RL33644

Summary

The federal government provides grants for voluntary family planning services through the Family Planning Program, Title X of the Public Health Service Act (42 U.S.C. §§300 to 300a-6). Enacted in 1970, it is the only domestic federal program devoted solely to family planning and related preventive health services. In 2011, Title X-funded clinics served more than five million clients.

Title X is administered through the Office of Population Affairs (OPA) in the Department of Health and Human Services (HHS). Although the authorization of appropriations for Title X ended with FY1985, funding for the program has continued through appropriations bills for the Departments of Labor, Health and Human Services, and Education, and Related Agencies (Labor-HHS-Education).

FY2012 funding for Title X was \$294 million, 2% less than the FY2011 funding level of \$299 million. The Consolidated Appropriations Act, 2012 (P.L. 112-74) continued previous years' requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on promoting or opposing any legislative proposal or candidate for public office. Grantees continued to be required to certify that they encourage "family participation" when minors seek family planning services, and certify that they counsel minors on how to resist attempted coercion into sexual activity. The law also clarified that family planning providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.

The President's FY2013 Budget requests \$297 million for Title X, 1% more than the FY2012 funding level. The Senate-reported FY2013 Labor-HHS-Education Appropriations bill would provide \$294 million. The draft appropriations bill approved by the House Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies would provide zero funding for Title X in FY2013. Continuing Appropriations Resolution, 2013 (P.L. 112-175) funds Title X through March 27, 2013, under the same authority and conditions as in FY2012, at an annualized level of \$297 million (though the amount may change depending on various factors, such as potential sequestration).

The law (42 U.S.C. §300a-6) prohibits the use of Title X funds in programs where abortion is a method of family planning. According to OPA, family planning projects that receive Title X funds are closely monitored to ensure that federal funds are used appropriately and that funds are not used for prohibited activities such as abortion. The prohibition on abortion does not apply to all the activities of a Title X grantee, but only to activities that are part of the Title X project. A grantee's abortion activities must be "separate and distinct" from the Title X project activities.

Two bills addressing Title X have been introduced in the 113th Congress. H.R. 61 and H.R. 217 would prohibit Title X grants to entities that perform abortions, with exceptions for rape, incest, and certain physician-certified cases where the woman is "in danger of death unless an abortion is performed."

Title X Program Administration and Grants

Administration

Title X is administered by the Office of Population Affairs' (OPA's) Office of Family Planning (OFP), under the Office of the Assistant Secretary for Health in the Department of Health and Human Services (HHS). Although the program is administered through OPA, funding for Title X activities is provided through the Health Resources and Services Administration (HRSA) in HHS. Authorization of appropriations expired at the end of FY1985, but the program has continued to be funded through appropriations bills for the Departments of Labor, Health and Human Services, and Education, and Related Agencies (Labor-HHS-Education).

OPA administers three types of project grants under Title X: family planning services;¹ family planning personnel training;² and family planning service delivery improvement research grants.³

Family Planning Services Grants

Services

Ninety percent of Title X funds are used for clinical services.⁴ Grants for family planning services fund family planning and related preventive health services, such as natural family planning methods; infertility services; services to adolescents; breast and cervical cancer screening and prevention; sexually transmitted disease (STD) and HIV prevention education, counseling, testing, and referral; preconception counseling; and counseling on establishing a reproductive life plan. Among the program's FY2012 priorities is one for providing preventive health services "in accordance with nationally recognized standards of care."⁵ The services must be provided "without coercion and with respect for the privacy, dignity, social, and religious beliefs of the individuals being served."⁶

Title X clinics provide confidential screening, counseling, and referral for treatment. In this regard, OPA has expressed a commitment to integrating HIV-prevention services in all family planning clinics.⁷ OPA provides supplemental grants to help Title X projects implement the

Centers for Disease Control and Prevention's "Revised Recommendations for HIV Testing of Adults, Adolescents, and Pregnant Women in Health Care Settings."⁸

Title X services offered to males include condoms, education and counseling, STD testing and treatment, HIV testing, and, in some cases, vasectomy services.⁹

Client Charges

Priority for services is given to persons from low-income families, who may not be charged for care.¹⁰ Clients from families with income between 100% and 250% of the federal poverty guideline (FPL) are charged on a sliding scale based on their ability to pay. Clients from families with income higher than 250% FPL are charged fees designed to recover the reasonable cost of providing services.¹¹

Client Characteristics

In 2011, Title X-funded clinics served 5.022 million clients, primarily low-income women and adolescents. Of those clients, 8% were male, 69% had incomes at or below the federal poverty level, and 89% had incomes at or below 200% of the federal poverty level.¹² For more than half of clients, Title X clinics are their "usual" or only continuing source of health care.¹³ In 2011, 64% of Title X clients were uninsured.¹⁴

¹⁰ 42 C.F.R. §59.2 defines "low-income family" as having income at or below 100% of the Federal Poverty Guidelines (FPL). The regulation states that "'Low-income family' also includes members of families whose annual family income exceeds this amount, but who, as determined by the project director, are unable, for good reasons, to pay for family planning services. For example, unemancipated minors who wish to receive services on a confidential basis must be considered on the basis of their own resources."

Grantees and Clinics

In 2011, there were 91 Title X family planning services grantees. Such grantees included 49 state, local, and territorial health departments and 42 nonprofit organizations, such as hospitals, community health agencies, family planning councils, and Planned Parenthood affiliates.¹⁵

Title X grantees can provide family planning services directly or they can delegate Title X monies to other agencies to provide services. Although there are no matching requirements for grants, regulations specify that no clinics may be fully supported by Title X funds.¹⁶ In 2011, Title X provided services through 4,382 clinics located in the 50 states, the District of Columbia, and the U.S. territories.¹⁷

Family Planning Training and Research Grants

Grants for family planning personnel training are used to train staff and to improve the utilization and career development of paraprofessionals.¹⁸ Staff are trained through five national training programs for Coordination and Strategic Initiatives; Management and Systems Improvement; Family Planning Service Delivery; Quality Assurance, Quality Improvement and Evaluation; and a National Clinical Training Center.¹⁹ Family planning service delivery improvement research grants are used for studies to enhance effectiveness and efficiency of the service delivery system.

More information on the Title X program can be found at <http://www.hhs.gov/opa/title-x-family-planning/>.

FY2013 Funding

Budget Request

The President's FY2013 Budget requests \$296.838 million for Title X. This would be a 1% increase over the FY2012 level of \$293.870 million.²⁰ The budget would continue previous years' requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on promoting or opposing any legislative proposal or candidate for public office.²¹

²⁰ HHS, HRSA, *Fiscal Year 2013, Justification of Estimates for Appropriations Committees*, p. 347.

²¹ HHS, HRSA, *Fiscal Year 2013, Justification of Estimates for Appropriations Committees*, p. 19.

Highlights from the FY2013 HRSA Budget *Justification* include the following:

- The proposed FY2013 funding level is projected to support family planning services for 5 million clients.
- The program's FY2013 goals include preventing 1,600 cases of infertility through Chlamydia screening and 961,000 unintended pregnancies.
- Family planning clinics will be encouraged to use electronic health records and electronic practice management systems and to improve clinics' ability to bill third parties.
- The program will continue to try to increase competition for funds, targeting areas that currently lack access to family planning services.
- The program will continue to try to improve clinic efficiency in response to rising costs for pharmaceuticals, providers, and screening and diagnostic technologies.
- The FY2013 target for cost per client served is \$292.23, with the goal of maintaining the cost per client below the medical care inflation rate.
- Clinics will be encouraged to expand the availability of long-acting reversible contraceptive methods.
- The FY2013 HRSA *Justification* describes plans to continue a contract with the Institute of Medicine (IOM) for a Standing Committee to advise the Title X program. The Standing Committee is examining the role of family planning and reproductive health in health reform and will address recommendations made in the independent IOM report, *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results* (2009). (The IOM report is discussed further in the section "Institute of Medicine Evaluation.")²²

Senate Activity

On June 14, 2012, the Senate Appropriations Committee approved its FY2013 Labor-HHS-Education appropriations bill, S. 3295. The bill would provide \$293.870 million for Title X, the same as the FY2012 funding level.

