FRP . . . at a glance

What is it?
Signed agreement among 27 Federal departments and agencies, including the American Red Cross, that:

✓ Provides the mechanism for coordinating delivery of Federal assistance and resources to augment efforts of State and local governments overwhelmed by a major disaster or emergency

✓ Supports implementation of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S. Code 5121, et seq.), as well as individual agency statutory authorities

✓ Supplements other Federal emergency operations plans developed to address specific hazards

When is it implemented?

✓ In anticipation of a significant event likely to result in a need for Federal assistance

✓ In response to an actual event requiring Federal assistance under a Presidential declaration of a major disaster or emergency

What Federal resources can be deployed?

✓ Specialized teams for damage assessment, emergency communications, medical assistance and support, urban search and rescue, emergency power restoration, and community relations

✓ Equipment and supplies such as mobile kitchens, water purification units, portable toilets and showers, and tents

✓ Facilities including a Disaster Field Office, mobilization center, and Disaster Recovery Centers

What types of Federal assistance are available?

To deliver immediate relief:

✓ Initial response resources, including food, water, and emergency generators

✓ Emergency services to clear debris, open critical transportation routes, and provide mass sheltering and feeding

To speed return to normal and reduce damage from future occurrences:

✓ Loans and grants to repair or replace damaged housing and personal property

✓ Grants to repair or replace roads and public buildings, incorporating to the extent practical hazard-reduction structural and nonstructural measures

✓ Technical assistance to identify and implement mitigation opportunities to reduce future losses

✓ Other assistance, including crisis counseling, tax relief, legal services, and job placement

The Federal Response Plan (FRP) outlines how the Federal Government implements the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended, to assist State and local governments when a major disaster or emergency overwhelms their ability to respond effectively to save lives; protect public health, safety, and property; and restore their communities. The FRP describes the policies, planning assumptions, concept of operations, response and recovery actions, and responsibilities of 25 Federal departments and agencies and the American Red Cross, that guide Federal operations following a Presidential declaration of a major disaster or emergency.

The FRP has proven to be an effective framework for coordinating delivery of Federal disaster assistance to State and local governments. Since it was issued in 1992, Federal agencies have demonstrated that they can work together to achieve the common goal of efficient, timely and consistent disaster response and recovery.

This interim edition of the FRP reflects the passage of the Homeland Security Act of 2002 and the establishment of the Department of Homeland Security (DHS). This replaces the previous issuance of the FRP in April 1999. It is intended for use pending a thorough review and update by DHS, at which time a new edition of the FRP will be issued.

This page intentionally left blank.
The Federal Response Plan (FRP) describes the mechanism and structure by which the Federal Government mobilizes resources and conducts activities to address the consequences of any major disaster or emergency that overwhels the capabilities of State and local governments. Federal assistance is available under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as well as individual agency authorities, to save lives; protect public health, safety, and property; alleviate damage and hardship; and reduce future vulnerability.

By signing this letter of agreement, Federal departments and agencies commit to:

- Support the FRP concept of operations and carry out their assigned functional responsibilities to ensure the orderly, timely delivery of Federal assistance;
- Cooperate with the Federal Coordinating Officer appointed by the President to provide effective oversight of disaster operations;
- Make maximum use of existing authorities, organizations, resources, systems, and programs to reduce disaster relief costs;
- Form partnerships with counterpart State agencies, voluntary disaster relief organizations, and the private sector to take advantage of all existing resources; and
- Continue to develop and refine headquarters and regional planning, exercise, and training activities to maintain necessary operational capabilities.

Signatures to the FRP are not incorporated in the interim version, but will be included in the subsequent edition.

Federal Response Plan
Basic Plan

I. Introduction

A. Purpose

The Federal Response Plan (FRP) establishes a process and structure for the systematic, coordinated, and effective delivery of Federal assistance to address the consequences of any major disaster or emergency declared under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S. Code (U.S.C.) 5121, et seq.). The FRP:

1. Sets forth fundamental policies, planning assumptions, a concept of operations, response and recovery actions, and Federal agency responsibilities;

2. Describes the array of Federal response, recovery, and mitigation resources available to augment State and local efforts to save lives; protect public health, safety, and property; and aid affected individuals and communities in rebuilding after a disaster;

3. Organizes the types of Federal response assistance that a State is most likely to need under 12 Emergency Support Functions (ESFs), each of which has a designated primary agency;

4. Describes the process and methodology for implementing and managing Federal recovery and mitigation programs and support/technical services;

5. Addresses linkages to other Federal emergency operations plans developed for specific incidents;

6. Provides a focus for interagency and intergovernmental emergency preparedness, planning, training, exercising, coordination, and information exchange; and

7. Serves as the foundation for the development of detailed supplemental plans and procedures to implement Federal response and recovery activities rapidly and efficiently.

B. Scope

1. The FRP concepts apply to a major disaster or emergency as defined under the Stafford Act, which includes a natural catastrophe; fire, flood, or explosion regardless of cause; or any other occasion or instance for which the President determines that Federal assistance is needed to supplement State and local efforts and capabilities. Throughout the FRP, any reference to a disaster, major disaster, or emergency generally means a presidentially declared major disaster or emergency under the Stafford Act.
2. The FRP covers the full range of complex and constantly changing requirements following a disaster: saving lives, protecting property, and meeting basic human needs (response); restoring the disaster-affected area (recovery); and reducing vulnerability to future disasters (mitigation). The FRP does not specifically address long-term reconstruction and redevelopment.

3. The FRP applies to all signatory Federal departments and independent agencies that may be tasked to provide assistance in a major disaster or emergency. Additionally, the American Red Cross functions as a Federal agency in coordinating the use of Federal mass care resources in a presidentially declared disaster or emergency. For purposes of the FRP, any reference to Federal agencies with respect to their responsibilities and activities in responding to a disaster generally means Federal departments and agencies, as well as the American Red Cross.

4. Under the FRP, a State means any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

5. Relationships with any federally recognized American Indian or Alaska Native Tribe are on a government-to-government basis. Federal agencies acknowledge the importance of an interagency/intergovernmental/tribal partnership to improve access to disaster assistance. Although a State Governor must request a Presidential disaster declaration on behalf of a tribe under the Stafford Act, Federal agencies subsequently can work directly with the tribe, within existing authorities and resources, to tailor disaster programs to its unique needs.

C. National Disaster Response Framework

1. The combined emergency management authorities, policies, procedures, and resources of Federal, State, and local governments as well as voluntary disaster relief organizations, the private sector, and international sources constitute a national disaster response framework for providing assistance following a major disaster or emergency. This framework is illustrated in Figure 1.

2. Within this framework, the Federal Government can provide personnel, equipment, supplies, facilities, and managerial, technical, and advisory services in support of State and local disaster assistance efforts. Various Federal statutory authorities and policies establish the basis for providing these resources. (The Department of Homeland Security (DHS) has compiled a separate compendium of Legal Authorities Supporting the Federal Response Plan that lists emergency response and recovery-related directives, together with a summary interpretation of each legal citation.)
3. Under the Stafford Act and Executive Orders 12148, Federal Emergency Management, and 12656, Assignment of Emergency Preparedness Responsibilities, DHS has been delegated primary responsibility for coordinating Federal emergency preparedness, planning, management, and disaster assistance functions. DHS also has been delegated responsibility for establishing Federal disaster assistance policy. In this stewardship role, DHS has the lead in developing and maintaining the FRP.

4. The FRP describes the structure for organizing, coordinating, and mobilizing Federal resources to augment State and local response efforts under the Stafford Act and its implementing regulations that appear in 44 Code of Federal Regulations (CFR) 206. The FRP also may be used in conjunction with Federal agency emergency operations plans developed under other statutory authorities as well as memorandums of understanding (MOUs) among various Federal agencies.

5. In particular, the FRP may be implemented concurrently with the:
   a. National Plan for Telecommunications Support in Non-Wartime Emergencies, which provides a basis for ESF #2 — Communications;
   b. National Oil and Hazardous Substances Pollution Contingency Plan, known as the National Contingency Plan (NCP), which provides the basis for ESF #10 — Hazardous Materials operations; and/or
   c. Federal Radiological Emergency Response Plan (FRERP), which details the Federal response to a peacetime radiological emergency.

6. The FRP also may be implemented in response to the consequences of terrorism, in accordance with Presidential Decision Directive (PDD)-39 and PDD-62 that set forth U.S. counterterrorism policies. The FRP Terrorism Incident Annex describes the concept of operations for a unified response to a terrorism incident involving two
or more of the following plans: the FRP, the Federal Bureau of Investigation (FBI) Weapons of Mass Destruction (WMD) Incident Contingency Plan, the Department of Health and Human Services (HHS) Health and Medical Services Support Plan for the Federal Response to Acts of Chemical/Biological Terrorism, the NCP, and the FRERP.

7. The FRP is implemented through regional supplements developed by DHS and other Federal agency regional offices describing specific actions, operating locations, and relationships to address the unique needs of the region and States within the region. From time to time, an operations supplement to the FRP may be issued to address special events that merit advanced planning, such as the Olympics or Presidential inaugurations.

8. The FRP is further implemented through various operations manuals, field operations guides, and job aids that detail specific agency actions to be taken.

9. States, along with their local jurisdictions, have their own emergency operations plans describing who will do what, when, and with what resources. In addition, many voluntary, private, and international organizations have emergency or contingency plans. These planning relationships are shown in Figure 2.

Figure 2 — Emergency Planning Relationships
10. Although the FRP focuses primarily on operational planning specific to an incident, other types of planning also are critical to ensuring effective disaster operations. Preincident planning at all levels of government is used to identify operating facilities and resources that might be needed in response and recovery. Action planning, conducted throughout a disaster, establishes priorities with tactical objectives for the next operational period. Contingency planning assists in targeting a specific issue or event arising during a disaster and presents alternative actions to respond to the situation. Strategic planning is used to identify long-term issues such as the impact of forecasts and problems such as permanent housing for displaced disaster victims. It also can serve as a blueprint for rebuilding after a disaster.

D. Organization of the FRP

The FRP consists of the following sections as shown in Figure 3:

1. The **Basic Plan** presents the policies and concept of operations that guide how the Federal Government will assist disaster-stricken State and local governments. It also summarizes Federal planning assumptions, response and recovery actions, and responsibilities.

2. **Emergency Support Function Annexes** describe the mission, policies, concept of operations, and responsibilities of the primary and support agencies involved in the implementation of key response functions that supplement State and local activities. ESFs include Transportation, Communications, Public Works and Engineering, Firefighting, Information and Planning, Mass Care, Resource Support, Health and Medical Services, Urban Search and Rescue, Hazardous Materials, Food, and Energy.

3. The **Recovery Function Annex** describes the policies, planning considerations, and concept of operations that guide the provision of assistance to help disaster victims and affected communities return to normal and minimize the risk of future damage. Assistance is categorized by delivery system — either to individuals, families, and businesses or to State and local governments.

4. **Support Annexes** describe the mission, policies, and concept of operations of related activities required to conduct overall Federal disaster operations, including Community Relations, Congressional Affairs, Donations Management, Financial Management, Logistics Management, Occupational Safety and Health, and Public Affairs.

5. **Incident Annexes** describe the mission, policies, concept of operations, and responsibilities in those specific events that require a unified response under the FRP and one or more other Federal plans that implement authorities and functions outside the scope of the Stafford Act.

6. **Appendices** cover other relevant information, including terms and definitions, acronyms and abbreviations, guidelines for FRP changes and revisions, and overview of a disaster operation.
Figure 3 — Organization of the Federal Response Plan
II. Policies

A. Authorities

1. Under the Stafford Act, a Governor may request the President to declare a major disaster or an emergency if an event is beyond the combined response capabilities of the State and affected local governments. Based on the findings of a joint Federal-State-local Preliminary Damage Assessment (PDA) indicating the damages are of sufficient severity and magnitude to warrant assistance under the Act, the President may grant a major disaster or emergency declaration. (Note: In a particularly fast-moving or clearly devastating disaster, the PDA process may be deferred until after the declaration.)

2. If an emergency involves an area or facility for which the Federal Government exercises exclusive or primary responsibility and authority, the President may unilaterally direct the provision of emergency assistance under the Stafford Act. The Governor of the affected State will be consulted if possible.

3. No direct Federal assistance is authorized prior to a Presidential declaration. However, DHS can use limited predeclaration authorities to move Initial Response Resources (IRR) (critical goods typically needed in the immediate aftermath of a disaster (e.g., food, water, emergency generators) and emergency teams closer to potentially affected areas. DHS also can activate essential command and control structures to lessen or avert the effects of a disaster and to improve the timeliness of disaster operations. Additionally, when an incident poses a threat to life and property that cannot be effectively dealt with by the State or local governments, DHS may request the Department of Defense (DOD) to use its resources prior to a declaration to perform any emergency work “essential for the preservation of life and property” under the Stafford Act.

4. Following a declaration, the President may direct any Federal agency to use its authorities and resources in support of State and local assistance efforts to the extent that provision of the support does not conflict with other agency emergency missions. This authority has been further delegated to the Secretary of DHS; the DHS Regional Director; and the Federal Coordinating Officer (FCO).

5. The Secretary of DHS, on behalf of the President, appoints an FCO, who is responsible for coordinating the timely delivery of Federal disaster assistance to the affected State, local governments, and disaster victims. In many cases, the FCO also serves as the Disaster Recovery Manager (DRM) to administer the financial aspects of assistance authorized under the Stafford Act. The FCO works closely with the State Coordinating Officer (SCO), appointed by the Governor to oversee disaster operations for the State, and the Governor’s Authorized Representative (GAR), empowered by the Governor to execute all necessary documents for disaster assistance on behalf of the State.
6. The State must commit to pay a share of the cost to receive certain types of Federal assistance under the Stafford Act. In extraordinary cases, the President may choose to adjust the cost share or waive it for a specified time period. The Presidential declaration notes any cost-share waiver, and a DHS-State Agreement is signed further stipulating the division of costs among Federal, State, and local governments and other conditions for receiving assistance.

7. While performing a function under the authority of the Stafford Act, a Federal agency or designated employee of a Federal agency is not liable for any claim based on the exercise or performance of or the failure to exercise or perform that function.

8. In addition to a Presidential disaster declaration, several Federal agencies have independent authorities to declare disasters. For example, the Secretary of Agriculture may declare a disaster in certain situations in which a county has sustained production losses of 30 percent or greater in a single major enterprise, authorizing emergency loans for physical damages and crop losses. The Secretary of Commerce may make a determination of a commercial fishery failure or fishery resource disaster. The Administrator of the Small Business Administration (SBA) may make a disaster declaration based on physical damage to buildings, machinery, equipment, inventory, homes, and other property as well as economic injury.

9. Response by agencies to lifesaving and life-protecting requirements under the FRP has precedence over other Federal response activities, except where national security implications are determined to be of a higher priority. If a disaster or emergency affects the national security of the United States, appropriate national security authorities, plans, and procedures will be used.

B. Resource Coordination and Management

1. To the maximum extent possible, internal State and local resources should be used as the first line of support in response to a disaster. Intra-State and inter-State mutual aid can provide an additional option for timely and cost-effective resource support that can be executed prior to a Presidential disaster declaration. Mutual aid can be particularly useful in a disaster that depletes the resources of an individual State or community, but does not require a Presidential declaration.

2. Once State resources and capabilities are exhausted, Federal assistance may be provided to support State operational requirements and priorities.

3. When appropriate, Federal agencies should use their own authorities and funds to provide assistance for alleviating damage, loss, hardship, and suffering.

4. Federal assistance takes many forms — including the direct provision of goods and services, financial assistance (through insurance, grants, loans, direct payments), and technical assistance — and can come from various sources.

   a. Initial sources include internal government supplies (available surplus and excess property, agency stock previously acquired from the Disaster Relief Fund or on
Federal agencies may coordinate with voluntary organizations that provide a variety of disaster relief goods and services. Donations often play an important role in supplying disaster victims with essential needs. (See the Donations Management Support Annex for additional information.)

Additionally, Federal agencies are encouraged to take advantage of current partnership relations with the private sector. Businesses, inside and outside the disaster-affected area, can supply critical resources during response operations, and assist in restoring essential services and rebuilding the economic base during recovery operations. (As potential disaster victims, private-sector businesses also are urged to identify their risks, develop appropriate contingency plans, and take corrective actions prior to a disaster.)

Many foreign governments and individuals will respond with offers of assistance. Handling these offers could involve DHS, the Department of State (DOS), the DHS/U.S. Customs Service, and the DHS/Immigration and Naturalization Service (INS). State and local governments, however, are ultimately in charge of donations, in coordination with national, State, and local voluntary organizations.

In an event requiring massive resources, conflicting priorities requiring the same resources should be resolved in the field by the Emergency Response Team (ERT) Operations Section Chief or FCO. Unresolved resource conflicts and unmet State needs will be referred to DHS Headquarters (HQ) to the Emergency Support Team (EST) and/or the Catastrophic Disaster Response Group (CDRG), if necessary, for final resolution.

The Stafford Act requires that Federal agencies avoid duplicating resources and benefits whenever possible (i.e., agencies should not provide to a disaster victim the same or similar assistance that another agency is providing). Disaster victims are responsible for repayment of Federal assistance duplicated by private insurance or
other Federal programs. (See the Recovery Function Annex for additional information on duplication of benefits.)

C. Outreach/Information Dissemination

1. Community relations activities will be undertaken to provide information on Federal assistance programs to affected individuals, groups, organizations, and local governments. In addition, critical feedback from those affected will be provided for the FCO and staff. (See the Community Relations Support Annex for additional information.)

2. Congressional liaison will be established to provide information to the Washington, DC, and district offices of Members of Congress and to respond to questions, concerns, and problems raised by their constituents. (See the Congressional Affairs Support Annex for additional information.)

3. Public information will be an integral activity in disaster operations to ensure the coordinated and timely release of essential information to the public and news media about disaster-related activities. (See the Public Affairs Support Annex for additional information.)

III. Planning Assumptions

A. A major disaster or emergency can cause numerous fatalities and injuries, property loss, and disruption of normal life-support systems, and can have an impact on the regional economic, physical, and social infrastructures.

B. The extent of casualties and damage will reflect factors such as the time of occurrence, severity of impact, weather conditions, population density, building construction, and the possible triggering of secondary events such as fires and floods.

C. The large number of casualties, heavy damage to buildings and basic infrastructure, and disruption of essential public services will overwhelm the capabilities of the State and its local governments to meet the needs of the situation, and the President will declare a major disaster or emergency.

D. Federal agencies will need to respond on short notice to provide timely and effective assistance.

E. The degree of Federal involvement will be related to the severity and magnitude of the event as well as the State and local need for external support. The most devastating disasters may require the full range of Federal response and recovery assistance. Less damaging disasters may require only partial Federal response and recovery assistance. Some disasters may require only Federal recovery assistance.
IV. Concept of Operations

A. General

1. Most disasters and emergencies are handled by State and local responders. The Federal Government is called on to provide supplemental assistance when the consequences of a disaster exceed State and local capabilities. If needed, the Federal Government can mobilize an array of resources to support State and local efforts. Various emergency teams, support personnel, specialized equipment, operating facilities, assistance programs, and access to private-sector resources constitute the overall Federal disaster operations system. The FRP describes the major components of the system, as well as the structure for coordinating Federal response and recovery actions necessary to address State-identified requirements and priorities.

2. The FRP employs a multiagency operational structure that uses the principles of the Incident Command System (ICS), based on a model adopted by the fire and rescue community. ICS can be used in any size or type of disaster to control response personnel, equipment, and facilities. ICS principles include use of common terminology, modular organization, integrated communications, unified command structure, action planning, manageable span-of-control, predesignated facilities, and comprehensive resource management. The basic functional modules of ICS (e.g., operations and logistics) can be expanded or contracted to meet requirements as an event progresses.

Consistent with ICS principles, the FRP can be partially or fully implemented, in anticipation of a significant event or in response to an actual event. Selective implementation through the activation of one or more of the system’s components allows maximum flexibility in meeting the unique operational requirements of the situation and interacting with differing State systems and capabilities.

B. Concurrent Implementation of Other Federal Emergency Plans

1. An incident involving hazardous substances, WMD, or other lethal agents or materials may require a response under another Federal emergency operations plan (e.g., NCP and FRERP). These plans delineate measures necessary to handle or contain released materials and keep the public properly informed and protected.

2. Several of these plans designate a Lead Federal Agency (LFA) to coordinate the Federal response. The LFA is determined by the type of emergency. In general, an LFA establishes operational structures and procedures to assemble and work with agencies providing direct support to the LFA to obtain an initial assessment of the situation, develop an action plan, and monitor and update operational priorities. The LFA ensures each agency exercises its concurrent and distinct authorities and supports the LFA in carrying out relevant policy. Specific responsibilities of an LFA vary according to the agency’s unique statutory authorities.
3. If the incident also involves concurrent implementation of the FRP, the LFA and DHS coordinate to the maximum extent practical to ensure effective, unified Federal actions, consistent with their distinct authorities and responsibilities. Direct DHS support to an LFA is limited to DHS’s own authorities, resources, and expertise as an individual agency.

4. In a response to an emergency involving a radiological hazard, the LFA under the FRERP is responsible for Federal oversight of activities on site and Federal assistance to conduct radiological monitoring and assessment and develop protective action recommendations. When a radiological emergency warrants action under the Stafford Act, DHS uses the FRP to coordinate the nonradiological response to consequences off site in support of the affected State and local governments. If the FRERP and FRP are implemented concurrently, the Federal On-Scene Commander under the FRERP coordinates the FRERP response with the FCO, who is responsible for coordination of all Federal support to State and local governments. (Operational interfaces between the FRP and other Federal emergency plans are covered in more detail in the pertinent ESF and incident annexes.)

C. Integration of Response, Recovery, and Mitigation Actions

1. Following a disaster, immediate response operations to save lives, protect property, and meet basic human needs have precedence over recovery and mitigation. However, initial recovery planning should commence at once in tandem with response operations. Actual recovery operations will be initiated commensurate with State priorities and based on availability of resources immediately required for response operations.

2. In recognition that certain response and recovery activities may be conducted concurrently, coordination at all levels is essential to ensure consistent Federal actions throughout the disaster.

