Central Asia: Regional Developments and Implications for U.S. Interests

Summary

After the collapse of the Soviet Union in 1991, the United States recognized the independence of all the former Central Asian republics, supported their admission into Western organizations, and elicited Turkish support to counter Iranian influence in the region. Congress was at the forefront in urging the formation of coherent U.S. policies for aiding these and other Eurasian states of the former Soviet Union.

Soon after the terrorist attacks on America on September 11, 2001, all the Central Asian states offered overflight and other support to coalition anti-terrorist efforts in Afghanistan. Kyrgyzstan, Tajikistan, and Uzbekistan hosted coalition troops and provided access to airbases. In 2003, Kazakhstan and Uzbekistan endorsed coalition military action in Iraq, and Kazakhstan provided about two dozen troops for rebuilding. After September 11, U.S. policy emphasized bolstering the security of the Central Asian states to help them combat terrorism, proliferation, and arms trafficking. Other strategic U.S. objectives include promoting democratization, free markets, human rights, and energy development. Administration policy also aims to integrate these states into the international community so that they follow responsible security and other policies, and to discourage the growth of xenophobic, fundamentalist, and anti-Western orientations that threaten peace and stability.

The Administration's diverse goals in Central Asia reflect the differing characteristics of these states. U.S. interests in Kazakhstan include securing and eliminating Soviet-era nuclear and biological weapons materials and facilities. In Tajikistan, U.S. aid focuses on economic reconstruction. U.S. energy firms have invested in oil and natural gas development in Kazakhstan and Turkmenistan. U.S. relations with Uzbekistan suffered following the Uzbek government's violent crackdown on armed and unarmed protesters in the city of Andijon in May 2005.

Some observers call for different emphases or levels of U.S. involvement in the region. There are differing views on whether to strengthen or weaken conditions linking aid to progress in improving human rights and making adequate progress in democratization and the creation of free markets. There is debate regarding the importance of energy resources in the region to U.S. national security and about whether the risks posed by civil and ethnic tensions in the region outweigh the benefits of U.S. involvement. There are questions about whether U.S. military access will be needed after Afghanistan becomes more stable. Heightened congressional interest in Central Asian (and South Caucasian) states was reflected in passage of "Silk Road" language in 1999 (P.L. 106-113) authorizing enhanced U.S. policy attention and aid to support conflict amelioration, humanitarian needs, economic development, transport (including energy pipelines) and communications, border controls, democracy, and the creation of civil societies in these countries.

Central Asia: Regional Developments and Implications for U.S. Interests

Most Recent Developments

Assistant Secretary of State Richard Boucher visited Uzbekistan in early August 2006. He reported that the U.S. goal was to explore “actions that are needed to try and rebuild trust,” despite “strong differences” between the United States and Uzbekistan on human rights issues. In late August 2006, an article appeared on an Uzbek government website accusing unnamed “U.S. strategists” of planning the May 2005 insurrection in Andijon, Uzbekistan, in order to “destabilize” Central Asia, Russia, and China. These “strategists” also allegedly hoped that a resulting flood of drugs from Central Asia would destabilize Europe, eliminating this U.S. “economic competitor.” At the end of August, Uzbek authorities closed down the U.S.-based Partnership in Academics and Development, a non-governmental organization (NGO) that provides small loans to farmers, trains journalists, and sponsors business education, accusing it of illegal Christian proselytizing. During 2006, Uzbekistan has closed down other U.S.-based NGOs, including the Urban Institute, Winrock International, the Eurasia Foundation, Freedom House, the International Research and Exchanges Board, the American Bar Association, Counterpart International, Radio Free Europe/Radio Liberty, and the American Council for Collaboration in Education and Language Study (ACCELS).

Kazakhstan’s President Nursultan Nazarbayev reportedly will visit the United States in late September 2006.

Historical Background

Central Asia consists of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan; it borders Russia, China, the Middle East, and South Asia. The major peoples of all but Tajikistan speak Turkic languages (the Tajiks speak an Iranian language); and most are Sunni Muslims (some Tajiks are Shiia Muslims). Most are closely related historically and culturally. By the late 19th century, Russian tsars had conquered the last independent khanates and nomadic lands of Central Asia. By the early 1920s, Soviet power had been imposed; by 1936, five “Soviet Socialist Republics” had been created. Upon the collapse of the Soviet Union in December 1991, they gained independence.¹

Central Asia: Basic Facts
<p>Total Area: 1.6 million sq. mi., larger than India; Kazakhstan: 1.1 m. sq. mi.; Kyrgyzstan: 77,000 sq. mi.; Tajikistan: 55,800 sq. mi.; Turkmenistan: 190,000 sq. mi.; Uzbekistan: 174,500 sq. mi.</p> <p>Total Population: 59.4 million, slightly less than France; Kazakhstan: 15.2 m.; Kyrgyzstan: 5.1 m.; Tajikistan: 7.2 m.; Turkmenistan: 5.0 m.; Uzbekistan: 26.9 m. (2005 est., <i>CIA World Factbook</i>).</p> <p>Total Gross Domestic Product: \$223.6 billion in 2005; per capita GDP is about \$3,900; poverty is rampant. Kazakhstan: \$133.2 b.; Kyrgyzstan: \$9.3 b.; Tajikistan: \$8.8 b.; Turkmenistan: \$29.4 b.; Uzbekistan: \$52.2 b. (<i>CIA Factbook</i>, purchasing power parity).</p>

Overview of U.S. Policy Concerns

After the collapse of the Soviet Union at the end of 1991, then-President George H.W. Bush sent the “FREEDOM Support Act” (FSA) to Congress, which was amended and signed into law in October 1992 (P.L. 102-511). In 1999, congressional concerns led to passage of the “Silk Road Strategy Act” authorizing language (P.L. 106-113) calling for enhanced policy and aid to support conflict amelioration, humanitarian needs, economic development, transport and communications, border controls, democracy, and the creation of civil societies in the South Caucasus and Central Asia.

U.S. policymakers and others hold various views on the types and levels of U.S. involvement in the region. Some argue that ties with “energy behemoth” Kazakhstan are crucial to U.S. interests.² At least until recently, others argued that Uzbekistan is the “linchpin” of the region (it is the most populous regional state and is centrally located, shaping the range and scope of regional cooperation) and should receive the most U.S. attention. In general, however, U.S. aid and investment are viewed as strengthening the independence of the Central Asian states and forestalling Russian, Chinese, Iranian, or other efforts to subvert them. Such advocates argue that political turmoil and the growth of terrorist enclaves in Central Asia could produce spillover effects both in nearby states, including U.S. allies and friends such as Turkey, and worldwide. They also argue that the United States has a major interest in preventing terrorist regimes or groups from illicitly acquiring Soviet-era technology for making weapons of mass destruction (WMD). They maintain that U.S. interests do not perfectly coincide with those of its allies and friends, that Turkey and other actors possess limited aid resources, and that the United States is in the strongest position as the sole superpower to influence democratization and respect for human rights. They stress that such U.S. influence will help alleviate social tensions exploited by Islamic extremist groups to gain adherents. They also argue that for all these reasons, the United States should maintain military access to the region even when Afghanistan becomes more stable.

² U.S. Department of State. Office of the Spokesman. *Remarks: Secretary of State Condoleezza Rice At Eurasian National University*, October 13, 2005. Perhaps indicative of the boosted emphasis on U.S. interests in Kazakhstan, Secretary Rice argued that the country has the potential to be the “engine for growth” in Central Asia and the pacesetter for regional trade and other ties with South Asia. See also National Committee on American Foreign Policy, *Stability in Central Asia: Engaging Kazakhstan*, May 2005.

Some views of policymakers and academics who previously objected to a more forward U.S. policy toward Central Asia appeared less salient after September 11, 2001, but aspects of these views could gain more credence if Afghanistan becomes more stable. These observers argued that the United States historically had few interests in this region and that developments there remained largely marginal to U.S. interests. They discounted fears that anti-Western Islamic extremism would make enough headway to threaten secular regimes or otherwise harm U.S. interests. At least until the coup in Kyrgyzstan in March 2005 (see below, *Democratization*), these observers argued that the United States should not try to foster democratization among cultures they claimed are historically attuned to authoritarianism. Some observers reject arguments that U.S. interests in anti-terrorism, non-proliferation, regional cooperation, and trade outweigh concerns over democratization and human rights, and urge reducing or cutting off most aid to repressive states. A few observers point to instability in the region as a reason to eschew deeper U.S. involvement such as military access that might needlessly place more U.S. personnel and citizens in danger.