S. 3295 would continue previous years' requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on "any activity (including the publication or distribution of literature) that in any way tends to promote public support or opposition to any legislative proposal or candidate for public office." Grantees would continue to be required to certify that they encourage "family participation" when minors decide to seek family planning services and that they counsel minors on how to resist attempted coercion into sexual activity. The bill also clarifies that family planning providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.

In the committee report, the Senate Appropriations Committee supported updating program guidance to clarify that Title X funds may be used for information technology training and

²² HHS, HRSA, *Fiscal Year 2013, Justification of Estimates for Appropriations Committees*, pp. 347-353.

implementation, including electronic medical records. The committee also directed HRSA and the HHS Secretary to take certain steps to allow Title X-funded specialized family planning centers to be National Health Service Corps (NHSC) sites.²³

House Activity

On July 18, 2012, the House Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies approved its draft FY2013 appropriations bill, which would prohibit the bill's funds from being used for the Title X program.²⁴

The House subcommittee's draft bill would continue previous years' language requiring Title X grantees to certify that they encourage "family participation" when minors decide to seek family planning services and that they counsel minors on how to resist attempted coercion into sexual activity. The draft bill also clarifies that family planning providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.

The House subcommittee's draft bill would prohibit the bill's funds from being made available "for any purpose" to the Planned Parenthood Federation of America (PPFA) or any of its affiliates and clinics, unless they certify that PPFA affiliates and clinics will not perform an abortion, and will not provide any funds to any other entity that performs an abortion. There are exceptions for rape, incest, and certain physician-certified cases in which the woman is "in danger of death unless an abortion is performed." The HHS Secretary would be required to "seek repayment of any Federal assistance received by Planned Parenthood Federation of America, Inc., or any affiliate or clinic of Planned Parenthood Federation of America, Inc., if it violates the terms of the certification required by this section."

Continuing Resolution

The Continuing Appropriations Resolution, 2013 (CR, P.L. 112-175) became law on September 28, 2012. For most discretionary programs, including Title X, the CR continues funding under the same authority and conditions as in FY2012. The CR provides funding for October 1, 2012 through March 27, 2013.

For most programs receiving discretionary appropriations, the CR maintains annualized funding at the FY2012 levels provided by the Consolidated Appropriations Act, 2012 (P.L. 112-74) plus an increase of 0.612%. The CR required federal agencies to submit to Congress an operating plan

²³ S.Rept. 112-176, pp. 56-57. NHSC sites are required to provide referrals to comprehensive primary care services. The Senate Appropriations Committee directed HRSA to align Title X's and NHSC's definitions of "comprehensive primary care services." The committee also directed the HHS Secretary to provide guidance to Title X-only funded grantees on how to meet NHSC site requirements. For discussion of NHSC issues, see Rachel Benson Gold, "The National Health Service Corps: An Answer to Family Planning Centers' Workforce Woes?," *Guttmacher Policy Review*, vol. 14, no. 1 (Winter 2011), pp. 11-15; and Adam Sonfield, "Washington Watch: Providers look to help from workforce program," *Contraceptive Technology Update*, July 1, 2011.

²⁴ U.S. Congress, House Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, *Making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 2012, and for other purposes*, Draft bill, 112th Cong., 2nd sess., July 15, 2012, Sections 208, 209, 219, and 536, <http://appropriations.house.gov/uploadedfiles/bills-112hr-sc-ap-fy13-laborhhsed.pdf>.

for funds provided by the CR. The CR requires these plans to be updated in the event of sequestration or any extension of the CR itself.²⁵

The HRSA Operating Plan indicates that during the CR period, annualized funding for Title X is \$296.838 million.²⁶ Non-annualized funding for Title X for the period of the CR is \$144.768 million (This is 48.77% of the annualized CR).

Operating Plan amounts are not final. There is uncertainty depending on whether certain actions, such as sequestration, are taken pursuant to the Budget Control Act (P.L. 112-25) and the American Taxpayer Relief Act of 2012 (P.L. 112-240). Also, the agencies may request additional funds from the 0.612% increase, and the HHS Secretary has some authority to transfer funds among programs.

FY2013 Sequestration

FY2013 discretionary appropriations are being considered in the context of the Budget Control Act of 2011 (BCA; P.L. 112-25) and the American Taxpayer Relief Act of 2012 (P.L. 112-240). The BCA established discretionary spending limits for FY2012-FY2021. It also required that certain automatic across-the-board spending reductions, known as sequestration, be triggered by the failure to enact deficit reduction legislation developed by the BCA-established Joint Select Committee on Deficit Reduction. Because Congress failed to enact such legislation by the BCA-specified deadline of January 15, 2012, sequestration was scheduled to take effect on January 2, 2013. On January 2, 2013, the President signed the American Taxpayer Relief Act of 2012, which postponed sequestration until March 1, 2013, and reduced the total (government-wide) sequestration amount by \$24 billion. Unless Congress further amends or repeals the sequestration provisions in the BCA and the American Taxpayer Relief Act of 2012, automatic spending reductions are scheduled to take effect March 1, 2013.²⁷

If sequestration is triggered, the Office of Management and Budget (OMB) is expected to determine the final sequestration amounts. On September 14, 2012, OMB released *preliminary* account-level estimates of percentage reductions and dollar amount reductions under the sequestration scheduled for January 2, 2013. OMB noted that

²⁵ P.L. 112-175, sections 101, 106, 110, and 116. HRSA, *Health Resources and Services Administration: Operating Plan for FY 2013*, November 2012. The CR required that “only the most limited funding action of that permitted [by the CR] shall be taken in order to provide for continuation of projects and activities.” The Office of Management and Budget (OMB) announced that during the CR period, the FY2012 base level of funding would be automatically apportioned to agencies and programs. However, the 0.612% increase would not be automatically apportioned; agencies would have to submit a written request to OMB to obtain these funds. (OMB, Apportionment of the Continuing Resolution(s) for Fiscal Year 2013, OMB Bulletin No. 12-02, September 28, 2012, <http://www.whitehouse.gov/sites/default/files/omb/bulletins/fy2012/b12-02.pdf>). Subsequently, the HRSA Operating Plan for FY2013 does not reflect the 0.612% increase.

²⁶ Consolidated Appropriations Act, 2012 (P.L. 112-74, December 23, 2011) provided \$296.838 million to Title X. In January 2012, the HHS Secretary announced the transfer of \$2.968 million from Title X to HIV/AIDS assistance programs, bringing the FY2012 Title X funding level to \$293.870 million (Letter from Kathleen Sebelius, Secretary of Health and Human Services, to the Honorable Tom Harkin, January 20, 2012). The CR level is based on the amount provided in P.L. 112-74, prior to the transfer.

²⁷ For more background on sequestration, see CRS Report R42050, *Budget “Sequestration” and Selected Program Exemptions and Special Rules*, coordinated by Karen Spar.

The estimates and classifications in the report are preliminary. If the sequestration were to occur, the actual results would differ based on changes in law and ongoing legal, budgetary, and technical analysis.

For HRSA's discretionary "Health Resources and Services" spending, which includes Title X, OMB estimated an FY2013 reduction of 8.2% from the FY2012 level. OMB did not provide estimates for each individual HRSA program, noting that "additional time is necessary to identify, review, and resolve issues associated with providing information at this level of detail." OMB did not estimate a sequestration amount for Title X.²⁸ As of this writing, OMB's September 2012 estimates have not been updated for recent changes in law, such as the American Taxpayer Relief Act of 2012.

FY2012 Funding

FY2012 funding for Title X was \$293.870 million, 2% less than the FY2011 level of \$299.400 million.²⁹ P.L. 112-74, the Consolidated Appropriations Act, 2012, continued previous years' requirements that Title X funds not be spent on abortions, that all pregnancy counseling be nondirective, and that funds not be spent on "any activity (including the publication or distribution of literature) that in any way tends to promote public support or opposition to any legislative proposal or candidate for public office." Grantees continued to be required to certify that they encourage "family participation" when minors decide to seek family planning services and that they counsel minors on how to resist attempted coercion into sexual activity. The law also clarified that family planning providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.³⁰

The Consolidated Appropriations Act, 2012, contained a clause, known as the Weldon Amendment, stating that "None of the funds made available in this Act may be made available to a Federal agency or program, or to a State or local government, if such agency, program, or government subjects any institutional or individual health care entity to discrimination on the basis that the health care entity does not provide, pay for, provide coverage of, or refer for abortions."³¹ Some have argued that the Weldon Amendment conflicts with regulations that

²⁸ OMB, *OMB Report Pursuant to the Sequestration Transparency Act of 2012 (P.L. 112-155)*, September 14, 2012, pp. 3 and 9, and Appendix, p. 80, http://www.whitehouse.gov/sites/default/files/omb/assets/legislative_reports/stareport.pdf.