3. Mitigation opportunities should be actively considered throughout disaster operations. Decisions made during response and recovery operations can either enhance or hinder subsequent mitigation activities. The urgency to rebuild as soon as possible must be weighed against the longer term goal of reducing future risk and lessening possible impacts should another disaster occur.

D. Organizational Relationships

1. Department of Homeland Security

Under the Stafford Act, DHS serves as the primary coordinating agency for disaster response and recovery activities. To carry out this interagency role, DHS executes a wide range of administrative, programmatic, and specialized tasks. Initial tasks include notification, activation, mobilization, deployment, staffing, and facility setup. DHS processes the Governor’s request for disaster assistance, coordinates Federal operations under a disaster declaration, and appoints an FCO for each declared State. In continuing
operations, DHS provides support for logistics management; communications and information technology; financial management; community relations, congressional affairs, public information, and other outreach; and information collection, analysis, and dissemination.

2. Emergency Support Functions
   a. The FRP employs a functional approach that groups under 12 ESFs the types of direct Federal assistance that a State is most likely to need (e.g., mass care and health and medical services), as well as the kinds of Federal operations support necessary to sustain Federal response actions (e.g., transportation and communications). ESFs are expected to support one another in carrying out their respective missions.
   b. Each ESF is headed by a primary agency designated on the basis of its authorities, resources, and capabilities in the particular functional area. Other agencies have been designated as support agencies for one or more ESFs based on their resources and capabilities to support the functional area(s). ESF primary and support agency designations are shown in Figure 4.
   c. Federal response assistance required under the FRP is provided using some or all the ESFs as necessary. DHS will issue a mission assignment to task a primary agency for necessary work to be performed on a reimbursable basis. The primary agency may in turn task support agencies if needed. Specific ESF missions, organizational relationships, response actions, and primary and support agency responsibilities are described in the Emergency Support Function Annexes to the FRP. In cases where required assistance is outside the scope of an ESF, DHS may directly task any Federal agency to bring its resources to bear in the disaster operation.
   d. Requests for assistance from local jurisdictions are channeled to the SCO through the designated State agencies in accordance with the State emergency operations plan and then to the FCO or designee for consideration. Based on State-identified response requirements and FCO or designee approval, ESFs coordinate with their counterpart State agencies or, if directed, with local agencies to provide the assistance required. Federal fire, rescue, and emergency medical responders arriving on scene are integrated into the local ICS structure.

3. Military Support
   a. DOD maintains significant resources (personnel, equipment, and supplies) that may be available to support the Federal response to a major disaster or emergency. DOD will normally provide support only when other resources are unavailable, and only if such support does not interfere with its primary mission or ability to respond to operational contingencies.

**Figure 4 — Emergency Support Function Designation Matrix**

P = Primary Agency: Responsible for Coordination of the ESF

S = Support Agency: Responsible for Supporting the Primary Agency
b. Upon execution of the FRP, requests for military resource support must be accompanied by a Request for Federal Assistance (RFA) form, unless the DOD component is responding under its independent funding authority or the commander’s immediate response authority as defined in the DOD Manual for Civil Emergencies (DOD 3025.1M). (Note: The inability to immediately obtain an RFA should not preclude approved support.)

c. Prior to appointment of a Defense Coordinating Officer (DCO) (addressed below), national-level requests for military support are made through the Director of Military Support (DOMS), who represents the DOD executive agent (Secretary of the Army) for provision of military assistance to civil authorities. DOMS exercises national-level oversight of the DCO function.

d. Requests for military support at the Disaster Field Office (DFO) are processed through the DCO, the military official specifically designated to orchestrate DOD support. To ensure a coordinated and consistent DOD disaster response, the DCO is the single point of contact (POC) in the field for coordinating and validating the use of DOD resources (excluding those provided by the U.S. Army Corps of Engineers (USACE) when operating as the primary agency for ESF #3 — Public Works and Engineering, and those of the National Guard forces operating under State control). The DCO:

(1) Is the designated DOD on-scene member of the ERT;

(2) Coordinates RFAs and mission assignments with the FCO or designated representative, normally the ERT Operations Section Chief; and

(3) Is supported on scene by a Defense Coordinating Element (DCE), comprising administrative staff and liaison personnel, including the Emergency Preparedness Liaison Officer (EPLO), who normally will collocate with the ERT Operations Section.

Specific responsibilities of the DCO (subject to modification based on the situation) include validating requirements for military support (i.e., determining if the military could and should support the request); forwarding mission assignments to the appropriate military organization(s); and assigning military liaison officers to provide technical assistance to applicable activated ESFs. The DCO, through appropriate military channels, refers problematic/contentious military support issues to DOMS. DOMS facilitates resolution of issues at the national level.

e. Based on the magnitude and type of disaster and the anticipated level of resource involvement, DOD may establish a Joint Task Force (JTF) or Response Task Force (RTF) to consolidate and manage supporting operational military activities. Both task forces are temporary, multiservice organizations created to provide a consequence management response to a major natural or manmade disaster or emergency. The JTF responds to major disasters such as hurricanes or floods. The RTF responds to events involving the use, or possible use, of
chemical, biological, and/or highly explosive agents/materials. A JTF or RTF commander exercises operational control of all allocated DOD assets (except USACE personnel executing ESF #3 missions and the Joint Special Operations Task Force); provides personnel, equipment, and supplies to the affected area; and provides disaster response support based on mission assignments received through the DCO. Although both commanders may supplant the DCO as the senior DOD representative, the DCO will continue to exercise the ERT staff function of mission assignment coordination and validation, and will act as a liaison between the ERT staff and the JTF or RTF staff.

4. Federal Law Enforcement Assistance

a. In a disaster or emergency, each State has primary responsibility for law enforcement, using State and local resources, including the National Guard (to the extent that the National Guard remains under State authority and has not been called into Federal service or ordered to active duty). Accordingly, the FRP makes no provision for direct Federal support of law enforcement functions in a disaster or emergency.

b. If a State government should experience a law enforcement emergency (including one in connection with a disaster or emergency) in which it could not provide an adequate response to protect the lives and property of citizens, the State (on behalf of itself or a local unit of government) might submit an application in writing from the Governor to the Attorney General of the United States to request emergency Federal law enforcement assistance under the Justice Assistance Act of 1984 (42 U.S.C. 10501-10513) as prescribed in 28 CFR 65. The Attorney General will approve or disapprove the application no later than 10 days after receipt. If the application is approved, Federal law enforcement assistance may be provided including equipment, training, intelligence, and personnel.

c. In the event that State and local police forces (including the National Guard operating under State control) are unable to adequately respond to a civil disturbance or other serious law enforcement emergency, a Governor may request, through the Attorney General, Federal military assistance under 10 U.S.C. 15. Pursuant to 10 U.S.C. 331-333, the President will ultimately determine whether to use the Armed Forces to respond to a law enforcement emergency. Under Title 10 authority, the President may federalize and deploy all or part of any State’s National Guard.

e. Policies and structures for coordinating FRP operations with a DOJ response to threats or acts of terrorism within the United States are described in the FRP Terrorism Incident Annex.
E. Emergency Teams and Facilities

The FRP and its operational components are designed to be flexible to accommodate the response and recovery requirements specific to the disaster. In general, HQ-level components provide support to the regional-level components that implement the on-scene operations in the field. Major components include:

1. Secretary’s Operations Center/Mobile Emergency Response Support Operations Center
   a. The Secretary’s Operations Center (SOC) serves as DHS’s official notification point of an impending or actual disaster or emergency. This facility maintains a 24-hour capability to monitor all sources of warning/disaster information, including other Federal agencies, DHS regions, and the news media. The SOC reports disaster events to DHS key officials, DHS regions, and FRP signatory agencies.
   b. Each DHS region is supported by a Mobile Emergency Response Support (MERS) Operations Center (MOC). Each MOC operates 24 hours a day and is tasked with monitoring events and providing pertinent information to DHS regional staff and the SOC.

2. Regional Operations Center

The Regional Support Team (RST), when activated, reports to the Regional Operations Center (ROC). The RST coordinates Federal response efforts until an ERT is established in the field and the FCO assumes coordination responsibilities. Generally operating from the DHS Regional Office, the RST establishes communications with the affected State emergency management agency and the EST; coordinates deployment of the Emergency Response Team — Advance Element (ERT-A) to field locations; assesses damage information and develops situation reports (under ESF #5 — Information and Planning); and issues initial mission assignments. The RST is activated by the DHS Regional Director based on the level of response required. It is led by a RST Director and consists of DHS staff and ESF representatives, as well as a Regional Emergency Preparedness Liaison Officer (REPLO), who assists in coordination of requests for military support. Financial management activity at the ROC will be monitored and reported by the Comptroller. An RST organization is shown in Figure 5.
3. Emergency Response Team — Advance Element

The ERT-A is the initial Federal group that responds to an incident in the field. It is headed by a team leader from DHS and comprises DHS program and support staff and representatives from selected ESF primary agencies. A part of the ERT-A deploys to the State Emergency Operations Center (EOC) or to other locations to work directly with the State to obtain information on the impact of the event and to identify specific State requests for Federal response assistance that are called back to the RST for processing. Other elements of the ERT-A (including MERS personnel and equipment) deploy directly to or near the affected area to establish field communications, locate and establish field facilities, and set up operations. The ERT-A identifies or validates the suitability of candidate sites for the location of the mobilization center(s) and the DFO.
4. National Emergency Response Team

In a catastrophic disaster or high-visibility incident that would demand the full capabilities of DHS, a National Emergency Response Team (ERT-N) may deploy to the affected area. The Secretary of DHS determines the need for an ERT-N deployment, coordinating the plans with the affected region and other Federal agencies. The ERT-N comprises staff from DHS HQ and regional offices as well as other Federal agencies. (Three ERT-N teams are rostered; each team is on call every third month.)

5. Disaster Field Office

The DFO is the primary field location in each affected State for the coordination of Federal response and recovery operations. It operates 24 hours per day, as needed, or under a schedule sufficient to sustain Federal operations. The FCO and SCO collocate at the DFO, along with Federal agency regional representatives and State and local liaison officers, when possible. Once the DFO is ready for use, the ERT-A and/or ERT-N is augmented by DHS and other Federal agency staff to form a full ERT.

6. Emergency Response Team

The ERT is the principal interagency group that supports the FCO in coordinating the overall Federal disaster operation. Located at the DFO, the ERT ensures Federal resources are made available to meet State requirements identified by the SCO. The size and composition of the ERT can range from DHS regional office staff who are primarily conducting recovery operations to an interagency team having representation from all ESF primary and support agencies undertaking full response and recovery activities. The ERT organizational structure, encompassing the FCO’s support staff and four main sections (Operations, Information and Planning, Logistics, and Administration), is shown in Figure 6.

   a. FCO Support Staff

      (1) The FCO’s immediate staff can include a Deputy FCO and/or Deputy FCO for Mitigation as well as representatives providing assistance in the following organizational or functional areas: Equal Rights, Safety Officer, Environmental Officer, General Counsel, Emergency Information and Media Affairs, Congressional and Legislative Affairs, Community Relations, Office of the Inspector General, and Comptroller.

      (2) In addition, a DCO works closely with the FCO or designated representative in orchestrating military support.

   b. Operations Section

      (1) This section coordinates the delivery of Federal assistance and manages the activities of various emergency teams. Immediate support staff functions include Mission Assignment Coordination, Action Tracking, Defense Coordinating Element, and MERS.
The section comprises four branches — Operations Support, Human Services, Infrastructure Support, and Emergency Services. As shown in Figure 7, the 12 ESFs, along with several recovery program groups, are organized functionally under the branches to provide a coordinated approach and ensure seamless delivery of assistance to disaster survivors and the affected State.
c. **Information and Planning Section**

This section has two major tasks: the collection, processing, analysis, and dissemination of information about disaster operations to support planning and decision making at both the field operations and HQ levels; and the coordination...
of short-term and long-term planning at the field operations level. (See ESF #5 — Information and Planning Annex for additional information.)

d. Logistics Section

This section plans, organizes, and directs logistics operations that include control and accountability for supplies and equipment; resource ordering; delivery of supplies, equipment, and services to the DFO and other field locations; resource tracking; facility location, setup, space management, building services, and general facility operations; transportation coordination and fleet management services; information and technology systems services; administrative services such as mail management and reproduction; and customer assistance. (See the Logistics Management Support Annex for additional information.)

e. Administration Section

This section is responsible for personnel functions and employee services. Personnel functions cover tracking DHS staff and disaster reservist deployment, obtaining local hires, arranging billeting, and processing payroll. Employee services include providing for ERT personnel health and safety, overseeing access to medical services, and ensuring security of personnel, facilities, and assets.

7. Emergency Support Team

The EST is the interagency group that provides general coordination support to the RST, ERT-A, and ERT response activities in the field. Operating from the DHS National Interagency Emergency Operations Center (NIEOC) in Washington, DC, the EST is responsible for coordinating and tracking the deployment of IRR, DFO kits, Disaster Information Systems Clearinghouse (DISC) packages, and other responder support items to the field. The EST serves as the central source of information at the HQ level regarding the status of ongoing and planned Federal disaster operations. The EST attempts to resolve policy issues and resource support conflicts forwarded from the ERT. Conflicts that cannot be resolved by the EST are referred to the CDRG. The EST also provides overall resource coordination for concurrent multi-State disaster response activities. ESF primary agencies send staff to the EST or opt to coordinate response support activities from their own agency EOCs. The EST organizational structure is shown in Figure 8. It parallels the ERT organization, but is not identical.

8. Catastrophic Disaster Response Group

The CDRG, comprising representatives from all FRP signatory departments and agencies, operates at the national level to provide guidance and policy direction on response coordination and operational issues arising from the FCO and ESF response activities. CDRG members are authorized to speak for their agencies at the national policy level. During a disaster, the CDRG convenes as necessary, normally at DHS; the EST provides any needed support.
Federal Response Plan

9. Disaster Recovery Center

A Disaster Recovery Center (DRC) is a centralized location where individuals affected by a disaster can go to obtain information on disaster recovery assistance programs from various Federal, State, and local agencies as well as voluntary organizations. Trained staff are also on hand to provide counseling and advice. It is generally expected that individuals visit the DRC after they have called the teleregistration center to apply for assistance, as applications usually will not be taken at the DRC. However, a DRC may serve as a workshop site for assisting families and businesses to complete SBA disaster loan application forms. A center dealing only with mitigation in reconstruction and

Figure 8 — Emergency Support Team Organization
rebuilding techniques may be called a Reconstruction Information Center (RIC). A RIC may be set up at a fixed or mobile location.

10. Other Teams, Facilities, and Capabilities

a. Additional specialized teams are ready for deployment to support disaster operations, including damage assessment teams, Disaster Medical Assistance Teams (DMAT's), Donations Coordination Teams, Urban Search and Rescue (US&R) task forces, US&R Incident Support Teams, and mitigation assessment teams.

b. Additional facilities support organizational deployment, including assembly points, mobilization centers, staging areas, points of departure, and points of arrival.

c. Various other coordinating mechanisms, management tools, and information systems contribute to the overall Federal disaster operations system, including:

   (1) Time-Phased Force and Deployment Data (TPFDD). A tool to manage the rapid, systematic movement of Federal response personnel, equipment, and critical relief supplies into an affected area in accordance with operational priorities;

   (2) Movement Coordination Center (MCC). An element under ESF #1 — Transportation that is located at DHS HQ and, if necessary, in the field to coordinate the acquisition of transportation capacity and maintain visibility over validated transportation requests for assistance from inception through delivery to a mobilization center; and

   (3) Rapid Response Information System (RRIS). A system of databases and links to Internet sites providing information to Federal, State, and local emergency officials on Federal capabilities to render assistance to manage the consequences of a terrorist attack using WMD. This information is directly available to designated officials in each State, the DHS regions, and key Federal agencies via a protected Intranet site. Local officials have access to the abbreviated Internet site and indirectly to the Intranet site through their State counterparts. Additional information is available to the emergency response community on characteristics of WMD and appropriate safety measures; availability of excess or surplus Federal equipment; access to chemical, biological, and nuclear helplines and hotlines; training courses; and a reference library.

d. Many of these additional teams, facilities, and capabilities are discussed in the FRP annexes or are defined further in Appendix A.
Federal agencies are prepared to take a variety of actions to assist State and local governments in responding to and recovering from a major disaster. The following is a summary of these actions — ranging from initial notification of a disaster to preparation of a final disaster after-action report. They are not necessarily in sequential order; some may be undertaken concurrently. An overview of an entire disaster operation, indicating key operational components and the typical sequence of actions, appears in Appendix D.

A. Initial Actions

1. Notification

   a. Upon indication of an imminent or actual disaster, the State notifies the DHS Regional Office through the MERS Operations Center 800 number. The MOC then immediately notifies the SOC and DHS regional staff in accordance with regional procedures. If directed by the Regional Director, the MOC also notifies regional agency representatives.

   b. The SOC notifies key DHS HQ staff and other Federal agencies through their respective agency EOCs and/or designated individual(s). An advisory is issued to provide an early warning that a possible event being monitored may result in activation. The advisory is for information only and requires no formal action. An alert is issued when an imminent or actual event is likely to result in activation. It puts Federal responders on notice that they need to be ready for immediate deployment. An activation directs immediate deployment to the location specified in the notice. A cancellation indicates that no further action is required or that an activation notification is being terminated.

   c. CDRG members may be notified to convene at DHS HQ for an initial meeting, depending on the nature of the disaster. CDRG members or alternates remain on call to meet at any time during the disaster response.

2. Activation

   a. The DHS Regional Director deploys a DHS State Liaison to the State EOC to provide advice on the declaration process and available Federal assistance, and also partially or fully activates the RST, including regional agency representatives.

   b. With the support of ESFs, the RST initially deploys members of the ERT-A, including damage assessment personnel, to State operating facilities and disaster sites to assess the impact of the situation, collect damage information, and determine requirements. If regional resources appear to be overwhelmed or in an event having potentially significant consequences, DHS HQ may deploy an ERT-N to coordinate the initial response.

   c. Meanwhile, if directed by DHS HQ, the SOC informs ESF primary agencies of an EST activation and provides a time for each activated ESF to report to DHS,
as part of the EST. Primary agencies are responsible for activation of their support agencies if required. Agencies may activate their HQ EOCs to provide coordination and direction to their regional response elements in the field.

d. The Regional Director processes the Governor’s request for a Presidential declaration, which indicates the extent of damage and the types of Federal assistance required. DHS HQ then forwards the Governor’s request to the White House, along with a recommended course of action. Concurrent with a Presidential declaration of a major disaster or emergency and official appointment of an FCO, DHS designates the types of assistance to be made available and the counties eligible to receive assistance. The Regional Director appoints a DRM.

e. The ROC and EST Logistics Section support the establishment of a DFO and mobilization center(s). The ROC also coordinates Federal support of State requirements until the FCO assumes those responsibilities. A Joint Information Center (JIC) may be established, as required, to provide a central point for coordinating emergency public information activities.

f. The ERT-A/ERT-N coordinates damage assessment and selection of locations for field facilities with the State. It also coordinates mission assignments for direct Federal assistance and procurement of goods and services with the Comptroller and RST. The ERT-A/ERT-N begins the transition to a partial or full ERT.

g. ESFs act quickly to determine the impact of a disaster on their own capabilities and to identify, mobilize, and deploy resources to support response activities in the affected State.

h. The EST begins interagency operations by supporting initial activation, mission assignment requirements, and RST activities as needed.

B. Continuing Actions

1. Response Operations

a. The ERT-A/ERT-N completes the transition to a full ERT by the addition of staff, including ESF representatives.

b. Headed by the FCO and located at the DFO, the ERT assumes operational responsibility from the RST for coordinating Federal disaster assistance in support of State-identified needs and priorities submitted by the SCO.

c. The ESF representatives on the ERT coordinate Federal assistance under their respective ESF missions. To the extent possible, they maintain contact with their State counterparts.

d. At DHS, the EST provides financial, administrative, logistical, and operational support to the ERT and ROC as required, including coordinating the
deployment of emergency teams and supplies. The CDRG convenes as needed to address policy issues such as allocation of scarce Federal resources.

e. Early in the response, the Deputy FCO for Mitigation plays a critical role in identifying mitigation opportunities and educating disaster workers on the merits of incorporating mitigation measures into response and recovery actions.

f. Congressional Affairs staff from DHS and supporting agencies conduct briefings for Members of Congress and staff as appropriate.

g. Working with other Federal and State environmental agencies, the Environmental Officer identifies environmental and historic resources that might require consideration under the law as response and recovery efforts are implemented.

h. Once immediate response missions and lifesaving activities conclude, emergency teams are demobilized and the emphasis shifts from response to recovery operations. The ERT Information and Planning Section develops a demobilization plan for the ERT during response operations.

2. Recovery Operations

a. The ERT Operations Section is the central coordination point among Federal and State agencies and voluntary organizations for delivering recovery assistance programs. The Human Services and Infrastructure Support Branches of the Operations Section assess State and local recovery needs at the outset of the disaster and relevant timeframes for program delivery. The branches ensure Federal agencies that might have appropriate recovery assistance programs are notified of the disaster and share relevant applicant and damage information with all involved agencies.

b. In conjunction with the SCO, the FCO determines the need for DRCs in the disaster area. Federal and State agencies staff the DRCs with knowledgeable officials who provide recovery program information, advice, counseling, and technical assistance related to mitigation.

c. The Human Services Branch of the ERT coordinates assistance programs to help individuals, families, and businesses meet basic needs and return to self-sufficiency. The branch also coordinates with voluntary organizations and may become involved in donations management.

d. The Infrastructure Support Branch of the ERT coordinates assistance programs to aid State and local governments and eligible private nonprofit organizations to repair or replace damaged public facilities.

e. The two branches assist in identifying appropriate agency assistance programs to meet applicant needs, synchronizing assistance delivery, and encouraging incorporation of mitigation measures where possible. Additionally, they track
overall progress of the recovery effort, particularly noting potential program deficiencies and problem areas.

f. The Deputy FCO for Mitigation coordinates agency assessment of mitigation program needs and begins to match Federal and State resources to meet those needs.

