National Monuments and the Antiquities Act

Carol Hardy Vincent

Kristina Alexander
Legislative Attorney

March 21, 2014
Summary

The Antiquities Act of 1906 authorizes the President to proclaim national monuments on federal lands that contain historic landmarks, historic and prehistoric structures, or other objects of historic or scientific interest. The President is to reserve “the smallest area compatible with the proper care and management of the objects to be protected.” The act was designed to protect federal lands and resources quickly, and Presidents have proclaimed a total of 137 monuments. Congress has modified many of these proclamations and has abolished some monuments. Congress also has created monuments under its own authority.

Presidential establishment of monuments sometimes has been contentious—for example, President Franklin Roosevelt’s creation of the Jackson Hole National Monument in Wyoming (1943); President Carter’s massive Alaskan withdrawals (1978); and President Clinton’s establishment of 19 monuments and enlargement of three others (1996-2001). President Obama’s designation of nine new national monuments and enlargement of another have renewed controversy over the Antiquities Act. However, the President cited support for his monument designations, most of which had been proposed for protective designations by legislation.

Issues have included the size of the areas and types of resources protected; the effects of monument designation on land uses; the level and types of threats to the areas; the inclusion of nonfederal lands within monument boundaries; the act’s limited process compared with the public participation and environmental review aspects of other laws; and the managing agency.

Opponents have sought to revoke or limit the President’s authority to proclaim monuments. The 113th Congress is currently considering proposals to limit the President’s authority. Some bills would bar the President from declaring monuments in a particular state or other area—H.R. 1495 (Arizona); H.R. 1439 (Idaho); H.R. 1434 (Montana); H.R. 432 and S. 472 (Nevada); H.R. 1512 (New Mexico); H.R. 758 (Utah); and H.R. 1526, Section 375 (O&C Lands). Others would restrict Presidential authority in different ways. H.R. 382 would require approval by the pertinent state legislature and governor before a monument was proclaimed by the President. H.R. 1459 would make the President’s authority subject to the National Environmental Policy Act (NEPA), prohibit more than one proclamation per state per four-year presidential term, and prohibit private property from inclusion in a monument without the written consent of the property owner. Other bills would require congressional approval: H.R. 250; H.R. 1881, Section 304; H.R. 2192; H.R. 3895, Section 153; S. 17, Section 304; and S. 104. S. 104 also would make the President’s authority subject to NEPA. Under H.R. 2192 and H.R. 3895, if Congress did not approve the monument within a certain time period, the President would be barred from issuing a monument proclamation that was “substantially similar” (H.R. 2192) or from withdrawing the same or “similar” lands (H.R. 3895, §153).

Monument supporters favor the Antiquities Act in its present form, asserting that the public and the courts have upheld monument designations and that many past designations that initially were controversial have come to be supported. They contend that the President needs continued authority to act promptly to protect valuable resources on federal lands from potential threats.

Introduction

Presidential establishment of national monuments under the Antiquities Act of 1906 (16 U.S.C. §§431-433) has protected valuable sites, but also has been contentious. Litigation and legislation related to the law have been pursued throughout its history. To give one historical example, displeasure with President Franklin Roosevelt’s proclaiming of the Jackson Hole National Monument in Wyoming in 1943 (which became Grand Teton National Park) prompted litigation on the extent of presidential authority under the Antiquities Act, and led to a 1950 law prohibiting future establishment of national monuments in Wyoming unless Congress made the designation.¹ As another example, President Carter’s establishment of monuments in Alaska in 1978 also was challenged in the courts and led to a statutory requirement for congressional approval of land withdrawals² in Alaska larger than 5,000 acres.³ President Clinton’s proclamation of the Grand Staircase-Escalante National Monument in 1996 triggered several lawsuits, a law authorizing land exchanges,⁴ and proposals to amend or revoke presidential authority under the Antiquities Act. President George W. Bush’s designation of a marine national monument in 2009 led to a legal challenge claiming that fishing rights had been lost. To date, no court challenges have succeeded in undoing a presidential designation.

Additionally, initial opposition to some monument designations has turned to support over time. Some controversial monuments later were enlarged and redesignated as national parks by Congress, and today are popular parks with substantial economic benefit to the surrounding communities. For instance, the Grand Canyon National Monument, proclaimed in 1908 and the subject of a legal challenge, is now a world-famous national park.

Various issues regarding presidentially created monuments have generated controversy, lawsuits, and legislative proposals to limit the President’s authority. Issues include the size of the areas and types of resources protected, the level and types of threats to the areas, the inclusion of nonfederal lands within monument boundaries, restrictions on land uses that may result, the manner in which the monuments were created, and the selection of the managing agency. Recent Congresses have considered, but not enacted, bills to restrict the President’s authority to create monuments and to establish a process for input into monument decisions. Monument supporters assert that changes to the Antiquities Act are neither warranted nor desirable. They believe that the act serves an important purpose in preserving resources for future generations. The Obama Administration’s exploration of areas for national monument designation, including designation of nine new monuments and enlargement of another, have renewed interest in, and legislative efforts to restrict, the President’s authority to proclaim national monuments.