²⁹ HHS, Health Resources and Services Administration, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 347. The Consolidated Appropriations Act, 2012 (P.L. 112-74) at 125 Stat. 1066, initially provided \$297.400 million for Title X in FY2012; Division F, Title V, Section 527 applied a 0.189% across-the-board rescission to most Labor-HHS-Education items, bringing the funding level to \$296.838 million (125 Stat. 1115). In January 2012, the HHS Secretary announced the transfer of \$2.968 million from Title X to HIV/AIDS assistance programs, bringing the Title X funding level to \$293.870 million (Letter from Kathleen Sebelius, Secretary of Health and Human Services, to the Honorable Tom Harkin, January 20, 2012). Prior to passage of the Consolidated Appropriations Act, 2012 (P.L. 112-74), Congress provided temporary FY2012 funding under three continuing resolutions. P.L. 112-33, the Continuing Appropriations Act, 2012, provided funding through October 4, 2011. P.L. 112-36, the Continuing Appropriations Act, 2012, provided funding through November 18, 2011. P.L. 112-55, the Consolidated and Further Continuing Appropriations Act, 2012, provided funding through December 16, 2011. For most federal programs, including Title X Family Planning, these continuing resolutions continued funding under the same authority and conditions as for FY2011, but with a 1.503% across-the-board reduction in the rate of operations.

³⁰ P.L. 112-74, Division F, Title II, §209 and §210.

³¹ P.L. 112-74, Division F, §507(d). The Weldon Amendment was originally adopted as part of the FY2005 Labor-HHS-Education appropriations law, and has been attached to each subsequent Labor-HHS-Education appropriations (continued...)

require Title X family planning services projects to give pregnant women the opportunity to receive information, counseling, and referral upon request for several options, including “pregnancy termination.”³² In the February 23, 2011, *Federal Register*, HHS stated of potential conflicts, “The approach of a case by case investigation and, if necessary, enforcement will best enable the Department to deal with any perceived conflicts within concrete situations.”³³ This issue is discussed further in “Provider Conscience Rule” below.

On September 22, 2011, the Senate Appropriations Committee reported S. 1599, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2012. In the accompanying committee report S.Rept. 112-84, the Senate Appropriations Committee stated that it was aware of the 2009 Institute of Medicine review of the program, and that it supports the OFP’s efforts to review and update Title X program guidance and administrative directives.³⁴ The committee also stated that it encourages HRSA to allocate resources to OPA from the Patient Protection and Affordable Care Act (ACA). These resources would be used for technical assistance to help grantees prepare for ACA implementation, “including the expansion of Medicaid, technology upgrades and participating essential community providers.”³⁵

(...continued)

law: P.L. 108-447, Division F, §508(d), 118 Stat. 3163 (FY2005); P.L. 109-149, §508(d), 119 Stat. 2879 (FY2006). Under P.L. 110-5, §2, 121 Stat. 8, FY2007 appropriations were subject to the same conditions as during FY2006. P.L. 110-161, Division G, §508(d), 121 Stat. 1844 (FY2008). P.L. 111-8, Division F, §508(d), 123 Stat. 803 (FY2009). P.L. 111-117, Division D, §508(d), 123 Stat. 3280 (FY2010). Under P.L. 112-10, Division B, §1101, FY2011 appropriations were subject to the same conditions as during FY2010.

³² 42 C.F.R. 59.5(a)(5). Examples of this argument appear in “Weldon Amendment,” *Congressional Record*, daily edition, vol. 151, no. 51 (April 25, 2005), p. S4222; and “Federal Refusal Clause,” *Congressional Record*, daily edition, vol. 151, no. 52 (April 26, 2005), p. S425. The National Family Planning and Reproductive Health Association (NFPRHA), many of whose members provide Title X services, filed a lawsuit challenging the Weldon Amendment in the U.S. District Court for the District of Columbia. The court found that “While Weldon may not provide the level of guidance that NFPRHA or its members would prefer, may create a conflict with pre-existing agency regulations, and may impose conditions that NFPRHA members find unacceptable, none of these reasons provides a sufficient basis for the court to invalidate an act of Congress in its entirety.” Upon appeal, the U.S. Court of Appeals for the District of Columbia Circuit found that the plaintiff lacked the standing to challenge the Weldon Amendment. *See National Family Planning and Reproductive Health Association, Inc., v. Alberto Gonzales, et al.*, 468 F.3d 826 (D.C. Cir. 2006), and 391 F. Supp. 2d 200, 209 (D.D.C. 2005).

H2378. FY2010: P.L. 111-117, 123 Stat. 3239. FY2011: P.L. 112-10, §1810 and §1119. FY2012: HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 347.

- a. The FY2013 funding level has not yet been finalized. The President’s FY2013 Budget requests \$296.8 million. The Senate-reported FY2013 Labor-HHS-Education Appropriations bill, S. 3295, proposes \$293.9 million. The House Appropriations Labor-HHS-Education Subcommittee’s draft FY2013 bill proposes zero funding for Title X. Under the Continuing Appropriations Resolution, 2013 (CR, P.L. 112-175), annualized funding for Title X is \$296.838 million. The CR runs from October 1, 2012 through March 27, 2013.

Institute of Medicine Evaluation

At the request of OFP, the Institute of Medicine (IOM) of the National Academy of Sciences independently evaluated the Title X program and made recommendations in *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results* (2009).³⁶

³⁶ Institute of Medicine (IOM), Committee on a Comprehensive Review of the HHS Office of Family Planning Title X Program, *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results*, ed. Adrienne Stith Butler and Ellen Wright Clayton (Washington, DC: The National Academies Press, 2009), http://www.nap.edu/catalog.php?record_id=12585.

IOM found that family planning—“helping people have children when they want to and avoid conception when they do not—is a critical social and public health goal,” and that the “federal government has a responsibility to support the attainment of this goal.” IOM noted, for example, that family planning can prevent unintended and high-risk pregnancies, thereby reducing fetal, infant, and maternal mortality and morbidity. IOM also stated that the appropriate use of contraception can reduce abortion rates and cited “ample evidence that family planning services are cost-effective.”³⁷

IOM recommended that OFP develop and implement a multiyear evidence-based strategic plan.³⁸ IOM also made specific recommendations to improve program management and administration. For example, IOM recommended that

- program funding be increased so that statutory responsibilities can be met,
- methods of allocating funds be examined and improved,
- drug purchasing sources be consolidated,
- clinics’ administrative burden be reduced,
- a single method be adopted for determining criteria for eligible services,
- transparency be increased,
- workforce needs be assessed, and
- program guidelines be evidence-based.³⁹

Finally, IOM made recommendations to improve program evaluation. For example, IOM recommended that

- OFP collect additional data on client and system characteristics, the process and quality of care, and program outcomes;
- OFP fund and use a comprehensive framework for evaluating Title X;
- OFP obtain scientific input on its evaluation efforts; and
- evaluation findings be communicated to grantees, clinics, and others.⁴⁰

In response to the IOM recommendations, OPA plans to have new Title X Family Planning Service Guidelines in FY2013. These guidelines were developed over two years, during which expert panels reviewed the scientific literature. OPA states that the new guidelines will have “a foundation of empirical evidence and information supporting clinical practice.”⁴¹

³⁸ IOM, *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results*, p. 98.

³⁹ IOM, *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results*, pp. 140-143.

⁴⁰ IOM, *A Review of the HHS Family Planning Program: Mission, Management, and Measurement of Results*, pp. 166-170.

⁴¹ HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 351.