3. **Stand Down**

When a centralized Federal coordination presence is no longer required in the affected area, the ERT implements the demobilization plan to transfer responsibilities and close out the DFO. Recovery assistance program oversight and monitoring then shifts back to individual agencies’ regional offices or HQ.

4. **After-Action Report**

Following a disaster, the FCO submits an after-action report through the ERT Information and Planning Section to DHS HQ detailing problems encountered and key issues affecting Federal performance. Data from these issues and targeted reviews are analyzed and provided to appropriate DHS management for consideration. After a particularly large or unique disaster operation, DHS also may convene an interagency forum to identify lessons learned. Each Federal agency involved is encouraged to keep records of its activity to assist in preparing its own after-action report.

VI. **Responsibilities**

A. **ESF Primary Agencies**

A Federal agency designated as an ESF primary agency serves as a Federal executive agent under the FCO to accomplish the ESF mission. When an ESF is activated in response to a disaster, the primary agency for the ESF has operational responsibility for:

1. Orchestrating the Federal agency support within the functional area for an affected State;
2. Providing an appropriate level of staffing for operations at DHS, the ROC, DFO, and DRC;
3. Activating and subtasking support agencies;
4. Managing mission assignments and coordinating tasks with support agencies, as well as appropriate State agencies;
5. Supporting and keeping other ESFs and organizational elements informed of ESF operational priorities and activities;
6. Executing contracts and procuring goods and services as needed;
7. Ensuring financial and property accountability for ESF activities; and
8. Supporting planning for short-term and long-term disaster operations.
B. ESF Support Agencies

When an ESF is activated in response to a disaster, each support agency for the ESF has operational responsibility for:

1. Supporting the ESF primary agency when requested by conducting operations using its authorities, cognizant expertise, capabilities, or resources;
2. Supporting the primary agency mission assignments;
3. Providing status and resource information to the primary agency;
4. Following established financial and property accountability procedures; and
5. Supporting planning for short-term and long-term disaster operations.

C. Recovery Agencies

In recovery operations, each Federal agency has responsibility for:

1. Supporting the FCO in identifying needs and addressing recovery and mitigation program implementation;
2. Executing agency programs in an interagency, intergovernmental partnership environment;
3. Obtaining funding from the agency’s own statutory sources;
4. Providing the appropriate level of program staffing to meet common customer service goals and to represent the agency on the ERT;
5. Providing status information to the FCO and SCO; and
6. Supporting planning for short-term and long-term disaster recovery and mitigation operations.

D. Other Federal Agencies

Other Federal agencies not signatories to the FRP may have authorities, expertise, capabilities, or resources that may be required to support disaster operations. Those agencies may be requested to participate in Federal planning and operations activities, designate staff to serve as representatives to the CDRG, and/or provide support to the field.

E. Planning

DHS is responsible for coordinating overall planning under the FRP, including review and revision of the FRP, related annexes, and supporting operational procedures. Primary, support, and recovery agencies are responsible for planning and coordinating the delivery of disaster assistance. Primary agencies are responsible for taking the lead in preparing and maintaining their respective ESF annexes to the FRP. All agencies will contribute to the development of supporting material to the FRP, including HQ annexes and appendices, as well as regional supplements describing specific policies and procedures for disaster operations.
At the HQ level, the ESF Leaders Group (ESFLG) is the principal body that addresses FRP planning and implementation at the working level. It handles issue formulation and resolution, review of after-action reports, significant changes to FRP planning and implementation strategies, and other FRP-related operational issues that involve interagency resolution. The ESFLG forwards to the CDRG issues that cannot be resolved at the working level. Federal agencies designate representatives to serve on the CDRG, ESFLG, and other interagency bodies and working groups. Agencies also participate in FRP exercise, training, and post-event evaluation activities.

In each of the 10 standard Federal regions, a Regional Interagency Steering Committee (RISC) exists to coordinate interagency and intergovernmental issues related to disaster planning and operations. Federal agencies designate representatives to serve on the RISC and participate in regional preparedness activities. Additionally, State emergency management agencies are encouraged to send representatives to RISC meetings and to participate in regional exercise and training activities.
I. Introduction

A. Purpose

Emergency Support Function (ESF) #1 — Transportation assists Federal agencies, State and local governmental entities, and voluntary organizations requiring transportation capacity to perform response missions following a major disaster or emergency. ESF #1 also serves as a coordination point between response operations and restoration of the transportation infrastructure.

B. Scope

Federal transportation assistance provided by ESF #1 includes, but is not limited to:

1. Processing and overall coordination of requests for Federal and civil transportation support received from organizations eligible under the Federal Response Plan (FRP), including requests for military transportation;

2. Operating national and field Movement Coordination Centers (MCCs), as required, to obtain transportation services and provide visibility of transportation assets into and out of the disaster area;

3. Assessing the damage to the transportation infrastructure, analyzing the effects of the disaster on the national and regional transportation system, monitoring the accessibility of transportation capacity and congestion in the transportation system, and implementing management controls as required;

4. Assisting in the design and implementation of alternate transportation services, such as mass transit systems, to temporarily replace system capacity lost to disaster damage;
5. Coordinating the clearing and restoration of the transportation infrastructure;
6. Coordinating activities conducted under the direct authority of Department of Transportation (DOT) elements, such as air and marine traffic control and search and rescue; and
7. Providing DOT-owned aircraft for transportation of personnel and cargo, to the extent these assets are not required for internal priority DOT missions.

II. Policies

A. Federal transportation planning will consider using civil transportation capacity, as well as capacity owned or operated by Federal agencies.

B. Federal transportation planning will recognize State transportation policies and plans used to control the movement of relief personnel, equipment, and supplies, as well as State-established priorities for determining precedence of movement.

C. DOT Headquarters (HQ) will facilitate coordination between DOT regions in the event of multiregion ESF #1 operations.

D. Initial movements of Federal personnel, equipment, and supplies will be managed using a Time-Phased Force and Deployment List (TPFDL). TPFDLs for various scenarios will be developed and maintained through an interagency process led by the Department of Homeland Security (DHS) prior to a disaster to facilitate the prompt deployment of resources when disaster strikes. Each ESF is responsible for compiling, submitting, and updating information for inclusion in the TPFDL.

E. All users of transportation should use established shipper-carrier relationships to move materials into a disaster area and, if possible, include transportation as part of each contract for acquisition of goods. The establishment of predisaster contracts and arrangements for transportation is encouraged. Requests for ESF #1 assistance should be considered only after such arrangements are no longer available or not feasible. However, it is essential to the orderly flow of resources for ESFs to advise ESF #1 of all transportation movements arranged directly.

F. Military transportation will be provided in accordance with the Military Support section of the FRP Basic Plan (page 15).
III. Situation

A. Disaster Condition

A major disaster will severely damage the civil transportation system throughout the impacted area. Most local transportation activities will be hampered by damaged facilities, equipment, and infrastructure, as well as disrupted communications. At the same time, the disaster will create significant demands for national, regional, and local transportation of resources to provide for relief and recovery. Federal assistance may be required to meet these demands for movement of essential resources, as well as for clearing and restoration of the transportation system.

B. Planning Assumptions

1. The area/regional civil transportation infrastructure will sustain damage, limiting access to the disaster area. Access will improve as routes are cleared and repaired or as detours are built.

2. The requirements for transportation capacity will exceed State and/or locally controlled or accessible assets, demanding assistance from the Federal Government.

3. Infrastructure damage and communications disruptions will inhibit efficient coordination of transportation support during the immediate postdisaster period.

4. Gradual clearing of access routes and improved communications will permit an increased flow of emergency relief, although localized distribution patterns might remain unusable for a significant period.

5. The movement of relief supplies may create congestion in the transportation network both nationally and regionally, requiring imposition of controls.

6. ESF #1 can assist in the procurement of adequate transportation services and restoration of the system.

7. Local distribution of resources from a mobilization center to individual victims will normally be the responsibility of mission-assigned Federal agencies, as well as the affected State and local authorities, although ESF #1 can assist in the procurement of vehicles and supporting equipment for such operations.

IV. Concept of Operations

A. General

1. The Disaster Transportation Management System (DTMS) provides a structure for managing the acquisition of transportation services and the deployment of relief and recovery resources from around the Nation into the disaster area. The DTMS includes two components:

   a. TPFDLs, which are planned, prioritized lists of the most critical Federal assets to be deployed rapidly to the disaster site; and
b. MCCs to assist in the procurement of transportation assets and track the movement of resources to the disaster area. The MCC team is led by DOT and includes representatives from the Department of Defense (DOD), DHS, General Services Administration (GSA), and U.S. Department of Agriculture (USDA) Forest Service. All FRP agencies must notify the MCC when transportation arrangements are made, so that resources can be tracked and reception plans executed.

2. When a disaster occurs, the Secretary of Transportation will appoint a DOT Crisis Coordinator to manage the overall DOT/ESF #1 response, usually the Administrator of the Research and Special Programs Administration (RSPA). The Crisis Coordinator will provide policy direction over all national and regional ESF #1 response operations. The Director, Office of Emergency Transportation (OET), in RSPA will provide principal support to the Crisis Coordinator and manage ESF #1 operations at HQ. OET is also responsible for ESF #1 planning.

3. In the disaster area, direction of the ESF #1 mission is provided by the DOT Regional Emergency Transportation Coordinator (RETCO). The RETCO is the Secretary of Transportation’s representative for emergency preparedness and response matters and is the senior regional ESF #1 official for planning and execution.

4. Regional ESF #1 organization, notification, deployment, and support operations will be conducted in accordance with the respective ESF #1 annexes to the regional FRP supplements.

5. Communications will be established and maintained with ESF #5 — Information and Planning to report and receive assessments and status information.

6. All requests for Federal assistance and mission assignments for transportation support will be submitted to ESF #1 for coordination, validation, and/or action in accordance with this annex.

B. Organization

1. National-Level Response Structure
   a. National-level policy direction and management will be provided by the DOT Crisis Coordinator. Principal ESF #1 operations will be conducted at the DOT HQ Crisis Management Center (CMC). The DOT Crisis Coordinator will provide guidance and direction to ESF #1 representatives assigned to the Emergency Support Team (EST) at DHS, as well as to the support agencies and regional response organization.
   b. The DOT Crisis Coordinator will represent the department in deliberations of the Catastrophic Disaster Response Group (CDRG) during disasters.
c. The OET Director will activate the headquarters ESF #1 organization and the DOT CMC. The CMC will operate from Room 8336, DOT HQ Building, 400 Seventh Street, SW, Washington, DC. The CMC is staffed by representatives of DOT operating administrations and selected ESF #1 support agencies, and serves to coordinate and support ESF #1 activities and internal departmental functions.

d. The MCC will be established at DHS by the DOT Crisis Coordinator at the request of the EST Director.

2. Regional-Level Response Structure

a. The RETCO is responsible for coordinating Federal transportation response activities within the assigned jurisdiction.

b. The RETCO will activate those elements of the regional ESF #1 response organization required to meet the demands of the disaster, including ESF representatives to the Regional Support Team (RST), Emergency Response Team (ERT), and field MCC.

C. Response Actions

1. Initial Actions

a. Headquarters

Immediately upon notification of an imminent or actual disaster, priority attention will be directed toward:

(1) Establishing necessary emergency operating facilities, such as the CMC, and incident reporting systems;

(2) Establishing communications with the Office of the Secretary, the impacted RETCO, DOT elements, and appropriate ESF #1 support agencies;

(3) Establishing communications with DHS and other appropriate agencies to obtain the location of possible damage areas, degree of damage, and other available information, including aerial imagery;

(4) Providing appropriate representation to the CDRG and staff to the EST (including the MCC if required);

(5) Implementing plans internal to DOT to ensure adequate staff and administrative support; and

(6) Providing assistance to regional ESF #1 operations.
b. **Region**

   The RETCO will give priority attention to:

   (1) Establishing necessary emergency reporting systems and operating facilities;

   (2) Establishing communications with the Federal Coordinating Officer (FCO), the State Coordinating Officer, DOT operating administrations, and ESF #1 support agencies; and

   (3) Establishing communications with the DOT CMC.

2. **Continuing Actions**

   a. All ESFs will make maximum use of GSA standing schedules to secure transportation support resources and services, generally as part of a contract for acquisition of goods. ESF #1 will acquire transportation services when normal channels of procurement are unable to provide the service. In all cases, the MCC must be advised of all transportation movements arranged directly by the ESFs or other team elements (e.g., Logistics Section).

   b. Through the MCC, ESF #1 will maintain surveillance over the availability of Federal and civil transportation capacity. Shortages will be reported immediately to the DOT CMC, which will assist in identifying sources and may consider imposing priorities and allocations if the Defense Production Act has been implemented.

   c. The RETCO will coordinate with appropriate State and local agencies to facilitate the movement of people and goods to, from, and within the disaster area.

   d. The RETCO will be responsible for the administrative support of individuals involved in regional emergency transportation operations and for managing all financial transactions undertaken through mission assignments issued to DOT.

   e. The RETCO will coordinate with appropriate DOT regional operating administrations on the implementation of specific DOT statutory authorities providing immediate assistance, such as air traffic control, search and rescue, long-term recovery of the transportation infrastructure, and mitigation efforts to lessen the effects of future disasters.

V. **Responsibilities**

A. **Primary Agency: Department of Transportation**

   1. Coordinate the provision of Federal and civil transportation capacity in support of Federal agencies, State and local governmental entities, and voluntary organizations, including contracting for such resources when required.

   2. Provide staffing to and manage the MCC(s).
3. Manage the financial aspects of the ESF #1 response, including the funding of mission assignments and the process for reimbursement from DHS.

4. Supervise the assessment of damage to the transportation infrastructure and the analysis of the impact of the disaster on transportation operations, nationally and regionally.

5. Coordinate and implement, as required, emergency-related response and recovery functions performed under DOT statutory authorities, including the prioritization and/or allocation of civil transportation capacity, air and marine traffic control, search and rescue, emergency highway funding for federally owned highways and highways on the Federal Aid System, hazardous material containment response, and damage assessment.

6. Provide technical assistance to Federal, State, and local governmental entities in determining the most viable transportation networks to, from, and within the disaster area, as well as alternate means to move people and goods within the area affected by the disaster.

7. Identify resource requirements for transportation and coordinate their allocation.

B. Support Agencies

1. Department of Agriculture, Forest Service
   a. Manage mobilization centers for ESF #7 — Resource Support to receive goods shipped in support of the disaster.
   b. Provide staffing to the MCC(s).

2. Department of Defense
   a. Provide support in the emergency operation of inland waterways, ports, and harbors under the supervision of the U.S. Army Corps of Engineers (USACE), including dredging operations.
   b. Assist in restoring the transportation infrastructure.
   c. Provide organic military transportation capacity from the U.S. Transportation Command (USTRANSCOM) to move essential resources and assist in the contracting for civilian airlift. USTRANSCOM also will provide staff to the MCC(s).
   d. Assist in the development and support the execution of TPFDLs for high-priority response resources.

3. Department of Homeland Security
   a. Coordinate the acquisition, movement, and distribution of DHS-owned relief goods into the disaster area, in accordance with the Logistics Management Support Annex.
b. Initiate transportation actions prior to MCC activation, keep DOT informed of early transportation actions, and assume responsibility for closeout of actions after the HQ and field MCCs deactivate.

c. Supervise the development of the TPFDLs.

d. Provide staffing to the MCC(s).

e. Provide airlift and marine transportation capability.

4. Department of State

Coordinate requests for, and offers of, transportation assistance from foreign governments.

5. General Services Administration

a. Assist in identifying sources for and contracting transportation services.

b. Provide staffing to the MCC(s).

6. Tennessee Valley Authority

a. Participate in the coordination of transportation and navigation on Tennessee Valley Authority (TVA)-managed waterways during a disaster.

b. Assist in damage assessment.

7. U.S. Postal Service

Provide U.S. Postal Service (USPS) vehicles not immediately required for mail delivery for transportation of relief resources, particularly for distribution in the disaster area.

VI. Terms and Definitions

A. Civil Transportation Capacity

The total quantity of privately owned transportation services, equipment, facilities, and systems from all transport modes nationally or in a prescribed area or region.

B. Disaster Transportation Management System

A system for managing the acquisition of transportation assets and organizing the movement of resources into the disaster area. The DTMS includes the TPFDL and MCC.

C. DOT Crisis Coordinator

A senior-level official appointed by the Secretary of Transportation to manage the department’s emergency response operations during a situation having significant impact on civil transportation capacity or the transportation infrastructure. For disasters, the Administrator, RSPA, will normally serve as Crisis Coordinator.
D. Federally Arranged Transportation Support

The identification of available civil transportation capacity, and assistance in procuring such capacity, in support of Federal agencies, State and local governmental entities, and voluntary organizations unable to obtain required services through normal procurement channels.

E. Movement Coordination Center

An ESF #1 element within the EST in Washington, DC, and in the field. When established, the MCC coordinates acquisition of transportation capacity and maintains visibility over validated transportation requests for assistance from inception through delivery to a mobilization center.

F. Regional Emergency Transportation Coordinator

A senior-level executive from a DOT operating administration who is designated by DOT order to serve as the regional representative of the Secretary of Transportation for emergency transportation preparedness and response.

G. Time-Phased Force and Deployment List

A tool to manage the rapid, early movement of Federal personnel, equipment, and critical relief supplies in response to an impending or actual disaster. TPFDLs improve efficiency of air and ground support, contributing to the effective functioning of personnel, logistics, and transportation management processes. Typical resources deployed and tracked include special units such as Urban Search and Rescue task forces and Disaster Medical Assistance Teams, as well as generators, plastic sheeting, and meals-ready-to-eat. Detailed information is included about the cargo (quantity, dimensions, weight, points of departure/arrival, required delivery date, etc.) and passengers. Collectively, this information is known as the Time-Phased Force and Deployment Data.
This page intentionally left blank.
Emergency Support Function #2
Communications Annex

Primary Agency: Department of Homeland Security
Support Agencies: Department of Agriculture, Forest Service
Department of Commerce
Department of Defense
Department of the Interior
Federal Communications Commission
General Services Administration

I. Introduction

A. Purpose

Emergency Support Function (ESF) #2 — Communications ensures the provision of Federal telecommunications support to Federal, State, and local response efforts following a presidentially declared major disaster, emergency, or extraordinary situation under the Federal Response Plan (FRP). This ESF supplements the provisions of the National Plan for Telecommunications Support in Non-Wartime Emergencies, hereafter referred to as the National Telecommunications Support Plan (NTSP).

B. Scope

ESF #2 coordinates Federal actions to be taken to provide the required national security and emergency preparedness (NS/EP) telecommunications support to Federal, State, and local disaster response elements. This ESF will coordinate the establishment of required temporary NS/EP telecommunications and the restoration of permanent telecommunications. Where appropriate, services may be furnished under provisions of the Telecommunications Service Priority (TSP) system. ESF #2 applies to all Federal departments and agencies that may require telecommunications services or whose telecommunications assets may be employed during a disaster response.

II. Policies

A. The NTSP serves as a basis for planning and use of national telecommunications assets and resources in support of the provisions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act. The NTSP is issued by the Director, Office of Science and Technology Policy (OSTP), Executive Office of the President, in accordance with National Security Council policy direction, and is applicable to all Federal agencies.
B. The NTSP contains the authority for the National Communications System (NCS) to develop plans and coordinate and manage telecommunications support for Federal organizations in nonwartime emergencies. This authority is derived from Executive Order 12472, Assignment of National Security and Emergency Preparedness Telecommunications Functions, April 3, 1984.

C. The Department of Homeland Security (DHS) is honoring the agreement between OSTP and the Federal Emergency Management Agency (FEMA) dated June 7, 1995, stating the Office of the Manager, NCS, will execute FRP primary agency functional responsibilities on its behalf.

III. Situation

A. Disaster Condition

1. A disaster condition may result from a significant natural disaster, nuclear accident, or any other incident that causes extensive damage and/or results in a high volume of requests from all levels of government authority for services required to save lives and alleviate human suffering. These authorities require accurate and timely information on which to base decisions and guide response actions. Concurrently, commercial telecommunications facilities may sustain widespread damage. At a time when the need for real-time electronically processed information is greatest, the capability to acquire it may be seriously restricted or nonexistent. In such situations, all surviving telecommunications assets of the various levels of government, augmented by extraregional assets, will be needed immediately to ensure a proper response to the needs of victims of the event.

2. When activated, ESF #2 will coordinate and support NS/EP telecommunications requirements across the emergency continuum.

B. Planning Assumptions

1. Initially, State and local government officials focus on coordinating lifesaving activities concurrent with reestablishing control in the disaster area. Working with the telecommunications industry, these officials will restore and reconstruct telecommunications facilities as the situation permits.

2. Initial damage reports may be fragmented and provide an incomplete picture concerning the extent of damage to telecommunications facilities.

3. Weather and other environmental factors may restrict the ability of suppliers to deploy mobile or transportable telecommunications equipment into the affected area.

4. The affected region’s ability to communicate with the rest of the country may be impaired. Some key individuals may be isolated from their regional offices and/or operational centers.
5. The type of disaster and the potential for related disasters will require the careful consideration of a site for establishing a Disaster Field Office (DFO) in the least vulnerable location supportable by available telecommunications facilities.

IV. Concept of Operations

A. General

During an emergency, the following guidelines will be observed to allow ESF #2 to meet its disaster response responsibilities:

1. Telecommunications management will occur on a bottom-up basis; decisions will be made at the lowest level, with only those issues requiring adjudication or additional resources being referred to the next higher management level. DHS’s Telecommunications Information Management and Control System (TIMACS) will be used for Stafford Act expenditures for telecommunications support;

2. Uniform emergency telecommunications management and operational plans, procedures, and handbooks will be used throughout the entire ESF #2 operating environment;

3. The Federal Coordinating Officer (FCO) has overall responsibility for the coordination of telecommunications support in the response area. When General Services Administration (GSA) assistance is requested during a disaster response, a Federal Emergency Communications Coordinator (FECC) is appointed. The FECC prioritizes conflicting requests and recommends solutions to the FCO;

4. DHS controls its communications assets (i.e., Mobile Air Transportable Telecommunications System (MATTs)/Mobile Emergency Response Support (MERS)), in the disaster area but coordinates their use with the FECC. Other agencies that provide telecommunications assets in support of the disaster response also would control their organic assets, but would coordinate their use with the FECC; and

5. The FECC will be the telecommunications industry’s single Federal point of contact (POC) in the disaster area for Federal telecommunications requirements and will coordinate industry’s response. The FECC will coordinate with the State telecommunications officer to ensure Federal communications requirements do not conflict with State needs.
B. Organizational Structure (After a Presidentially Declared Disaster Response Requiring the Appointment of an FECC)

1. National-Level Response Structure

Response operations for a major disaster will normally begin when the FRP is implemented. DHS will selectively activate ESFs based on the nature and scope of the event and the Federal resources required to support State and local responses.