The Antiquities Act of 1906

The Antiquities Act of 1906 authorizes the President to proclaim national monuments on federal lands that contain “historic landmarks, historic and prehistoric structures, and other objects of

² A withdrawal is an action that restricts the use or disposition of public lands.
³ This provision was enacted as part of the Alaska National Interest Lands Conservation Act of 1980 (ANILCA), P.L. 96-487; see 16 U.S.C. §3213.
⁴ P.L. 105-335.
The Antiquities Act was a response to concerns over theft from and destruction of archaeological sites and was designed to provide an expeditious means to protect federal lands and resources. President Theodore Roosevelt used the authority in 1906 to establish Devil’s Tower in Wyoming as the first national monument. Sixteen of the 19 Presidents since 1906 created 137 monuments, including the Grand Canyon, Grand Teton, Zion, Olympic, the Statue of Liberty, and the Chesapeake and Ohio Canal. President Franklin Roosevelt used his authority the most often—on 28 occasions. President George W. Bush proclaimed the most monument acreage, virtually all in marine areas.

Monuments vary widely in size. While about half of the presidential monument proclamations involved less than 5,000 acres, they have ranged from less than 1 acre to about 89 million acres.

Congress, too, may create national monuments on federal lands, and has done so on numerous occasions under its constitutional authority to enact legislation regarding federal lands. That authority is not defined or limited by the provisions of the Antiquities Act. For instance, Congress could enact legislation providing more land uses than are typical for national monuments created by the President, such as allowing new commercial development, or could choose to provide additional protections. Some believe that such legislation (as opposed to presidential action) is more likely to involve the input of local and other citizens.

Congress also has modified monuments (including those created by the President), for instance, by changing their boundaries. Congress has abolished some monuments outright and converted others into different protective designations, such as national parks. Almost half of the current national parks were first designated as national monuments.

---

8 Since 1906, the Presidents who have not used this authority are Richard M. Nixon, Ronald Reagan, and George H. W. Bush.
9 Monuments created by Presidents from 1906 through 2006 are listed chronologically on the website of the National Park Service at http://www.nps.gov/archeology/sites/antiquities/MonumentsList.htm.
10 The African Burial Ground National Monument, established by President George W. Bush in New York City, is 0.345 acres. The Papahanaumokuakea Marine National Monument, proclaimed by President George W. Bush, is approximately 89 million acres in the Pacific Ocean. The largest national monument proclaimed on land was the Wrangell-St. Elias National Monument in Alaska, with 10.95 million acres. It was redesignated as a national park and national preserve two years after it was proclaimed.
11 U.S. Constitution, Article IV, Section 3: “The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States....”
12 For example, the Fossil Cycad National Monument in South Dakota was abolished by an Act of August 1, 1956, and the area was transferred to the Bureau of Land Management to be administered under the public land laws. As another example, the Papago Saguaro National Monument in Arizona was abolished by an Act of April 7, 1930, and the area was conveyed to the state of Arizona for park, recreational, and other public purposes.
13 For information on the authority of the President to modify or abolish monuments, see archived CRS Report (continued...)
Monument Issues and Controversies

Presidential authority to create monuments has generated concern among some Members of Congress, state and local officials, user groups, and others. Controversies in Congress are focused on a perceived lack of consistency between the Antiquities Act and the policies established in other laws, especially the land withdrawal provisions of the Federal Land Policy and Management Act of 1976 (FLPMA), the environmental reviews required by the National Environmental Policy Act (NEPA), and the public participation requirements of NEPA, FLPMA, and other laws. Criticism also has been expressed by those who oppose restrictions on land uses, both extractive (e.g., mining) and recreational (e.g., off-road vehicle use), as a result of monument proclamations. Critics also have challenged the size of the areas and types of resources that would be protected.

Among the monument measures considered during recent Congresses were bills to impose restrictions on presidential authority, such as those to limit the size or duration of withdrawals; to prohibit or restrict withdrawals in particular states; to encourage public participation in the monument designation process; to revoke the President’s authority to designate monuments or require congressional approval of some or all monument designations; or to promote presidential creation of monuments in accordance with certain federal land management and environmental laws. Measures also were introduced to change land uses within monuments and to alter monument boundaries.

Supporters of the Antiquities Act assert that changes to the act are neither warranted nor desirable. They contend that previous Congresses that focused on this issue were correct in not repealing the Antiquities Act. They note that Presidents of both parties have used the authority for over a century to protect valuable federal lands and resources expeditiously, and they defend the President’s ability to take prompt action to protect areas that may be vulnerable to looting, vandalism, commercial development, and other permanent changes. However, the Secretary of the Interior has authority to make emergency withdrawals of federal lands, which are effective when made but expire at the end of three years. Defenders also note that some past designations that initially were contentious have come to be widely supported over time. They contend that large segments of the public support land protection, such as through monument designations, for the recreational, preservation, and economic benefits that such designations often bring. They note that courts have supported presidential actions.