Also in response to the IOM report, HHS has a contract with IOM to convene a Standing Committee to advise the Title X program. According to the FY2013 HRSA *Justification*, the Standing Committee is advising the program on the following areas related to report recommendations: strategic planning, workforce planning, improving data collection on program performance, and improving communication and transparency. The Standing Committee is also examining the roles of family planning, reproductive health, and Title X in health reform.⁴²

The Patient Protection and Affordable Care Act and Title X

The Patient Protection and Affordable Care Act (ACA) has numerous provisions that may impact Title X clinics.⁴³ Notably, ACA increases access to health insurance.⁴⁴ (In 2011, 64% of Title X clients were uninsured.)⁴⁵ Federal ACA regulations and guidance will also require most health plans and health insurers to cover contraceptive services without cost-sharing.

ACA has several provisions that may increase health insurance coverage in the populations currently served by Title X. These provisions could help free up funds that Title X clinics currently spend on serving the uninsured. For example,

- States can expand Medicaid eligibility to include most nonelderly, nonpregnant individuals with income at or below 133% of FPL, effectively 138% FPL with the 5% income disregard.⁴⁶ (In 2011, 69% of Title X clients had incomes under 101% of FPL; another 15% had incomes between 101% and 150% of FPL.)⁴⁷

⁴² HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, pp. 350-351. IOM, Standing Committee on Family Planning, <http://www.iom.edu/Activities/Women/FamilyPlanning.aspx>.

⁴³ The Patient Protection and Affordable Care Act (P.L. 111-148, March 23, 2010) was amended by the Health Care Education and Reconciliation Act of 2010 (P.L. 111-152, March 30, 2010). These acts will be collectively referred to in this report as “ACA.”

⁴⁴ The Congressional Budget Office estimates that the share of nonelderly residents with insurance will grow from 80% in 2012 to 89% by 2022. Congressional Budget Office, *Estimates for the Insurance Coverage Provisions of the Affordable Care Act Updated for the Recent Supreme Court Decision*, July 24, 2012, p. 20, <http://cbo.gov/publication/43472>.

⁴⁵ Christina Fowler, Stacey Lloyd, Julia Gable, Jiantong Wang, and Emily McClure, *Family Planning Annual Report: 2011 National Summary*, pp. 21, 23.

⁴⁶ P.L. 111-148, §2001 as modified by §10201; P.L. 111-152, §1004 and §1201. This provision is summarized in CRS Report R41210, *Medicaid and the State Children’s Health Insurance Program (CHIP) Provisions in ACA: Summary and Timeline*, by Evelyn P. Baumrucker et al., and CRS Report RL33202, *Medicaid: A Primer*, by Elicia J. Herz. See also *To Be or Not to Be a “New Program”? What does NFIB v. Sebelius Mean for Implementation of the Affordable Care Act’s Medicaid Expansion Provision?*, by Kathleen Swendiman, <http://www.crs.gov/analysis/legalsidebar/pages/details.aspx?ProdId=121>. Medicaid is jointly financed by federal and state governments. All state Medicaid programs are mandated to include family planning services and supplies in their benefit packages, with no cost-sharing. For those in the new eligibility group, the federal government will pay 100% of Medicaid expenditures in 2014 through 2016, including family planning expenditures, gradually declining to 90% in 2020 and thereafter. For all other Medicaid enrollees, the federal government pays 90% of Medicaid family planning expenditures.

⁴⁷ Christina Fowler, Stacey Lloyd, Julia Gable, Jiantong Wang, and Emily McClure, *Family Planning Annual Report: 2011 National Summary*, p. 22.

- ACA gives states the option, through a Medicaid state plan amendment, of providing targeted Medicaid family planning services and supplies to certain individuals who would otherwise be ineligible for Medicaid.⁴⁸
- ACA requires most private health plans that cover dependents to continue to make such coverage available for young adult children under the age of 26.⁴⁹ (In 2011, 51% of Title X clients were younger than 25 years old; another 21% were aged 25 to 29.)⁵⁰
- Beginning in 2014, ACA will provide certain individuals and small businesses with access to private health plans through new health insurance exchanges and will subsidize the premium costs for certain individuals.⁵¹
- Beginning in 2014, ACA's individual mandate provision will require most individuals to have health insurance or pay a penalty.⁵²

ACA provisions to expand health insurance coverage are described in CRS Report R41664, *ACA: A Brief Overview of the Law, Implementation, and Legal Challenges*, coordinated by C. Stephen Redhead.

OPA has established FY2012 Program Priorities to guide the project plans of family planning services grantees. In response to ACA, one of these priorities is to improve Title X clinics' ability to bill Medicaid and private health insurance:

Identifying specific strategies for addressing the provisions of health care reform ("The Patient Protection and Affordable Care Act"), and for adapting delivery of family planning and reproductive health services to a changing health care environment, and assisting clients with navigating the changing health care system. This includes, but is not limited to, enhancing the ability of Title X clinics to bill third party payers, private insurance, and Medicaid.⁵³

⁴⁸ P.L. 111-148, §2303. This provision was effective upon enactment. Prior to ACA, states could provide these Medicaid family planning expansions only by obtaining special waivers. This provision is summarized in CRS Report R41210, *Medicaid and the State Children's Health Insurance Program (CHIP) Provisions in ACA: Summary and Timeline*, by Evelyn P. Baumrucker et al. As of January 1, 2013, nine states have had state plan amendments approved under this new authority. Guttmacher Institute, *State Policies in Brief as of January 1, 2013: Medicaid Family Planning Eligibility Expansion*, http://www.guttmacher.org/statecenter/spibs/spib_SMFPE.pdf. Federal guidance is provided in Cindy Mann, Director, Center for Medicaid, CHIP and Survey & Certification, *State Medicaid Directors Letter #10-013, Family Planning Services Option and New Benefit Rules for Benchmark Plans*, July 2, 2010, <https://www.cms.gov/smdl/downloads/SMD10013.pdf>.

⁴⁹ P.L. 111-148, §1001, as amended by P.L. 111-152, §2301. This dependent coverage provision is effective for plan years beginning on or after September 23, 2010. The provision is summarized in CRS Report R41220, *Preexisting Condition Exclusion Provisions for Children and Dependent Coverage under the Patient Protection and Affordable Care Act (ACA)*, by Bernadette Fernandez.

⁵⁰ Christina Fowler, Stacey Lloyd, Julia Gable, Jiantong Wang, and Emily McClure, *Family Planning Annual Report: 2011 National Summary*, pp. 10-11.

⁵¹ To ensure access for low-income individuals, most exchange plans will be required to have a sufficient number and geographic distribution of "essential community providers," which include Title X projects. HHS, "Patient Protection and Affordable Care Act; Establishment of Exchanges and Qualified Health Plans; Exchange Standards for Employers," 77 *Federal Register* 18470, March 27, 2012; 45 C.F.R. §156.235.

⁵² P.L. 111-148, §1501 and §10106, as amended by P.L. 111-152, §1002. This provision is summarized in CRS Report R41331, *Individual Mandate and Related Information Requirements under ACA*, by Janemarie Mulvey and Hinda Chaikind.

⁵³ HHS, OPA, *Title X Family Planning Program Priorities*, [http://www.hhs.gov/opa/title-x-family-planning/title-x-\(continued...\)](http://www.hhs.gov/opa/title-x-family-planning/title-x-(continued...))