Post-September 11 and Afghanistan. Since the terrorist attacks on the United States on September 11, 2001, the Administration has stated that U.S. policy toward Central Asia focuses on the promotion of security, domestic reforms, and energy development. According to then-Deputy Assistant Secretary of State B. Lynn Pascoe in testimony in June 2002, the September 11 attacks led the Administration to realize that “it was critical to the national interests of the United States that we greatly enhance our relations with the five Central Asian countries” to prevent them from becoming harbors for terrorism.³ After September 11, 2001, all the Central Asian states soon offered overflight and other assistance to U.S.-led anti-terrorism efforts in Afghanistan. The states were predisposed to welcome such operations. Tajikistan and Uzbekistan had long supported the Afghan Northern Alliance’s combat against the Taliban, and all the Central Asian states feared Afghanistan as a base for terrorism, crime, and drug trafficking (even Turkmenistan, which tried to reach some accommodation with the Taliban). In 2005, however, Uzbekistan rescinded its basing agreement with the United States (see also below, *Security*).

Support for Operation Iraqi Freedom. Uzbekistan was the only Central Asian state that joined the “coalition of the willing” in February-March 2003 that endorsed prospective U.S.-led coalition military operations in Iraq (Kazakhstan joined later). Uzbekistan subsequently decided not to send troops to Iraq, but Kazakhstan has deployed some two dozen troops to Iraq who are engaged in demining and water purification. Recently, Central Asian populations reportedly have raised increased concerns about the deaths of Muslim civilians in Iraq and as a result of Israeli-Hezbollah fighting.

Fostering Pro-Western Orientations

The United States has encouraged the Central Asian states to become responsible members of the international community, supporting integrative goals through bilateral aid and through coordination with other aid donors. The stated policy goal is to discourage radical anti-democratic regimes and terrorist groups from gaining influence. All the Central Asian leaders publicly embrace Islam but display hostility toward Islamic fundamentalism. At the same time, they have established some trade and aid ties with Iran. Although they have had greater success in attracting development aid from the West than from the East, some observers argue that, in the long run, their foreign policies may not be anti-Western but may more closely reflect some concerns of other Islamic states.⁴

The State Department in 2006 included Central Asia in a revamped Bureau of South and Central Asian Affairs. According to Principal Deputy Assistant Secretary of State Steven Mann, “institutions such as NATO and the OSCE will continue to draw the nations of Central Asia closer to Europe and the United States,” while the United States also will encourage the states to develop “new ties and synergies with nations to the south,” such as Afghanistan, India, and Pakistan.⁵

Russia’s Role

During most of the 1990s, U.S. administrations generally viewed a democratizing Russia as serving as a role model in Central Asia. Despite growing authoritarian tendencies in Russia since Vladimir Putin became its president in 2000, the Bush Administration has emphasized that Russia’s counter-terrorism efforts in the region broadly support U.S. interests. At the same time, the United States long has stressed to Russia that it should not seek to dominate the region or exclude Western and other involvement. Virtually all U.S. analysts agree that Russia’s actions should be monitored to ensure that the independence of the Central Asian states is not threatened.

Soon after the terrorist attacks on the United States on September 11, 2001, Russia acquiesced to increased U.S. and coalition presence in the region for operations against Al Qaeda and its supporters in Afghanistan. Besides Russia’s own concerns about Islamic extremism in Afghanistan and Central Asia, it was interested in boosting its economic and other ties to the West and regaining some influence in Afghanistan. More recently, however, Russia has appeared to step up efforts to counter U.S. influence in Central Asia by advocating that the states increase economic and strategic ties with Russia and limit such ties with the United States. Such a stance appears paradoxical to some observers, since Russia (and China)

benefit from anti-terrorism operations carried out by U.S. and coalition forces in Afghanistan.

During the 1990s, Russia's economic decline and demands by Central Asia caused it to reduce its security presence, a trend that President Putin has appeared to retard or reverse. In 1999, Russian border guards were largely phased out in Kyrgyzstan, the last Russian military advisors left Turkmenistan, and Uzbekistan withdrew from the Collective Security Treaty (CST) of the Commonwealth of Independent States (CIS), in part because the treaty members failed to help Uzbekistan meet the growing Taliban threat in Afghanistan, according to Karimov. However, Russia has appeared determined to maintain a military presence in Tajikistan. It long retained about 14,500 Federal Border Guards in Tajikistan, most of whom were Tajik conscripts, and 7,800 Russian troops of the 201st motorized rifle division.⁶

Russia's efforts to formalize a basing agreement with Tajikistan dragged on for years, as Tajikistan endeavored to maximize rents and assert its sovereignty. In October 2004, the basing agreement was signed, formalizing Russia's largest military presence abroad, besides its Black Sea Fleet. At the same time, Tajikistan demanded full control over border policing. Russia announced in June 2005 that it had handed over the last guard-house along the Afghan-Tajik border to Tajik troops. The U.N. Office on Drugs and Crime reported in early 2006 that the amount of heroin seized in Tajikistan during 2005 had declined, perhaps in part because of complications during the phase-in of full border control by Tajikistan. Tajik President Rakhmanov and others emphasize that growing drug production and trafficking from Afghanistan pose increasing challenges.⁷

In a seeming shift toward a more activist role in Central Asia, in April 2000, Russia called for the members of the CST to approve the creation of rapid reaction forces to combat terrorism and hinted that such forces might launch pre-emptive strikes on Afghan terrorist bases. These hints elicited U.S. calls for Russia to exercise restraint and consult the U.N. Presidents Clinton and Putin agreed in 2000 to set up a working group to examine Afghan-related terrorism (this working group now examines global terrorism issues). CST members agreed in 2001 to set up a Central Asian rapid reaction force headquartered in Kyrgyzstan, with Russia's troops in Tajikistan comprising most of the force. CIS members in 2001 also approved setting up an Anti-Terrorism Center (ATC) in Moscow, with a branch in Kyrgyzstan, giving Russia influence over regional intelligence gathering.

Committee on International Relations. Subcommittee on the Middle East and Central Asia. U.S. Policy in Central Asia: Balancing Priorities. *Testimony of Richard A. Boucher, Assistant Secretary of State for South and Central Asian Affairs*, April 26, 2006. According to the EU's European Law Enforcement Organization, about 20% of the Afghan drugs that reach Europe are smuggled through Central Asia. *APA News Service*, May 31, 2006.

Perhaps to counteract the U.S.-led military coalition presence in Kyrgyzstan established after the September 11, 2001, attacks (see below), Russia in September 2003 signed a 15-year military basing accord with Kyrgyzstan providing access to the Kant airfield, near Kyrgyzstan's capital of Bishkek.⁸ The nearly two dozen Russian aircraft and several hundred troops at the base also serve as part of the Central Asian rapid reaction force. The base is a few miles from the U.S.-led coalition's airbase. Taking advantage of Uzbekistan's souring relations with many Western countries (see below), Russia signed a Treaty on Allied Relations with Uzbekistan in November 2005 that calls for mutual defense consultations in the event of a threat to either party (similar to language in the CST). Uzbekistan renewed or reaffirmed its status as a signatory of the CST in June 2006, consolidating its strategic security ties with Russia. The member-states of the CST agreed in June 2006 that basing agreements by any member with a third party had to be approved by all members, in effect providing supreme veto power to Russia over such future basing arrangements.

Pointing to the deterioration of U.S.-Uzbek ties, many observers suggest that the appreciative attitude of Central Asian states toward the United States — for their added security accomplished through U.S.-led actions in Afghanistan — has declined over time. Reasons may include perceptions that the United States has not provided adequate security or economic assistance and growing concerns among the authoritarian leaders that the United States advocates democratic “revolutions” to replace them. Also, Russia is pledging security support to the states to get them to forget their pre-September 11, 2001, dissatisfaction with its support. Russia also encourages the leaders to believe that the United States backs democratic “revolutions” to replace them.

Russia's economic interests in Central Asia are being reasserted as its economy improves and may constitute its most effective lever of influence. Russia seeks to counter Western business and gain substantial influence over energy resources through participation in joint ventures and by insisting that pipelines cross Russian territory. After an Energy Cooperation Statement was signed at the May 2002 U.S.-Russia summit, it appeared that Russia would accept a Western role in the Caspian region, including construction of the Baku-Tbilisi-Ceyhan (BTC) oil pipeline. Subsequently, however, Russian officials tried (unsuccessfully) to persuade Kazakhstan not to commit to use the BTC pipeline.

⁸ In contrast to the U.S. airbase at Manas, the Russians at Kant have no lease payments and utilities are provided gratis. In June 2006, Vladimir Mikhaylov, the head of Russia's Air Force, reportedly proclaimed that “Russians will stay at the Kant airbase forever.” *Russian Military Review*, March 31, 2006.