A primary objection to national monuments is that the declaration changes the property from being federal land available for multiple uses to being a national monument with possible restricted uses. The legal challenge to the Grand Teton National Monument was premised on the
state’s loss of revenue from taxes and grazing fees.\textsuperscript{18} Courts have found that, for monuments established under the Antiquities Act, agencies are afforded broad rights to protect the resources of the site, and that the loss of income is not a legal basis to reject a monument designation.\textsuperscript{19} The broad rights to protect monument resources at the time of creation can include water rights.\textsuperscript{20}

**Monument Size**

In establishing a national monument, the President is required by the Antiquities Act to reserve “the smallest area compatible with the proper care and management of the objects to be protected.”\textsuperscript{21} Many monuments have been quite small, but several Presidents have established large monuments, especially in Alaska. Examples of large monuments include Katmai, established in 1918 with 1.1 million acres; Glacier Bay, created in 1925 with 1.4 million acres; most of the Alaska monuments proclaimed in 1978, the largest being Wrangell-St. Elias, with nearly 11 million acres; and Grand Staircase-Escalante, established in 1996 with 1.7 million acres. More recently, President George W. Bush established large marine monuments, namely the Papahanaumokuakea Marine National Monument, with approximately 89 million acres; the Marianas Trench Marine National Monument, with 60.9 million acres; the Pacific Remote Islands Marine National Monument, with 55.6 million acres; and the Rose Atoll Marine National Monument, with 8.6 million acres.\textsuperscript{22} The Bush Administration claimed that the latter three areas formed the largest protected ocean area in the world.\textsuperscript{23}

Critics assert that large monuments violate the Antiquities Act, in that the President’s authority regarding size was intended to be narrow and limited. They charge that Congress intended the act to protect specific items of interest, especially archaeological sites and the small areas surrounding them. They support this view with the legislative history of the act, in which proposals to limit a withdrawal to 320 or 640 acres were mentioned although not enacted. They contend that some of the monument designations were greater than needed to protect particular objects of value, and that the law was not intended to protect large swaths of land or ocean.

Defenders observe that the Antiquities Act gives the President discretion to determine the acreage necessary to ensure protection of the resources in question, which can be a particular archaeological site or larger features or resources. The Grand Canyon, for example, originally was a national monument measuring 0.8 million acres; President Theodore Roosevelt determined that this large size was necessary to protect the “object” in question—the canyon. Defenders also note that after considering the issue in the early 1900s, Congress deliberately rejected proposals to restrict the President’s authority to set the size of the withdrawal. Further, they assert that preserving objects of interest may require withdrawal of sizeable tracts of surrounding land to preserve the integrity of the objects and the interactions and relationships among them.

\textsuperscript{19} Wyoming v. Franke, 58 F. Supp. 890 (D. Wyo. 1945).
\textsuperscript{21} 16 U.S.C. §431.
\textsuperscript{22} All monument sizes listed are approximate. Also, the sizes of marine monuments typically have been identified in square miles, rather than acres. A square mile is equal to 640 acres.
\textsuperscript{23} For information on protection of ocean areas, including issues, programs, and administrative and congressional action, see CRS Report RL32154, *Marine Protected Areas: An Overview*, by Harold F. Upton.
The courts have deferred to the President’s judgment as to the proper size for a monument. For example, the lawsuit challenging the Grand Sequoia National Monument was based in part on the monument’s size (327,769 acres) not being “the smallest area compatible with proper care and management,” as required by the act.²⁴ The court found no factual basis for the argument that the size did not meet the standards of the act.

**Establishment Criteria**

Under the Antiquities Act, the President can establish monuments on federal land containing “historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest.”²⁵ Some proclamations have identified particular objects needing protection, while others have referred more generally to scenic, scientific, or educational features of interest.

Presidents sometimes have cited threats to resources (e.g., natural and cultural) to support establishing monuments, although imminent threat is not expressly required by the Antiquities Act. In his remarks designating the Grand Staircase-Escalante National Monument, for instance, President Clinton expressed concern about work underway for a large coal mining operation that, he asserted, could damage resources in the area. Sometimes the noted threats appear less immediate, as for the lands included in the Grand Canyon-Parashant Monument (proclaimed January 11, 2000) which “could be increasingly threatened by potential mineral development,” according to the Clinton Administration.²⁶ In other cases, threats were reported by the press or private organizations. For instance, the National Trust for Historic Preservation had identified the (subsequently proclaimed) President Lincoln and Soldiers’ Home National Monument as one of the country’s most endangered historic properties.

Presidential creation of monuments in the absence of immediate threats to resources troubles those who believe that the law is intended to protect objects that are in immediate peril of permanent harm. They contend that Presidents have established monuments to support environmental causes, limit development, and score political gains, among other reasons. Those who contest those charges note that the Antiquities Act lacks a requirement that objects be immediately threatened or endangered. Others cite the pervasive dangers of development and growth, looting, and vandalism as sufficient grounds for contemporary presidential action.