Title X clinics could also provide enrollment assistance to clients who become newly eligible for Medicaid or exchange plans.⁵⁴ Title X supporters state that, although clinics currently funded by Title X could see increased revenues from Medicaid and private insurance after 2014, the Title X program will still be necessary:

In addition to medical care, Title X supports activities that are not reimbursable under Medicaid and commercial insurance plans... Title X has made a major contribution to the training of clinicians; that need remains today... Title X helps to support staff salaries, not just for clinicians but for front-desk staff, educators and finance and administrative staff. Title X provides for individual patient education as well as community-level outreach and public education about family planning and women's health issues. Title X also helps to support the infrastructure necessary to keep the doors open—subsidizing rent, utilities and infrastructure needs like health information technology.⁵⁵

Some advocates note that even after 2014, family planning services will still be sought by uninsured persons and dependents who, for confidentiality reasons, might not wish to bill reproductive health services to their parent's or spouse's health insurance.⁵⁶ Advocates maintain that even after 2014, there will still be strong demand for safety net providers, such as many Title X clinics, that provide health care to underserved populations.⁵⁷

ACA requires most private health plans to cover certain preventive services for women without cost-sharing.⁵⁸ HHS commissioned IOM to recommend preventive services to be included in this requirement.⁵⁹ Adopting the IOM recommendations, federal rules and guidelines require that most health plans cover, without cost-sharing, “All Food and Drug Administration approved contraceptive methods, sterilization procedures, and patient education and counseling for all women with reproductive capacity,” as prescribed.⁶⁰ Some have noted that this requirement, by

⁵⁶ The Congressional Budget Office estimates that about 30 million nonelderly residents will remain uninsured in 2022. Congressional Budget Office, *Estimates for the Insurance Coverage Provisions of the Affordable Care Act Updated for the Recent Supreme Court Decision*, July 24, 2012, p. 20. Confidentiality issues are discussed in Rachel Benson Gold, “Unintended Consequences: How Insurance Processes Inadvertently Abrogate Patient Confidentiality,” *Guttmacher Policy Review*, vol. 12, no. 4 (fall 2009), pp. 12-16, <http://www.guttmacher.org/pubs/gpr/12/4/gpr120412.html>.

⁵⁷ Leighton Ku, Emily Jones, and Peter Shin et al., “Safety-Net Providers After Health Care Reform: Lessons from Massachusetts,” *Archives of Internal Medicine*, vol. 171, no. 15 (August 2011), pp. 1379-1384. Massachusetts passed its health reform law in 2006. The authors found that between 2005 and 2009, the state's community health centers (which include some Title X clinics) saw a 31% increase in number of clients served. OPA's *Family Planning Annual Reports* indicate that between 2005 and 2010, the number of Title X clients in Massachusetts declined 7%, from 73,784 in 2005 to 68,446 in 2010. Nationally over the same time period, the number of Title X clients increased 4%, from 5.003 million in 2005 to 5.225 million in 2010. HHS, OPA, *Family Planning Annual Reports*, <http://www.hhs.gov/opa/title-x-family-planning/research-and-data/fp-annual-reports/#fpar>.

⁵⁹ IOM, *Clinical Preventive Services for Women: Closing the Gaps* (Washington, DC: The National Academies Press, 2011), http://www.nap.edu/catalog.php?record_id=13181.

⁶⁰ The requirement is effective for plan years beginning on or after August 1, 2012, with some exceptions for religious (continued...)

removing up-front cost barriers, could result in more women switching to longer-acting contraceptive methods, such as hormonal implants and intrauterine devices.⁶¹ The HRSA *Justification* notes that in FY2013, “Family planning centers will be encouraged and trained to provide a broad range of contraceptives, with a focus on expanding the availability of long-acting reversible methods.”⁶²

ACA may also impact Title X clinics in other ways. For example, because ACA increased the rebate percentage drug makers pay on drugs purchased for Medicaid beneficiaries, Title X clinics likely will receive larger discounts on drugs obtained through the 340B drug discount program.⁶³ ACA also increases funding for teen pregnancy prevention efforts, expands healthcare workforce programs, and increases funding for community health centers.⁶⁴ HHS has a contract with IOM to convene a Standing Committee to advise the Title X program. Among other topics, the IOM Standing Committee is examining the roles of family planning, reproductive health, and Title X in health reform.⁶⁵

Abortion and Title X

The law prohibits the use of Title X funds in programs where abortion is a method of family planning.⁶⁶ On July 3, 2000, OPA released a final rule with respect to abortion services in family

(...continued)

entities. Condoms and vasectomies are not included. HHS, HRSA, *Women’s Preventive Services: Required Health Plan Coverage Guidelines*, <http://www.hrsa.gov/womensguidelines/>. ⁶² HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 351.

⁶³ P.L. 111-148, §2501. Title X clinics are among the entities eligible to receive discounts on certain drugs’ prices under Section 340B of the Public Health Service Act. The maximum prices that drug manufacturers can charge 340B entities are calculated using the Medicaid rebate formula. The ACA provision is summarized in CRS Report R41210, *Medicaid and the State Children’s Health Insurance Program (CHIP) Provisions in ACA: Summary and Timeline*, by Evelyne P. Baumrucker et al. The 340B program website is <http://www.hrsa.gov/opa>. There were 3,868 Title X clinic sites enrolled in the 340B program as of July 1, 2011. U.S. Government Accountability Office, *Drug Pricing: Manufacturer Discounts in the 340B Program Offer Benefits, but Federal Oversight Needs Improvement*, GAO-11-836, September 23, 2011, p. 39, <http://gao.gov/products/GAO-11-836>.

⁶⁴ These and other ACA provisions that could potentially impact Title X clinics are summarized in CRS Report R41278, *Public Health, Workforce, Quality, and Related Provisions in PPACA: Summary and Timeline*, coordinated by C. Stephen Redhead and Erin D. Williams, and CRS Report R41210, *Medicaid and the State Children’s Health Insurance Program (CHIP) Provisions in ACA: Summary and Timeline*, by Evelyne P. Baumrucker et al.

⁶⁵ IOM, *Standing Committee on Family Planning*, <http://www.iom.edu/Activities/Women/FamilyPlanning.aspx>. HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 351.

⁶⁶ 42 U.S.C. §300a-6. In addition, language in annual Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations bills have also prohibited the use of Title X funds for abortions (in (continued...))

planning projects.⁶⁷ The rule updated and revised regulations that had been in effect since 1988.⁶⁸ The major revision revoked the “gag rule,” which restricted family planning grantees from providing abortion-related information. The regulation at 42 C.F.R. Section 59.5 had required, and continues to require, that abortion not be provided as a method of family planning. The July 3, 2000, rule amended the section to add the requirement that a project must give pregnant women the opportunity to receive information and counseling on each of the following options: prenatal care and delivery; infant care, foster care, or adoption; and pregnancy termination. If the woman requests such information and counseling, the project must give “neutral, factual information and nondirective counseling on each of the options, and referral upon request, except with respect to any option(s) about which the pregnant woman indicates she does not wish to receive such information and counseling.”⁶⁹

According to OPA, family planning projects that receive Title X funds are closely monitored to ensure that federal funds are used appropriately and that funds are not used for prohibited activities such as abortion. The prohibition on abortion does not apply to all the activities of a Title X grantee, but only to activities that are part of the Title X project. The grantee’s abortion activities must be “separate and distinct” from the Title X project activities.⁷⁰ Safeguards to maintain this separation include (1) careful review of grant applications to ensure that the applicant understands the requirements and has the capacity to comply with all requirements; (2) independent financial audits to examine whether there is a system to account for program-funded activities and non-allowable program activities; (3) yearly comprehensive reviews of the grantees’ financial status and budget report; and (4) periodic and comprehensive program reviews and site visits by OPA regional offices.⁷¹

It is unclear exactly how many Title X clinics also provide abortions through their non-Title X activities. In 2004, following appropriations conference report directions, HHS surveyed its Title X grantees on whether their clinic sites also provided abortions with non-federal funds.⁷² Grantees were informed that responses were voluntary and “without consequence, or threat of consequence, to non-responsiveness.” The survey did not request any identifying information. HHS mailed surveys to 86 grantees and received 46 responses. Of these, 9 indicated that at least one of their clinic sites (17 clinic sites in all) also provided abortions with non-federal funds, and

(...continued)

FY2012, this provision appeared in P.L. 112-74, 125 Stat. 1066). For background on abortion funding restrictions in general, see CRS Report RL33467, *Abortion: Judicial History and Legislative Response*, by Jon O. Shimabukuro.

⁶⁷ HHS, OPA, “Standards of Compliance for Abortion-Related Services in Family Planning Services Projects,” 65 *Federal Register* 41270–41280, July 3, 2000; and HHS, OPA, “Provision of Abortion-Related Services in Family Planning Services Projects,” 65 *Federal Register* 41281-41282, July 3, 2000.

⁶⁸ 42 C.F.R. Part 59, “Grants for family planning services.”

⁶⁹ On December 19, 2008, HHS published a provider conscience rule which, according to HHS, is inconsistent with the requirement that Title X grantees provide clients with abortion referrals upon request. 73 *Federal Register* 78087. This is discussed below in “Provider Conscience Rule.”