Obstacles to Peace and Independence: Regional Tensions and Conflicts

The legacies of co-mingled ethnic groups, convoluted borders, and emerging national identities pose challenges to stability in all the Central Asian states. Emerging national identities compete with those of the clan, family, region, and Islam. Central Asia's convoluted borders fail to accurately reflect ethnic distributions and are hard to police, hence contributing to regional tensions. Ethnic Uzbeks make up sizeable minorities in the other Central Asian countries and Afghanistan. In Tajikistan, they make up almost a quarter of the population. More ethnic Turkmen reside in Iran and Afghanistan — over three million — than in Turkmenistan. Sizeable numbers of ethnic Tajiks reside in Uzbekistan, and seven million in Afghanistan. Many Kyrgyz and Tajiks live in China's Xinjiang province. The fertile Ferghana Valley is shared by Tajikistan, Kyrgyzstan, and Uzbekistan. The central governments have struggled to gain control over administrative subunits. Most observers agree that the term "Central Asia" currently denotes a geographic area more than a region of shared identities and aspirations, although it is clear that the land-locked, poverty-stricken, and sparsely-populated region will need more integration in order to develop.

Regional cooperation remains stymied by tensions among the states. Such tensions continue to exist despite the membership of the states in various cooperation groups such as the CST Organization, the Shanghai Cooperation Organization (SCO), and NATO's Partnership for Peace (PFP). The CST was signed by Russia, Belarus, the South Caucasus countries, and the Central Asian states (except Turkmenistan) in May 1992 and called for military cooperation and joint consultations in the event of security threats to any member. Of ten-years duration, at the time of its renewal in 1999, Uzbekistan, Georgia, and Azerbaijan formally withdrew. The remaining members formed the CST Organization (CSTO) in late 2002, and a secretariat opened in Moscow at the beginning of 2004. Through the CSTO, Russia has attempted to involve the members in joint support for the Central Asian rapid reaction forces and joint efforts to combat international terrorism and drug trafficking.⁹ In 1996, Russia, Kazakhstan, Kyrgyzstan, and Tajikistan signed the "Shanghai treaty" with China pledging the sanctity and substantial demilitarization of mutual borders, and in 1997 they signed a follow-on treaty demilitarizing the 4,300 mile former Soviet-Chinese border. China has used the treaty to pressure the Central Asian states to deter their ethnic Uighur minorities from supporting separatism in China's Xinjiang province, and to get them to extradite Uighurs fleeing China. In 2001, Uzbekistan joined the group, re-named the SCO, and in 2003 the SCO Anti-Terrorism Center was established there.

The 1992-1997 Civil War in Tajikistan

Tajikistan was among the Central Asian republics least prepared and inclined toward independence when the Soviet Union broke up. In September 1992, a loose

⁹ Roger N McDermott, Collective Security Group Reinvents Itself in a New World, *Eurasia Insight*, August 28, 2002.

coalition of nationalist, Islamic, and democratic parties and groups tried to take power. Kulyabi and Khojenti regional elites, assisted by Uzbekistan and Russia, launched a successful counteroffensive that by the end of 1992 had resulted in 20,000-40,000 casualties and up to 800,000 refugees or displaced persons, about 80,000 of whom fled to Afghanistan. After the two sides agreed to a cease-fire, the U.N. Security Council established a small U.N. Mission of Observers in Tajikistan (UNMOT) in December 1994. In June 1997, Tajik President Emomali Rakhmanov and rebel leader Seyed Abdullo Nuri signed a *comprehensive peace agreement*. Benchmarks of the peace process were largely met, and UNMOT pulled out in May 2000. The United States has pledged to help Tajikistan rebuild. Some observers point to events in the city of Andijon in Uzbekistan (see below) as indicating that conflicts similar to the Tajik civil war could engulf other regional states where large numbers of people are disenfranchised and poverty-stricken.

The 1999 and 2000 Incursions into Kyrgyzstan

Several hundred Islamic extremists and others first invaded Kyrgyzstan in July-August 1999. Jama Namanganiy, the co-leader of the Islamic Movement of Uzbekistan (IMU; see below), headed the largest guerrilla group. They seized hostages and several villages, allegedly seeking to create an Islamic state in south Kyrgyzstan as a springboard for a jihad in Uzbekistan.¹⁰ With Uzbek and Kazakh air and other support, Kyrgyz forces forced the guerrillas out in October 1999. Dozens of IMU and other insurgents again invaded Kyrgyzstan and Uzbekistan in August 2000. Uzbekistan provided air and other support, but Kyrgyz forces were largely responsible for defeating the insurgents by late October 2000. The IMU did not invade the region in the summer before September 11, 2001, in part because bin Laden had secured its aid for a Taliban offensive against the Afghan Northern Alliance.

The 1999 and 2004 Attacks in Uzbekistan

A series of explosions in Tashkent in February 1999 were among early signs that the Uzbek government was vulnerable to terrorism. By various reports, the explosions killed 16 to 28 and wounded 100 to 351 people. The aftermath involved wide-scale arrests of political dissidents and others deemed by some observers as unlikely conspirators. Karimov in April 1999 accused Mohammad Solikh (former Uzbek presidential candidate and head of the banned Erk Party) of masterminding what he termed an assassination plot, along with Tohir Yuldashev (co-leader of the IMU) and the Taliban. The first trial of 22 suspects in June resulted in six receiving death sentences. The suspects said in court that they received terrorist training in Afghanistan, Tajikistan, Pakistan, and Russia and were led by Solikh, Yuldashev and Namanganiy. In 2000, Yuldashev and Namanganiy received death sentences in absentia, and Solikh received a 15.5 year prison sentence. Solikh denied membership in IMU, and he and Yuldashev denied involvement in the bombings.

¹⁰ According to Zeyno Baran, S. Frederick Starr, and Svante Cornell, the incursions of the IMU into Uzbekistan and Kyrgyzstan in 1999 and 2000 were largely driven by efforts to secure drug trafficking routes. *Islamic Radicalism in Central Asia and the Caucasus: Implications for the EU*, Silk Road Paper, July 2006.

On March 28 through April 1, 2004, a series of bombings and armed attacks were launched in Uzbekistan, reportedly killing 47. An obscure Islamic Jihad Group of Uzbekistan (IJG; Jama'at al-Jihad al-Islami, a breakaway part of the IMU) claimed responsibility. In subsequent trials, the alleged attackers were accused of being members of IJG or of Hizb ut-Tahrir (HT; an Islamic fundamentalist movement ostensibly pledged to peace but banned in Uzbekistan) and of attempting to overthrow the government. Some defendants testified that they were trained by Arabs and others at camps in Kazakhstan and Pakistan. They testified that IMU member Najmiddin Jalolov (convicted in absentia in 2000) was the leader of IJG, and linked him to Taliban head Mohammad Omar, Uighur extremist Abu Mohammad, and Osama bin Laden. On July 30, 2004, explosions occurred at the U.S. and Israeli embassies and the Uzbek Prosecutor-General's Office in Tashkent. The IMU and IJG claimed responsibility and stated that the bombings were aimed against Uzbek and other "apostate" governments. A Kazakh security official in late 2004 announced the apprehension of several IJG members. He alleged that the IJG had ties to Al Qaeda; had other cells in Kyrgyzstan, Uzbekistan, and Russia; and was planning assassinations.¹¹

In September 2000, the State Department designated the IMU as a Foreign Terrorist Organization, stating that the IMU, aided by Afghanistan's Taliban and by Osama bin Laden, resorts to terrorism, actively threatens U.S. interests, and attacks American citizens. The "main goal of the IMU is to topple the current government in Uzbekistan," the State Department warned, and it linked the IMU to bombings and attacks on Uzbekistan in 1999-2000. IMU forces assisting the Taliban and Al Qaeda suffered major losses during coalition actions in Afghanistan, and Namanganiy was probably killed.¹² Former CIA Director Porter Goss testified in March 2005 that IJG "has become a more virulent threat to U.S. interests and local governments."¹³ In May 2005, the State Department designated IJG as a global terrorist group, and in June, the U.N. Security Council added IJG to its terrorism list.¹⁴

The 2005 Violence in Andijon, Uzbekistan

Dozens or perhaps hundreds of civilians were killed or wounded on May 13, 2005, after Uzbek troops fired on demonstrators in the eastern town of Andijon. The protestors had gathered to demand the end of a trial of local businessmen charged with belonging to an Islamic terrorist group. The night before, a group stormed a

prison where those on trial were held and released hundreds of inmates.¹⁵ Many freed inmates then joined others in storming government buildings. President Islam Karimov flew to the city to direct operations, and reportedly had restored order by late on May 13. The United States and others in the international community have called for an international inquiry, which the Uzbek government has rejected. On July 29, 439 people who had fled from Uzbekistan to Kyrgyzstan were airlifted to Romania for resettlement processing, after the United States and others raised concerns that they might be tortured if returned to Uzbekistan.¹⁶

At the first major trial of fifteen alleged perpetrators of the Andijon unrest in late 2005, the accused all confessed and asked for death penalties, and testified that the U.S. and Kyrgyz governments helped finance and support violence aimed at overthrowing the government, and that international media colluded with local human rights groups and non-governmental organizations (NGOs) in this effort. The U.S. and Kyrgyz governments denied such involvement, and many observers criticized the trial as appearing stage-managed. Many Uzbek opposition party members and media and NGO representatives have been arrested. Partly in response, Congress has amplified calls for conditioning aid to Uzbekistan on its democracy and human rights record (see below, *Legislation*).