National-level ESF #2 operations will normally commence at the same time that the ESF #2 position on the Emergency Support Team (EST) is activated under the FRP. The EST, which comprises representatives from all the ESFs, is located at DHS Headquarters (HQ). Once notified of a disaster, the National Coordinating Center (NCC) for Telecommunications staff assesses anticipated/actual damage, identifies NS/EP service requirements, prioritizes requirements, monitors the developing situation/response, renders status reports, and coordinates service provisioning and restoration as required. The NCC staff makes assessments based on reports from FECC and NCC industry representatives, who coordinate with their parent company Emergency Operations Centers (EOCs). The Manager, NCC, appoints ESF #2 representatives to the EST, providing for 24-hour coverage if required. If the Catastrophic Disaster Response Group (CDRG) is convened to address priority issues, the Deputy Manager, NCS, will represent ESF #2 at such meetings. The Manager, NCS, may dispatch an NCS Disaster Area Liaison Officer (DALO) to the disaster site to assist the FECC in coordinating national-level telecommunications support to the disaster response. The FECC also may request the deployment of an NCS DALO through the Manager, NCS. DHS will dispatch an agency representative to the disaster area to assist in coordinating DHS’s telecommunications support.

2. Regional-Level Response Structure

For a major disaster, the FCO will request the appointment of an FECC. GSA will ensure a qualified person capable of performing the required functions is identified (that person could be the GSA Regional Emergency Services Communications Planner (RECP) who serves as NCS Regional Manager for that region). The FECC will deploy to the scene of a presidentially declared disaster as the principal Federal telecommunications manager in the disaster area. The FECC will normally deploy to the affected State EOC as part of the Advance Element of the Emergency Response Team (ERT-A) and will assist ESF #7 — Resource Support in selecting a DFO site. DHS will provide an agency representative to assist in coordinating DHS’s telecommunications support in the setup of the DFO. Federal disaster response operations are coordinated from the Regional Operations Center (ROC) until the DFO is operational, which is normally a period of 48 to 96 hours. The FECC deploys to the disaster area and works with DHS communications personnel to establish telecommunications services for the DFO. At the DFO, the FECC is assisted by the Emergency Communications Staff (ECS), a group of government and industry telecommunications managers trained in emergency response and DFO operations. Conflicts regarding priorities and/or resources that
cannot be resolved by the FCO and FECC will be passed to the CDRG and, if still not resolved, to the Joint Telecommunications Resources Board (JTRB).

C. Notification Procedures

1. Headquarters

The NCC is always available to assist industry and Federal response operations during day-to-day planning and coordination of national telecommunications support, including disaster response activities. If ESF #2 is activated, DHS will notify the Manager, NCC, immediately. The Manager, NCC, will then alert all NCC personnel and assume national-level coordination of telecommunications assets as necessary. During nonduty hours, the National Communications System Defense Information Systems Agency-Global Operations Security Center (NCS/DISA-GOSC) will alert the Manager, NCC, who will direct that an NCC Initial Response Team (IRT) be formed to assess the situation.

Immediately upon receipt of information about the disaster or emergency, and upon notification of any FRP activation, the NCC will contact DHS for information and guidance on the situation and ongoing response planning, and coordinate ESF #2 response preparations. If the Manager, NCC, determines that an FECC will be activated, the Manager will notify the appropriate GSA Regional Emergency Coordinator (REC) that DHS has requested an FECC. The GSA REC will notify the appropriate GSA regional office to activate the FECC.

2. Region

The FECC will coordinate with the Manager, NCC, to request Individual Mobilization Augmentee (IMA) support.

D. Response Actions

1. Initial Actions

a. Immediately upon notification of a disaster, the Manager, NCC, will begin gathering damage assessment data from the NCC government and industry representatives. The Manager, NCC, in coordination with DHS and GSA, will determine the appropriate level of response for national-level ESF #2 elements. The initial focus of the NCC will be to identify:

(1) Operational telecommunications assets available for use within the affected area;

(2) Telecommunications assets not within the affected area that may be brought physically or employed electronically to support the affected area; and

(3) Actual and planned actions of the commercial telecommunications companies toward recovery and reconstruction of their facilities.
b. The FECC will determine the ESF #2 regional and disaster area response requirements with the applicable DHS Regional Director.

c. Until the FECC and the ECS are deployed and operational, DHS communications staff will accumulate damage information obtained from the DHS Regional Director, other Federal agencies, and industry sources. Additionally, DHS communications staff may make initial estimates of the level of Federal telecommunications support that may be required. This information will be provided to the FECC upon arrival in the affected area. The FECC will also receive a status report on the telecommunications situation, Federal telecommunications assets that have arrived in the disaster area, telecommunications services provided, and any open telecommunications requests.

d. The ECS will be organized in the disaster area and expanded as necessary by drawing on experienced personnel from unaffected areas.

e. NCC personnel, in coordination with the FECC, will begin an inventory of Federal communications assets available to support the recovery mission. Federal agencies with communications assets may be asked to contribute these assets to the response effort. The Manager, NCC, will be kept informed of these assets and their status.

f. Potential NCC actions include the following:

   (1) Obtaining the location of the proposed DFO;
   (2) Obtaining the latest weather report for the area, including present conditions, the 24-hour forecast, and the long-range forecast;
   (3) Obtaining information from ESF #1 — Transportation about road, rail, and all transportation conditions in the area and whether they can be used to get mobile telecommunications systems into the area; and
   (4) Determining from DHS and/or ESF #7 — Resource Support the location of possible sources of secondary response facilities in the disaster area (e.g., staging areas or satellite DFOs).

  g. The FECC, when activated, will assess the need for mobile and transportable telecommunications equipment. The FECC, through the NCC, may request NCS member organizations to identify assets for possible deployment.

  h. The NCC, in coordination with the FECC, will assess the need for telecommunications industry support and ensure such support is available as needed.

2. Continuing Actions

   a. The FECC will prepare and process any required reports.

   b. The representatives of the NCS member organizations that have been asked to provide assets will confirm to the NCC that those assets have been prepared for
movement to the disaster area, as and when needed, and will report when they have been deployed and have become operational.

c. The FECC, assisted by the ECS, will:

   (1) Coordinate Federal telecommunications support to responding Federal agencies, State, and local governments, and quasi-governmental and voluntary relief organizations as directed by the FCO;

   (2) Recommend release of Federal telecommunications resources when they are no longer required; and

   (3) Maintain a record for audit of all telecommunications support provided. NCS member organizations’ procedures will be used to accomplish this audit.

d. The NCC will provide damage information to the EST ESF #2 representative and the FECC regularly, and to other Federal agencies upon request.

e. Requests for telecommunications support will come from many sources. The FECC will forward unresolved requests to the NCC. When the allocation of telecommunications resources cannot be resolved by the NCC to the satisfaction of the parties involved, the issues will be presented to the CDRG and then, if necessary, to the JTRB for resolution.

f. The NCC develops and promulgates information collection guidelines and procedures to enhance assessment, allocation, and coordination of government and industry telecommunications assets.

V. Responsibilities

A. Primary Agency: Department of Homeland Security

1. The Manager, NCS, will ensure the provision of adequate telecommunications support to Federal response operations. The Manager, NCS, through the NCC, will provide information and assistance to the JTRB as required.

2. The Manager, NCS, is responsible for:

   a. Supporting the JTRB as required in accordance with standard operating procedures issued by the Director, OSTP;

   b. Ensuring all information regarding potential and/or actual emergency situations with significant telecommunications implications is brought to the attention of the Director, OSTP;

   c. Coordinating response activities with DHS, GSA, and other JTRB member organizations;

   d. Monitoring the status of crucial situations that have the potential for developing into a major disaster, emergency, or extraordinary situation, and those that may require emergency telecommunications support;
e. Coordinating with ESF #12 — Energy regarding telecommunications industry requests for support under the Electric Service Priority (ESP) initiative, emergency fuel resupply, and safe access for telecommunications work crews into disaster areas;

f. Supporting the ESP initiative by providing updated data to and from the Department of Energy (DOE) and the participating telecommunications companies;

g. Monitoring the recovery efforts and, as required, coordinating the provision of telecommunications needed by the Federal Government;

h. Providing situation status to the JTRB as required;

i. Appointing an NCS DALO to provide on-site assistance to the FECC in coordinating national-level telecommunications support in the disaster area; and

j. Activating IMAs to support disaster responses at the DFO, national, and regional levels.

3. The Manager, NCC, is responsible for:

a. Monitoring the status of crucial situations that have the potential for developing into a major disaster, emergency, or extraordinary situation to determine that adequate NS/EP telecommunications services are being provided to support response operations;

b. Assessing the impact on existing Federal Government NS/EP telecommunications services;

c. Coordinating the restoration and/or rerouting of existing Federal Government NS/EP telecommunications services and the provisioning of new NS/EP telecommunications services;

d. Coordinating with telecommunications service providers and prioritizing requirements as necessary when providers are unable to satisfy all telecommunications services requirements, when there are conflicts between multiple FECCs, or when the allocation of available resources cannot be fully accomplished at the field level;

e. Coordinating, when requested by the FECC, with NCS member organizations to obtain additional telecommunications specialists to augment the ECS;

f. Coordinating with Federal agencies those special telecommunications industry requests for assistance that support NS/EP activities, including support under the ESP initiative, emergency fuel resupply, and safe access for telecommunications work crews into disaster areas; and

g. Coordinating with appropriate government and industry representatives in support of FECC requests to meet user requirements for cellular telephone assets.
B. Support Agencies

1. ESF #2 support agency representatives will be aware of their parent organizations’ capabilities to provide mobile or transportable resources for telecommunications activities.

2. Any agency having substantial communications assets in the disaster area should have representation on the ECS.

3. Agencies will coordinate required connection to commercial or government telecommunications resources through the FECC.

4. The agencies listed below provide the indicated support to ESF #2 efforts under the FRP.

   a. Department of Agriculture, Forest Service

      (1) Provide radio communications systems for support of firefighters, law enforcement officers, and disaster response operations.

      (2) Provide engineers, technical personnel, and liaison staff to assist the ECS and to maintain the National Interagency Radio Support systems.

      (3) Provide National Interagency Radio Support systems for use by damage reconnaissance teams to report information from the disaster area to the DFO, and such other applications as determined by the radio communications coordinator.

      (4) Provide a communications officer to accompany radio systems for the purpose of user training and operator maintenance indoctrination.

      (5) Provide additional radio systems required for the establishment of a DFO radio net.

   b. Department of Commerce

      (1) National Telecommunications and Information Administration

         (a) Develop plans and procedures concerning radio spectrum assignments, priorities, and allocations for use by Federal agencies.

         (b) Develop, maintain, and publish policies, plans, and procedures for the control and assignment of radio frequencies, including the authority to amend, modify, or revoke such assignments, in those parts of the electromagnetic spectrum allocated to the Federal Government.

         (c) Maintain and publish the Emergency Readiness Plan for Use of the Radio Spectrum.
(2) National Oceanic and Atmospheric Administration (NOAA),
National Weather Service

Provide public dissemination of critical pre-event and post-event information
over the all-hazards NOAA Weather Radio (NWR) system, the NOAA Weather
Wire Service, and the Emergency Managers’ Weather Information Network
(EMWIN).

c. Department of Defense

Provide assistance in civil emergencies in accordance with national policies,
consistent with defense priorities as set forth in the Department of Defense
(DOD) Directive 3025.1, Military Support to Civil Authorities. The Secretary
of Defense has designated the Secretary of the Army as the executive agent for
DOD support to civil emergencies.

d. Department of Homeland Security

(1) Provide a representative(s) to serve on the FECC’s staff to coordinate the
employment of DHS’s telecommunications assets, including MATTS/
MERS, in the disaster area; coordinate DHS requests for telephone service
and connectivity; and provide expertise on MATTS/MERS and DHS
networks.

(2) Coordinate the establishment of telecommunications support in the DFO
with the FECC.

(3) Install computers and local area networks at the DFO as required.

(4) Provide radio equipment and other organic telecommunications support.

(5) Provide communications support to State and local officials to assist in
disseminating warnings to the populace concerning risks and hazards.

(6) Provide frequency management and site engineering expertise to the ECS.

(7) Provide representation on the ECS and coordinate DHS resources and TSP
requests with the FECC.

(8) Provide video teleconference expertise to the ECS.

e. Department of the Interior

Provide radio and radio-telephone systems from assets not required to meet
Department of the Interior (DOI) emergency missions.

f. Federal Communications Commission

(1) Review the policies, plans, and procedures that are developed by all entities
licensed or regulated by the Federal Communications Commission (FCC)
to provide NS/EP telecommunications services to ensure such policies,
plans, and procedures are consistent with the public interest, convenience,
and necessity.
Federal Response Plan

(2) Perform such functions as required by law with respect to all entities licensed or regulated by the FCC, including (but not limited to) the extension, discontinuance, or reductions of common-carrier facilities or services; the control of common-carrier rates, charges, practices, and classifications; the construction authorization, activation, deactivation, or closing of radio stations, services, and facilities; the assignment of radio frequencies to FCC licensees; the investigation of violations of pertinent law and regulation; and the initiation of appropriate enforcement actions.

g. General Services Administration

(1) Each Regional Administrator, GSA, will ensure a GSA RECP who will serve as an NCS Regional Manager (NCSRM) and FECC, is identified for each of the 10 standard Federal Regions. The Regional Administrator will authorize the GSA RECP/NCSRM to accept guidance from the DHS Regional Director during the predeployment phase of a telecommunications emergency. National-level guidance will be provided by the GSA Federal Telecommunications Service (FTS) Emergency Communications Coordinator. The Regional Administrator will authorize the GSA RECP/NCSRM or designated alternate(s) to perform the functions of the FECC upon request by the FCO or senior Federal official.

(2) The GSA RECP/NCSRM will prepare and maintain a Regional Support Plan for each designated standard Federal Region, coordinating plan development with counterpart GSA RECP/NCSRMs in contiguous regions. The GSA RECP/NCSRM will supervise the training of potential FECCs within the assigned region.

(3) When requested, the FECC will deploy to the scene of a presidentially declared major disaster, emergency, or extraordinary situation to survey the status of telecommunications and to determine residual capabilities and the extent of damage within the affected area. The FECC will coordinate with other Federal agencies to determine their emergency telecommunications service requirements.

(4) When activated, the FECC will:

(a) Accumulate damage information obtained from the DHS Regional Director, the NCC, other Federal agencies, and industry sources and conduct telecommunications status evaluations;

(b) Advise the FCO on all telecommunications matters;

(c) Act as the single government POC in the disaster area for industry for all telecommunications requests and actions;

(d) Assess the need for mobile or transportable equipment;
(e) Release Federal telecommunications resources as soon as commercial carrier services can support the response mission;

(f) Coordinate with Federal, State, and local organizations, and the major voluntary relief organizations as well as other ESFs involved with disaster recovery, to ascertain their telecommunications requirements;

(g) Ensure required services are provided in support of the Federal disaster response and recovery effort;

(h) Coordinate the distribution of cellular telephone assets by appropriate government and industry representatives in support of user requirements;

(i) Assemble and lead the ECS;

(j) Maintain an audit trail of all telecommunications support provided;

(k) Prioritize telecommunications requirements;

(l) Ensure an ESF #2 representative is deployed to support the RST;

(m) Coordinate frequency management for the disaster area including frequencies used by deployed military assets;

(n) Coordinate the use of military telecommunications assets;

(o) Coordinate TSP requests;

(p) Ensure ESF #2 representatives are provided to support damage assessment personnel;

(q) Provide an ESF #2 representative to support the ERT-A;

(r) Coordinate telecommunications support to the disaster mobilization center as necessary; and

(s) Prepare and process any required reports.

h. Other Federal Agencies

(1) NCS member organizations will be prepared to assist the Manager, NCS, in the deployment and use of agency-owned/leased or otherwise unique telecommunications assets to support the response effort.

(2) All other Federal agencies will:

   (a) Use organizational resources to meet their mission requirements before requesting that the FECC obtain emergency telecommunications support;

   (b) Notify the FECC promptly of all telecommunications requirements and available assets. This will eliminate the possibility of service
duplications and ensure prompt provision of needed services and facilities to the proper user;

(c) Coordinate with the FECC when telecommunications support (other than that provided or already coordinated through the FECC) has been requested by a representative of an organization at a disaster location;

(d) Coordinate any requests for commercial or government telecommunications resources through the FECC;

(e) Coordinate with the NCC as necessary for any required national-level telecommunications support;

(f) Notify the FECC promptly when their telecommunications resources are to be withdrawn or discontinued; and

(g) Notify the FECC when telecommunications resources provided by the FECC are no longer required.

Emergency Support Function #3
Public Works and Engineering Annex

Primary Agency: Department of Defense, U.S. Army Corps of Engineers
Support Agencies: Department of Agriculture
Department of Commerce
Department of Health and Human Services
Department of the Interior
Department of Labor
Department of Veterans Affairs
Environmental Protection Agency
Tennessee Valley Authority

I. Introduction

A. Purpose

Emergency Support Function (ESF) #3 — Public Works and Engineering provides technical advice and evaluation, engineering services, contracting for construction management and inspection, contracting for the emergency repair of water and wastewater treatment facilities, potable water and ice, emergency power, and real estate support to assist the State(s) in meeting goals related to lifesaving and life-sustaining actions, damage mitigation, and recovery activities following a major disaster or emergency.

B. Scope

Activities within the scope of ESF #3 include:

1. Participation in predisaster activities, such as pre-positioning assessment teams and contractors, and deployment of other advance elements;
2. Participation in needs/damage assessments immediately following a disaster;
3. Emergency clearance of debris to enable reconnaissance of the damaged areas and passage of emergency personnel and equipment for lifesaving, property protection, and health and safety;
4. Removal and disposal management of debris from public property;
5. Provision of expedient emergency access routes, which includes repairs to damaged streets, bridges, ports, waterways, airfields, and other facilities necessary for emergency access to disaster victims;
6. Emergency restoration of critical public facilities, including the temporary restoration of water supplies and wastewater treatment systems;
7. Emergency demolition or stabilization of damaged structures and facilities designated by State or local governments as immediate hazards to public health and safety, or as necessary to facilitate lifesaving operations (temporary protective measures to abate immediate hazards to the public for health and safety reasons until demolition is accomplished);

8. Emergency contracting to support public health and safety, such as providing for potable water, ice, power, or temporary housing;

9. Technical assistance, including inspection of private residential structures and commercial structures;

10. Support to other ESFs as outlined in the Federal Response Plan (FRP); and

11. Provision of emergency power to public facilities.

II. Policies

A. The Director of Military Support (DOMS) is the responsible national-level Department of Defense (DOD) office for military support to civilian authorities. DOD has responsibility for ESF #3 and has designated the U.S. Army Corps of Engineers (USACE) as its operating agent for ESF #3 planning, preparedness, response, and recovery.

B. The USACE will develop work priorities in cooperation with the State government and in coordination with the Federal Coordinating Officer (FCO).

C. A USACE division(s) will appoint an overall mission coordinator for all ESF #3 response and recovery activities on the RST and ERT as appropriate.

III. Situation

A. Disaster Condition

In a major disaster or emergency, response and recovery operations may be beyond the State and local response capabilities. Structures may be destroyed or severely weakened. Homes, public buildings, bridges, and other facilities may have to be reinforced or demolished to ensure safety. Debris may make streets and highways impassable. Public utilities may be damaged and be partially or fully inoperable. A major disaster may affect the lives of many State and local response personnel and their facilities, and prevent them from performing their prescribed emergency duties. Similarly, equipment in the immediate disaster area may be damaged or inaccessible. Sufficient resources may not be available to State and local agencies to meet emergency requirements. Federal assistance may be required to identify and deploy resources from outside the affected area to ensure a timely, coordinated effective response.
B. Planning Assumptions

1. Access to the disaster areas will be dependent on the reestablishment of ground and water routes. In many locations, debris clearance and emergency road repairs will be given top priority to support immediate lifesaving emergency response activities.

2. Early damage assessments will be general, incomplete, and may be inaccurate. Rapid assessment of the disaster area is required to determine critical response times and potential work loads.

3. To minimize threats to public health, emergency environmental waivers and legal clearances will be needed to dispose of emergency debris and materials from demolition activities. Under Federal regulations, local authorities are responsible for obtaining required waivers and clearances. Federal agencies are responsible for complying with appropriate Federal environmental and historic preservation statutes.

4. Significant numbers of personnel having engineering and construction skills and construction equipment and materials will be required from outside the disaster area.

5. Primary agencies (including USACE) and support agencies will perform tasks under their own authorities, as applicable, in addition to missions received under the authority of the FRP.

6. Previously inspected structures will require reevaluation if aftershocks occur following an earthquake.

IV. Concept of Operations

A. General

ESF #3 support will supplement State and local emergency response actions. Close coordination will be maintained with Federal, State, and local officials to determine potential taskings and to track the status of response activities. The priority of taskings will be determined jointly between Federal and State officials. The ESF #3 team will provide damage information to ESF #5 — Information and Planning for overall damage assessment, and inform the Emergency Response Team (ERT) Operations Section of the damage situation and ESF activities. Support agency representatives will collocate with USACE field personnel to coordinate support with their agencies as necessary.