⁷⁰ 65 *Federal Register* 41281-41282, July 3, 2000.

⁷¹ E-mail from Barbara Clark, HHS, Office of the Assistant Secretary for Legislation, August 24, 2006. See also *OPA Program Instruction Series, OPA 11-01: Title X Grantee Compliance with Grant Requirements and Applicable Federal and State Law, including State Reporting Laws*, Letter from Marilyn J. Keefe, Deputy Assistant Secretary for Population Affairs, to Regional Health Administrators, Regions I-X; Title X Grantees, March 1, 2011, <http://www.hhs.gov/opa/pdf/opa-11-01-program-instruction-re-compliance.pdf>.

⁷² HHS, *Report to Congress Regarding the Number of Family Planning Sites Funded Under Title X of the Public Health Service Act That Also Provide Abortions with Non-Federal Funds*, 2004. HHS was directed to conduct the survey by FY2004 appropriations conference report H.Rept. 108-401, pp. 800-801.

34 indicated that none of their clinic sites provided abortions with non-federal funds; 3 responses had no numerical data or said the information was unknown.

Title X supporters argue that family planning reduces unintended pregnancies, thereby reducing abortion.⁷³ HHS estimates that Title X family planning services helped avert 996,000 unintended pregnancies in 2010.⁷⁴ The Guttmacher Institute estimates that clinics receiving Title X funds helped avert 406,200 abortions in 2008.⁷⁵

On the other hand, Title X critics argue that federal funds should be withheld from any organization that performs or promotes abortions, such as the Planned Parenthood Federation of America. These critics argue that federal funding for non-abortion activities frees up Planned Parenthood's other resources for its abortion activities.⁷⁶ Some critics also argue that if a family planning program is operated by an organization that also performs abortions, the implicit assumption and the message to clients is that abortion is a method of family planning.⁷⁷

Teenage Pregnancy and Title X

In 2011, 21% of Title X clients were aged 19 or younger.⁷⁸ Critics argue that by funding Title X, the federal government is implicitly sanctioning nonmarital sexual activity among teens. These critics argue that a reduced teenage pregnancy rate could be achieved if family planning programs emphasized efforts to convince teens to delay sexual activity, rather than efforts to decrease the percentage of sexually active teens who become pregnant.⁷⁹ (See CRS Report RS20301, *Teenage Pregnancy Prevention: Statistics and Programs*, by Carmen Solomon-Fears, for a broader discussion of teen pregnancy.)

⁷³ Examples of this argument can be found in Rachel Benson Gold, Adam Sonfield, and Cory L. Richards, et al., *Next Steps for America's Family Planning Program: Leveraging the Potential of Medicaid and Title X in an Evolving Health Care System*, Guttmacher Institute, New York, 2009, pp. 16-17, <http://www.guttmacher.org/pubs/NextSteps.pdf>, and in U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, *Threat to Title X and Other Women's Health Services*, 104th Cong., 1st sess., August 10, 1995, S.Hrg. 104-416 (Washington: GPO, 1996), pp. 16-21.

⁷⁴ HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 349.

⁷⁶ Examples of this argument can be found in House debate, *Congressional Record*, daily edition, vol. 154, no. 112 (July 9, 2008), pp. H6320-H6326. In 2011, 333,964 abortion procedures were performed by Planned Parenthood affiliates, comprising 3% of Planned Parenthood services that year, according to the Planned Parenthood Federation of America, *Planned Parenthood 2011-2012 Annual Report*, 2013, pp. 4-5, <http://www.plannedparenthood.org/about-us/annual-report-4661.htm>.

⁷⁷ An example of these arguments can be found in U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, *Threat to Title X and Other Women's Health Services*, pp. 22-35.

⁷⁸ Christina Fowler, Stacey Lloyd, Julia Gable, Jiantong Wang, and Emily McClure, *Family Planning Annual Report: 2011 National Summary*, p. 9.

⁷⁹ An example of these arguments can be found in U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, *Threat to Title X and Other Women's Health Services*, pp. 22-35.

The program's supporters, on the other hand, argue that the Title X program should be expanded to serve more people in order to reduce the rate of unintended pregnancies. According to HHS, in 2010, Title X family planning services helped avert an estimated 219,000 unintended teen pregnancies.⁸⁰ Supporters of expanding family planning services argue that the United States has a higher teen pregnancy rate than some countries (such as Sweden) where a similar percentage of teens are sexually active, in part because U.S. teens use contraception less consistently.⁸¹

Confidentiality for Minors and Title X

Confidentiality is required for personal information about Title X services provided to individuals.⁸² Regarding services to minors, Title X project guidelines state:

Adolescents must be assured that the counseling sessions are confidential and, if follow-up is necessary, every attempt will be made to assure the privacy of the individual. However, counselors should encourage family participation in the decision of minors to seek family planning services and provide counseling to minors on resisting attempts to coerce minors into engaging in sexual activities. Title X projects may not require written consent of parents or guardians for the provision of services to minors. Nor can the project notify parents or guardians before or after a minor has requested and received Title X family planning services.⁸³

Although minors are to receive confidential services, Title X providers are not exempt from state notification and reporting laws on child abuse, child molestation, sexual abuse, rape, or incest.⁸⁴

As for payment of services provided to minors, Title X regulations indicate that “unemancipated minors who wish to receive services on a confidential basis must be considered on the basis of

⁸⁰ HHS, HRSA, *Fiscal Year 2013 Justification of Estimates for Appropriations Committees*, p. 349. See also the discussion of publicly funded family planning services in “Programs to Reduce Unintended Pregnancy,” in The Institute of Medicine, *The Best Intentions: Unintended Pregnancy and the Well-Being of Children and Families* (Washington: National Academy Press, 1995), p. 220, http://www.nap.edu/catalog.php?record_id=4903.

⁸¹ An example of these arguments can be found in U.S. Congress, Senate Committee on Appropriations, Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, *Threat to Title X and Other Women's Health Services*, pp. 16-21. See also Jacqueline E. Darroch, et al., “Differences in Teenage Pregnancy Rates Among Five Developed Countries: The Roles of Sexual Activity and Contraceptive Use,” *Family Planning Perspectives*, vol. 33, no. 6 (November/December 2001), pp. 244-251.

⁸² 42 C.F.R. §59.11. Also, several court cases have interpreted Title X statute as supporting confidentiality for minors; see Glenn A. Guarino, “Provision of family planning services under Title X of Public Health Service Act (42 U.S.C.A. §300-300a-8) and implementing regulations,” *American Law Reports Federal*, 1985, 71 A.L.R. Fed. 961.

⁸³ HHS, Office of Family Planning, *Program Guidelines For Project Grants For Family Planning Services*, January 2001, p. 25, <http://www.hhs.gov/opa/title-x-family-planning/title-x-policies/program-guidelines/>. For an overview of Title X efforts to encourage family participation, see RTI International, *An Assessment of Parent Involvement Strategies in Programs Serving Adolescents: Final Report*, 2007, <http://www.hhs.gov/opa/pdfs/parent-involvement-final-report.pdf>. The report found that parent involvement is associated with several positive outcomes, such as delayed sexual initiation and lower rates of pregnancy and sexually transmitted infections.

