to recognize that ESDP must have a role in addressing new challenges in order to remain relevant and to bolster the EU's new, broader security strategy developed by the EU's top foreign policy official, Javier Solana. The description of the Petersberg tasks in the text of the EU's new constitutional treaty states that "all of these tasks may contribute to the fight against terrorism;" many analysts assert that this language effectively expands the Petersberg tasks to include combating terrorism.

In the wake of the March 11, 2004 terrorist bombings in Spain, EU leaders issued a new "Declaration on Combating Terrorism." Among other measures, it called for "work to be rapidly pursued to develop the contribution of ESDP to the fight against terrorism." In November 2004, EU officials outlined a more detailed plan to enhance EU military and civilian capabilities to prevent and protect both EU forces and civilian populations from terrorist attacks, and to improve EU abilities to manage the consequences of a terrorist attack. EU policymakers also noted that ESDP missions might include providing support to third countries in combating terrorism. At the same time, EU officials maintain that countering terrorism will not be ESDP's main focus, in part because they view the fight against terrorism largely as an issue for law enforcement and political action.<sup>42</sup>

## U.S. Perspectives

Successive U.S. Administrations, backed by Congress, have supported the EU's ESDP project as a means to improve European defense capabilities, thereby enabling the allies to operate more effectively with U.S. forces and to shoulder a greater degree of the security burden. U.S. supporters argue that ESDP's military requirements are consistent with NATO efforts to enhance defense capabilities and interoperability among member states. They point out that the EU has made relatively quick progress on its ESDP agenda, and its missions in the Balkans and in the Congo demonstrate that the EU can contribute effectively to managing crises, both within and outside of Europe. As noted previously, U.S. policymakers and Members of Congress insist that EU efforts to build a defense arm be tied to NATO.

The United States remains concerned, however, that France and some other EU members will continue to press for a more autonomous EU defense identity. Washington grudgingly approved the December 2003 agreement to enhance the EU's planning capabilities, but some U.S. officials still fear that the new EU planning cell of 20 to 30 officers could grow over time into a larger staff, which could duplicate and compete with NATO structures. They also worry that the "mutual assistance clause" and "structured cooperation" in the EU's constitutional treaty could ultimately lead to a multi-tiered security structure that could destroy the indivisibility of the transatlantic security guarantee.<sup>43</sup>

Overall, critics of ESDP contend that it will mean less influence for the United States in Europe. They suggest that the possible development within NATO of an "EU caucus" — pre-negotiated, common EU positions — could complicate alliance decision-making and decrease Washington's leverage. As noted previously, EU plans for its rapid reaction force may depend on double- or triple-hatting forces already assigned to NATO or other multinational units, thus potentially depriving NATO of forces it might need if a larger crisis arose subsequent to an EU deployment. Furthermore, if EU missions overstretch European militaries, ESDP could compete with NATO efforts to develop its quick-strike Response Force, impede the sustainability of NATO forces in Afghanistan, or hinder the deployment of a possible NATO-led mission in Iraq. Others fear that the EU's success in establishing defense decision-making bodies has not been matched by capability improvements, potentially leading to a situation in which the EU gets bogged down in a conflict and requires the United States and NATO to bail it out.