Some critics charge that, because the original purpose of the act was to protect specific objects, particularly objects of antiquity such as cliff dwellings, pueblos, and other archeological ruins (hence the name “Antiquities Act”), Presidents have used the act for excessively broad purposes, such as general conservation, recreation, scenic protection, or protection of living organisms. These purposes, they contend, are more appropriate for a national park or other designation established by Congress. Supporters of current presidential authority counter that the act does not limit the President to protecting ancient relics, and maintain that “other objects of historic or scientific interest” is broad wording that grants considerable discretion to the President.

Courts, including the U.S. Supreme Court, have upheld under the Antiquities Act both the designation of particular monuments and the President’s authority to create monuments. In a

---

decision addressing one of the first national monuments proclaimed—the Grand Canyon—the Supreme Court upheld the President’s authority under the Antiquities Act. The Court found that the act gave the President the authority to preserve lands with cultural or scientific interest. Since then, courts have given deference to this presidential authority, holding that courts have only a limited review of a presidential proclamation provided that it states the natural or historic interest and that the area is the minimum amount needed to protect those interests. The courts also have ruled that the act may protect natural wonders and wilderness values.

**Inclusion of Nonfederal Lands**

It is an unresolved issue whether the Antiquities Act allows the President to declare a national monument on lands not owned by the federal government. To date, no presidential declaration of a monument has converted private property to federal property. However, some private inholdings occur within national monuments.

The Antiquities Act initially states that it applies to lands owned or controlled by the federal government. However, it also states that, where the objects to be preserved are on privately owned lands, the property “may be relinquished to the Government.” Private and other non-federal landowners have donated land under this provision, and the President subsequently designated national monuments that included the donated lands. As an early example, Secretary of the Interior James R. Garfield accepted the private donation of a redwood forest in California on December 31, 1907, and on January 9, 1908, President Theodore Roosevelt proclaimed the area the Muir Woods National Monument. More recently, Secretary of the Interior Ken Salazar accepted donations leading to the establishment of some monuments by President Obama, including the César E. Chávez National Monument in California.

It is not clear whether relinquishment must be voluntary (via donation, purchase, or exchange) or may include condemnation. Courts have only discussed the issue as a side matter to the dispute they were resolving. In two such cases, the courts have indicated that relinquishment should be interpreted as a voluntary surrender of property. The more recent decision, in 2008, stated that the Antiquities Act “does not authorize government officials forcibly to take private property to provide such care or to enter private land.” In 1978, the Supreme Court described the Antiquities Act as applying solely to federal property: “A reservation under the Antiquities Act thus means no more than that the land is shifted from one federal use, and perhaps from one federal managing agency, to another.”

In some cases, nonfederal lands are contained within the outer boundaries of a monument, although the ownership does not change by the monument designation. This inclusion is a source of controversy. The Clinton Administration indicated that the monument designation does not

---

28 Ibid., at 455.
32 Buono v. Kempthorne, 527 F.3d 758 (9th Cir. 2008).
apply to nonfederal lands. The Solicitor of the Department of the Interior (DOI) asserted this view in 1999 testimony before Congress, stating that the Antiquities Act applies only to federal lands and that monument designations cannot bring state or private lands into federal ownership. Some monument proclamations have stated that nonfederal lands will become part of the monument if the federal government acquires title to the lands from the current owners.

Some, however, note that while private or state-owned lands are technically not part of the monument, development of such land located within monuments is difficult because such development might be incompatible with the purposes for which the monument was created or constrained by management of the surrounding federal lands. Monument supporters note that if state or private landowners within a monument fear or experience difficulties, they can pursue land exchanges with the federal government. Some monument proclamations have authorized land exchanges to further the protective purposes of the monument.

**Effects on Land Use**

The overriding management goal for all monuments is protection of the objects described in the proclamations. Monument designation can limit or prohibit land uses, such as development or recreational uses. Limitations or prohibitions may be included in the proclamations themselves, accompanying administration statements, management plans developed by the agencies to govern monument lands, agency policies, or other sources. Some use issues may not arise for particular monuments given their distinctive characteristics, for instance, their small size or water-based nature. In general, existing uses of the land that are not precluded by the proclamations, and do not conflict with the purposes of the monument, may continue.

At least since 1996, monument proclamations typically have had protections for valid existing rights for land uses, but the extent to which designations may affect existing rights is not always clear. A common concern is that monument designation potentially could result in new constraints on development of existing mineral and energy leases, claims, and permits. There are fears that mineral activities may have to adhere to a higher standard of environmental review, and will have a higher cost of mitigation, to ensure compatibility with the monument designation.

