The Case for Change

The federal government is on a “burning platform,” and the status quo way of doing business is unacceptable for a variety of reasons, including:

- Past fiscal trends and significant long-range challenges
- Selected trends and challenges having no boundaries
- Additional resource demands due to Iraq, Afghanistan, incremental homeland security needs, and recent natural disasters in the United States
- Numerous government performance/accountability and high risk challenges
- Outdated federal organizational structures, policies, and practices
- Rising public expectations for demonstrable results and enhanced responsiveness
Composition of Federal Spending

1966
- Defense: 34%
- Social Security: 15%
- Net interest: 7%
- All other spending: 43%
- Medicare & Medicaid: 1%

1986
- Defense: 29%
- Social Security: 14%
- Net interest: 10%
- All other spending: 28%
- Medicare & Medicaid: 20%

2006
- Defense: 32%
- Social Security: 19%
- Net interest: 9%
- All other spending: 21%
- Medicare & Medicaid: 20%

aAll other spending is net of offsetting interest receipts.
Potential Fiscal Outcomes
Under Alternative Simulation
Revenues and Composition of Spending as a Share of GDP

Source: GAO’s August 2007 analysis.

Notes: AMT exemption amount is retained at the 2006 level through 2017 and expiring tax provisions are extended. After 2017, revenue as a share of GDP returns to its historical level of 18.3 percent of GDP plus expected revenues from deferred taxes, i.e., taxes on withdrawals from retirement accounts. Medicare spending is based on the Trustees April 2007 projections adjusted for the Centers for Medicare and Medicaid Services alternative assumption that physician payments are not reduced as specified under current law.
Growth in Spending for Social Security, Medicare, and Medicaid Expected to Outpace Economic Growth

Federal Tax Expenditures Exceeded Discretionary Spending for Half of the Last Decade

Dollars in billions (in 2006 dollars)

Fiscal Year

- Mandatory spending excluding net interest
- Sum of tax expenditure revenue loss estimates
- Discretionary spending

Note: Summing tax expenditure estimates does not take into account interactions between individual provisions. Outlays associated with refundable tax credits are included in mandatory spending.
Revenue Loss Estimates for the Largest Tax Expenditures Reported for Fiscal Year 2006

Revenue loss estimates (dollars in billions)

187.5
62.5
125
89.8\(^{a}\)
68.3
48.6
43.1

- Exclusion of employer contributions for medical insurance premiums and medical care
- Net exclusion of employer-sponsored pension contributions and earnings
- Deductibility of mortgage interest on owner-occupied homes
- Capital gains (except agriculture, timber, iron ore, and coal)
- Deductibility of nonbusiness states and local taxes other than on owner-occupied homes

\(^{a}\)The value of employer-provided health insurance is excluded from Medicare and Social Security payroll taxes. Some researchers have estimated that payroll tax revenue losses amounted to more than half of the income tax revenue losses in 2004, and we use this estimate for 2006. The research we are aware of dealt only with health care, therefore the 50 percent figure may not apply to other items that are excluded from otherwise applicable income and payroll taxes.
State and Local Governments Face Increasing Fiscal Challenges

**Percent of GDP**

Operating Surplus/Deficit Measure

Net-lending/Net-Borrowing

Current Fiscal Policy Is Unsustainable

- The “Status Quo” Is Not an Option
  - We face large and growing structural deficits largely due to known demographic trends and rising health care costs
  - GAO’s simulations show that balancing the budget in 2040 could require actions as large as
    - Cutting total federal spending by 60 percent or
    - Raising federal taxes to two times today's level

- Faster Economic Growth Can Help, but It Cannot Solve the Problem
  - Closing the current long-term fiscal gap based on reasonable assumptions would require real average annual economic growth in the double-digit range every year for the next 75 years
  - During the 1990s, the economy grew at an average 3.2 percent per year
  - As a result, we cannot simply grow our way out of this problem. Tough choices will be required
The Way Forward: A Three-Pronged Approach