Democratization and Human Rights

A major goal of U.S. policy in Central Asia has been to foster the long-term development of democratic institutions and policies upholding human rights. The United States has worked with the ex-Communist Party officials who lead in the five states (even in Tajikistan and Kyrgyzstan, where the current presidents were once lower-level party officials). Particularly since September 11, 2001, the United States has attempted to harmonize its concerns about democratization and human rights in the region with its interests in regional support for the Global War on Terrorism. According to some allegations, the Administration may have sent suspected terrorists in its custody to Uzbekistan for questioning, a process termed “rendition.”¹⁷ Although not verifying such transfers specifically to Uzbekistan, the Administration has stated that, under the rendition policy, it receives diplomatic assurances that transferees will not be tortured.

¹⁵ There is a great deal of controversy about whether this group contained foreign-trained terrorists or was composed mainly of the friends and families of the accused. See U.S. Congress. Commission on Security and Cooperation In Europe. Briefing: The Uzbekistan Crisis. *Testimony of Galima Bukharbayeva, Correspondent. Institute for War and Peace Reporting*, June 29, 2005. For another viewpoint, see Shirin Akiner, *Violence in Andijon, 13 May 2005: An Independent Assessment*, Central Asia-Caucasus Institute, July 2005.

Possible scenarios of political development in Central Asia have ranged from continued rule in most of the states by former Soviet elites to violent transitions to Islamic fundamentalist or xenophobic rule. Relatively peaceful and quick transitions to more or less democratic and Western-oriented political systems have been considered less likely by many observers.¹⁸ All the Central Asian leaders have remained in power by orchestrating extensions of their terms, eliminating possible contenders, and providing emoluments to supporters and relatives. All the Central Asian governments have experienced coup attempts — and Kyrgyzstan's government was successfully overthrown (see below) — and the leaders in Uzbekistan and Turkmenistan face rising popular protests.

Demonstrations in Kyrgyzstan against a tainted legislative election and economic distress resulted in President Akayev's relatively peaceful overthrow in March 2005. Some observers hailed this coup as the third so-called "democratic revolution" in Eurasia, after those in Georgia and Ukraine, and the first in Central Asia. They suggested that the country, because of its slightly wider scope of civil liberties compared to the rest of Central Asia, might lead the region in democratic reforms. More recently, this prognostication appears less likely, because of ongoing corruption, weak government, and pro-Russian moves by the leadership that could jeopardize Kyrgyzstan's independence.¹⁹ The U.S. Ambassador on April 17, 2006, raised concerns that crime and corruption increasingly threaten Kyrgyzstan's stability. Days before, there had been an assassination attempt against democracy and human rights advocate Edil Baysalov, after he had met with visiting U.S. Assistant Secretary of State Richard Boucher and reportedly warned him that democratization in Kyrgyzstan was faltering. The European Union also warned the Kyrgyz government in May 2006 that "there are worrying indications that circles connected with organized crime are attempting to gain influence over political life and state institutions" and urged the government to combat growing crime and political violence.

Among recent elections, incumbent Kazakh President Nazarbayev won another term with 91% of the vote in a five-man race on December 4, 2005. Many observers credited economic growth in the country and promises of increased wages and pensions as bolstering his popularity. He campaigned widely and pledged democratic reforms and poverty relief. Observers from the OSCE, COE, and the European Parliament assessed the election as progressive but still falling short of a free and fair race. Problems included restrictions on campaigning and harassment of opposition

¹⁸ Mark Katz, Revolutionary Change in Central Asia, *World Affairs*, Spring 2006, pp. 157-72.

¹⁹ Others suggested that the coup was more a clan-based shift of power. Kathleen Collins, the Logic of Clan Politics: Evidence from the Central Asian Trajectories, *World Politics*, January 2004, pp. 224-261; S. Frederick Starr, Clans, Authoritarian Rulers, and Parliaments in Central Asia, *Silk Road Paper*, June 2006. Kyrgyz democracy advocate Roza Otunbayeva has asserted that President Bakiyev's relatives and friends control the country. Open Source Information Center (*OSIC*), *Central Eurasia: Daily Report*, June 3, 2006, Doc. No. CEP-950047. For background, see CRS Report RL32864, *Coup in Kyrgyzstan: Developments and Implications*, by Jim Nichol.

candidates.²⁰ Then-Assistant Secretary of State for European and Eurasian affairs Daniel Fried averred that “in the case of ... countries whose elections were not free and fair but not a travesty — perhaps Kazakhstan is in that category — we need to be very clear about what it is we want, which is democracy” and that the United States should continue engagement with such governments “as long as they are moving in roughly the right direction.”²¹

In late February 2006, Kazakhstan’s interior (police) ministry announced that it had detained Yerzhan Otembayev, the top aide to Nurtay Abykayev, the speaker of the Senate (the upper legislative chamber), on suspicion of involvement in the February abduction and murder of Altynbek Sarsenbayev, leader of the opposition Nagyz Ak Zhol (True Bright Path) Party. Arrests included personnel in the national security committee, and its head resigned. The police reported that Otembayev had confessed to having Sarsenbayev killed for personal reasons. Opposition politicians and others asserted that Otembayev’s alleged involvement indicated that the assassination was ordered by other top officials. The U.S. FBI reportedly assisted in investigating Sarsenbayev’s murder. In testimony in August 2006, defendant Rustam Ibragimov implicated Abykayev, Nartay Dutbayev (former head of the National Security Committee), and Aleksey Kikshayev (a former presidential staffer) in the murder. He also asserted that these three were planning to overthrow President Nursultan Nazarbayev. Some observers viewed the testimony as spurious, since Abykayev firmly supports Nazarbayev.²² Otembayev also renounced his earlier confession. At the end of August 2006, the court convicted Otembayev, Ibragimov, and eight others of involvement in the murders.

Democracy Pledges

During Nazarbayev’s 1994 U.S. visit, he and then-President Clinton signed a Charter on Democratic Partnership recognizing Kazakhstan’s commitments to the rule of law, respect for human rights, and economic reform. During his December 2001 visit, Nazarbayev repeated these pledges in a joint statement with President Bush. In March 2002, a U.S.-Uzbek Strategic Partnership Declaration was signed pledging Uzbekistan to “intensify the democratic transformation” and improve freedom of the press. During his December 2002 U.S. visit, Tajikistan’s President Rakhmanov pledged to “expand fundamental freedoms and human rights.” Despite such democracy pledges (the United States still regards the U.S.-Uzbek Declaration as valid), the states have made little progress, according to the State Department.²³

Turkmenistan and Uzbekistan are generally viewed as having the most repressive governments. Tajikistan experienced many human rights abuses during its civil war, and the government appears in recent years to be backtracking on

respect for human rights. Non-favored faiths, missionaries, and pious Muslims face religious rights abuses in all the states. Unfair elections increase political alienation and violence aimed against the regimes. In June 2006, the State Department downgraded Uzbekistan to “Tier 3,” for having problems as a source country for human trafficking that does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so.²⁴ The NGO Freedom House has given Turkmenistan its lowest possible rating on political rights and civil liberties and Uzbekistan its next-to-lowest rating, including them among such countries as North Korea, Libya, Cuba, Syria, Sudan, and Myanmar.²⁵

The non-governmental organization Forum-18 reported on June 20, 2006, that religious repression in Uzbekistan has increased in recent months against Christians and observant Muslims. In mid-June 2006, Uzbek President Islam Karimov signed a law adding harsher criminal penalties for missionary activities, including the printing and storing of illegal religious materials or the spreading of (or intention to spread) religious ideas that “offend national honor and dignity or insult [other] religious or atheistic feelings.”²⁶

Among U.N. actions, the General Assembly in December 2003 and November 2004 approved resolutions expressing “grave concern” about human rights abuses in Turkmenistan and urging reforms. The U.N. Rapporteur on Torture in early 2003 completed a report that concluded that police and prison officials in Uzbekistan “systematically” employed torture.²⁷ In November 2005, the U.N. General Assembly’s Third Committee approved resolutions critical of human rights violations in Turkmenistan and Uzbekistan. The resolution on Turkmenistan expressed “grave concern” about political repression, media censorship, religious minority group harassment, and detainee torture. The resolution on Uzbekistan expressed “grave concern” about violence against civilians in Andijon and called on the government to permit an international investigation. The Uzbek representative asserted that the resolution contained no credible facts and ignored Uzbekistan’s right to defend its constitutional order against terrorists.²⁸

Perhaps indicating growing democratization and human rights problems in Kyrgyzstan, the Kyrgyz Foreign Ministry in July 2006 declared two U.S. diplomats *persona non grata*, giving as a reason their “inappropriate contacts” with NGO leaders. The United States deemed the expulsions as “based on bad information, false accusations, and evil misinterpretations of fact,” and expelled two Kyrgyz diplomats in turn.²⁹ The United States expressed disappointment that Kyrgyzstan had not lived up to its international obligations when in July 2006 it extradited five Uzbek refugees to Uzbekistan. The United States and the U.N. High Commissioner of Refugees also raised concerns about alleged abductions of five Uzbek refugees seeking asylum in Kyrgyzstan. Some observers in Kyrgyzstan have viewed these developments as marking the government’s warming relations with Russia and Uzbekistan and cooling relations with the United States and the West.