B. Organization

1. National-Level Response Structure

   a. Catastrophic Disaster Response Group

      The USACE representative to the Catastrophic Disaster Response Group (CDRG) is the Chief of the Operations Division of the Directorate of Civil Works. The alternate representative is the Chief, Civil Emergency Management Branch, Operations Division, Directorate of Civil Works.
b. Emergency Support Team

The ESF #3 representative(s) to the Emergency Support Team (EST) will be responsible for coordinating mission assignments and resources to support disaster operations. The USACE representative(s) to the EST will be assigned by the Civil Emergency Management Branch, Operations Division, Directorate of Civil Works.

c. Agency Operations Elements

Headquarters USACE (HQUSACE) will operate from the HQUSACE Emergency Operations Center (EOC). HQUSACE may request support agency liaison representatives to report to HQUSACE EOC if the disaster situation warrants.

2. Regional-Level Response Structure

a. Regional Operations Center

A USACE division will provide the necessary representation on the RST. These representative(s) will remain in the Regional Operations Center (ROC) until deactivated or released by the RST Director.

b. Advance Element of the Emergency Response Team

The USACE division having responsibility for the State in which the disaster occurs will ensure necessary representatives are immediately provided for the formation of the Advance Element of the ERT (ERT-A). The damage assessment representative will be an infrastructure specialist assigned from the division.

c. Disaster Field Office ESF #3 Cell

A supplemental ESF #3 component to the ERT-A will deploy to the DFO and evolve into the ESF #3 cell after the DFO is established. Among the ESF #3 roles are preparing statements of work, cost estimates, and estimated completion dates for mission assignments; tracking and executing mission assignments; maintaining cognizance of all other ERT activities; assessing information; determining resource requirements; setting priorities; disseminating information; and taking other response and recovery actions as required. In addition to assigning the representatives from the ERT-A to the full ERT, the designated USACE division also will provide necessary staff for response and recovery operations.

d. Defense Coordinating Officer

DOD/DOMS will provide a Defense Coordinating Officer (DCO) to serve as the single point of contact (POC) to the FCO and ESF representatives for all requests for military assistance other than that provided by ESF #3. USACE will support the DCO and deployed joint forces as requested.
e. Response and Recovery Operations

USACE districts may be required to establish field offices (Emergency Response and Recovery Offices) to support assignments and missions. Divisions and districts will carry out mission assignments based on Department of Homeland Security (DHS) guidance and within established procedures.

C. Notification

1. Headquarters

The DHS Homeland Security Center (HSC) will notify the Army Operations Center (AOC) of an emergency situation. The AOC will then immediately notify the CDRG members from USACE and DOMS. The AOC and HQUSACE EOC will exchange telephonic notifications to ensure each is aware of the situation. The EOC will notify ESF #3 EST members and subordinate USACE commands.

2. Region

Upon occurrence of a major disaster and/or notification of FRP activation, HQUSACE will designate the lead division(s) and instruct the division commander to implement the local notification plans. Concurrently, the responsible DHS region will request support from the predesignated USACE division commander.

D. Response Actions

1. Initial Actions

a. HQUSACE

(1) Send EST representatives to DHS as required.

(2) Provide CDRG representation as needed.

(3) Activate the EOC and begin notification procedures.

(4) Establish communications with DHS, DOD/DOMS through the AOC, and USACE subordinate commands.

(5) Provide liaison to DHS to coordinate congressional relations activities with DHS’s Congressional Relations Officer.

(6) Provide public affairs liaison to the DHS Joint Information Center (JIC).

b. Regions (Division and District)

(1) Designate personnel to staff the RST, ERT-A, and ESF #3 cell in accordance with the FRP.

(2) Activate the EOC and identify facilities for USACE field offices.

(3) Notify support agencies’ regional offices of ESF #3 activation.
(4) Gather essential elements of information and report to the ROC, HQUSACE, DFO, and EOC.

(5) Identify requirements for remote sensing and imagery to ESF #5.

2. Continuing Actions
   a. HQUSACE
      (1) Continue EOC operations.
      (2) Ensure proper and adequate coordination is in effect at all levels.
   b. Regions (Division and District)
      (1) Support DHS and State emergency agencies as required.
      (2) Work with State and local governments to maximize the use of available regional assets and to identify resources required from outside the region.

V. Responsibilities

A. Primary Agency
   1. Army Operations Center
      a. Notify HQUSACE, DOMS, and CDRG member directly if possible.
      b. Notify HQUSACE EOC of FRP activation.
   2. HQUSACE
      a. Review the FRP annually. Submit comments as appropriate and revise this annex as necessary.
      b. Develop additional USACE guidance as required to execute assigned missions.
      c. Participate in training and exercises including those of support agencies.
      d. Conduct periodic meetings and workshops with support agencies at the national level to maintain capabilities, and to plan for and prepare to respond to a disaster in the event of activation.

B. Support Agencies
   1. Predisaster Actions
      a. Provide HQUSACE with POCs at the national level for coordinating plans and responses.
      b. Designate representatives at the regional level.
2. Specific Agency Responsibilities

a. Department of Agriculture, Forest Service
   
(1) Provide engineering and contracting/procurement personnel and equipment to assist in emergency removal of debris, demolition, repair of roads and bridges, temporary repair of essential public facilities, and water supply. The Forest Service will be the regional contact for this support.

(2) Provide technical personnel to evaluate damage to water control facilities. The Natural Resources Conservation Service will be the regional contact for this support.

b. Department of Commerce
   
Provide direct technical support and advice on procurement of external consulting services for assessing the structural and fire safety of damaged buildings and lifelines (public works and utilities). The Interagency Committee on Seismic Safety in Construction, Building and Fire Research Laboratory, National Institute of Standards and Technology, will be the contact.

c. Department of Health and Human Services
   
(1) Supply engineering and environmental health personnel to assist in assessing the status of wastewater and solid-waste facilities.

(2) Provide guidance related to health problems associated with hazardous materials.

(3) Assist in determining the suitability for human consumption of water from local sources.

d. Department of the Interior
   
(1) Provide engineering support to assist in evaluating damage to water control systems, such as dams, levees, and water delivery facilities and structures.

(2) Provide technical assistance in contract management, contracting, procurement, construction inspection, and environmental and archeological assessments.

(3) Name a POC (in the Bureau of Reclamation) for all Department of the Interior (DOI) support for ESF #3.

e. Department of Labor
   
Provide supplemental assistance for debris removal or demolition activities performed by ESF #3. The Occupational Safety and Health Administration will be the regional contact for this support.
f. **Department of Veterans Affairs**

   Provide engineering personnel and support, including design estimating and construction supervision for repair, reconstruction, and restoration of eligible facilities.

g. **Environmental Protection Agency**

   (1) Assist, in conjunction with the Department of Health and Human Services, in determining the suitability for human consumption of water from local sources and in identifying hazardous materials having the potential to affect drinking water supplies.

   (2) Assist in locating disposal sites for debris clearance activities.

   (3) Identify locations and provide safety guidance for areas affected by hazardous materials. Ensure the protection and cleanup of these areas.

   (4) Assist in identifying water and wastewater needs.

h. **Tennessee Valley Authority**

   Provide personnel to assist in damage assessment, structural inspections, debris clearance monitoring, and restoration of facilities in general.
Emergency Support Function #4  
Firefighting Annex

Primary Agency: Department of Agriculture, Forest Service
Support Agencies:  
Department of Commerce  
Department of Defense  
Department of Homeland Security, U.S. Fire Administration  
Department of the Interior  
Environmental Protection Agency

I. Introduction

A. Purpose

Emergency Support Function (ESF) #4 — Firefighting detects and suppresses wildland, rural, and urban fires resulting from, or occurring coincidently with, a major disaster or emergency requiring Federal response assistance.

B. Scope

ESF #4 manages and coordinates firefighting activities, including the detection and suppression of fires on Federal lands, and provides personnel, equipment, and supplies in support of State and local agencies involved in rural and urban firefighting operations.

II. Policies

A. Processes and procedures established in the National Interagency Mobilization Guide will be followed in responding to a major disaster or emergency under the Federal Response Plan (FRP).

B. National support will be accomplished through the National Interagency Coordination Center (NICC) located at the National Interagency Fire Center (NIFC) at Boise, ID.

C. Coordination with, and support of, State and local fire suppression organizations will be accomplished through the State Forester, in cooperation with the State Fire Marshal, State emergency management agency, or other appropriate State agency operating under the Incident Command System (ICS).

D. Priority will be given to saving lives and protecting property, in that order.

E. The primary agency for this ESF will be the U.S. Department of Agriculture (USDA), Forest Service, at the national level. For operations that occur in the State of Alaska, operational lead for firefighting response will be the Department of the Interior (DOI), Bureau of Land Management.
III. **Situation**

A. **Disaster Condition**

1. The management of a large firefighting operation is complex, often involving thousands of resources and many different agencies and jurisdictions. Fire resulting from, or independent of but occurring coincidentally with, a major disaster or emergency may place extraordinary demands on available resources and logistics support systems.

2. A major disaster or emergency may result in many urban, rural, and wildland fires. The damage potential from fires in urban areas during and after a major disaster (such as an earthquake) exceeds that of all other causes. Numerous fires may have the potential to spread rapidly, cause extensive damage, and pose a serious threat to life and property. Urban fire departments not incapacitated by an earthquake may be totally committed to fires in urban areas. Normally available firefighting resources may be difficult to obtain and use because of massive disruption of communication, transportation, utility, and water systems.

B. **Planning Assumptions**

1. Many urban, rural, and wildland fires may result from or occur coincidentally with an earthquake or as the result of another significant event. Large, damaging fires may be common.

2. At the time of a major disaster or emergency, there may be wildland fires burning elsewhere in the United States. These fires will draw on the same resources (e.g., air, crews, overhead, engines, or other tactical and support resources) that would be needed to support firefighting and other emergency operations. It must be assumed that some firefighting resources will become scarce, resulting in the disaster-related firefighting operations competing for resources through established resource ordering channels.

3. Telephone communications may be interrupted, making radio communications necessary. Early ordering of radio starter systems from NICC is a high priority.

4. Wheeled-vehicle access may be hampered by bridge failures, landslides, etc., making conventional travel to the fire location extremely difficult or impossible. Aerial attack by airtankers, helicopters, and smoke jumpers may be essential in these situations. Helicopter availability may be scarce, and damage to airports or runways will cause congestion at usable airports.

5. Agencies that commonly support large fire suppression operations, including the military and General Services Administration (GSA), may receive urgent requests from nonfire-related agencies for personnel, equipment, and supplies. Many resources commonly available for use in fighting large wildland fires will be scarce or unavailable.
6. Wildland firefighting techniques may have to be applied to rural and urban fire situations, particularly where water systems are inoperative. Aerial delivery of fire retardants or water for structural protection may be essential. In the case of multiple fires, firebreaks may be cleared and burning-out and backfiring techniques may be used.

7. Efficient and effective mutual aid among the various Federal, State, and local fire suppression agencies requires the use of ICS with compatible firefighting equipment and communications.

IV. Concept of Operations

A. General

1. ESF #4 will manage and coordinate Federal firefighting activities. This will be accomplished by mobilizing firefighting resources in support of State and local wildland, rural, and urban firefighting agencies. ESF #4 will use established firefighting and support organizations, processes, and procedures. Responsibility for situation assessment and determination of resource needs lies primarily with local Incident Commanders in coordination with the Emergency Response Team (ERT) at the Disaster Field Office (DFO).

2. Requests for firefighting assistance and resources will be transmitted from the DFO to the appropriate Geographic Area Coordination Center. For resources beyond those available within the geographic area, the requests will be sent to NICC at Boise, ID. NICC will contact the National Fire Suppression Liaison Officer in the event of national-level shortages or unavailability of needed resources.

3. Resolution of such shortages will be pursued by the Emergency Support Team (EST) and, when necessary, by the Catastrophic Disaster Response Group (CDRG). Actual firefighting operations will be managed under the ICS. Situation and damage assessment information will be transmitted through established fire suppression intelligence channels and directly between the national-level and regional-level ESFs according to ESF #5 — Information and Planning procedures.

B. Organization

ESF #4 has a parallel structure at the national and regional levels.

1. National-Level Response Support Structure
   a. The National Director for Fire and Aviation Management, Forest Service, will represent the USDA on the CDRG.
   b. National ESF #4 activities will operate under the direction of the Assistant Director for Operations, Fire and Aviation Management, Forest Service. Assistance will be provided as necessary by the Forest Service and DOI Fire Directors at NIFC.
c. The Disaster and Emergency Operation Specialist will serve as the National Fire Suppression Liaison Officer. The National Fire Suppression Liaison Officer or a representative will be located at Department of Homeland Security (DHS) Headquarters (HQ) during a disaster when ESF #4 is activated. This position is a member of the EST and is the link to the National Director for Fire and Aviation Management at Forest Service HQ.

d. The national ESF #4 will provide broad policy and coordination support to the CDRG and, based on recommended DHS requirements, may be operational on a 24-hour basis. Support agencies will have representatives available by telephone or pager on a 24-hour basis when necessary.

e. National logistics support and interregional mobilization of resources will be provided by NICC.

2. Regional-Level Response Structure

Federal firefighting response support is coordinated by the Regional/Area Fire Coordinator provided by the Forest Service Regional/Area Office. The Regional/Area Fire Coordinator has responsibility for establishing and maintaining coordination with the National Fire Suppression Liaison Officer, Forest Service Region, regional support agencies, and ERT. ESF #4 will be represented by a Fire Suppression Support Coordinator at the DFO. Regional firefighting response and logistics support will be provided by Geographic Area Coordination Centers and the NICC in accordance with established Mobilization Guides. Support agencies will have representatives available by telephone or pager on a 24-hour basis for the duration as necessary.

C. Notification

1. Upon notification by DHS of a potential or actual event requiring response, the National Fire Suppression Liaison Officer, Forest Service, will notify all other ESF #4 members by telephone or pager.

2. The Regional/Area Fire Coordinators and NICC also will be notified by telephone or pager.

D. Response Actions

1. Initial Actions

The National Fire Suppression Liaison Officer or representative will:

a. Locate at DHS within 2 hours of notification;

b. Establish communication links with DHS, national primary and support agencies, USDA Emergency Operations Center (EOC), National Director for Fire and Aviation Management at Forest Service HQ, and Forest Service Director at NIFC;

c. Establish communication links with the Regional/Area Fire Coordinators; and
d. Obtain an initial fire situation and damage assessment through established intelligence procedures.

2. Continuing Actions

The National Fire Suppression Liaison Officer or representative will:

a. Obtain, maintain, and provide fire situation and damage assessment information through established intelligence procedures;

b. Determine and resolve, as necessary, issues regarding resource shortages and slow processing, interagency conflicts, and policy matters involving the CDRG;

c. Maintain close coordination with the CDRG, support agencies, NICC, and DFO; and

d. Maintain a complete log of actions taken, resource orders, records, and reports.

V. Responsibilities

A. Primary Agency: Department of Agriculture, Forest Service

1. Provide qualified representatives to serve as National Fire Suppression Liaison Officer, Regional/Area Fire Coordinator, and Fire Suppression Support Coordinator at the DFO.

2. Task support agencies as necessary to accomplish ESF #4 support responsibilities.

3. Provide logistics support through the Geographic Area Coordination Center and/or NICC for mobilizing resources for firefighting.

4. Assume full responsibility for suppression of wildfires burning or threatening national forest system lands.

5. Provide and coordinate firefighting assistance to other Federal land management, State forestry, and local fire organizations as requested under the terms of existing agreements and the FRP.

6. Arrange for direct liaison with fire chiefs in the designated area to coordinate requests for firefighting assistance in structural or industrial fire protection operations.

7. Provide information to ESF #5 as assessments of fire-caused damages are obtained.

B. Support Agencies

1. Department of Commerce

   a. Provide fire/weather forecasting as needed from NIFC at Boise, ID, or from a nearby National Weather Service Forecast Office under the terms of existing interagency agreements.

   b. Provide urban and industrial hazard analysis support through the Building and Fire Research Laboratory of the National Institute of Standards and Technology.
c. Provide fire/weather support under the terms of the National Agreement for Meteorological Services in Support of Agencies with Land Management and Fire Protection Responsibilities.

2. **Department of Defense**
   a. Assume full responsibility for firefighting activities on U.S. military installations.
   b. Support firefighting operations on nonmilitary lands with personnel, equipment, and supplies under the terms of the existing interagency agreement, including the arrangement of liaisons as required.
   c. Provide contracting services through the U.S. Army Corps of Engineers to urban and rural firefighting forces to obtain heavy equipment and/or demolition services as needed to suppress disaster-related fires.

3. **Department of Homeland Security, U.S. Fire Administration**
   Provide advice and assistance relating to structural firefighting and establish communications with State Fire Marshals in adjoining States.

4. **Department of the Interior**
   a. Assume full responsibility for fighting wildfires burning on lands within its jurisdiction.
   b. Assist the Forest Service in managing and coordinating firefighting operations.
   c. Provide firefighting assistance to other Federal land management organizations as requested under the terms of existing agreements and the FRP.

5. **Environmental Protection Agency**
   Provide technical assistance and advice in the event of fires involving hazardous materials.

**C. Other Organizations**

State forestry organizations in most States are responsible for wildland firefighting on non-Federal lands. States may assist other States in firefighting operations and may assist Federal agencies through agreement.

**VI. Reference**

National Interagency Mobilization Guide available from NICC.
VII. Terms and Definitions

A. Fire Suppression Support Coordinator

The person representing ESF #4 at the DFO.

B. Incident Command System

An on-site incident management system applicable to all types of emergencies. Includes standard organizational structure, agency qualifications, training requirements, procedures, and terminology enabling participating agencies to function together effectively and efficiently.

C. National Fire Suppression Liaison Officer

The Disaster and Emergency Operations Specialist, Fire and Aviation Management, Forest Service. This person is a member of the EST operating at the national level. Primary responsibility is to provide liaison among the EST, the National Director of Fire and Aviation Management, Forest Service HQ, and other support agencies.

D. National Interagency Coordination Center

The organization responsible for coordination of national emergency response for wildland fire suppression, located at the NIFC in Boise, ID.

E. Regional/Area Fire Coordinator

The person primarily responsible for operation of ESF #4 at the regional level.
Emergency Support Function #5
Information and Planning Annex

Primary Agency: Department of Homeland Security
Support Agencies: Department of Agriculture
                                  Department of Commerce
                                  Department of Defense
                                  Department of Education
                                  Department of Energy
                                  Department of Health and Human Services
                                  Department of the Interior
                                  Department of Justice
                                  Department of Transportation
                                  Department of the Treasury
                                  American Red Cross
                                  Environmental Protection Agency
                                  General Services Administration
                                  National Aeronautics and Space Administration
                                  Nuclear Regulatory Commission
                                  Small Business Administration

Support Organizations: Civil Air Patrol
                                      Voluntary Organizations

I. Introduction

A. Purpose

Emergency Support Function (ESF) #5 — Information and Planning collects, analyzes, processes, and disseminates information about a potential or actual disaster or emergency to facilitate the overall activities of the Federal Government in providing assistance to one or more affected States. Fulfilling this mission supports planning and decision making at both the field/regional operations and headquarters (HQ) levels.

B. Scope

During disaster operations, ESF #5 becomes the Information and Planning Section of the Regional Support Team (RST) or the Emergency Response Team (ERT) at the Disaster Field Office (DFO), as well as the Emergency Support Team (EST) at Department of Homeland Security (DHS) HQ.
II. Policies

The Information and Planning Section operates at all levels of disaster response, whether at the disaster site itself, the region, or DHS. It does the following:

A. Activates as needed in anticipation of, or immediately following, a disaster or emergency;
B. Performs as a staff-level function in support of Federal leadership at the field, regional, and HQ levels;
C. Processes information that is common to one or more operational elements and that contributes to the overall perspective of the emergency;
D. Coordinates activities of on-the-ground assessment personnel;
E. Serves as site of overall coordination of situation assessment operations;
F. Tasks support agencies to provide technical expertise and information necessary to develop accurate assessment and analysis of a developing or ongoing situation;
G. Contacts other ERT or EST organizational elements to provide daily information updates for reporting and analysis requirements of ESF #5. Other ERT and EST elements are responsible for information processing and information displays unique to their own operations;
H. Collocates with the State Information and Planning Section when feasible for ERT operations; and
I. Executes, at the ERT and EST locations, procedures stipulated in the current version of the Information and Planning Section Standard Operating Procedures (SOPs).

III. Situation

A. Disaster Condition

A disaster or other significant event will be of such severity and magnitude as to require Federal response and recovery assistance to supplement State and local efforts to save lives and protect property. Information and Planning (ESF #5) will support initial assessment of developing situations and will provide timely and appropriate information to support Federal emergency managers in determining, with the appropriate State(s), whether Federal assistance will be required.

B. Planning Assumptions

1. In a disaster situation, there is a need for a central collection point on the RST, ERT, and EST, where situation information can be compiled, analyzed, and prepared for use by decision makers.

2. The State is the most immediate source of vital information for the RST and/or the ERT regarding damage and initial response needs. Regional data, using State and
local government sources and Federal agency inputs, become the primary information sources for the EST.

3. There is an immediate and continuous demand by officials involved in response and recovery efforts for information about the developing or ongoing disaster or emergency situation.

4. There may be a need to rapidly deploy field observers or assessment personnel to the disaster area to collect additional critical information about resource requirements for victims or to conduct an immediate situation assessment to determine initial Federal response requirements.

5. Information and Planning Section staff, deployed as part of the Advance Element of the ERT (ERT-A), needs to operate without local support for up to 72 hours. The ESF #5 staff needs to be self-sufficient in terms of equipment, supplies, and communications connectivity during this initial period.

6. Initial Information and Planning Section activities on the RST/EST may require 24-hour operations.

IV. Concept of Operations

A. General

1. In response to a disaster situation or incident, emergency personnel from the affected State and the Federal Government should jointly assess the situation initially to determine if there is a need for Federal response operations. Executing these assessment duties involves Information and Planning personnel in the form of ERT-A staff.

2. In the initial period of an incident, the main avenue for the collection of disaster information should be from local sources (primarily first responders and other government elements), which should report information to the State Emergency Operations Center (EOC). At the State EOC, reports should be directed to the appropriate operational element(s) needing the information—both State and Federal response elements, including the Information and Planning Section. Information should be passed to Federal elements through the DHS State Liaison from the appropriate DHS Regional Office.