---

35 For instance, nearly all of President Clinton’s monument proclamations had such a provision, including the monument proclamations for the Agua Fria, Canyons of the Ancients, Sonoran Desert, and Upper Missouri River Breaks National Monuments. These monument proclamations are on the BLM website under the respective monument listings, at http://www.blm.gov/wo/st/en/prog/blm_special_areas/NLCS/monuments.html.
37 For instance, President Clinton’s monument proclamations typically contained such a provision, including the monument proclamations for the Agua Fria, Canyons of the Ancients, Sonoran Desert, and Upper Missouri River Breaks National Monuments. These monument proclamations are on the BLM website under the respective monument listings, at http://www.blm.gov/wo/st/en/prog/blm_special_areas/NLCS/monuments.html.
38 No comprehensive examination was made of earlier monument proclamations.
39 The term *valid* has been interpreted by the Supreme Court in the context of a mine within a national monument as meaning there were valuable, workable deposits of ore present. Cameron v. United States, 252 U.S. 450 (1920).
Most of these monument proclamations have barred new mineral leases, mining claims, prospecting or exploration activities, and oil, gas, and geothermal leases, subject to valid existing rights. This has been accomplished by language to withdraw the lands within the monuments from entry, location, selection, sale, leasing, or other disposition under the public land laws, mining laws, and mineral and geothermal leasing laws.

Another concern is whether commercial timber cutting will be restricted as a result of designation. For instance, future timber production was expressly precluded in the Giant Sequoia National Monument proclaimed by President Clinton in 2000, although certain then-current logging contracts could be completed. In many other cases, the proclamations have implied, through a general prohibition against removing any “feature” of the monuments, that timber cutting is precluded.\(^4\) Some assert that restrictions are needed to protect the environmental, scenic, and recreational attributes of forests preserved under the Antiquities Act. Logging supporters assert that forests can be used sustainably and that concerns raised by environmentalists as grounds for limiting commercial timber operations do not reflect modern forestry practices.

Motorized and mechanized vehicles off-road are prohibited (except for emergency or authorized ‘purposes) under the proclamations for many newer monuments, particularly those issued by President Clinton. Otherwise, the management plans for monuments typically address whether to allow vehicular travel on designated routes or in designated areas, or to close routes or areas to vehicular use in those monuments where such use is not expressly prohibited. In some areas that have become monuments, off-road vehicles have been allowed, at least in some places.

Other concerns have included the possible effects of monument designation on hunting, fishing, and grazing. Some proclamations have restricted such activities to protect monument resources, and monument management plans may impose additional restrictions. For instance, proclamations for some marine monuments established by President George W. Bush have restricted or prohibited commercial and recreational fishing. Provisions on grazing have been controversial in some cases, with some asserting that grazing has been unnecessarily curtailed while others claim that grazing has not been sufficiently limited to prevent ecological damage.

States and counties frequently have viewed restrictions on federal lands in their jurisdictions as threats to economic development. They maintain that local communities are hurt by the loss of jobs and tax revenues that results from prohibiting/restricting future mineral exploration, timber development, or other activities. Some believe that limitations on energy exploration could leave the United States more dependent on foreign oil.

Advocates of creating monuments claim that economic benefits resulting from designation, including increased tourism, recreation, and attracting new businesses and residents, may exceed the benefits of traditional economic development.\(^4\) Others allege that the public interest value of

---

\(^4\) For instance, President Clinton’s monument proclamations typically contained such a provision, including the monument proclamations for the Agua Fria, Canyons of the Ancients, Sonoran Desert, and Upper Missouri River Breaks National Monuments. These monument proclamations are on the BLM website under the respective monument listings, at http://www.blm.gov/wo/st/en/prog/blm_special_areas/NLCS/monuments.html.

\(^4\) The potential economic benefits to local communities of national monument designation were discussed at a House subcommittee hearing on September 13, 2011. For testimony asserting beneficial economic impacts, see Ray Raker, Executive Director, Headwaters Economics, at http://naturalresources.house.gov/uploadedfiles/raskertestimony09.13.11.pdf. For testimony asserting adverse impacts on communities, see Jerry Taylor, Mayor, Escalante City, Utah, at http://naturalresources.house.gov/uploadedfiles/taylortestimony09.13.11.pdf.
continued environmental protection outweighs any temporary economic benefit that could result from development. Some want more restrictions on development.

“Consistency” of Antiquities Act with NEPA and FLPMA

The Federal Land Policy and Management Act of 1976 (FLPMA) authorizes the Secretary of the Interior to make certain land withdrawals under specified procedures. In enacting FLPMA, Congress not only limited the ability of the Interior Secretary to make withdrawals, but repealed much of the express and implied withdrawal authority previously granted to the President by several earlier laws.

Critics of the Antiquities Act maintain that the act is inconsistent with FLPMA’s intent of restoring control of public land withdrawals to Congress. They assert that Congress is the appropriate body to make and implement land withdrawal policy and that Congress intended to review and retain veto control over all executive withdrawals exceeding 5,000 acres. On the other hand, in enacting FLPMA, Congress did not explicitly repeal or amend the Antiquities Act, despite extensive consideration of executive withdrawal authorities. Supporters of the act assert that it was the clear intent of Congress to retain presidential withdrawal authority under the Antiquities Act.