Congressional Actions in FY2003. In Congress, Omnibus Appropriations for FY2003 (P.L. 108-7) forbade FREEDOM Support Act (FSA) assistance to the government of Uzbekistan unless the Secretary of State determined and reported that it was making substantial progress in meeting commitments under the Strategic Partnership Declaration to democratize and respect human rights. P.L. 108-7 also forbade assistance to the Kazakh government unless the Secretary of State determined and reported that it significantly had improved its human rights record during the preceding six months. However, the legislation permitted the Secretary to waive the requirement on national security grounds. The Secretary reported in May 2003, that Uzbekistan was making such progress (by late 2003, the Administration had decided that it could no longer make this claim; see below, *Weapons of Mass Destruction*). In July 2003, the Secretary reported that Kazakhstan was making progress. Some in Congress were critical of these findings. Consolidated Appropriations for FY2004, including foreign operations (P.L. 108-199) and for FY2005 (P.L. 108-447, Section 578), and Foreign Operations Appropriations for FY2006 (P.L. 109-102, Sections 586 and 587) retained these conditions, while clarifying that the prohibition on aid to Uzbekistan pertained to the *central* government and that conditions included respecting human rights, establishing a “genuine” multi-party system, and ensuring free and fair elections and freedom of expression and media.

State Department Actions in FY2004. In July 2004, the State Department announced that, despite some “encouraging progress” in respecting human rights, up to \$18 million in aid to Uzbekistan would be withheld because of “lack of progress on democratic reform and restrictions put on U.S. assistance partners on the ground” (in contrast, progress was reported regarding Kazakhstan).³⁰ International Military Education and Training (IMET) and FMF programs, which are conditioned on

respect for human rights, were among those affected. The State Department reprogrammed or used notwithstanding authority (after consultation with Congress) to expend some of the funds, so that about \$8.5 million was ultimately withheld. During an August 2004 visit to Uzbekistan, Gen. Myers criticized the cutoff of IMET and FMF programs as “shortsighted” and not “productive,” since it reduced U.S. military influence (see also below, *Weapons of Mass Destruction*).³¹

State Department Actions in FY2005. For FY2005, Secretary of State Condoleezza Rice reported to Congress in May 2005 that Kazakhstan had failed to significantly improve its human rights record, but that she had waived aid restrictions on national security grounds. The Secretary of State in FY2005 did not determine and report to Congress that Uzbekistan was making significant progress in respecting human rights, so Section 578 aid restrictions remained in place. FMF and IMET were restricted. The State Department reported that it used notwithstanding authority to allocate \$4.16 million in aid to Uzbekistan for reforming health care, promoting better treatment of detainees, combating HIV/AIDS, combating trafficking in drugs and persons, and supporting World Trade Organization accession.

State Department Actions in FY2006. For FY2006, Secretary of State Rice reported to Congress in May 2006 that Kazakhstan had failed to significantly improve its human rights record, but that she had waived aid restrictions on national security grounds. She did not determine and report to Congress that Uzbekistan was making significant progress in respecting human rights, so Section 586 restrictions remained in place. FMF and IMET were restricted. According to the State Department, notwithstanding authority will be used to allocate some of the aid.

Security and Arms Control

The U.S.-led coalition’s overthrow of the Taliban and routing of Al Qaeda and IMU terrorists in Afghanistan (termed Operation Enduring Freedom or OEF) increased the security of Central Asia. According to then-Assistant Secretary of Defense J. D. Crouch in testimony in June 2002, “our military relationships with each [Central Asian] nation have matured on a scale not imaginable prior to September 11th.” Crouch averred that “for the foreseeable future, U.S. defense and security cooperation in Central Asia must continue to support actions to deter or defeat terrorist threats” and to build effective armed forces under civilian control. Kyrgyzstan, Crouch related, became a “critical regional partner” in OEF, providing basing for U.S. and coalition forces at Manas (in mid-2006, these troops reportedly numbered about 1,100). Uzbekistan provided a base for U.S. operations at Karshi-Khanabad (K2; just before the pullout, U.S. troops reportedly numbered less than 900), a base for German units at Termez (in early 2006, German troops reportedly numbered about 300), and a land corridor to Afghanistan for humanitarian aid via the Friendship Bridge at Termez. Tajikistan permitted use of its international airport in Dushanbe for refueling (“gas-and-go”) and hosted a French force (there were

³¹ *Defense and Foreign Affairs Daily*, August 16, 2004.

reportedly 400 troops there in mid-2006). Kazakhstan and Turkmenistan provided overflight and other support.³²

To obtain Uzbekistan's approval for basing, the 2002 U.S.-Uzbek Strategic Partnership Declaration included a nonspecific security guarantee. The United States affirmed that "it would regard with grave concern any external threat" to Uzbekistan's security and would consult with Uzbekistan "on an urgent basis" regarding a response. The two states pledged to intensify military cooperation, including "re-equipping the Armed Forces" of Uzbekistan, a pledge that appeared to be repudiated by Uzbekistan following events in Andijon.

Although U.S. security assistance was boosted in the aftermath of 9/11, such aid has lessened somewhat since then as a percentage of all such aid to Eurasia, particularly in FY2004-FY2005 after some aid to Uzbekistan was cut (see below). Security and law enforcement aid was \$187.55 million in FY2002 (31% of all such aid to Eurasia), \$101.5 million (33%) in FY2003, \$132.5 million (11.2%) in FY2004, and \$148.5 million in FY2005 (11.3%). Of all budgeted assistance to Central Asia over the period from FY1992-FY2004, security and law enforcement aid accounted for a little over one-fifth. Security and law enforcement aid included FMF, IMET, and EDA programs and border security aid to combat trafficking in drugs, humans, and WMD. To help counter burgeoning drug trafficking from Afghanistan, the emergency supplemental for FY2005 (P.L. 109-13) provided \$242 million for Central Asia and Afghanistan, and the emergency supplemental for FY2006 (P.L. 109-234) provided \$150 million for Central Asia and Afghanistan (of which about \$30 million was recommended for Central Asia).

In addition to the aid reported by the Coordinator's Office, the Defense Department provides coalition support payments to Kyrgyzstan, including base lease payments and landing and overflight fees (overall authority and funding have been provided in FY2002-FY2005 emergency supplemental appropriations for military operations and maintenance). According to one 2005 report, the United States had paid a total of \$28 million in landing fees, parking fees, and airport fees; \$114 million for fuel, and \$17 million to Kyrgyz contractors. Uzbekistan received a payment of \$15.7 million for use of K2 and associated services, and the Defense Department in September 2005 announced an intention to pay another \$23 million. On October 5, an amendment to Defense Appropriations for FY2006 (H.R. 2863) was approved in the Senate to place a one-year hold on the payment. Despite congressional concern, the Defense Department transferred the payment in November 2005. The conferees on H.R. 2863 later dropped the amendment (H.Rept. 109-360; P.L. 109-359).

³² Senate Foreign Relations Committee. Subcommittee on Central Asia and the South Caucasus. *Statement of J.D. Crouch II, Assistant Secretary of Defense for International Security Policy*, June 27, 2002. Reportedly, there are about 1,000 U.S. troops, 40 French, and 55 Spanish troops at Manas. *Air Force Times*, June 19, 2006. Russian media reported that France had increased its number of troops in Tajikistan from about 150 in late 2005 to 400 in mid-2006. *Regnum News Agency*, May 20, 2006. *Jane's Defense Weekly* reported in April 2006 that India has dispatched 12 MiG-29s and 40 military personnel to a base at Farkhor, Tajikistan.