3. Information and Planning activities in the region commence with the activation of a RST by the DHS Regional Director, based on the need to monitor a potential or developing incident. As the situation develops and it is determined that Federal response and recovery assistance will be required, deployment to the disaster response location may begin. ESF #5 personnel should participate in initial response operations as part of the ERT-A, and later the full ERT in the DFO. The RST is responsible for all situation reporting to the EST and other operating elements until the DFO is operational.
4. Information and Planning activities at the HQ level should begin concurrently with RST activities for an incident. In addition, ESF #5 elements on the EST may be activated at DHS at any time to monitor and report on situations that have a disaster potential.

5. As the DFO becomes operational, regional Information and Planning activities should transition from the State EOC and the ROC to the DFO. The focus of the information collection process should change from one involving overall assessment of the severity and extent of the damage to one describing the status of the response and recovery efforts.

B. Organization of the Information and Planning Section

Leadership for the Information and Planning Section rests with an Information and Planning Section Chief who reports directly to the RST Director in the Regional Operations Center (ROC), or the Federal Coordinating Officer (FCO) who heads the ERT at a DFO. On the RST or ERT, a Deputy Information and Planning Section Chief may support the Section Chief. A second deputy may be necessary in a situation where a night shift would be operating. On the EST, the Section Chief has no deputy but may have an administrative assistant.

1. Basic Organizational Structure for the ROC or DFO

The organization chart in Figure ESF #5-1 shows a full Information and Planning Section that might operate at an ERT or, on a smaller scale, on a RST. The ESF #5 Section Chief may adjust the size and structure of the section to fit the needs of the specific situation. The Section Chief consults the RST Director or FCO to determine the timetable for situation report (SITREP) inputs, SITREP publishing times, and times for daily status briefings. These consultations may include discussions with the HQ EST because of report deadlines established by the White House and other leadership elements.

a. Situation Status Branch

(1) Collects, analyzes, and displays information regarding the disaster situation and the location of critical resources. The latter include special teams, task forces, deployed personnel, and highlights from resource-tracking information maintained by the Logistics Section.

(2) Maintains the Situation Room for information displays, and collects and analyzes information to be used in the SITREPs, the status briefings, and by other responders.

(3) Develops appropriate media for displaying information, including the overall emergency team organizational chart and daily meeting information.
Figure ESF #5-1 — Organization of the ESF #5 Section of the Emergency Response Team

b. Planning Support Branch

(1) Receives information from the Situation Status Branch and uses it to support the different planning needs of the FCO and the ERT leadership.

(2) Analyses long-term trends and assists team leadership with the development of strategic plans and formats.

(3) Identifies critical planning issues and provides general planning support to the ERT.

(4) Facilitates daily or special planning meetings.

(5) Produces and disseminates, as needed, daily action plans based on the functional plans of other sections, contingency plans based on specific issues, and long-range management plans concerning personnel or operational priorities.

(6) Produces and disseminates a Daily Intelligence Summary for the FCO and other disaster managers.
c. Documentation Branch

(1) Receives information from the Situation Status Branch, as well as from other ESFs and team elements, to prepare its products, which include SITREPs, status and informal briefings, and special reports.

(2) Uses status reports of agencies leading the Federal response under other plans in describing response efforts in the SITREPs.

(3) Maintains archival files and records for each current disaster and provides clerical support to the Information and Planning Section.

(4) Solicits inputs to and prepares the after-action report signed by the FCO.

d. Technical Services Branch

(1) Coordinates remote sensing and reconnaissance requirements.

(2) Establishes and maintains a geographic information system (GIS) capability within the DFO including:

   (a) Acquiring and/or setting up a GIS computer suite and/or coordinating through DHS for temporary use of a deployable GIS computer suite if available; and

   (b) Generating GIS products and analyses, including maps and tables, and/or coordinating with DHS to obtain these products.

(3) Provides hazard-specific technical advice to support operational planning.

(4) Uses additional subject matter experts (SMEs) or technical specialists such as a meteorologist or seismologist as needed.

2. Basic EST Organization

The basic functions for the EST Information and Planning Section do not differ from those of the ERT. However, the same tasks are accomplished with no designated branches because in the HQ environment some support requirements can be provided from DHS staff that are not available to the ERT in the field. An organization chart is shown in Figure ESF #5-2. The Section Chief directly supervises all section staff.
**C. Response Actions**

1. **Initial Actions**

The Information and Planning Section begins operations at the occurrence of the event/incident or upon a preincident emergency declaration. In some instances, this could precede the onset of a disaster (e.g., during an approaching hurricane), when the RST and HQ Information and Planning Section would operate a small monitoring group.

a. Regional ESF activities for Information and Planning begin on the RST. State information processing operations should commence simultaneously at the State EOC or another State-designated location. Then the ERT-A, including key Information and Planning staff, should deploy to the disaster response location. At that time, some regional staff may join State staff at the EOC to begin situation assessment activities, and other staff may go to the DFO to arrange space and equipment for the full Information and Planning Section. Additional staff should be activated as needed by the Section Chief.
b. The HQ Information and Planning Section initiates activities in its operations area at DHS and establishes initial liaison with the RST and/or the ERT-A. In the case of a developing incident, such as a major flood or hurricane, the Information Coordination Unit (ICU) at HQ provides intelligence to the incoming EST members.

2. Continuing Actions

Information and Planning Section actions last as long as necessary. Over time, disaster operations will transition from response to recovery. This transition does not change the mission of Information and Planning, nor does it affect the basic functions of information gathering, analysis, dissemination, and planning. As the tempo of disaster operations slows, the staff of the Information and Planning Section is gradually reduced.

a. The focus shifts to the economic impact of the disaster, the effectiveness of program delivery, and the identification of recovery issues. Normally, there will be an increased need for specific economic and demographic information provided by the Technical Services Branch.

b. The emphasis in planning during the recovery phase shifts from the daily action plan to long-range management plans. Much of this planning will be done by staff within individual ERT and EST sections or branches; Information and Planning staff collates the information and facilitates the process.

c. Situation reporting and formal briefings should continue through the recovery phase, although the frequency of both should be gradually reduced.

d. At least one Information and Planning staff member, normally a reports specialist, should remain on the FCO’s staff until the DFO is closed. This facilitates the preparation of the after-action report, daily briefings, and talking points.

e. A reduced staff should remain active at DHS to develop briefings, special reports, and SITREPs as needed. When the requirement for regular reporting diminishes, this function should transition to the ICU. FCO SITREPs can substitute for the HQ SITREPs during this period.

V. Responsibilities

A. Primary Agency: Department of Homeland Security

1. Coordinates the overall Federal effort to collect, analyze, process, synthesize, report, and display essential elements of information (EEI) and to facilitate support for planning efforts in disaster operations.

2. Coordinates Federal situation assessment including remote sensing and reconnaissance operations, activation and deployment of assessment personnel or teams, and GIS support to operating disaster entities.
3. Provides staffing support for Information and Planning Section activities at the State EOC, RST, and ERT at the regional level and at DHS.

B. Support Agencies

Department of Agriculture (USDA)
Department of Commerce (DOC)
National Oceanic and Atmospheric Administration (NOAA)
   National Weather Service (NWS)
   National Ocean Service (NOS)
   Environmental Research Laboratories (ERL)
   National Institute of Standards and Technology (NIST)
Department of Defense (DOD)
   Director of Military Support (DOMS)
   U.S. Army Corps of Engineers (USACE)
   National Imagery and Mapping Agency (NIMA)
Department of Education (DOEd)
Department of Energy (DOE)
Department of Health and Human Services (HHS)
Department of the Interior (DOI)
   U.S. Geological Survey (USGS)
Department of Justice (DOJ)
Department of Homeland Security (DHS)
   U.S. Coast Guard (USCG)
   U.S. Customs Service
American Red Cross
Environmental Protection Agency (EPA)
General Services Administration (GSA)
National Aeronautics and Space Administration (NASA)
Nuclear Regulatory Commission (NRC)
Small Business Administration (SBA)

1. As support agencies to ESF #5, primary agencies for other ESFs should identify a staff liaison or a point of contact (POC) at the regional, DFO, and HQ levels to provide disaster information and intelligence on ESF activities to the Information and Planning Section. In addition, all agencies as appropriate should identify a staff liaison or a POC at the regional and HQ levels to provide technical expertise, data, advice, and staff support for disaster operations and situation assessment activities that fall within the domain of each agency, as follows:

   a. Nautical and aeronautical charting, surveys, tidal and geodetic services, and georeferenced coastal imagery (DOC/NOAA/NOS);
   b. Meteorology (DOC/NWS);
   c. Structural engineering (DOC/NIST);
   d. Economic and business impacts, banking, and small business recovery assistance (DOC, Treasury, and SBA);
e. National security (DOD);
f. Schools (DOEd);
g. Mental health (HHS);
h. Seismology (DOI/USGS);
i. Hydrology, stream flows, and water-level data (DOI, USACE, and DOC/NOAA);
j. Airborne pollution dispersion prediction (DOC/NOAA/ERL);
k. Shelter status reports and housing transition issues and planning (American Red Cross);
l. Legal issues and law enforcement (DOJ);
m. Environmental impacts, pollution and hazardous materials (EPA and DHS/USCG);
n. Real-time assessment of disaster impact and magnitude (DHS/U.S. Customs Service);
o. Nuclear power plants (NRC);
p. Dam safety (USACE); and
q. Remote sensing technology and assistance (DOI/USGS, DOD/NIMA, and NASA).

This list is not exhaustive. Support capabilities of other entities may be used as needed.

2. Agencies should provide personnel to support assessment operations as requested.

3. Agencies should provide personnel to work in the appropriate ESF of the ERT or EST. They should also provide periodic reports, as requested, on agency response operations to the Information and Planning Sections of the ERT and EST.

C. Support Organizations

1. Civil Air Patrol

a. Provide a liaison to the DFO to work with the Operations and ESF #5 Sections to facilitate coordination of Civil Air Patrol (CAP) support operations and to ensure CAP activities are reported in the SITREP. Input to the SITREP also may be submitted through the Defense Coordinating Element.

b. Designate an appropriate CAP Wing Staff person to coordinate CAP-DHS planning and response activities between the CAP-U.S. Air Force region and the DHS regional staff.
2. Voluntary Organizations

Report information on their disaster response and recovery activities through the DHS Voluntary Agency Liaison in the Human Services Branch of the ERT Operations Section. Information should include status of relief activities such as feeding, sheltering, cleanup, unsolicited donated goods and services management, or any other relief activity being provided to the affected community.

VI. References

VII. Terms and Definitions

A. Types of Plans Employed during ERT and EST Operations

1. Action Plan: A verbal or written plan reflecting FCO/State Coordinating Officer (SCO) priorities with tactical objectives for the next operational period.

2. Contingency Plan: Targets a specific issue or event that arises during disaster operations and presents alternative actions to respond to the situation.

3. Functional Plan: A subset of the action plan developed by individual elements, setting out their operational priorities for addressing the most pressing problems.

4. Long-Range Management Plan: Used by the FCO and team management in a large-scale disaster to address internal staffing and disaster organization and team requirements.

5. Strategic Plan: Addresses long-term issues such as impact of weather forecasts, time-phased resource requirements, and problems such as permanent housing for displaced disaster victims, environmental pollution, and infrastructure restoration.

B. Essential Elements of Information

To assess quickly and accurately the effect of a disaster on the population and infrastructure of an area, emergency managers require early intelligence on the areas noted below. This information facilitates accurate assessment of what response activities and materiel are
required to save lives, relieve human suffering, and expedite response and recovery operations. During the early hours of a disaster and in the absence of “ground truth” information such as actual on-site surveys or imagery, GIS, computerized predictive modeling, and damage estimation software may be used to develop initial estimates of damage. As soon as possible, actual on-site ground surveys will be performed. Sources may include a Federal-State Preliminary Damage Assessment (PDA) and information from Federal, State, and local government agencies, among others, to establish “ground truth” for the following EEI as needed:

- Boundaries of the disaster area
- Social, economic, and political impacts
- Jurisdictional boundaries
- Status of transportation systems and critical transportation facilities
- Status of communications systems
- Access points to the disaster area
- Status of operating facilities
- Hazard-specific information
- Weather data affecting operations
- Seismic or other geophysical information
- Status of critical facilities and distribution systems
- Status of remote sensing and reconnaissance activities
- Status of key personnel
- Status of ESF activation
- Status of disaster or emergency declaration
- Major issues and activities of ESFs
- Resource shortfalls and status of critical resources
- Overall priorities for response
- Status of upcoming activities
- Donations
- Historical and demographic information
- Status of energy systems
- Estimates of potential impacts based on predictive modeling (as applicable)
- Status (statistics) on recovery programs (human services, infrastructure, SBA)
• Status and analysis of initial assessments (needs assessments and damage assessments, including PDAs)
• Status of efforts under other Federal emergency operations plans

C. Information Coordination Unit

A DHS team that monitors and reports daily on potential or actual disasters. Prior to an incident, the ICU provides daily situation updates about all ongoing or pending activities. During a disaster, ICU members become part of the EST Information and Planning Section, Situation Status Branch.

D. Monitoring Period

The period preceding an incident characterized by assessment and preparatory activities leading to either response activity or stand down. During this period, DHS monitors causative factors and phenomena, keeps in close contact with the affected DHS region(s) and appropriate Federal agencies, and may call for remote sensing data or other assessment actions.

E. Operational Period

The period of time scheduled for completion of a given set of operations actions as specified in the action plan, usually 24 hours. This period usually defines the reporting period for SITREPs and plans that address operational priorities.

F. Situation Assessment

The evaluation and interpretation of information gathered from a variety of sources — including weather information and forecasts, computerized models, GIS data mapping, remote sensing sources, ground surveys, etc. — that, when communicated to emergency managers and decision makers, can provide a basis for response and recovery decision making.

G. Situation Reports

Periodic summaries of the disaster situation, including the status of operations, geographical information, identification of operational priorities and requirements, reports from specific ESFs on their major response and recovery activities, unmet needs, and recommended actions, as well as data on human services, infrastructure, and mitigation programs.

H. Situation Room

An area in the State EOC, ROC, DFO, or DHS used for the display of information summarizing the status of disaster operations.

I. Status Briefing

A briefing by ERT or EST personnel that summarizes the current situation, operational priorities, and the status of Federal response operations in support of a disaster.
This page intentionally left blank.
Emergency Support Function #6
Mass Care Annex

Primary Agency: American Red Cross
Support Agencies:
- Department of Agriculture
- Department of Defense
- Department of Health and Human Services
- Department of Homeland Security
- Department of Housing and Urban Development
- Department of Veterans Affairs
- General Services Administration
- U.S. Postal Service

I. Introduction

A. Purpose

Emergency Support Function (ESF) #6 — Mass Care coordinates Federal assistance in support of State and local efforts to meet the mass care needs of victims of a disaster. This Federal assistance will support the delivery of mass care services of shelter, feeding, and emergency first aid to disaster victims; the establishment of systems to provide bulk distribution of emergency relief supplies to disaster victims; and the collection of information to operate a Disaster Welfare Information (DWI) system to report victim status and assist in family reunification.

B. Scope

1. This annex describes the response actions of ESF #6 and the responsibilities of primary and support agencies in accomplishing those response actions in support of the delivery of mass care services by State and local governments.

   The American Red Cross independently provides mass care services to disaster victims as part of a broad program of disaster relief, as outlined in charter provisions enacted by the U.S. Congress, act of January 5, 1905. The responsibilities assigned to the American Red Cross as the primary agency for ESF #6 at no time will supersede those responsibilities assigned to the American Red Cross by its congressional charter.

2. Initial response activities will focus on meeting urgent needs of disaster victims on a mass care basis. Initial recovery efforts may commence as response activities are taking place. As recovery operations are introduced, close coordination will be required between those Federal agencies responsible for recovery operations and
voluntary organizations providing recovery assistance, including the American Red Cross.

3. ESF #6 encompasses:

a. **Shelter**

   Emergency shelter for disaster victims includes the use of preidentified shelter sites in existing structures; creation of temporary facilities or the temporary construction of shelters; and use of similar facilities outside the disaster-affected area, should evacuation be necessary.

b. **Feeding**

   Feeding will be provided to disaster victims and emergency workers through a combination of fixed sites, mobile feeding units, and bulk distribution of food. Such operations will be based on sound nutritional standards and will include meeting requirements of disaster victims with special dietary needs.

c. **Emergency First Aid**

   Emergency first aid will be provided to disaster victims and workers at mass care facilities and at designated sites within the disaster area. This service will be supplemental to emergency health and medical services established to meet the needs of disaster victims.

d. **Disaster Welfare Information**

   DWI regarding individuals residing within the affected area will be collected and provided to immediate family members outside the affected area through a DWI system. DWI will also be provided to aid in reunification of family members within the affected area who were separated at the time of the disaster.

e. **Bulk Distribution of Emergency Relief Items**

   Sites will be established within the affected area for bulk distribution of emergency relief items to meet urgent needs of disaster victims.

4. ESF #6 does not include recovery activities. (As a private, nonprofit organization, the American Red Cross independently provides recovery assistance under its congressional charter.)

**II. Policies**

A. All mass care activities and services will be provided without regard to economic status or racial, religious, political, ethnic, or other affiliation.

B. All mass care activities and services will be provided in accordance with existing Federal statutes, rules, and regulations.
C. Federal support agency personnel assigned to ESF #6 will work in accordance with their parent agency rules and regulations, and will be self-sufficient for a minimum of 72 hours following a disaster occurrence.

D. The American Red Cross Disaster Services, National Headquarters (HQ), will coordinate ESF #6 planning activities to ensure an immediate and automatic ESF #6 response.

E. Actions initiated by American Red Cross chapters and its national HQ in response to a disaster event are independent of actions taken by the American Red Cross as the primary agency for ESF #6.

### III. Situation

#### A. Disaster Condition

1. The magnitude of damage to structures and lifelines will rapidly overwhelm the capacity of State and local governments to assess the disaster and respond effectively to basic and emergency human needs. Damage to roads, airports, communications systems, etc., will hamper emergency response efforts. The movement of emergency supplies will be seriously impeded. Many professional emergency workers and others who normally would help during a disaster will be dead, injured, involved with family problems resulting from the disaster, or unable to reach their assigned posts. State, county, and municipal emergency facilities will be severely damaged or inaccessible.

2. Hundreds of thousands of disaster victims will be forced from their homes, depending on such factors as time of occurrence, area demographics, building construction, and existing weather conditions. There will be large numbers of dead and injured, which also may leave a large number of specialized population groups (e.g., senior citizens and children) without support. Thousands of family members may be separated immediately following a sudden-impact disaster, such as children in school and parents at work. Thousands of transients, such as tourists, students, and foreign visitors, may be involved.

#### B. Planning Assumptions

1. A major disaster or emergency occurs that produces significant casualties and widespread damage.

2. Mass care facilities will receive priority consideration for structural inspections to ensure safety of occupants.

3. Mass care operations and logistical support requirements will be given high priority by Federal agencies.

#### C. Planning Factors

1. The nature and extent of the disaster require a planned, immediate, and automatic response from the entire emergency management community.
2. Individuals in areas of high risk are expected to have prepared for and be self-
sufficient for a minimum of 72 hours.

3. Local units of voluntary agencies active in disaster will to the maximum extent
possible provide immediate feeding, shelter, and emergency first aid services in
response to the disaster event under their own auspices and authorities. These units
will plan to provide these services without external support for at least the first
72 hours following the onset of a disaster.

4. The ESF #6 planning basis for sheltering is that approximately 20 percent of the
affected population will seek public shelter. Some victims will find shelter with
friends and relatives, some will leave the area, and some will remain at or near their
damaged homes.

5. A certain percentage of the sheltered population will require shelter for an extended
period of time.

6. The restoration of communications systems, disrupted by damages and overloads,
may take weeks.

IV. Concept of Operations

A. General

1. ESF #6 will work directly with its State functional or agency counterpart to provide
the support needed as identified by the State. Requests for assistance will be
channeled from local jurisdictions through a designated State liaison to the Federal
Coordinating Officer (FCO) or designee and then to ESF #6 for action. Assistance
will be provided from ESF #6 to the State, or at the State’s request, directly to an
affected local jurisdiction.

2. The American Red Cross will deploy administrative staff to establish a temporary
field HQ for ESF #6 to support initial response. The field HQ staff will immedi-
ately establish a direct reporting link with American Red Cross Disaster Services at
National HQ. This response includes deploying staff with the Advance Element of
the Emergency Response Team (ERT-A) and to the Department of Homeland
Security (DHS) Regional Support Team (RST), as well as convening the ESF #6
regional element.

3. ESF #6 leadership will convene at the American Red Cross National HQ following
Federal Response Plan (FRP) implementation to evaluate the situation, implement
plans established to support mass care operations, and consider and respond to
requests for mass care-related resources.
B. Organization

1. National-Level Response Support Structure
   a. The ESF #6 staff will operate under the direction of the Senior Vice President, Chapter Services, of the American Red Cross at National HQ in Washington, DC. The American Red Cross National HQ will provide administrative support to the ESF #6 staff.
   b. The Senior Vice President, Chapter Services, will represent ESF #6 as a member of the Catastrophic Disaster Response Group (CDRG).
   c. Representatives of all agencies designated to support ESF #6 will be available on a 24-hour basis for the duration of the emergency response period.

2. Regional-Level Response Structure
   a. The regional-level response structure may comprise representatives on the RST and representatives on the ERT-A. When fully operational, the regional-level response structure includes the ESF #6 section in the Disaster Field Office (DFO).
   b. Liaisons from Federal support agencies will be available to the ESF #6 section at the DFO as necessary, and available on a 24-hour basis for the duration of the emergency response period.
   c. Liaisons from ESF #6 to other ESFs and/or related functions will be identified and deployed by the ESF #6 section in the DFO.

C. Activation

1. The DHS Homeland Security Center (HSC) will activate ESF #6 by contacting the American Red Cross Disaster Operations Center, which will activate agencies whose support is required.
2. This activation may include deploying staff to the Emergency Support Team (EST) at DHS, the affected RST, the ERT-A, and the full Emergency Response Team (ERT).