⁸⁴ P.L. 112-74, Division F, Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2010, Title II, Department of Health and Human Services, §210, 125 Stat. 1083. *OPA Program Instruction Series, OPA 11-01: Title X Grantee Compliance with Grant Requirements and Applicable Federal and State Law, including State Reporting Laws*, Letter from Marilyn J. Keefe, Deputy Assistant Secretary for Population Affairs, to Regional Health Administrators, Regions I-X; Title X Grantees, March 1, 2011, <http://www.hhs.gov/opa/pdfs/opa-11-01-program-instruction-re-compliance.pdf>.

their own resources.”⁸⁵ The project guidelines instruct that “Eligibility for discounts for minors who receive confidential services must be based on the income of the minor.”⁸⁶

Supporters of confidentiality argue that parental notification or parental consent requirements would lead some sexually active adolescents to delay or forgo family planning services, thereby increasing their risk of pregnancy or sexually transmitted diseases.⁸⁷

Critics argue that confidentiality requirements can interfere with parents’ right to know of and to guide their children’s health care. Some critics also disagree with discounts for minors without regard to parents’ income, because the Title X program was intended to serve “low-income families.”⁸⁸

Planned Parenthood and Title X

The Planned Parenthood Federation of America (PPFA) operates through a national office and 74 affiliates, which operate nearly 800 local health centers.⁸⁹ Affiliates participating in Title X can receive funds directly from HHS or indirectly from other Title X grantees, such as their state or local health departments. PPFA and its affiliates receive about \$66 million in annual Title X funding, according to the PPFA Washington Office.⁹⁰

In May 2010, the Government Accountability Office (GAO) released a report with data on the obligations and expenditures of federal funds for several nonprofit organizations, including PPFA and its affiliates.⁹¹

According to the GAO report, in FY2009, HHS reported obligating to Planned Parenthood and its affiliates \$18.2 million through the Title X Family Planning Services program and \$0.3 million through Title X Family Planning Service Delivery Improvement Research Grants.⁹² These figures reflected funds that HHS provided directly to these organizations. They did not include Title X

⁸⁵ 42 C.F.R. §59.2.

⁹² GAO, *Federal Funds: Fiscal Years 2002-2009 Obligations, Disbursements, and Expenditures for Selected Organizations Involved in Health-Related Activities*, p. 16.

funds that reached Planned Parenthood or its affiliates indirectly through subgrants or that passed through from state agencies or other organizations.

The GAO report also showed Planned Parenthood's expenditures of Title X funds. These expenditures were identified through audit reports that Planned Parenthood and its affiliates submitted to comply with Office of Management and Budget (OMB) audit requirements.⁹³ Expenditures included federal funds provided directly or indirectly to these organizations. The most recent expenditure data were from FY2008, when Planned Parenthood and its affiliates reported spending \$53 million from the Title X Family Planning Services program.⁹⁴

Provider Conscience Rule

Overview

Several already existing federal restrictions protect health care providers from being coerced to provide certain services to which they object. These statutory restrictions prohibit recipients of certain federal funds from discriminating against such providers. These restrictions include the Church Amendment (which protects those with religious or moral objections to abortion and sterilization), Public Health Service (PHS) Act Section 245 (which protects certain individuals, medical schools, and training programs that will not provide, perform, make arrangements for, or refer for abortions or abortion training), and the Weldon Amendment (which protects certain entities that will not provide, pay for, provide coverage for, or refer for abortions).⁹⁵

In the December 19, 2008, *Federal Register*, HHS published a final rule, often called the provider conscience rule, that was intended to increase awareness of these existing restrictions.⁹⁶ Some critics argued that the rule would limit patients' access to contraception, and that it conflicted with the Title X requirement that grantees provide pregnant women, upon request, nondirective counseling and referrals on several options including abortion.

The rule became effective January 20, 2009. In the March 10, 2009, *Federal Register*, HHS proposed to rescind the provider conscience rule and invited public comments.⁹⁷

⁹³ Organizations with annual expenditures of federal funds of \$500,000 or more are required to have an audit. The GAO report includes expenditure data from 85 Planned Parenthood affiliates. GAO, *Federal Funds: Fiscal Years 2002-2009 Obligations, Disbursements, and Expenditures for Selected Organizations Involved in Health-Related Activities*, p. 10 footnote b, p. 22 footnote 1.

⁹⁴ GAO, *Federal Funds: Fiscal Years 2002-2009 Obligations, Disbursements, and Expenditures for Selected Organizations Involved in Health-Related Activities*, p. 25.

⁹⁵ More background about these and other federal provider conscience provisions is in CRS Report R40722, *Health Care Providers' Religious Objections to Medical Treatment: Legal Issues Related to Religious Discrimination in Employment and Conscience Clause Provisions*, by Cynthia Brougher and Edward C. Liu, and CRS Report RL34703, *The History and Effect of Abortion Conscience Clause Laws*, by Jon O. Shimabukuro. See also HHS, Office for Civil Rights (OCR), *Overview of Federal Statutory Health Care Provider Conscience Protections*, <http://www.hhs.gov/ocr/civilrights/faq/providerconsciencefaq.html>, and *Federal Health Care Conscience Protection Statutes*, <http://www.hhs.gov/ocr/civilrights/understanding/ConscienceProtect/index.html>.

⁹⁶ U.S. Department of Health and Human Services, "Ensuring Department of Health and Human Services Funds Do Not Support Coercive or Discriminatory Policies or Practices in Violation of Federal Law," 73 *Federal Register* 78072-78101, December 19, 2008, <http://federalregister.gov/a/E8-30134>.

⁹⁷ HHS, "Rescission of the Regulation Entitled 'Ensuring That Department of Health and Human Services Funds Do (continued...)"

In the February 23, 2011, *Federal Register*, HHS rescinded most of the rule, except for a provision that the HHS Office for Civil Rights will handle complaints based on federal health care provider conscience protection restrictions. HHS stated that parts of the 2008 rule were “unclear and potentially overbroad in scope,” and noted that the rescission “does not alter or affect the federal statutory health care provider conscience protections” that already exist.⁹⁸

2008 Rule

The 2008 provider conscience rule stated that entities carrying out HHS health service programs shall not require individuals “to perform or assist in the performance of any part of a health service program or research activity funded by the Department if such service or activity would be contrary to his religious beliefs or moral convictions.”⁹⁹ The rule defined *assist in the performance* as participating in any activity with a “reasonable connection” to the objectionable procedure or health service, including “counseling, referral, training, and other arrangements” for the procedure or health service.¹⁰⁰

The rule prohibited recipients of HHS appropriations act funds from subjecting institutions or individuals to discrimination because they did not refer patients for abortions.¹⁰¹ Also, the rule prohibited recipients of grants under the Public Health Service Act from discriminating against physicians or other health care professionals because they refused to assist in the performance of sterilization or abortion based on religious beliefs or moral convictions.¹⁰²

Before publishing the final rule, HHS solicited public comments.¹⁰³ Some commenters argued that the rule was inconsistent with the Title X regulatory requirement that grantees provide pregnant women, upon request, nondirective counseling and referrals on several options including abortion.¹⁰⁴ The Title X requirement states that if the woman requests such information and counseling, the project must give “neutral, factual information and nondirective counseling on each of the options, and referral upon request, except with respect to any option(s) about which the pregnant woman indicates she does not wish to receive such information and counseling.”¹⁰⁵

¹⁰³ Comments may be viewed at <http://www.regulations.gov/#>. (Check the “Public Submissions” box).

¹⁰⁴ Examples of such comments include Letter from Sharon L. Camp, President and CEO, Guttmacher Institute, to HHS, September 24, 2008, <http://www.guttmacher.org/media/resources/2008/09/24/GuttmacherInstitute-re-ConscienceRegulation.pdf>, and Letter from Caroline Fredrickson, Director, Washington Legislative Office, American Civil Liberties Union (ACLU), Louise Melling, Director, Reproductive Freedom Project, ACLU, and Vania Leveille, Washington Legislative Office, ACLU et al. to HHS, September 25, 2008, http://www.aclu.org/images/asset_upload_file467_36942.pdf.

¹⁰⁵ 42 C.F.R. §59(a)(5).