U.S. Central Command (USCENTCOM) in 1999 became responsible for U.S. military engagement in Central Asia. It cooperates with the European Command (USEUCOM), on the Caspian [Sea] Guard program, launched in 2003, to enhance and coordinate security assistance provided by U.S. agencies to establish an “integrated airspace, maritime and border control regime” for Azerbaijan and Kazakhstan. A related hydrocarbons initiative provides maritime security, crisis response, and consequence management aid to help the Caspian regional states protect energy transport to the West.³³ Russia has appeared to counter U.S. maritime security aid by boosting the capabilities of its Caspian Sea Flotilla and by urging the littoral states to coordinate their naval activities with Russia’s.

All the Central Asian states except Tajikistan joined NATO’s PFP by mid-1994 (Tajikistan joined in 2002). Central Asian troops have participated in periodic PFP (or “PFP-style”) exercises in the United States since 1995, and U.S. troops have participated in exercises in Central Asia since 1997 (Uzbekistan’s participation in PFP has been in abeyance since events in Andijon). A June 2004 NATO summit communique pledged enhanced Alliance attention to the countries of the South Caucasus and Central Asia. In January 2006, Kazakhstan’s progress in military reform enabled NATO to elevate it to participation in an Individual Partnership Action Plan.

According to some reports, the Defense Department has been considering possibly setting up long-term military facilities in Central Asia termed Cooperative Security Locations (CSLs; they might contain pre-positioned equipment and be managed by private contractors, and few if any U.S. military personnel may be present). The Overseas Basing Commission in 2005 acknowledged that U.S. national security might be enhanced by future CSLs in Central Asia but urged Congress to seek inter-agency answers to “what constitutes vital U.S. interests in the area that would require long-term U.S. presence.”³⁴

Closure of Karshi-Khanabad

On July 5, 2005, the presidents of Uzbekistan, Kyrgyzstan, and Tajikistan signed a declaration issued during a meeting of the Shanghai Cooperation Organization (SCO; see below, *Regional Tensions*) that stated that “as large-scale military operations against terrorism have come to an end in Afghanistan, the SCO member states maintain that the relevant parties to the anti-terrorist coalition should set a deadline for the temporary use of ... infrastructure facilities of the SCO member states and for their military presence in these countries.”³⁵ Despite this declaration, none of the Central Asian leaders immediately called for closing the coalition bases.

³³ Senate Armed Services Committee. *Statement of General James L. Jones, USMC, Commander, United States European Command*, March 1, 2005. According to one Azerbaijani newspaper, Turkmenistan is acquiring more weaponry from Russia, which Turkmenistan may threaten to use against Azerbaijan to gain control of disputed Caspian seabed oil and gas fields. *OSIC*, June 22, 2006, Doc. No. CEP-950016.

³⁴ Commission on Review of the Overseas Military Facility Structure of the United States. *Interim Report*, May 9, 2005.

³⁵ *OSIC*, July 5, 2005, Doc. No. CPP-249.

However, after the United States and others interceded so that refugees who fled from Andijon to Kyrgyzstan could fly to Romania, Uzbekistan on July 29 demanded that the United States vacate K2 within six months. On November 21, 2005, the United States officially ceased operations to support Afghanistan at K2. Perhaps indicative of the sharp reversal of U.S. military-to-military and other ties, former pro-U.S. defense minister Qodir Gulomov reportedly was on trial in mid-2006 on charges of treason. Many K2 activities shifted to the Manas airbase in Kyrgyzstan.³⁶ In early 2006, Kyrgyz President Bakiyev reportedly requested that lease payments for use of the Manas airbase be increased to more than \$200 million per year and at the same time re-affirmed Russia's free use of its nearby base.³⁷

Russia's President Vladimir Putin on June 15, 2006, unfavorably compared U.S. foreign policy to Russia's policy toward the other Soviet successor states (particularly toward Uzbekistan). He stated that Russia had "careful" relations with them since they were still "weak and vulnerable" instead of trying to "impose standards" on them. He argued that "I understand the dissatisfaction of the United States with the fact that Uzbekistan has closed [the U.S.-led coalition airbase at Karshi-Khanabad]. But if they didn't behave there like a bull in a china shop, maybe the base would not have been closed." Outgoing U.S. Ambassador to Tajikistan Richard Hoagland strongly responded on June 19 that "to assume that these nations are subject to orders from ... Europe or North America ... is embarrassingly simplistic, offensively paternalistic, and ... does not correspond to reality. To call these republics fragile is equally paternalistic.... Some clear-eyed leaders in [Central Asia] desire strongly to build their nation's independence and sovereignty. Some others are willing to sell their state and even their own soul to the highest bidder for their own and their family's short-term personal and political gain.... It would most definitely not be to [the advantage of Central Asian states] to become the Junior Partners in a new Warsaw Pact or Tashkent Pact.... We have no intention to create a new bloc to exercise control.... [All countries] need to work to integrate Central Asia into the world community."³⁸

On July 14, 2006, the United States and Kyrgyzstan issued a joint statement that the two sides had resolved the issue of the continued U.S. use of airbase facilities at Manas. Although not specifically mentioning U.S. basing payments, it was announced that the United States would provide \$150 million in "total assistance and compensation over the next year," subject to congressional approval (some reports indicated that the "rent" portion of this amount would be \$20 million). Kyrgyz Security Council Secretary Miroslav Niyazov and U.S. Deputy Assistant Defense Secretary James MacDougall also signed a Protocol of Intentions affirming that the United States would compensate the Kyrgyz government and businesses for goods,

³⁶ Reportedly, nine million pounds of fuel are off-loaded and 4,000 tons of cargo and 13,500 people are transported each month through Manas to Afghanistan. USAFE/CC Revisits Manas, Impressed with Improvements, *US Fed News*, July 10, 2006.

³⁷ For background, see CRS Report RS22295, *Uzbekistan's Closure of the Airbase at Karshi-Khanabad: Context and Implications*, by Jim Nichol.

³⁸ "Putin Supports Uzbek President to Avoid Afghan Scenario," *Interfax*, June 16, 2006; U.S. Embassy, Dushanbe, Tajikistan. Richard E. Hoagland. *Sovereign States Make Their Own Decisions*, June 19, 2006.

services, and support of coalition operations. Some observers suggested that increased terrorist activities in Afghanistan and a May 12 terrorist incursion from Tajikistan into Kyrgyzstan may have contributed to a Kyrgyz evaluation that the U.S. coalition presence was still necessary. Visiting Central Asia in late July 2006, USCENTCOM head Gen. John Abizaid stated that the United States probably would eventually reduce its military presence in the region while increasing its military-to-military cooperation.³⁹

Weapons of Mass Destruction

Major U.S. security interests have included elimination of nuclear weapons remaining in Kazakhstan after the breakup of the Soviet Union and other efforts to control nuclear proliferation in Central Asia. The United States has tendered aid aimed at bolstering their export and physical controls over nuclear technology and materials, in part because of concerns that Iran is targeting these countries.

After the Soviet breakup, Kazakhstan was on paper a major nuclear weapons power (in reality Russia controlled these weapons). In December 1993, the United States and Kazakhstan signed a CTR umbrella agreement for the “safe and secure” dismantling of 104 SS-18s, the destruction of silos, and related purposes. All bombers and their air-launched cruise missiles were removed by late February 1994 (except seven bombers destroyed with U.S. aid in 1998). On April 21, 1995, the last of about 1,040 nuclear warheads had been removed from SS-18 missiles and transferred to Russia, and Kazakhstan announced that it was nuclear weapons-free. The SS-18s were eliminated by late 1994. The United States reported that 147 silos had been destroyed by September 1999. A U.S.-Kazakh Nuclear Risk Reduction Center in Almaty was set up to facilitate verification and compliance with arms control agreements to prevent the proliferation of WMD. S.Res. 122, approved on May 25, 2005, commends Kazakhstan for eliminating its nuclear weapons.

Besides the Kazakh nuclear weapons, there are active research reactors, uranium mines, milling facilities, and nuclear waste dumps in Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan, many of which reportedly remain inadequately protected against theft. Also, Kazakhstan and Uzbekistan hosted major chemical and biological warfare (CBW) facilities during the Soviet era. Kazakhstan is reported to possess one-fourth of the world’s uranium reserves, and Kazakhstan and Uzbekistan are among the world’s top producers of low enriched uranium. Kazakhstan had a fast breeder reactor at Aktau that was the world’s only nuclear desalinization facility. Shut down in 1999, it had nearly 300 metric tons of uranium and plutonium spent fuel in storage pools (three tons of which were weapons-grade). In 1997 and 1999, U.S.-Kazakh accords were signed on decommissioning the Aktau reactor.