V. Response Actions

A. Initial Actions

1. The national ESF #6 response structure will:
   a. Assess the disaster situation and forecast mass care response needs;
   b. Provide technical assistance to the regional ESF #6 section and EST; and
   c. Validate requests from the regional ESF #6 section for mass care resources.
2. The regional ESF #6 section will:
   a. Establish communications with the national ESF #6 response structure;
   b. Assess the disaster situation and determine the adequacy of mass care response activities;
   c. Provide technical assistance to the State agency responsible for mass care;
   d. Validate requests from the affected State for mass care resources;
   e. Manage the process for requests for Federal assistance;
   f. Provide reports to the national ESF #6 response structure and DFO; and
   g. Anticipate future mass care requirements.

B. Continuing Actions

1. The national ESF #6 response structure will:
   a. Assess the disaster situation and mass care response needs;
   b. Provide technical assistance to the regional ESF #6 section and EST;
   c. Coordinate resource requests with the Federal support agencies and EST;
   d. Provide status reports on mass care activities in the region(s); and
   e. Anticipate future mass care requirements.

2. The regional ESF #6 section will:
   a. Coordinate the resources necessary to support the conduct of all required mass care services;
   b. Maintain contact with the State agency responsible for mass care to coordinate assistance. ESF #6, in conjunction with the State counterpart, will evaluate the needs for mass care and, when scarce resources are involved, present those needs to the national ESF #6 response structure for guidance in resource allocation;
   c. Manage the request for Federal assistance process for mission assignments and taskings;
   d. Manage logistical support and related fiscal activities;
   e. Anticipate future mass care requirements; and
   f. Coordinate with Federal and voluntary organization recovery programs for the transition of mass care response to recovery operations.
VI. **Responsibilities**

**A. Primary Agency: American Red Cross**

1. Support the management and coordination of sheltering, feeding, emergency first aid services, bulk distribution of emergency relief items, and DWI services to the disaster-affected population.

2. Provide DWI to appropriate authorities in response to disaster welfare inquiries and family reunification requests.

3. Manage mass care logistical and related fiscal activities.

**B. Support Agencies**

1. **Department of Agriculture**
   a. **Food and Nutrition Service**
      (1) Locate and secure supplies of food, including federally owned surplus foods, to supplement those in the disaster area.
      (2) Provide statistics on the quantities and locations of food furnished by the Food and Nutrition Service.
   b. **Forest Service**
      (1) Provide available departmental resources (e.g., cots, blankets, sleeping bags, personnel) for shelters.
      (2) Provide logistical guidance and support.

2. **Department of Defense**
   a. **Director of Military Support**
      Provide available resources (personnel, equipment, and supplies) in the absence of other national disaster system resource capabilities (including contracting).
   b. **U.S. Army Corps of Engineers**
      (1) Provide potable water and ice for mass care use and bulk distribution to disaster victims.
      (2) Provide assistance in inspecting mass care shelter sites after the disaster to ensure suitability of facilities to safely shelter disaster victims.
      (3) Provide assistance in constructing temporary shelter facilities, if necessary, in the disaster area.

3. **Department of Health and Human Services**
   a. Provide Department of Health and Human Services (HHS) workers to augment personnel assigned to shelters.
b. Provide casualty information from within the disaster-affected area in support of a DWI system.

c. Provide technical assistance for shelter operations related to food, vectors, water supply, and waste disposal.

d. Assist in the provision of medical supplies and services.

4. Department of Homeland Security

a. Assist in the release of information for notification of relatives.

b. Assist in establishing priorities and coordinating the transition of mass care operations with recovery activities based on disaster situation information and the availability of resources that can be appropriately applied.

c. Provide available resources such as cots, blankets, meals-ready-to-eat, and other Initial Response Resources (IRR) and logistical support, including communications, for disaster operations as appropriate.

d. Assist in the provision of medical supplies and services.

5. Department of Housing and Urban Development

a. Provide information on available habitable housing units, owned or in the possession of the Department of Housing and Urban Development (HUD), within or adjacent to the disaster or affected area for use as emergency shelters.

b. Provide available HUD staff to assist when needed with mass care operations.

6. Department of Veterans Affairs

a. Provide for food preparation and stockpiling in its facilities during the immediate emergency.

b. Provide medical supplies and personnel to support mass care operations.

c. Provide available facilities suitable for mass shelter.

7. General Services Administration

a. Provide communications links to the DWI center from the disaster area.

b. Provide other logistical support for mass care requirements as requested.

8. U.S. Postal Service

a. Provide change of address cards for victims to notify the U.S. Postal Service (USPS) of relocation addresses for mail forwarding, and assist in the distribution, collection, and mailing of those cards.

b. Provide an electronic file of address change information furnished by disaster victims.

I. Introduction

A. Purpose

Emergency Support Function (ESF) #7 — Resource Support provides operational assistance in a potential or actual presidentially declared major disaster or emergency.

B. Scope

ESF #7 support to Federal organizations during the immediate response phase of a disaster includes emergency relief supplies, space, office equipment, office supplies, telecommunications (in coordination with ESF #2 — Communications if activated), contracting services, transportation services (in coordination with ESF #1 — Transportation), security services, Federal law enforcement liaisons, and personnel required to support immediate response activities. ESF #7 provides support for requirements not specifically identified in the other ESFs. It addresses the effort and activity necessary to evaluate, locate, procure, and provide essential material resources, including excess and surplus property. ESF #7 support may continue until the disposition of excess and surplus property, if any, is completed.

II. Policies

A. In accordance with assigned responsibilities and upon implementation of the Federal Response Plan (FRP), the Resource Support agencies will provide operational assistance to the affected areas.

B. Support agencies will furnish resources to support ESF #7 requirements, including procurement personnel necessary to establish operations effectively at the national and regional levels. Such support will be terminated at the earliest practical time.
C. Equipment and supplies will be provided from current Federal stocks or, if necessary, from commercial sources. Supplies to be used will not be stockpiled for the purposes of ESF #7.

D. General Services Administration (GSA) support of other ESFs will be done through ESF #7.

E. All procurement will be supported by a written justification and will be made in accordance with current Federal laws and regulations, which when necessary authorize other than “full and open competition.” GSA is the central procurement authority for the Federal Government. All procurement actions made at the request of Federal agencies in support of the FRP will be in accordance with GSA’s statutory and administrative requirements and will be accomplished using the appropriate fund citation/reimbursement procedures.

F. The provision of the operational support necessary to establish the response capacity of Federal agencies will be a major element in the execution of ESF #7.

III. Situation

A. Disaster Condition

A major disaster could cripple the productive capability of the affected area to respond, as well as that of surrounding areas under extreme conditions. The Federal Government, however, will have the capacity to meet most foreseeable requirements. There will be shortages in the local area of a variety of supplies necessary for emergency population survival, such as cots, sheets, blankets, pillows, pillowcases, tents for temporary shelter, and plastic and paper items for mass feeding.

B. Planning Assumptions

1. Implementation of the FRP will occur during peacetime. If the United States is involved in a significant military operation, the Federal Government will be devoted to supporting it, and allocation of available resources for multiple demands will be coordinated in conjunction with appropriate resource agencies.

2. Federal requirements may need to be met from resources outside the disaster area, as most local resources will be claimed by the State in support of response operations.

3. Transport of resources may require a mobilization center. National Guard or military bases will be available for use, and adequate facilities will be available for materiel handling. Appropriate Federal and State officials should mutually agree on the use of these facilities prior to a response requirement.

4. Warehouses belonging to the Federal agencies within the affected area may suffer major structural damage. Supplies contained in these warehouses may be inaccessible during initial post-disaster operations but will be available at a later date as debris is cleared.
5. All requested Resource Support will be required for the immediate relief operations (e.g., initial lifesaving and life-support operations).

IV. Concept of Operations

A. General

The nationwide capabilities of the Resource Support community will be committed through Emergency Operations Centers (EOCs) at the national and regional levels. The primary determination of resource needs is made by the operational elements at the regional level. Requests for resources will flow upward through and be controlled by EOCs at the regional and national levels. The primary source of personnel, equipment, supplies, and materials will be from existing Federal resources. Support that cannot be provided from Federal resources may be secured through direct procurement or donations.

B. Organization

1. National-Level Response Support Structure
   a. The national ESF will operate under the direction of the GSA Emergency Coordinator (EC).
   b. ESF support operations will be coordinated through the GSA EC in the GSA Central Office, Washington, DC.
   c. Upon notification of implementation of the FRP, the GSA EC will make an initial determination of which ESF support agencies will be required to make personnel available at the EOC and which will be required to remain available on telephone standby. All national ESF support agency personnel will notify their parent agencies and await instruction from the GSA EC before reporting to the GSA EOC.
   d. The EC will represent the ESF in its dealings with the Catastrophic Disaster Response Group (CDRG) and will maintain liaison with the regional ESF and other interested parties.
   e. GSA Central Office will provide administrative support to the ESF.

2. Regional-Level Response Structure
   a. The GSA Regional Administrator or Regional Emergency Coordinator (REC) is the regional ESF head.
   b. The GSA Regional Administrator or REC will appoint one or more Federal Emergency Support Coordinator(s) (FESC), if needed, to coordinate the provision of ESF support at the Disaster Field Office (DFO).
   c. Preferably, the regional EOC will be located in the DFO. The GSA region will determine the center’s initial location if movement to, or the condition of, the DFO precludes immediate occupancy.
d. The agencies supporting this ESF will have a representative present at the DFO on a 24-hour (12-hour shift) basis for the duration of the emergency response period if required.

e. For a disaster affecting a multi-State area within a region, one location may be chosen that will act as a consolidation point for all Resource Support requests. The location chosen must enhance support to all affected States and ensure coordination with other ESFs. Where possible, the location will be determined in concert with the Department of Homeland Security (DHS) and other ESFs during the planning process. This does not preclude establishing one ESF per GSA region, with a liaison element in each DFO.

f. GSA will provide administrative support for the regional ESF.

C. Notification

1. The GSA EC will be notified by the DHS Homeland Security Center (HSC). The GSA EC will notify all support agencies.

2. The GSA EC will notify the head of the affected regional ESF by any means necessary. If the GSA EC encounters difficulties in providing information to the affected regional official, the EC will notify DHS of the difficulty and request assistance. The GSA EC also will notify selected GSA regional officials of the need to be prepared to provide support as required.

3. Upon notification:
   a. All national ESF support agency personnel will contact their parent agencies and await instructions from the GSA EC before reporting to the GSA EOC; and
   b. All regional ESF support personnel will contact their parent agencies and report to their predesignated ESF initial operational location.

D. Response Actions

1. Initial Actions

Upon ESF notification by DHS:

   a. The GSA EC, or an authorized representative, within 2 hours after notification will alert the national and regional ESF points of contact (POCs) as required, ensuring all internal GSA parties are fully informed of developments;
   b. The GSA EC will provide support to Federal agencies engaged in the disaster response as requirements are identified until the regional ESF is operational;
   c. The REC will assume control of ESF #7 operations under the FRP;
   d. The appropriate regions will be contacted to augment response operations; and
e. The REC will establish and deploy a team or teams to provide the following support as necessary:
   (1) Deploy a representative to the Regional Operations Center (ROC);
   (2) Deploy a team to the State EOC as part of the Advance Element of the Emergency Response Team (ERT-A);
   (3) Ensure a suitable DFO facility, using preidentified locations where applicable, is acquired and ready to occupy within 72 hours of receiving DHS requirements and/or DHS acceptance of the space;
   (4) Provide support in acquiring communications, office furniture, equipment, and supplies to equip the DFO;
   (5) Support deployment of Initial Response Resources (IRR) with transportation services and procurement; and
   (6) Establish and manage mobilization center(s).

2. Continuing Actions

From the time of initial actions and throughout the immediate response period, ESF #7 will provide Resource Support in accordance with its charged responsibilities. The following procedures will be used to provide, control, and account for goods and services:

a. Upon notification of space requirements, the ESF will determine, through the regional GSA Public Building Service (PBS), the availability of suitable space in federally owned or leased buildings;

b. When space in federally owned or leased buildings is not available or acceptable, the DHS Regional Director or Federal Coordinating Officer (FCO) will be notified by the ESF, which will then arrange with the regional PBS to assist in locating suitable space elsewhere;

c. Communications capability will be provided through the Federal Emergency Communications Coordinator (FECC);

d. ESF #7, in support of ESF #1, will arrange for transportation as required;

e. Motor equipment will be provided from the following sources:
   (1) Equipment owned by Federal agencies that may be reassigned to the Federal disaster operation;
   (2) Federal supply schedule contractors; and
   (3) Other commercial sources.

f. All required office furniture and equipment will be provided from Federal inventories or commercial sources;
g. Office supplies and other expendables will be provided from Federal stores, supply centers, stock, or other government and commercial sources. Small businesses and vendors in the affected area will be used whenever possible;

h. Procurement support will be provided using GSA, Defense Logistics Agency (DLA), and other agencies’ contracting resources as required;

i. The ESF will make available technical advisors in the areas of procurement, storage, and transportation as well as engineering advisory services in connection with damage surveys, appraisals, and building demolitions or repairs;

j. The ESF will determine the availability of and provide supplies stocked in distribution facilities, national defense stockpile, and customer supply centers when and if immediately available;

k. The ESF will provide Federal police, if available, to support DHS upon request;

l. The ESF will provide contract guard services to augment Federal security activities; and

m. In addition to the above, the ESF also will loan excess Federal personal property and provide other services as requested by the FCO.

V. **Responsibilities**

A. **Primary Agency: General Services Administration**

1. The GSA EC will be responsible for providing, directing, and coordinating ESF #7 operations.

2. The GSA REC will be responsible for the following:
   a. Locating, procuring, and issuing resources to other Federal agencies for use in emergency operations necessary to support the Federal emergency response or to promote public safety;
   b. Coordinating the transfer of excess Federal personal property and aid in its disposal when requested;
   c. Locating and coordinating the use of available space for disaster management activities;
   d. Coordinating and determining the availability of and providing consumable non-edible supplies stocked in distribution facilities and customer supply centers when available;
   e. Procuring required stocks from vendors or suppliers when GSA items are not readily available;
   f. Providing motor equipment and transportation services in coordination with the Department of Transportation (DOT), and in conformance with its responsibilities for the implementation of emergency-related functions, including the
prioritization and/or allocation of all or part of the civil transportation resource and related ESF #1 responsibilities;

g. Coordinating the procurement of telecommunications equipment in coordination with ESF #2; and

h. Providing support to the GSA Regional Administrator on all Resource Support activities.

B. Support Agencies

1. Department of Agriculture, Forest Service
   a. Provide the management and support of mobilization centers.
   b. Provide assistance related to transportation and accountability of IRR items at the mobilization centers.

2. Department of Commerce
   The Interagency Committee on Seismic Safety in Construction/Building and Fire Research Laboratory of the National Institute of Standards and Technology will provide technical expertise on structural surveys as well as the procurement of external consulting services. This procedure is necessary to assess the structural and fire safety of Federal and non-Federal damaged buildings and lifelines (i.e., public works and utilities).

3. Department of Defense
   Provide resources (personnel, equipment, and supplies) in the absence of other national disaster system resource capabilities (including contracting) when provision does not conflict with the Department of Defense’s (DOD’s) primary mission or its ability to respond to operational contingencies.

4. Department of Energy
   Coordinate with energy industries to assist in meeting critical fuel, lubricant, and electrical power needs unable to be met by Federal or State actions.

5. Department of Homeland Security
   a. Act as liaison to provide logistical support to Federal, State, and local governments.
   b. Provide a Law Enforcement Liaison Officer to operate an information clearinghouse and facilitate the coordination of Federal law enforcement organizations for response to disaster-related activities.
   c. Establish and coordinate security requirements for the protection of Federal personnel and assets in relation to disaster response and recovery activities and facilities.
d. Provide Contracting Officers’ Technical Representatives from the Regional Support Team (RST), Emergency Response Team, (ERT), or Emergency Support Team (EST) Logistics or Operations Section for all ESF #7-executed procurement contracts as appropriate.

e. Provide an Accountable Property Officer to ensure compliance with property management regulations and assume responsibility for Federal property management associated with ERT missions and general operations.

f. U.S. Customs Service: Provide security support as requested.

g. Assist in coordinating the provision of commercial telecommunications assets within the disaster area as appropriate.

6. Department of Labor

Provide technical personnel to assist in the identification and recruitment of individuals with specialized occupations needed to support disaster response operations. The Job Corps at the regional level can provide students and instructors capable of providing support.

7. Department of Transportation

Determine requirements, locations, and schedules for the movement of emergency supplies into and within the disaster area.

8. Department of Veterans Affairs

a. Provide technical assistance in identifying and procuring medical supplies and other medical services.

b. Provide personnel knowledgeable in Federal procurement and distribution operations.

c. Provide computer support operations as appropriate.

9. National Aeronautics and Space Administration

Provide available space, buildings, airports, and telecommunications as may be required for emergency support operations.

10. Office of Personnel Management

Identify, locate, and, if necessary, recruit personnel needed to support disaster operations after appropriate coordination with GSA.

VI. References

C. GSA Orders.
D. DOD regulations governing civil assistance.

VII. Terms and Definitions

A. Federal Emergency Support Coordinator

The FESC is the principal POC between GSA and DHS for the establishment of support priorities, allocation of GSA resources, and coordination of the delivery of all GSA equipment, services, and materials except those pertaining to telecommunications. The FESC, with appropriate GSA support staff as determined by the FESC, will normally be located at the DFO. However, at the discretion of the FCO, support may be provided from an already established GSA office, granted that such support is not delayed. The FESC serves until released by the FCO.

B. Regional Emergency Coordinator

The GSA REC, or a designated alternate, is the regional POC for DHS alerts and requests for assistance.
This page intentionally left blank.
I. Introduction

A. Purpose

Emergency Support Function (ESF) #8 — Health and Medical Services provides coordinated Federal assistance to supplement State and local resources in response to public health and medical care needs following a major disaster or emergency, or during a developing potential medical situation. Assistance provided under ESF #8 is directed by the Department of Health and Human Services (HHS) through its executive agent, the Assistant Secretary for Public Health Emergency Preparedness (ASPHEP). Resources will be furnished when State and local resources are overwhelmed and public health and/or medical assistance is requested from the Federal Government.

B. Scope

1. ESF #8 involves supplemental assistance to State and local governments in identifying and meeting the health and medical needs of victims of a major disaster, emergency, or terrorist attack. This support is categorized in the following functional areas:

   a. Assessment of health/medical needs;

   b. Health surveillance;

   c. Medical care personnel;
d. Health/medical equipment and supplies;

e. Patient evacuation;

f. In-hospital care;

g. Food/drug/medical device safety;

h. Worker health/safety;

i. Radiological/chemical/biological hazards consultation;

j. Mental health care;

k. Public health information;

l. Vector control;

m. Potable water/wastewater and solid waste disposal;

n. Victim identification/mortuary services; and

o. Veterinary services.

2. HHS, in its primary agency role for ESF #8, coordinates the provision of Federal health and medical assistance to fulfill the requirements identified by the affected State and local authorities having jurisdiction. Included in ESF #8 are overall public health response; triage, treatment, and transportation of victims of the disaster; and evacuation of patients out of the disaster area, as needed, into a network of Military Services, Veterans Affairs, and pre-enrolled non-Federal hospitals located in the major metropolitan areas of the United States. ESF #8 will use resources primarily available from:

a. Within HHS;

b. ESF #8 support agencies;

c. The National Disaster Medical System (NDMS), a nationwide medical mutual-aid network between the Federal and non-Federal sectors that includes medical response, patient evacuation, and definitive medical care. At the Federal level, it is a partnership among HHS, the Department of Defense (DOD), the Department of Veterans Affairs (VA), and the Department of Homeland Security (DHS), and is administered by DHS; and

d. Specific non-Federal sources such as major pharmaceutical suppliers, hospital supply vendors, the National Foundation for Mortuary Care, certain international disaster response organizations and international health organizations.
II. Policies

A. ESF #8 will be implemented upon the appropriate State-level request for assistance following the occurrence of a major disaster or emergency and after determination has been made by DHS that a Federal response is warranted.

B. The ASPHEP is responsible for activating and coordinating the activities of ESF #8. Within ESF #8, DHS is responsible for activating and coordinating the NDMS. The lead policy official for ESF #8 supporting the ASPHEP is the Principal Deputy ASPHEP. The HHS Office of the Assistant Secretary for Public Health Emergency Preparedness (OASPHEP) is the action agent and is responsible for coordinating the implementation of ESF #8 and providing staff support to the HHS policy officials. The HHS Regional Health Administrators (RHAs) are the operating agents and are responsible for directing regional ESF #8 activities.

C. The HHS Secretary’s Command Center (SCC) will provide national liaison between the Federal Government headquarters (HQ) and appropriate regional officials in the response structure at the disaster scene for the coordination of Federal health and medical assistance to meet the requirements of the situation. The HHS SCC will coordinate and facilitate the overall ESF #8 response.

D. In accordance with assignment of responsibilities in ESF #8, and further tasking by the primary agency, each support agency will contribute to the overall response but will retain full control over its own resources and personnel.

E. ESF #8 is the primary source of public health and medical response/information for all Federal officials involved in response operations.

F. All national and regional organizations (including other ESFs) participating in response operations will report public health and medical requirements to their counterpart level (national or regional) of ESF #8.

G. To ensure patient confidentiality protection, ESF #8 will not release medical information on individual patients to the general public.

H. Appropriate information on casualties/patients will be provided to the American Red Cross for inclusion in the Disaster Welfare Information (DWI) system for access by the public.

I. Requests for recurring reports of specific types of public health and medical information will be submitted to ESF #8. ESF #8 will develop and implement procedures for providing these recurring Situation Reports (SITREPs).

J. The primary Joint Information Center (JIC), established in support of the Federal Response Plan (FRP), will be authorized to release general medical and public health response information to the public. Other JICs may also release general medical and public health response information at the discretion of the lead Public Affairs Officer.
III. Situation

A. Disaster Condition

1. A significant natural disaster or manmade event that overwhelms the affected state would necessitate Federal public health and medical care assistance. Hospitals, nursing homes, ambulatory care centers, pharmacies, and other facilities for medical/healthcare and special needs populations may be severely damaged structurally or destroyed. Facilities that survive with little or no structural damage may be rendered unusable or only partially usable because of a lack of utilities (power, water, sewer) or because staff are unable to report for duty as a result of personal injuries and/or damage/disruption of communications and transportation systems. Medical and healthcare facilities that remain in operation and have the necessary utilities and staff will probably be overwhelmed by the “walking wounded” and seriously injured victims who are transported there in the immediate aftermath of the occurrence. In the face of massive increases in demand and the damage sustained, medical supplies (including pharmaceuticals) and equipment will probably be in short supply. (Most healthcare facilities usually maintain only a small inventory stock to meet their short-term, normal patient load needs.) Disruptions in local communications and transportation systems could also prevent timely resupply.