1. Improve Financial Reporting, Public Education, and Performance Metrics

2. Strengthen Budget and Legislative Processes and Controls

3. Fundamentally Reexamine & Transform for the 21st Century (i.e., entitlement programs, other spending, and tax policy)

Solutions Require Active Involvement from both the Executive and Legislative Branches

- Improve transparency & completeness of President’s budget proposal:
  - Return to 10-year estimates in budget both for current policies and programs and for policy proposals
  - Include in the budget estimates of long-term cost of policy proposals & impact on total fiscal exposures.
  - Improve transparency of tax expenditures
- Consider requiring President’s budget to specify & explain a fiscal goal and a path to that goal within 10-year window—or justify an alternative deadline
- Require annual OMB report on existing fiscal exposures [liabilities, obligations, explicit & implied commitments]
- Require enhanced financial statement presentation to address fiscal sustainability and intergenerational equity issues
- Prepare and distribute a summary annual report that is both useful and used
- Increase information on long-range fiscal sustainability issues in Congressional Budget Resolution & Budget Process.
- Develop key national (outcome-based) indicators (e.g. economic, security, social, environmental) to chart the nation’s posture, progress, and position relative to the other major industrial countries
The Way Forward: Strengthen Budget and Legislative Processes and Controls

- Restore discretionary spending caps & PAYGO rules on both spending and tax sides of the ledger
- Develop mandatory spending triggers [with specific defaults], and other action-forcing provisions (e.g., sunsets) for both direct spending programs and tax preferences
- Develop, impose & enforce modified rules for selected items (e.g., earmarks, emergency designations, and use of supplementals)
- Require long-term cost estimates (e.g., present value) for any legislative debate on all major tax and spending bills, including entitlement programs. Cost estimates should usually assume no sunset
- Extend accrual budgeting to insurance & federal employee pensions; develop techniques for extending to retiree health & environmental liabilities
- Consider biennial budgeting
- Consider expedited line item rescissions from the President that would only require a majority vote to override the proposed rescission(s)
The Way Forward: 
Fundamentally Reexamine & Transform

- Restructure existing entitlement programs
- Reexamine and restructure the base of all other spending
- Review & revise existing tax policy, including tax preferences and enforcement programs
- Expand scrutiny of all proposed new programs, policies, or activities
- Reengineer internal agency structures and processes, including more emphasis on long-term planning, integrating federal activities, and partnering with others both domestically and internationally
- Strengthen and systematize Congressional oversight processes
- Increase transparency associated with government contracts and other selected items
- Consider a capable, credible, bi-partisan budget, entitlement, and tax reform commission
Key National Indicators

- **WHAT**: A portfolio of economic, social, and environmental outcome-based measures that could be used to help assess the nation’s and other governmental jurisdictions’ position and progress

- **WHO**: Many countries and several states, regions, and localities have already undertaken related initiatives (e.g., Australia; New Zealand; Canada; United Kingdom; Oregon; Silicon Valley (California); Jacksonville (Florida); Boston (Massachusetts))

- **WHY**: Development of such a portfolio of indicators could have a number of possible benefits, including
  - Serving as a framework for related strategic planning efforts
  - Enhancing performance and accountability reporting
  - Informing public policy decisions, including much needed baseline reviews of existing government policies, programs, functions, and activities
  - Facilitating public education and debate as well as an informed electorate

- **WAY FORWARD**: Key players working through a consortium within a nonprofit organization receiving technical assistance from the National Academies domestically and OECD and others providing assistance internationally on related efforts
The United States may be the only superpower, but compared to most other OECD countries on selected key economic, social, and environmental indicators, on average, the U.S. ranks

</tr>
<tr>
<td>2042</td>
<td>Trust fund exhausted</td>
</tr>
</tbody>
</table>

Possible Way Forward on Social Security Reform

Make little or no changes to those who are near retirement or already retired and make a number of adjustments that would affect younger workers:

- Phase-in an increase in the **normal** retirement age and index it to life expectancy
- Consider phasing-in an increase in the **early** retirement age and index it to life expectancy with a modified disability access provision
- Modify income replacement and/or indexing formulas for middle and upper income earners
- Strengthen the minimum benefit
- Consider a modest adjustment to the COLA formula
- Increase the taxable wage base, if necessary
- Consider supplemental individual accounts and mandatory individual savings on a payroll deduction basis (e.g., a minimum 2 percent payroll contribution and a program designed much like the Federal Thrift Savings Plan with a real trust fund and real investments)
<table>
<thead>
<tr>

<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>2007</td>
<td>Medicare Part A outlays exceed cash income</td>
</tr>
<tr>
<td>2007</td>
<td>“Medicare funding warning” triggered</td>
</tr>
<tr>
<td>2013</td>
<td>Projected date that annual “general revenue funding” for Part B will exceed 45 percent of total Medicare outlays</td>
</tr>
<tr>
<td>2019</td>
<td>Part A trust fund exhausted, annual income sufficient to pay about 80% of promised Part A benefits</td>
</tr>
</tbody>
</table>

The public needs to be educated about the differences between wants, needs, affordability, and sustainability at both the individual and aggregate level.

Ideally, health care reform proposals will:

- **Align Incentives** for providers and consumers to make prudent decisions about the use of medical services,

- **Foster Transparency** with respect to the value and costs of care, and

- **Ensure Accountability** from insurers and providers to meet standards for appropriate use and quality.

Ultimately, we need to address four key dimensions: access, cost, quality, and personal responsibility.
### Selected Potential Health Care Reform Approaches

<table>
<thead>
<tr>
<th>Reform Approach</th>
<th>Short-term action</th>
<th>Long-term action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revise the government’s payment systems and leverage its purchasing authority to foster value-based purchasing for health care products and services</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Consider additional flexibility for states to serve as models for possible health care reforms</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Consider limiting direct advertising and allowing limited importation of prescription drugs</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Foster more transparency in connection with health care costs and outcomes</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Create incentives that encourage physicians to utilize prescription drugs and other health care products and services economically and efficiently</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Foster the use of information technology to increase consistency, transparency, and accountability in health care</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Encourage case management approaches for people with chronic and expensive conditions to improve the quality and efficiency of care delivered and avoid inappropriate care</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td>Reexamine the design and operational structure of the nation’s health care entitlement programs—Medicare and Medicaid, including exploring more income-related approaches</td>
<td>✔</td>
<td>✔</td>
</tr>
</tbody>
</table>
## Selected Potential Health Care Reform Approaches

<table>
<thead>
<tr>
<th>Reform Approach</th>
<th>Short-term action</th>
<th>Long-term action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revise certain federal tax preferences for health care to encourage more efficient use of health care products and services.</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td>Foster more preventative care and wellness services and capabilities, including fighting obesity and encouraging better nutrition</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td>Promote more personal responsibility in connection with health care</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td>Limit spending growth for government-sponsored health care programs (e.g., percentage of the budget and/or economy)</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>Develop a core set of basic and essential services. Create insurance pools for alternative levels of coverage, as necessary</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>Develop a set of evidence-based national practice standards to help avoid unnecessary care, improve outcomes, and reduce litigation</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>Pursue multinational approaches to investing in health care R&amp;D</td>
<td>✓</td>
<td></td>
</tr>
</tbody>

Moving the Debate Forward

• The Sooner We Get Started, the Better
  • The miracle of compounding is currently working against us
  • Less change would be needed, and there would be more time to make adjustments
  • Our demographic changes will serve to make reform more difficult over time

• Need Public Education, Discussion, and Debate
  • The role of government in the 21st Century
  • Which programs and policies should be changed and how
  • How government should be financed
Three Key Illnesses

- Myopia
- Tunnel Vision
- Self-Centeredness
Four National Deficits