CTR aid was used to facilitate the transport of 600 kg of weapons-grade uranium from Kazakhstan to the United States in 1994, of 2,900 kg of up to 26% enriched nuclear fuel from Aktau to Kazakhstan’s Ulba facility in 2001 (which Ulba converted into less-enriched fuel), of eleven kg of uranium in fuel rods from

³⁹ *Associated Press*, July 24, 2006.

Uzbekistan to Russia in 2004, and 63 kg of uranium from Uzbekistan to Russia in April 2006. CTR and Energy Department funds have been used in Kazakhstan to dismantle a former anthrax production facility in Stepnogorsk, to remove some strains to the United States, to secure two other BW sites, and to retrain scientists. CTR funding was used to dismantle Uzbekistan's Nukus chemical weapons research facility. Other CTR aid helps keep Uzbek weapons scientists employed in peaceful research. CTR aid also was used to eliminate active anthrax spores at a former CBW test site on an island in the Aral Sea. These latter two projects were completed in 2002.

The FY2003 National Defense Authorization Act (P.L. 107-314, Sec. 1306) provided for the president to waive prohibitions on CTR aid (as contained in Sec.1203 of P.L. 103-160) to a state of the former Soviet Union if he certified that the waiver was necessary for national security and submitted a report outlining why the waiver was necessary and how he planned to promote future compliance with the restrictions on CTR aid. The waiver authority, exercisable each fiscal year, expired at the end of FY2005. (The six restrictions in P.L. 103-160 include a call for CTR recipients to observe internationally recognized human rights.) In FY2004 and FY2005, the President explained that Uzbekistan's human rights problems necessitated waivers.⁴⁰ Defense Authorizations for FY2006 (P.L. 109-163) provide a non-sunset waiver authority, exercisable annually (see below, *Legislation*).

Trade and Investment

The Administration and others stress that U.S. support for free market reforms directly serves U.S. national interests by opening new markets for U.S. goods and services and sources of energy and minerals. U.S. private investment committed to Central Asia has greatly exceeded that provided to Russia or most other Eurasian states except Azerbaijan. U.S. trade agreements have been signed and entered into force with all the Central Asian states, but bilateral investment treaties are in force only with Kazakhstan and Kyrgyzstan. Permanent normal trade relations with Kyrgyzstan were established by law in June 2000, so that "Jackson-Vanik" trade provisions no longer apply that call for presidential reports and waivers concerning freedom of emigration.

In 2005, the Bush Administration highlighted a program to encourage Central Asia to bolster trade and transport ties with Afghanistan and South Asia. As stated by Secretary Rice, the program gives impetus to a "new Silk Road, a great corridor of reform" extending from Europe southward to Afghanistan and the Indian Ocean. According to Evan Feigenbaum, Deputy Assistant Secretary of State for South and

Presidential Determination: No. 2004-19. *Waiver of Restrictions on Assistance to the Republic of Uzbekistan under the Cooperative Threat Reduction Act of 1993 and Title V of the FREEDOM Support Act*, December 30, 2003; Presidential Determination: No. 2005-13. *Waiver of Restrictions...*, December 14, 2004.

Central Asia, “we are ... promoting options and opportunities omni-directionally but increasingly to the south — the least developed direction.”⁴¹

All the states of the region possess large-scale resources that could contribute to the region becoming a “new silk road” of trade and commerce. The Kazakh and Turkmen economies are dependent on energy exports but need added foreign investment for production and transport. Uzbekistan’s state-controlled cotton and gold production rank among the highest in the world and much is exported. It also has moderate energy reserves. Kyrgyzstan has major gold mines and strategic mineral reserves, is a major wool producer, and could benefit from tourism. Tajikistan has one of the world’s largest aluminum processing plants and is a major cotton grower.

Despite the region’s development potential, the challenges of corruption, inadequate transport infrastructure, punitive tariffs, border tensions, and uncertain respect for contracts discourage major foreign investment (except for some investment in the energy sector). Examples of such challenges include Uzbekistan’s restrictions on travel, which have encouraged Tajikistan and Kyrgyzstan to explore building a major road to Kazakhstan that bypasses Uzbekistan. At a meeting of the Eurasian Economic Community in June 2006, Tajik President Rakhmanov criticized Uzbekistan’s requirement that Tajik and Kyrgyz citizens obtain visas to visit it, and Uzbek President Karimov reportedly pledged to reconsider the visa requirement. The challenge of corruption has been underscored by a report issued in early 2006 by the non-governmental organization Global Witness, which alleges that Turkmen President Niyazov personally controls a vast portion of the wealth generated from natural gas exports. The NGO raises concerns that organized crime groups may be involved in these exports and urges the European Union to limit trade ties with Turkmenistan.⁴²

Energy Resources

U.S. policy goals regarding energy resources in the Central Asian and South Caucasian states have included supporting their sovereignty and ties to the West, supporting U.S. private investment, promoting Western energy security through diversified suppliers, assisting ally Turkey, and opposing the building of pipelines that transit “energy competitor” Iran or otherwise give it undue influence over the region. Security for Caspian region pipelines and energy resources also has been a recent interest. President Bush’s 2001 *National Energy Policy* report suggests that greater oil production in the Caspian region could not only benefit regional economies, but also help mitigate possible world supply disruptions. It recommends U.S. support for building the BTC pipeline and an Azerbaijan-Turkey gas pipeline,

coaxing Kazakhstan to use the oil pipeline, and otherwise encouraging the regional states to provide a stable and inviting business climate for energy development.⁴³

According to the U.S. Department of Energy (DOE), the Caspian region is emerging as a significant source of oil and gas for world markets. Kazakhstan possesses the Caspian region's largest proven oil reserves at 9-29 billion barrels, according to DOE, and also possesses 65 trillion cubic feet (tcf) of natural gas. Kazakhstan's oil exports currently are about 1.3 million barrels per day (bpd). Some U.S. energy firms and other private foreign investors have become discouraged in recent months by harsher government terms, taxes, and fines. Turkmenistan possesses about 101tcf of proven gas reserves, according to DOE, among the largest in the world.⁴⁴

The Central Asian states have been pressured by Russia to yield portions of their energy wealth to Russia, in part because Russia controls most existing export pipelines. Kazakhstan's main oil export route is a 930-mile pipeline — owned by the Caspian Pipeline Consortium, in which Russian shareholders have a controlling interest — that carries 560,000 bpd of oil from Kazakhstan to Russia's Black Sea port of Novorossiysk (23 million metric tons a year).

Kazakhstan's two non-Russian oil export routes are to the Mediterranean Sea and China. In June 2006, Kazakhstan and Azerbaijan finalized an agreement to ship 25 million metric tons per year of Kazakh oil through the BTC pipeline, about one-half the capacity of the pipeline. The Kazakh oil will be barged across the Caspian to Azerbaijan. The first Kazakh oil export pipeline not transiting Russia was completed from Atasu in central Kazakhstan to the Xinjiang region of China (a distance of about 600 miles), and began delivering oil in May 2006. Initial capacity is 20 million metric tons per year. At Atasu, it links to another pipeline from Kumkol, also in central Kazakhstan, and will eventually link to Atyrau on Kazakhstan's Caspian Sea coast.

Niyazov signed a 25-year accord with Putin in 2003 on supplying Russia up to 6 billion cubic meters (bcm) of gas in 2004 (about 12% of production), rising up to 80 bcm in 2009, perhaps then tying up a large part of Turkmenistan's production. Turkmenistan halted gas shipments to Russia at the end of 2004 in an attempt to get a higher gas price but settled for all-cash rather than partial barter payments. In early 2006, Turkmenistan again requested higher gas prices from Russia, because Russia's state-controlled Gazprom gas firm had raised the price it charged for customers receiving the gas that it had purchased from Turkmenistan. In June 2006, Turkmenistan threatened to cut off gas shipments at the end of July unless Gazprom agreed to a price increase from \$65 per one thousand cubic meters (mcm) to \$100 per mcm for the rest of 2006. On July 25, Gazprom shut off one major pipeline from Turkmenistan for eight days of "repairs." In early September 2006, Gazprom agreed

to pay \$100 per mcm from 2007 to the end of 2009, and Turkmenistan pledged to supply 42 bcm in 2006 and 50 bcm in 2007-2009.

Seeking alternatives to pipeline routes through Russia, in December 1997 Turkmenistan opened the first pipeline from Central Asia to the outside world beyond Russia, a 125-mile gas pipeline linkage to Iran. In early April 2006, Turkmenistan and China signed a framework agreement calling for Chinese investment in developing gas fields in Turkmenistan and in building a gas pipeline through Uzbekistan and Kazakhstan to China. In early September 2006, Niyazov indicated that he considered the possibility of building a trans-Caspian pipeline and a pipeline to Pakistan as unlikely.

