# Nuclear Attack Planning Base - 1990

## Federal Emergency Management Agency

April 1987

The Nuclear Attack Planning Base 1990 was an official estimate of the potential physical effects of a Soviet nuclear attack on the population of the United States, including detailed county-by-county assessments of damage due to blast overpressure, fire and radiation.

A copy of the approximately 800 page publication, originally marked Limited Distribution and Not for Public Release, was released in April 2005 with the following caveat: "This publication was provided by the Federal Emergency Management Agency, Department of Homeland Security, for its academic and historical value only."

- [Executive Summary](#)
- [Cover Page](#)
- [Front Matter, Table of Contents](#)
- [Part 1: Project Overview](#)
- [Part 2: Project Development](#)
- [Part 3: Risk Definitions](#) (1.67 MB PDF file)
- [Annex A: Direct Effects & Fire Risk, Statistics and Maps](#) (4.2 MB PDF file)
- [Annex B: Fallout Risk, Statistics and Maps](#) (6.1 MB PDF file)