Similarly, critics note that monuments have been proclaimed without the environmental studies required of agencies for “major federal actions” under NEPA, or the review of a public purpose and opportunity for public participation that FLPMA provides. However, neither NEPA nor FLPMA applies to the actions of a President (as opposed to an action of an agency), and the Antiquities Act is silent as to the procedures a President must follow to proclaim a new monument. Some want to add procedures for environmental review and public participation to the monument designation process so that significant withdrawals (with resulting effects on existing uses) would not be made without scientific, economic, and public input.

Others counter that such changes would impair the ability of the President to take action quickly to protect objects and lands, thereby avoiding possible damage to the resources. They assert that participation requirements are not needed in law because Presidents typically consult with government officials and the public before establishing monuments. Some believe that NEPA requirements are unnecessary for monument designation because once monuments are created, detailed management plans are developed in accordance with NEPA.

Monument Management

Although most monuments are managed by the National Park Service (NPS), both Congress and the President have created monuments managed by other agencies. For example, in 1996 President Clinton created the Grand Staircase-Escalante National Monument and assigned its management to BLM, the first such area administered by BLM. Also, President George W. Bush

---

National Monuments and the Antiquities Act

selected the Fish and Wildlife Service (FWS), the National Oceanic and Atmospheric Administration in the Department of Commerce, and other agencies to manage marine monuments. On September 21, 2012, President Obama established the Chimney Rock National Monument with the Forest Service as the managing agency. In most cases, the monuments were assigned to be managed by the agency that had responsibility for the area before the designation, although that was not always the case. For example, although the area within the Minidoka Internment National Monument was managed by the Bureau of Reclamation before designation, the proclamation designating the monument changed the management authority to the NPS.

The President’s authority to choose a management agency other than NPS has been questioned. Before 1933, monuments were managed by different agencies, but in that year President Franklin Roosevelt consolidated management of national monuments in the NPS. Following the 1933 consolidation, it was not until 1978 that a presidentially created monument was managed by an agency other than the NPS. In 1978, two of the Alaska monuments created by President Carter were directed to be managed by the Forest Service, part of the U.S. Department of Agriculture, and two were managed by FWS. Assigning management to the Forest Service was controversial, and the two monuments were ultimately given statutory direction for Forest Service management.44

The Supreme Court has suggested that it is entirely proper to switch management of federal lands among federal agencies. As noted earlier, in its decision regarding the Channel Islands National Monument, the Court said that the Antiquities Act could mean that the “land is shifted from one federal use, and perhaps from one federal managing agency, to another.”45 A 1980 opinion from the Office of Legal Counsel (Department of Justice) appears to indicate that the President may have some flexibility in choosing the managers of post-1933 monuments.46 Others also assert that the authority of the President under the Antiquities Act carries with it discretion to choose the managing agency.

Some critics contend that management by an agency other than the NPS is an illegal transfer of the current functions of the NPS. Others counter that establishing a new monument under another agency would not constitute a reorganization because management of current NPS units, and the general authority of the NPS to manage monuments, would be unaffected. Even if placing management authority under a department other than the DOI might constitute a reorganization, the President nevertheless might be able to move a function of the NPS to other DOI agencies under congressionally approved authority allowing transfers of functions within DOI.47

Administration Activity

Most Presidents since 1906 have used the authority in the Antiquities Act to establish or expand national monuments. President Obama has designated nine new national monuments in eight

44 The two monuments were given statutory approval as part of the Alaska National Interest Lands Conservation Act of 1980 (ANILCA), P.L. 96-487.
47 Reorganization Plan No. 3 of 1950.
states, ranging in size from an estimated 10.5 acres to 242,555 acres. The President also enlarged one monument in California. Brief information on each monument is listed below.48

- Fort Monroe National Monument in Virginia was designated on November 1, 2011. In establishing the 325-acre monument, the President stated that “Fort Monroe on Old Point Comfort in Virginia has a storied history in the defense of our Nation and the struggle for freedom.”49

- Fort Ord National Monument in California was designated on April 20, 2012. The purpose of the 14,651-acre Fort Ord National Monument is to maintain its historical and cultural significance, as well as attract tourists and recreationists and enhance the area’s unique natural resources, according to the President.50

- Chimney Rock National Monument in Colorado was designated on September 21, 2012. The President cited the “spiritual, historic, and scientific resources of great value and significance” in proclaiming the 4,726-acre monument.51

- César E. Chávez National Monument in California was designated on October 8, 2012. The 10.5-acre monument “marks the extraordinary achievements and contributions to the history of the United States made by César Chávez and the farm worker movement that he led with great vision and fortitude,” according to the President.52

- First State National Monument in Delaware was designated on March 25, 2013. The 1,108 acres of the monument contain objects and areas of historic interest related to the settlement of Delaware and the role of Delaware as the first state to ratify the Constitution, according to the President.53

- Charles Young Buffalo Soldiers National Monument in Ohio was designated on March 25, 2013. The 60-acre monument was established to commemorate the life and accomplishments of Colonel Charles Young, the highest ranking African American commanding officer in the United States Army from 1894 until his death in 1922, the commander of a troop of Buffalo Soldiers, and the first African American superintendent of a national park, as described in the proclamation.54

48 For additional information on a particular monument, see the pertinent proclamation identified in the footnote.
• Río Grande del Norte National Monument in New Mexico was designated on March 25, 2013. In proclaiming the monument, the President stated that protecting the 242,555-acre monument “will preserve its cultural, prehistoric, and historic legacy and maintain its diverse array of national and scientific resources, ensuring that the historic and scientific values of this area remain for the benefit of all Americans.”

