

Enterprise Software Agreements Listed Below

The **Enterprise Software Initiative (ESI)** is a Department of Defense (DoD) initiative to streamline the acquisition process and provide best-priced, standards-compliant information technology (IT). The ESI is a business discipline used to coordinate multiple IT investments and leverage the buying power of the government for commercial IT products and services. By consolidating IT requirements and negotiating Enterprise Agreements with software vendors, the DoD realizes significant Total Cost of Ownership (TCO) savings in IT acquisition and maintenance. The goal is to develop and implement a process to identify, acquire, distribute and manage IT from the enterprise level.

In September 2001, the ESI was approved as a "quick hit" initiative under the DoD Business Initiative Council (BIC). Under the BIC, the ESI will become the benchmark acquisition strategy for the licensing of commercial software and will extend a Software Asset Management Framework across the DoD. Additionally, the ESI was incorporated into the Defense Federal Acquisition Regulation Supplement (DFARS) Section 208.74 on Oct. 25, 2002, and DoD Instruction 500.2 in May 2003.

Unless otherwise stated authorized ESI users include all DoD components, and their employees including Reserve component (Guard and Reserve) and the U.S. Coast Guard mobilized or attached to DoD; other government employees assigned to and working with DoD; nonappropriated funds instrumentalities such as NAFI employees; Intelligence Community (IC) covered organizations to include all DoD Intel System member organizations and employees, but not the CIA nor other IC employees unless they are assigned to and working with DoD organizations; DoD contractors authorized in accordance with the FAR; and authorized Foreign Military Sales.

For more information on the ESI or to obtain product information, visit the ESI Web site at <http://www.don-imit.navy.mil/esi>.

Special Note to Navy Users: The Department of the Navy (DON) established a Navy Shore-Based Oracle Database Enterprise License Agreement that was implemented Oct. 1, 2004 effective through Sept. 30, 2013, to provide Navy shore-based organizations the right to use the Oracle databases. This agreement is managed by the Space and Naval Warfare Systems Center (SPAWARSYSCEN) San Diego DON Information Technology (IT) Umbrella Program Office. This agreement consolidated existing and new Oracle Database software licenses and maintenance under a single contractual vehicle and procured the rights to use for authorized users. All DON General Fund and Working Capital activities are covered, with an exception of Marine Corps activities. Marine Corps activities are currently covered by a separate Marine Corps-wide Oracle database agreement.

Authorized users at covered activities include all Navy active duty, reserve and civilian shore-based billets not assigned to a ship. On-site and off-site contractors who access Navy systems for the purpose of supporting Navy shore-based operations are also covered. This Navy Shore-Based Oracle Database Enterprise License Agreement provides significant benefits including substantial cost avoidance for the Department. It facilitates the goal of net-centric operations by allowing all shore personnel to access Oracle databases, permitting the sharing of authoritative data across the shore-based enterprise. The agreement has a priced option that, if exercised, will enable the Department to extend these benefits to the afloat Navy. Activities covered by this license agreement shall not enter into separate Oracle database agreements or procure additional Oracle database licenses outside this central agreement whenever Oracle is selected as the database. This prohibition includes software maintenance that is acquired:

- a. as part of a system or system upgrade, including Application Specific Full Use (ASFU) licenses;
- b. under a service contract;
- c. under a contract or agreement administered by another agency, such as an interagency agreement;
- d. under a Federal Supply Schedule contract or blanket purchase agreement established in accordance with FAR 8.404(b)(4); or
- e. by a contractor that is authorized to order from a Government supply source pursuant to FAR 51.101.

This policy has been coordinated with the Office of the Assistant Secretary of the Navy (Financial Management and Comptroller), Office of Budget.

Netscape Products

Netscape Products - Netscape Communicator Client and a number of the Netscape Server products for use across DoD. Available for download at no cost. Customers must choose between the commercial version and the Defense Information Infrastructure Common Operating Environment (DII COE) Segmented Versions.

Licensed software products available from the Defense Information Systems Agency (DISA) are commercial versions of the software, not the segmented versions that are compliant with the DII COE standards. The segmented versions of the software are required for development and operation of applications associated with the DII COE, the Global Command and Control System (GCCS) or the Global Combat Support System (GCSS).

If your intent is to use a licensed product available for download from the DoD Download site to support development or operation of an application associated with the DII COE, GCCS or GCSS, you must go to one of the Web sites listed below to obtain the DII COE segmented version of the software. You may not use the commercial version available from the DoD Download site.

If you are not sure which version (commercial or segmented) to use, we strongly encourage you to refer to the Web sites listed below for additional information to help you to make this determination before you obtain the software from the DoD Download site.

CHIPS Article Submission Guidelines

CHIPS welcomes articles from our readers. Submit articles via e-mail as Microsoft Word or .txt file attachments to chips@navy.mil or by mail to Editor, CHIPS, SSC Charleston, 9456 Fourth Ave, Norfolk, VA 23511-2130. If submitting your article by mail, please send the article on disc with a printed copy. To discuss your article with a CHIPS editor, call (757) 444-8704 or DSN 564-8704.

Relate the subject matter of your article to information technology (IT) and how IT is helping to accomplish your command mission, improve services, perform a task or automate or enhance a process. Provide lessons learned from your experience. Our motto states: "CHIPS: Dedicated to Sharing Information, Technology, Experience." The theme of your article should meet the intent of our motto.

An article is more interesting when you can convey a personal experience; it is also easier to read. When writing use active rather than passive voice. Avoid technical terms that only a few readers would understand. Write out the full name or title before using an acronym the first time; thereafter, use only the acronym. But avoid using a myriad of acronyms throughout your article since they can be confusing to the reader.

Articles may contain illustrations. Photos and illustrations are acceptable in .jpeg, .gif, .tif or .eps formats. Do not embed photos or images in your MS Word document, please send them as separate file attachments. Make sure photos and illustrations add value to your article and are mentioned in the text. Please do not use Web-based or MS PowerPoint graphics because they do not have a high enough resolution to reproduce clear, quality illustrations in publication. Please save graphic files with a resolution of 300 dpi.

Submit your article to your public affairs officer and chain of command for release authority before you submit your article to CHIPS.

While we do not require a standard length for articles, we prefer articles one to two pages in length. Typically, one magazine page equals two and a half pages of typed text using a standard 12-point font or approximately 700-1,000 words. (Suggest applying the word count feature in Microsoft Word to check your article length.)

We reserve the right to edit articles, a necessary step in the production process. Our goal is to enhance your style, not change it. We use the Associated Press Stylebook and guidance from the Chief of Navy Information for editorial management.

The following information is provided to help you understand our production process. We have subject matter experts on staff, who review each article for technical accuracy. We may make changes to your article to conform to magazine production guidelines and the CHIPS style manual and format. If an article requires extensive changes equating to a major rewrite, we will contact you.

CHIPS is published quarterly. Our deadline dates are: Feb. 1, April 1, Aug, 1 and Oct. 1.

Thank you for your interest in CHIPS magazine.