U.S. Aid Overview

For much of the 1990s and until September 11, 2001, the United States provided much more aid each year to Russia and Ukraine than to any Central Asian state (most such aid was funded from the FSA account in Foreign Operations Appropriations, but some derived from other program and agency budgets). Cumulative foreign aid budgeted to Central Asia for FY1992 through FY2005 amounted to \$3.8 billion, 13.6% of the amount budgeted to all the Eurasian states, reflecting the lesser priority given to these states prior to 9/11. Budgeted spending for FY2002 for Central Asia, during OEF, was greatly boosted in absolute amounts (\$584 million) and as a share of total aid to Eurasia (about one-quarter of such aid). The Administration's aid requests since then have gradually declined in absolute amounts, although it has continued to stress important U.S. interests in the region. Some observers argue that although aid amounts have declined in dollar amounts in recent years, they appear to loom somewhat larger as percentages of the total FSA and other Function 150 aid to Eurasia (although such regional aid in recent years is still proportionately less than that provided to the South Caucasian region).

Appearing to reflect growing concern about human rights abuses, lessening interest in the region, and a push to reduce spending, Congress approved \$99 million in FSA aid for the states of Central Asia for FY2006, \$17.5 million below the presidential request (P.L. 109-102). Besides bilateral and regional aid, the United States contributes to international financial institutions that aid Central Asia. Recurrent policy issues regarding U.S. aid include what it should be used for, who should receive it, and whether it is effective.

109th Congress Legislation

P.L. 109-234 (H.R. 4939, Lewis)

Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006. Signed into law on June 15, 2006. Provides \$150.47 million for "Drug Interdiction and Counter-Drug Activities, Defense," to remain available until expended, for activities related to Afghanistan and Central Asia. The conference report (H.Rept. 109-494) calls for \$10 million each for

Tajikistan and Turkmenistan, \$5 million for Kazakhstan, and \$5.27 million for Kyrgyzstan.

H.Con.Res. 187 (Ros-Lehtinen)

Expressing the Sense of Congress Concerning Uzbekistan. Introduced June 22, 2005. Calls for Uzbekistan to permit an international inquiry into the May 2005 violence there and to carry out democratic and human rights reforms.

H.R. 2601 (Christopher Smith)

Foreign Relations Authorization Act, FY2006-FY2007. Introduced on May 24, 2005 (H.Rept. 109-168). Passed the House on July 20, 2005. Received in the Senate on July 22, 2005, read twice, and placed on the Senate Legislative Calendar. Section 1413 calls on the President and the Secretaries of State and Defense to discuss with the members of the Shanghai Cooperation Organization the importance of retaining regional military bases used by the anti-terrorist coalition.

H.R. 3545 (William Delahunt)

Uzbekistan Freedom Promotion Act of 2005. Introduced July 28, 2005. Amends the Foreign Assistance Act of 1961 to limit foreign assistance to the government of Uzbekistan, unless the President certifies each fiscal year that it is upholding democratic and human rights. The bill restricts arms exports and visas for Uzbek officials involved in human rights abuses and permits freezing their assets. It calls for expedited U.S. admission of Uzbek pro-democracy advocates fearing prosecution and a report to Congress on moving U.S. military operations out of Uzbekistan.

H.R. 5122 (Hunter)

National Defense Reauthorization Act for FY2007. Sec. 1022 restates and revises Defense Department authority to provide support for counter-drug activities of certain foreign governments. Adds Kazakhstan and Kyrgyzstan as eligible for assistance, including possible nonlethal equipment, boats, aircraft, and vehicles. Amount obligated and expended is not to exceed \$40 million in FY2006 or \$60 million in FY2007 or FY2008. Sec. 1025 calls for the Defense Secretary to submit a report by the end of 2006 updating the interagency counter-narcotics plan for Afghanistan and South and Central Asia. Introduced on April 6, 2006. Passed House on May 11, 2006. Passed Senate on June 22, 2006. Conferees appointed.

H.R. 5382 (Christopher Smith)

Central Asia Democracy and Human Rights Promotion Act of 2006. Introduced on May 11, 2006. Subcommittee on Africa, Global Human Rights, and International Operations held markup and forwarded amended bill to International Relations Committee on June 22, 2006. Finds that the Central Asian states continue to struggle with their transition from authoritarian rule. Urges that the United States should provide assistance to encourage the states to conduct free and fair elections, human rights, and develop the rule of law. Calls for assistance to encourage media independence, the growth of civic NGOs, enactment of laws bolstering religious freedom, education of law enforcement officials on anti-torture methods, prosecution of human traffickers, and establishment of programs to combat corruption and support good governance. As amended, authorizes \$97 million in such assistance for each of the fiscal years 2007 and 2008. In addition to such sums as are otherwise authorized, authorizes \$10 million (as amended) for each of the fiscal years 2007 and

2008 for Voice of America and RFE/RL for expanded radio broadcasting to the region. Directs that in FY2007-FY2008, foreign operations appropriations may be provided for a Central Asian state only if the Secretary of State certifies that the state has made significant improvements in the protection of human rights during the preceding one-year period. The Secretary may waive the limitation on national security grounds. Amounts withheld may be reprogrammed for democracy and human rights programs. Directs that in the case of Uzbekistan, the Secretary must also certify that the country has agreed to an international investigation of events in Andijon, and no national security waiver is permitted.

H.R. 5522 (Kolbe)

Foreign Operations, Export Financing, and Related Programs Appropriations Bill, 2007. Introduced on June 5, 2006. Passed the House on June 9, 2006. Reported in Senate with an amendment in the nature of a substitute on July 10, 2006. H.Rept. 109-486 recommends \$19 million for FREEDOM Support Act (FSA) assistance for Kazakhstan, \$29 million for Kyrgyzstan, \$22 million for Tajikistan, \$5 million for Turkmenistan, and \$15 million for Uzbekistan. The FSA aid recommendation for these states is \$4.75 million below the President's request. The House Appropriations Committee recommended no IMET assistance for Uzbekistan because of "ongoing turmoil" in the country, and deleted language making Uzbekistan eligible for EDA. S.Rept. 109-277 assigned aid for the Central Asian states to various programs, with the amounts adding up to accord with the President's requested FSA aid for the Central Asian states.

H.Res. 545 (Ros-Lehtinen)/S.Res. 295 (Lugar)

A resolution expressing the sense of the Congress on the arrest of Sanjar Umarov in Uzbekistan. Introduced on November 10, 2005. Passed House on December 18, 2005. S.Res. 295 introduced on November 2, 2005. Passed Senate on November 2, 2005.

S. 2749 (Brownback)

To update the Silk Road Strategy Act of 1999 to modify targeting of assistance in recognition of political and economic changes in the Central Asian and South Caucasian countries since 1999. Introduced on May 4, 2006. Designates Afghanistan as a Silk Road country. States that support for democracy, mineral and other property rights, the rule of law, and U.S. trade with energy-rich Kazakhstan, Azerbaijan, and Turkmenistan, and with energy-transporting states will strengthen U.S. energy security by enhancing access to diversified energy resources. Urges close U.S. relations with the Silk Road states to facilitate maintaining military bases near Afghanistan and Iraq. Recognizing that China and Russia have acted at odds with U.S. security interests, such as by curbing the U.S. military presence in Uzbekistan, calls for U.S. observer status in the Shanghai Cooperation Organization (SCO) in order to promote stability and security. Calls for providing greater access to Export-Import Bank loans, promoting the development of trans-Caspian oil and gas pipelines, and supporting the building of a rail link in Kazakhstan that will facilitate the shipment of oil and other goods to Europe. Calls for the Export-Import Bank and OPIC to help set up a Caspian Bank of Reconstruction and Development. Urges consideration for setting up a Silk Road Advisory Board (consisting of experts in agriculture, democratization, banking, finance, legal reform, infrastructure planning, and oil and gas extraction and transport), a private sector energy

consultancy (to coordinate business projects and promote production, transportation, and refining investments), and an annual meeting of Silk Road aid sponsors and beneficiaries to be held in conjunction with the Energy Security Forum of the U.N. Economic Council of Europe.

S. 2770 (McCain)

Andijon Accountability Act of 2006. Introduced on May 9, 2006. Directs the President to submit a list of Uzbek government officials who played a direct and substantial role in the repression of peaceful political dissent in Andijon. These officials will be ineligible for a visa to enter the United States and their U.S. assets will be frozen. The President may terminate the sanctions if the Secretary of State certifies that the Uzbek government is fully cooperating with an international inquiry into the May 2005 Andijon massacre.