• San Juan Islands National Monument in Washington was designated on March 25, 2013. This 970-acre monument contains an archipelago of over 450 islands, rocks, and pinnacles in Washington’s Puget Sound. According to the President, the area contains an “unmatched landscape,” numerous wildlife species in diverse habitats, archaeological sites, and historic lighthouses and is a “refuge of scientific and historic treasures and a classroom for generations of Americans.”

• Harriet Tubman–Underground Railroad National Monument in Maryland was designated on March 25, 2013. This 11,750-acre monument commemorates the life of Harriet Tubman, a leader of the Underground Railroad, and protects the landscape and historic features of the area in which she lived, worked, and later led enslaved African Americans to freedom, according to the proclamation.

• California Coastal National Monument was enlarged on March 11, 2014. President Obama added 1,665 onshore acres to this offshore monument, and named the expanded area the “Point Arena-Stornetta Unit.” According to the proclamation, the area is of “significant scientific importance,” and contains archeological and cultural sites and artifacts, a landscape shaped by “powerful geologic forces,” and “spectacular wildlife,” among other resources and values.

The Administration cited support for the establishment of the monuments—for instance, from government officials, businesses and local communities, and/or other stakeholders. Most of the monuments had first been proposed for protective designations in legislation. In addition, some

59 See for example, H.R. 2456/S. 1303 (112th) (to establish a Fort Monroe National Historical Park); H.R. 2621/S. 508 (112th), H.R. 5223/S. 3303 (111th) (to establish a Chimney Rock National Monument); H.R. 624/S. 323 (112th), H.R. 3893/S. 1801 (111th) (to establish a First State National Historical Park); H.R. 1241/S. 667 (111th), H.R. 1078/S. 227 (111th) (to designate a Harriet Tubman Underground Railroad National Historical Park); and H.R. 1411/S. 61 (113th), H.R. 4969/S. 3587 (112th) (to expand the California Coastal National Monument), and H.R. 4192 (111th) (to establish the Stornetta Outstanding Natural Area).
Members and segments of the public have advocated for additional monument designations in their states.\(^60\) However, there also has been opposition to the monuments established by the President, including concerns about the costs of managing them.

Concerns about the President’s use of his authority continue to be raised. Remarks by DOI Secretary Sally Jewell on October 31, 2013, were viewed as implying that the President is considering additional monument designations.\(^61\) The Secretary stated that the nine new monuments established by President Obama “provide important protections for special places” and that “[t]here are more special places that need protection.”\(^62\) In response, on November 13, 2013, some Members of Congress requested that the Secretary provide a list of places the President is considering for monument designation, a proposed timeline for these designations, and notification of a state’s congressional delegation in advance of monument designations.\(^63\)

An earlier Obama Administration evaluation of whether to designate or expand national monuments drew controversy. In February 2010, an Administration “internal draft” document regarding possible national monuments was obtained by some Members of Congress.\(^64\) The internal draft document identified 13 sites for possible new monument designations and one monument for possible expansion.\(^65\) The areas were in nine states: Arizona, California, Colorado, Montana, Nevada, New Mexico, Oregon, Utah, and Washington. The document also identified three areas in Alaska and Wyoming as worthy of protection, but as ineligible for monument designation because of the restrictions in law on the President’s authority in those states.

Concerns centered on whether the Administration was planning to designate national monuments without input from Congress, local and state governments, residents of the affected areas, and the general public. Fear that the Administration had not intended to consult on its monument considerations originated with the notation on the document that it was “not for release.” Other concerns echoed the traditional conflicts regarding the establishment of monuments—effects on land uses, monument size, and the type of objects protected.

The Administration subsequently expressed intent to use a collaborative process in evaluating areas for monument status. The Secretary of the Interior stated an interest in working with land users, local governments, governors, and Congress with regard to using and protecting federal lands.\(^66\) Others noted that the Administration’s intent to collaborate had been expressed on the

“internal draft” itself, which stated at the outset that areas identified “may be good candidates for National Monument designation under the Antiquities Act; however, further evaluations should be completed prior to any final decision, including an assessment of public and Congressional support.” Still others noted that agency draft documents typically are not available for release.