HHS responded that the provider conscience requirement did indeed conflict with the Title X requirement, so that in certain situations, OPA would not enforce the Title X referral regulation:

With regards to the Title X program, Commenters are correct that the current regulatory requirement that grantees must provide counseling and referrals for abortion upon request (42 C.F.R. 59.5(a)(5)) is inconsistent with the health care provider conscience protection statutory provisions and this regulation. The Office of Population Affairs, which administers the Title X program, is aware of this conflict with the statutory requirements and, as such, would not enforce this Title X regulatory requirement on objecting grantees or applicants.¹⁰⁶

The 2008 rule did not define the term *abortion*. Some commenters argued that by not defining abortion as excluding contraception, the rule could jeopardize Title X programs. HHS responded that “questions over the nature of abortion and the ending of a life are highly controversial and strongly debated,” and so declined to issue a formal definition. HHS added that “nothing in this rule alters the obligation of federal Title X programs to deliver contraceptive services to clients in need as authorized by law and regulation.”¹⁰⁷

Some commenters argued that the rule would make it difficult for Title X clinics to screen job applicants to ensure that staff were willing to provide contraceptive services. HHS responded that job applicants would be unlikely to apply for, or be best qualified for, jobs where they object to the majority of the work. HHS explained further:

To the extent a health care employer’s adverse decision is based on an applicant’s inability to perform the essential functions of a job, the decision would not typically constitute discrimination under the regulation even if the applicant had expressed an unwillingness to perform those functions on conscience grounds. However, an adverse decision predicated on an applicant’s alleged “inability” could constitute unlawful discrimination if the employer’s stated reasons are pretextual; for example, if the employer is using the definition of essential functions as a pretext for excluding applicants with certain religious beliefs or moral convictions.¹⁰⁸

In response to comments that the rule would restrict patients’ access to contraception, HHS responded that “we have found no evidence that these regulations will create new barriers in accessing contraception unless those contraceptives are currently delivered over the religious or moral objections of the provider.”¹⁰⁹

2011 Rule Rescission

In the February 23, 2011, *Federal Register*, HHS rescinded most of the 2008 final rule, except for a provision that the HHS Office for Civil Rights (OCR) will coordinate the handling of complaints based on federal provider conscience statutory restrictions.¹¹⁰ HHS stated that “No

¹⁰⁶ 73 *Federal Register* 78087.

¹⁰⁷ 73 *Federal Register* 78077.

¹⁰⁸ 73 *Federal Register* 78084-78085.

¹⁰⁹ 73 *Federal Register* 78071-78072.

¹¹⁰ HHS explained that the enforcement of statutory provider conscience protections would include “normal program compliance mechanisms.” For example, HHS is expected to help violating entities come into compliance, and if entities still fail to comply, HHS “will consider all legal options,” such as the termination of funds and the return of funds paid out in violation of the conscience statutes. HHS also stated that it is starting an initiative to increase awareness of (continued...)

regulations were required or necessary for the conscience protections contained in the Church Amendments, PHS Act, Section 245, and the Weldon Amendment to take effect,” and that the rule rescission does not affect existing provider conscience statutory restrictions.¹¹¹

As discussed above in “2008 Rule,” some commenters had raised concerns about possible conflicts between the 2008 Rule and requirements governing certain HHS programs, including Title X. In the 2011 rule rescission, HHS stated that such conflicts would be addressed on a case-by-case basis:

Health care entities must continue to comply with the long-established requirements of the statutes above governing Departmental programs. These statutes strike a careful balance between the rights of patients to access needed health care, and the conscience rights of health care providers. The conscience laws and the other federal statutes have operated side by side often for many decades. As repeals by implication are disfavored and laws are meant to be read in harmony, the Department fully intends to continue to enforce all the laws it has been charged with administering. The Department is partially rescinding the 2008 final rule in an attempt to address ambiguities that may have been caused in this area. The approach of a case by case investigation and, if necessary, enforcement will best enable the Department to deal with any perceived conflicts within concrete situations.¹¹²

As discussed in “2008 Rule,” some commenters had raised concerns that the 2008 rule did not define “abortion” as excluding contraception. In rescinding the rule, HHS stated that “The provision of contraceptive services has never been defined as abortion in federal statute. There is no indication that the federal health care provider conscience statutes intended that the term ‘abortion’ included contraception.”¹¹³

As discussed in “2008 Rule,” some commenters had raised concerns that the 2008 rule could restrict some patients’ access to contraception. HHS stated that it rescinded the rule in part because it “had the potential to negatively impact patient access to contraception and certain other medical services without a basis in federal conscience protection statutes.” HHS reiterated that entities should continue to comply with their Title X obligations.¹¹⁴

Legislation in the 113th Congress

The Title X Abortion Provider Prohibition Act was introduced on January 3, 2013, as H.R. 61, and on January 4, 2013, as H.R. 217. (The bill texts are nearly identical.)¹¹⁵ The Title X Abortion

(...continued)

federal provider conscience protections among grantees and health care providers. OCR includes provider conscience information in its education and outreach efforts and on its website, and HHS is amending its grant documents to clarify that recipients must comply with federal conscience protection laws. HHS, “Regulation for the Enforcement of Federal Health Care Provider Conscience Protection Laws,” *76 Federal Register* 9972, February 23, 2010.

¹¹¹ *76 Federal Register* 9969, 9970.

¹¹² *76 Federal Register* 9973.

¹¹³ *76 Federal Register* 9973.

¹¹⁴ *76 Federal Register* 9974.

¹¹⁵ Whereas H.R. 61 refers to pregnancies that are “the result of rape or incest,” “the result of rape,” and “the result of incest,” H.R. 217 refers to pregnancies that are “the result of *an act of* rape or incest,” “the result of *an act of* rape” and “the result of *an act of* incest” [*Italics added*]. Otherwise the bill texts are identical.

Provider Prohibition Act would prohibit Title X assistance to any entity unless it certifies that it will not perform, nor provide funds to any other entity that performs, an abortion during the period of assistance. The prohibition would not apply to hospitals, unless the hospital provides funds to a non-hospital entity that performs an abortion. The bills have exceptions for abortions performed in cases of rape, incest, or certain physician-certified cases where the woman is “in danger of death unless an abortion is performed.” The bills would also require the HHS Secretary to provide Congress an annual report listing, for each entity receiving a Title X grant: information on any abortions it performed, the date that it last certified that it would not perform abortions, and any other entities to which it makes available funds received through Title X grants. H.R. 61 and H.R. 217 were both referred to the House Committee on Energy and Commerce.

Appendix. Summary of Title X of the Public Health Service Act

Below is a summary of Title X of the Public Health Service Act, codified at 42 U.S.C. Section 300 to Section 300a-6, Population Research and Voluntary Family Planning Programs:

Section 1001. Project Grants and Contracts for Family Planning Services

The Secretary may make grants to and enter into contracts with public or nonprofit private entities to assist in the establishment and operation of voluntary family planning projects to offer a broad range of acceptable and effective family planning methods and services (including natural family planning methods, infertility services, and services for adolescents). Entities which receive grants or contracts must encourage family participation in their projects.

Section 1002. Formula Grants to States for Family Planning Services¹¹⁶

The Secretary may make grants to state health authorities to assist in planning, establishing, maintaining, coordinating, and evaluating family planning services. The state health authority must have an approved state plan for a coordinated and comprehensive program of family planning services.

Section 1003. Training Grants and Contracts

The Secretary may make grants to public or nonprofit private entities and enter into contracts with public or private entities and individuals to provide the training for personnel to carry out family planning service programs.

Section 1004. Research

The Secretary may conduct and make grants to public or nonprofit private entities and enter into contracts with public or private entities and individuals for projects for research in the biomedical, contraceptive development, behavioral, and program implementation fields related to family planning and population.

Section 1005. Informational and Educational Materials

The Secretary may make grants to public or nonprofit private entities and enter into contracts with public or private entities and individuals to assist in developing and making available family

¹¹⁶ These formula grants, which were authorized for FY1971-FY1973, were never funded. S.Rept. 101-95, pp. 5, 10.

planning and population growth information (including educational materials) to all persons desiring such information.

Section 1006. Regulations and Payments

The Secretary may promulgate regulations and must determine the conditions for making payments to grantees to assure that such grants will be effectively utilized for the purposes they were made.

Grantees must assure that (1) priority will be given to the furnishing of services to persons from low-income families; and (2) no charge will be made in such project or program for services provided to any person from a low-income family except to the extent that payment will be made by a third party (including a government agency) which is authorized or is under legal obligation to pay the charge.

The Secretary must be satisfied that informational or educational materials developed or made available under the grant or contract will be suitable for the purposes of this title and for the population or community to which they are to be made available.

In the case of any grant or contract under Section 1001, such assurances shall provide for the review and approval of the suitability of such materials, prior to their distribution, by an advisory committee established by the grantee or contractor in accordance with regulations.

Section 1007. Voluntary Participation

The acceptance by any individual of family planning services or family planning or population growth information (including educational materials) shall be voluntary and shall not be a prerequisite to eligibility for or receipt of any other service or assistance from, or to participation in, any other program of the entity or individual that provided such service or information.

Section 1008. Prohibition of Abortion

None of the funds appropriated under this title shall be used in programs where abortion is a method of family planning.