The Obama Administration opposes restrictions on the President’s authority to establish national monuments. For instance, in a written statement on several legislative proposals in the 112th Congress, the Administration asserted that the authority has contributed significantly to the protection of special qualities on federal lands, and that the proposals “would undermine this vital authority.” The Administration further observed that the Antiquities Act “provided much of the legal foundation for cultural preservation and natural resource conservation in the nation” and provides the basis for current federal protection of archeological sites from looting and vandalism.

Legislative Activity

Given the recurring controversies over presidential establishment of national monuments, recent Congresses have evaluated whether to abolish, limit, or retain unchanged the President’s authority to establish monuments under the Antiquities Act. Most recently, bills to restrict the President’s authority to proclaim national monuments have been introduced in the 113th Congress. Some bills would prohibit the President from establishing or expanding national monuments in particular states or other areas. Other bills focus on the authority for monument designation. H.R. 382 would require both the pertinent governor’s and state legislature’s consent to a presidentially proposed national monument. It also would bar the Secretary of the Interior from implementing restrictions on public use of a national monument until after “an appropriate review period” for public input and state approval. On April 16, 2013, the Subcommittee on Public Lands and Environmental Regulation of the House Committee on Natural Resources held a hearing on H.R. 382.

H.R. 1459 would make several changes regarding the President’s authority to establish national monuments. First, the measure seeks to make the President’s authority subject to NEPA. It provides that monument proclamations affecting more than 5,000 acres would be considered major federal actions under NEPA. Proclamations affecting 5,000 acres or less would be

69 This section focuses on 113th Congress legislation pertaining to the President’s authority to establish national monuments under the Antiquities Act. For instance, legislation pertaining to uses of land within national monuments is not addressed.

70 For state-specific bills, see H.R. 1495 (Arizona); H.R. 1439 (Idaho); H.R. 1434 (Montana); H.R. 432 and S. 472 (Nevada); H.R. 1512 (New Mexico); and H.R. 758 (Utah). The Subcommittee on Public Lands and Environmental Regulation of the House Committee on Natural Resources held hearings on all six House bills. In addition, H.R. 1526, §375 would make monument designations on Oregon and California Railroad Grant Lands and the O&C region public domain lands subject to congressional approval. The measure passed the House, and was referred on September 23, 2013, to the Senate Committee on Energy and Natural Resources.
categorically excluded under NEPA, and would expire after three years unless approved by an act of Congress. Second, the bill would prohibit more than one proclamation per state per four-year presidential term without an act of Congress. Third, it would prohibit private property from inclusion in a monument without the written consent of the property owner. Additionally, within one year following a monument proclamation, a study estimating the costs of managing the monument would be required to be submitted to specified House and Senate committees and posted on the website of the Department of the Interior. On September 20, 2013, H.R. 1459 was reported by the House Committee on Natural Resources and placed on the Union Calendar in the House.

Other bills—H.R. 250; H.R. 1881, Section 304; H.R. 2192; H.R. 3895, Section 153; S. 17, Section 304 and S. 104—would make the President’s authority to designate monuments subject to congressional approval. Three of the measures—S. 104; H.R. 2192; and H.R. 3895, Section 153—also contain other provisions on national monuments. S. 104 also would require “certifying compliance” with NEPA “with respect to the proposed national monument,” and bar the Secretary of the Interior from implementing restrictions on public use of a national monument until after “an appropriate review period” for public input and congressional approval.

H.R. 2192 would require congressional approval of a monument proclamation within two years, or the proclamation would be ineffective, barring the President from issuing a monument proclamation that was “substantially similar” to it. The bill also would amend the Antiquities Act to require the President to prepare a report for Congress analyzing the economic impacts of the designation, including federal, local, and state tax revenues lost or gained; impacts on existing uses such as hunting, grazing, timber production, mining, and off highway vehicle use; and the impact on energy security, including an estimate of the number of barrels of oil, tons of coal, or cubic feet of natural gas that would become unavailable if the monument were approved. It would create new public hearing and notice and comment procedures; require publication of reports and comments; and require notices to the governor and officials of local and tribal governments. It seeks to restrict the size of the monument that the President could designate, by changing the Antiquities Act from “the smallest area compatible with the proper care and management of the objects to be protected” to “the smallest area essential to ensure” (emphasis added). On June 6, 2013, the Subcommittee on Public Lands and Environmental Regulation of the House Committee on Natural Resources held a hearing on H.R. 2192.

H.R. 3895, Section 153, would make all executive branch withdrawals of public lands effective upon public notice in the Federal Register and notice to the House and Senate, but permanent only if approved by statute within one year of congressional notification. The measure applies to withdrawals of more than 100 acres, and to smaller withdrawals in certain circumstances. If Congress does not enact a law within one year, the executive branch would be barred from withdrawing the same or “similar” lands for five years.

---

71 The bill does not specify the agencies required to prepare the studies.
73 The Subcommittee on Public Lands and Environmental Regulation of the House Committee on Natural Resources held a hearing on H.R. 250 on April 16, 2013.
74 The measure does not define “substantially similar.”
75 The measure does not define “similar.”