2. Uninjured persons who require daily or frequent medications such as insulin, antihypertensive drugs, digitalis, and dialysis may have difficulty in obtaining these medications and treatments because of damage/destruction of normal supply locations and general shortages within the disaster area.

3. In certain other disasters, there could be a noticeable emphasis on relocation, shelters, vector control, and returning water, wastewater, and solid waste facilities to operation.

4. A major medical and environmental emergency resulting from nuclear, biological, or chemical (NBC) weapons of mass destruction (WMD) could produce a large concentration of specialized injuries and problems that could overwhelm the state and local public health and medical care system.

B. Planning Assumptions

1. Resources within the affected disaster area will be inadequate to clear casualties from the scene or treat them in local hospitals. Additional mobilized Federal capabilities will be urgently needed to assist State and local governments to triage and treat casualties in the disaster area and then transport them to the closest appropriate hospital or other healthcare facility. Additionally, medical resupply will be needed throughout the disaster area. In a major disaster, operational necessity may require the further transportation by air of patients to the nearest metropolitan areas with sufficient concentrations of available hospital beds, where patient needs can be matched with the necessary definitive medical care.
2. A terrorist release of WMD; damage to chemical and industrial plants, sewer lines, and water distribution systems; and secondary hazards such as fires will result in toxic environmental and public health hazards to the surviving population and response personnel, including exposure to hazardous chemicals, biologicals, radiological substances, and contaminated water supplies, crops, livestock, and food products.

3. The damage and destruction of a major disaster, which may result in multiple deaths and injuries, will overwhelm the State and local mental health system, producing an urgent need for mental health crisis counseling for disaster victims and response personnel.

4. Assistance in maintaining the continuity of health and medical services will be required.

5. Disruption of sanitation services and facilities, loss of power, and massing of people in shelters may increase the potential for disease and injury.

6. Primary medical treatment facilities may be damaged or inoperable; thus, assessment and emergency restoration to necessary operational levels is a basic requirement to stabilize the medical support system.

IV. Concept of Operations

A. General

1. Upon notification of a major disaster or emergency, HHS (as primary agency) will alert the HHS SCC staff to assemble in the HHS SCC. The ASPHEP, HHS Agency Emergency Coordinators (AECs), and appropriate HHS RHAs, Regional Emergency Coordinators, and Regional Directors (RDs) will be notified.

2. The ASPHEP will direct the activities of ESF #8. DHS will activate the NDMS as needed.

3. Preidentified personnel will be alerted to meet requirements for representing ESF #8 on the:
   a. Catastrophic Disaster Response Group (CDRG);
   b. Emergency Support Team (EST);
   c. SCC (national ESF #8 group);
   d. Regional ESF #8 Coordination Center;
   e. Regional Support Team (RST); and

4. All support agencies will be notified and tasked to provide 24-hour representation as necessary. Each support agency is responsible for ensuring sufficient program staff is available to support the HHS SCC and to carry out the activities tasked to its agency on a continuous basis. Individuals representing agencies who are staffing the HHS
SCC will have extensive knowledge of the resources and capabilities of their respective agencies and have access to the appropriate authority for committing such resources during the activation.

5. National ESF #8 will provide liaison and communications support to regional ESF #8 to facilitate direct communications between them. National ESF #8 personnel will be deployed as necessary to assist regional ESF #8 in establishing and maintaining effective coordination within the disaster area.

6. Regional ESF #8 will coordinate with the appropriate State medical and public health officials and organizations to determine current medical and public health assistance requirements.

7. Regional ESF #8 will be supported by the Joint Regional Medical Planning Office (JRMPO) or other entity designated by the Defense Coordinating Officer (DCO) to coordinate civil authority requests for military resource support within the disaster area. Regional ESF #8 also will be assisted by those other support agencies as contained in the regional ESF #8 appendices.

8. Regional ESF #8 will use locally available health and medical resources to the extent possible to meet the needs identified by State and local authorities. National ESF #8 will meet the additional requirements primarily from prearranged sources throughout the United States and Canada.

9. During the response period, ESF #8 will evaluate and analyze medical and public health assistance requests and responses, and develop and update assessments of medical and public health status. ESF #8 will maintain accurate and extensive logs to support after-action reports and other documentation of the disaster conditions.

10. In the early stages of a disaster response, it may not be possible to fully assess the situation and verify the level of assistance required. In such circumstances, national ESF #8, in consultation with regional ESF #8, reserves the right to decide whether to authorize assistance. In these cases, every attempt will be made to verify the need before providing assistance.

11. ESF #8 will develop and provide medical and public health SITREPs to the CDRG, EST, ERT, primary JIC, and organizations with a need for recurring reports of specific types of information including other ESFs, Federal agencies, and the State upon request. Information will be disseminated by all available means including fax, telephone, radio, memoranda, display charts and maps, and verbal reports at meetings and briefings.

B. Organization

1. National-Level Response Structure

   a. ESF #8 response will be activated and directed by the ASPHEP. The HHS SCC national ESF #8 group will become operational. The national ESF #8 group will consist of a core of Federal agencies that will be supplemented by other national-
level organizations, governmental and private, as the situation dictates. During the initial activation, the principal core staff will consist of a predesignated HHS staff and representatives from the Assistant Secretary of Defense (Health Affairs), DOD; Undersecretary for Health, VA; and Undersecretary for Emergency Preparedness and Response, DHS.

b. Additional supporting agencies and organizations will be alerted and will be tasked either to provide a representative to the HHS SCC or to provide a representative who will be immediately available via telecommunications (e.g., telephone, fax, conference calls) to provide support.

c. HHS will identify and provide personnel to represent HHS and national ESF #8 both on the CDRG and the EST. HHS also will dispatch, as needed, emergency response coordinators and the national ESF #8 ERT to the disaster area to support the lead RHA with responsibility for the regional ESF #8.

d. Coordination of ESF #8 will be centralized at the HHS SCC.

e. Special advisory groups of health/medical subject matter experts (SMEs) will be assembled and consulted by national ESF #8 as needed.

2. Regional-Level Response Structure

a. The RHA, the lead for the regional ESF #8 health and medical response, will establish a regional ESF #8 Coordination Center (CC) and provide administrative support to the regional response activities. The HHS RD will assist the RHA by coordinating human services support required from the other HHS operating divisions located within the region.

b. The lead for regional ESF #8 will represent ESF #8 in its dealings with the Federal Coordinating Officer (FCO) and will maintain liaison with the FCO, the appropriate State and local health and medical officials, national ESF #8, and the HHS RD.

c. Regional ESF #8 will have appropriate representatives available to rapidly deploy, with the ERT-A, to the affected State’s EOC or other designated location.

d. Regional ESF #8 will have appropriate representative(s) present or available by telephone or radio at the regional ESF #8 CC, and additionally at the Regional Operations Center (ROC) and/or Disaster Field Office (DFO), as required by the FCO, on a 24-hour basis for the duration of the emergency response period. Other representatives of the lead/support agencies will be available to staff the EST and/or the ERT upon request of the lead of regional ESF #8.

C. Notification

1. Upon the occurrence of a potential major disaster or emergency, the DHS Homeland Security Center (HSC) will notify the ESF #8 action agent (HHS/OASPHEP). The affected DHS region will notify the HHS RHA. Notification can be made via telephone, fax, or digital pagers. Such notification could be to advise of
the potential disaster, convene the CDRG, request an ESF #8 representative to deploy as a regional ERT member, establish the EST at DHS, or to notify HHS that DHS has received a request from State or regional officials seeking activation of NDMS.

2. HHS SCC will notify the ASPHEP and request activation of ESF #8. HHS SCC will alert its staff, which in turn will notify the lead regional ESF #8 by telephone or radio, if possible. If the RHA or the appropriate representative cannot be contacted, the HHS RD will be notified and requested to advise the regional ESF #8 lead. If the HHS RD cannot be contacted, the ESF #8 lead of an adjacent region will be contacted and requested to assist in notifying and establishing the regional ESF #8 in the disaster area.

3. The HHS SCC staff also will notify all other national ESF #8 members by the most expeditious communications method.

4. Upon notification, ESF #8 members will notify their parent agencies. ESF #8 members will report to the appropriate location(s) as directed (such as HHS SCC or DHS HSC) and regional ESF #8 members will report to the appropriate location(s) as directed (such as the ROC or DFO).

D. Response Actions

1. Initial Actions Following a Potential Major Disaster or Emergency

The HHS SCC will become operational immediately on notification. Until the regional ESF #8 becomes operational, the collection, analysis, and dissemination of requests for medical and public health assistance will be the responsibility of national ESF #8, with the assistance of the HHS region. Upon declaration by the RHA that the regional ESF #8 CC is operational, the major responsibilities for requests for medical and public health assistance will be transferred to regional ESF #8. National ESF #8 will conduct the following actions while bringing ESF #8 to a fully operational status:

a. Federal health and medical assistance is generally categorized into the major functions of prevention, medical services, mental health services, and environmental health. Each of the 15 specific functional areas is contained in one of these categories. Upon notification of the occurrence of a potential major disaster or emergency, the lead of the national ESF #8 (the ASPHEP) will request HHS and support agencies to initiate action immediately to identify and report the potential need for Federal health and medical support to the affected disaster area in the following functional areas:

(1) Assessment of Health/Medical Needs

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Mobilize and deploy an assessment team to the disaster area to assist in determining specific health/medical needs and priorities. The composition of the assessment team will be jointly determined by the action agent and the operating agent
based on the type and location of the emergency. This function includes the assessment of the health system/facility infrastructure.

(2) Health Surveillance

Lead HHS Agency: Centers for Disease Control and Prevention (CDC). Assist in establishing surveillance systems to monitor the general population and special high-risk population segments; carry out field studies and investigations; monitor injury and disease patterns and potential disease outbreaks; and provide technical assistance and consultations on disease and injury prevention and precautions.

(3) Medical Care Personnel

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Provide Disaster Medical Assistance Teams (DMATs) and individual public health and medical personnel to assist in providing care for ill or injured victims at the location of a disaster or emergency. DMATs can provide triage, medical or surgical stabilization, and continued monitoring and care of patients until they can be evacuated to locations where they will receive definitive medical care. Specialty DMATs can also be deployed to address mass burn injuries, pediatric care requirements, chemical injury or contamination, etc. In addition to DMATs, DOD and National Guard units for casualty clearing/staging and other missions will be deployed as needed. Individual clinical health and medical care specialists may be provided to assist State and local personnel. The VA is one of the primary sources of these specialists.

(4) Health/Medical Equipment and Supplies

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Provide health and medical equipment and supplies, including pharmaceuticals, biologic products, and blood and blood products, in support of DMAT operations and for restocking health and medical care facilities in an area affected by a major disaster or emergency.

(5) Patient Evacuation

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Provide for movement of seriously ill or injured patients from the area affected by a major disaster or emergency to locations where definitive medical care is available. NDMS patient movement will primarily be accomplished using fixed-wing aero-medical evacuation resources of DOD; however, other transportation modes may be used as circumstances warrant.

(6) In-Hospital Care

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Provide definitive medical care to victims who become seriously ill or injured as a result of a major disaster or emergency. For this purpose, NDMS has established and
maintains a nationwide network of voluntarily precommitted, non-Federal, acute care hospital beds in the largest U.S. metropolitan areas.

(7) **Food/Drug/Medical Device Safety**

Lead HHS Agency: Food and Drug Administration (FDA). Ensure the safety and efficacy of regulated foods, drugs, biologic products, and medical devices following a major disaster or emergency. Arrange for seizure, removal, and/or destruction of contaminated or unsafe products.

(8) **Worker Health/Safety**

Lead HHS Agency: CDC. Assist in monitoring health and well-being of emergency workers; perform field investigations and studies addressing worker health and safety issues; and provide technical assistance and consultation on worker health and safety measures and precautions.

(9) **Radiological/Chemical/Biological Hazards Consultation**

Lead HHS Agency: CDC. Assist in assessing health and medical effects of radiological, chemical, and biological exposures on the general population and on high-risk population groups; conduct field investigations, including collection and analysis of relevant samples; advise on protective actions related to direct human and animal exposure, and on indirect exposure through radiologically, chemically, or biologically contaminated food, drugs, water supply, and other media; and provide technical assistance and consultation on medical treatment and decontamination of radiologically, chemically, or biologically injured/contaminated victims.

(10) **Mental Health Care**

Lead HHS Agency: Substance Abuse and Mental Health Services Administration. Assist in assessing mental health needs; provide disaster mental health training materials for disaster workers; and provide liaison with assessment, training, and program development activities undertaken by Federal, State, and local mental health officials.

(11) **Public Health Information**

Lead HHS Agency: CDC. Assist by providing public health and disease and injury prevention information that can be transmitted to members of the general public who are located in or near areas affected by a major disaster or emergency.

(12) **Vector Control**

Lead HHS Agency: CDC. Assist in assessing the threat of vector-borne diseases following a major disaster or emergency; conduct field investigations, including the collection and laboratory analysis of relevant samples; provide vector control equipment and supplies; provide technical assistance and consultation on protec-
tive actions regarding vector-borne diseases; and provide technical assistance and consultation on medical treatment of victims of vector-borne diseases.

(13) Potable Water/Wastewater and Solid Waste Disposal

Lead HHS Agency: Indian Health Service (IHS). Assist in assessing potable water and wastewater/solid waste disposal issues; conduct field investigations, including collection and laboratory analysis of relevant samples; provide water purification and wastewater/solid waste disposal equipment and supplies; and provide technical assistance and consultation on potable water and wastewater/solid waste disposal issues.

(14) Victim Identification/Mortuary Services

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Assist in providing victim identification and mortuary services, including NDMS Disaster Mortuary Operational Response Teams (DMORTs); temporary morgue facilities; victim identification by fingerprint, forensic dental, and/or forensic pathology/anthropology methods; and processing, preparation, and disposition of remains.

(15) Veterinary Services

Lead Agency: DHS/NDMS, in coordination with HHS/ASPHEP. Assist in delivering healthcare to injured or abandoned animals and performing veterinary preventive medicine activities following a major disaster or emergency, including conducting field investigations and providing technical assistance and consultation as required.

b. National ESF #8 also will initiate the following alerting actions:

(1) Alert and deploy national ESF #8 representative(s) to the EST;

(2) Alert national ESF #8 representative(s) to be on standby to deploy to the disaster area as a member of the national ESF #8 ERT;

(3) Alert and deploy national ESF #8 to the disaster area to provide liaison and support to regional ESF #8;

(4) Request DHS HSC to request the NDMS Operations Support Center (NDMSOSC) to alert NDMS Response Resources to be on a standby basis;

(5) Request the NDMSOSC, through its DOD representative, to alert the Global Patient Movement Requirements Center (GPMRC) to prepare to receive hospital bed availability reports. GPMRC will establish an appropriate reporting window;

(6) Request the NDMSOSC, through VA, DOD representatives, and appropriate VA and Military Services command and control systems, to alert local NDMS Federal Coordinating Centers (FCCs) to obtain bed
availability reports from the participating non-Federal hospitals and report
bed status to GPMRC;

(7) Alert HHS Supply Service Center, Defense Logistics Agency, and other
preidentified sources of medical supplies to be on a standby basis;

(8) Alert national-level communications and transportation support agencies
to be on a standby basis; and

(9) Determine from ESF #5 — Information and Planning the geographic area
affected by the disaster and obtain weather information for the disaster
area, including present conditions, the 24-hour forecast, and the long-range
forecast.

c. National ESF #8 primary and support agency members will report to the HHS
SCC and convene within 2 hours following notification. Alternatively, ESF #8
members may be directed to report to their usual offices within 2 hours and
thereafter maintain continuous telephone communication with national ESF #8.

d. The designated DOD representative will activate the national-level DOD
support network as required. This alerting may include, but not be limited to,
the Director of Military Support (DOMS); Surgeons General of the Army, Navy,
and Air Force; U.S. Transportation Command (USTRANSCOM); Air Mobility
Command (AMC); National Guard Bureau (NGB); GPMRC; Forces Command
(FORSCOM); U.S. Atlantic Command (USACOM); U.S. Pacific Command
(USPACOM); U.S. Southern Command (USSOUTHCOM); Office of Civilian
Health and Medical Program of the Uniformed Services (OCHAMPUS);
Medical Readiness Division, Office of the Joint Chiefs of Staff (J-4/JCS); and
other appropriate DOD components. DOMS, in coordination with the Services
and JCS executive agents (i.e., Headquarters U.S. Air Force (HQUSAF) Surgeon
General for GPMRC) will, in turn, notify Service FCCs and other Service
components as appropriate.

2. Continuing Actions

a. Situation Assessment

(1) The national ESF #8 staff will continuously acquire and assess information
about the disaster situation. The staff will continue to attempt to identify
the nature and extent of health and medical problems, and establish
appropriate monitoring and surveillance of the situation to obtain valid
ongoing information. National ESF #8 will primarily rely on information
from the disaster area that is furnished by regional ESF #8. Other sources
of information may include national ESF #8 support agencies, various
Federal officials in the disaster area, State health officials, State Emergency
Medical Services (EMS) authorities, State disaster authorities, or the
responsible jurisdiction in charge of the disaster scene. Information also
may be acquired from Federal officials outside the disaster area, such as local NDMS FCCs, DHS Regional Offices, and HHS Regional Offices.

(2) Because of the potential complexity of the health and medical response issues/situations, conditions may require special advisory groups of SMEs to be assembled by national ESF #8 to review health/medical intelligence information and advise on specific strategies to most appropriately manage and respond to a specific situation.

b. Activation of Health/Medical Response Teams

(1) By direction of the ASPHEP, health personnel/teams from HHS (other than NDMS assets) will be deployed as needed, and appropriate medical and public health (including environmental health) assistance will be provided. NDMS response teams will be activated and deployed as needed by DHS. The NDMSOSC will respond to the requirements by arranging for alerting, activation, appointment to Federal status (where appropriate), and deployment of NDMS DMATs. The NDMSOSC, in cooperation with the NDMS MST (when established), will coordinate and arrange for the necessary transportation and logistic support for the DMATs. DMATs may be activated for provision of patient reception, patient staging, casualty clearing, or other medical care activities in meeting the needs of the situation.

(2) Certain military medical units, including Active Duty, Reserve, and National Guard, may be tasked to deploy to support ESF #8 requirements. These requirements will be coordinated with the NDMSOSC DOD representative, who will coordinate with DOMS to activate and deploy the necessary military units. VA assets that are available for response activities include the Medical Emergency Radiological Response Teams (MERRTs) and the Emergency Medical Response Teams (EMRTs). The VA is also able to mobilize health professionals who are not necessarily part of a formal “team,” depending on ESF #8 requirements.

c. Coordination of Requests for Medical Transportation

Arrangements for medical transportation should be made at the lowest levels possible. Normally, local transportation requirements are to be handled by local authorities. If it is determined by regional ESF #8 that State or local resources are inadequate to meet the requirements, a State request for Federal medical transportation assistance will be executed at the national ESF #8 level by use of the NDMS patient evacuation component coordinated through the NDMSOSC. Patient regulation will be the responsibility of TRANSCOM’s GPMRC.
d. Coordination of Requests for Aeromedical Evacuation of Patients from the Disaster Area

The concept of operation is for local authorities to operate Casualty Collection Points (CCPs) that will feed into State-operated Regional Evacuation Points (REPs). ESF #8 will coordinate the hand-off of patients from the REPs into the NDMS patient evacuation system.

Patient regulating is the responsibility of GPMRC. Because the movement of patients is based on the availability of hospital beds, GPMRC will receive patient requirements from the disaster area and regulate patients to destination reception areas that report available beds. Regional ESF #8 will establish a Patient Reporting Activity (PRA) to report the number of patients requiring movement out of the area to GPMRC. Patients will be reported in the specified contingency categories. FCCs will likewise report available beds in the same contingency categories. Once the regulating decision is made, GPMRC will pass it to the PRA and the receiving FCCs. After receipt by the PRA, regional ESF #8 will coordinate with the State to have the patients moved.

e. Coordination of Requests for Definitive (In-Hospital) Medical Care

Arrangements for definitive medical care are primarily a local function. Requests for additional assistance should first be referred to State authorities. If State resources are inadequate to provide this assistance, the affected State can request Federal assistance. In this case, the designated State Coordinating Officer (SCO) directs his or her request to the DHS Regional Director or FCO who coordinates the request with the regional ESF #8 representative and develops a mission assignment. The mission assignment is passed from regional ESF #8 to the NDMSOSC. The senior official in the NDMSOSC notifies the DHS Undersecretary for Emergency Preparedness and Response, who will activate the NDMS and authorize the NDMSOSC to notify: the Assistant Secretary of Defense, Health Affairs (ASD/HA) (or designated representative); the Undersecretary for Health, Department of Veterans Affairs (USH/VA) (or designated representative); and HHS. At this point, the Office of the ASD/HA will notify the Services to activate DOD FCCs, the VA will activate the VA FCCs, and DHS will notify DOMS who will request appropriate patient evacuation support from TRANSCOM. There will also be communication between ASD/HA and DOMS. The activated FCCs will activate area operations and patient reception plans.

GPMRC will establish and disseminate appropriate bed reporting instructions to the FCCs and will provide appropriate patient reception/patient arrival information to local FCCs. Local FCCs, through their patient reception teams, will distribute arriving patients to specific NDMS-participating non-Federal hospitals based on the patients’ needs, facility capability, and eligibility for care.
f. Coordination for Obtaining, Assembling, and Delivering Medical Equipment and Supplies to the Disaster Area

Representatives of HHS, DHS, VA, DOD, Department of Transportation (DOT), and General Services Administration (GSA) will coordinate arrangements for the procurement and transportation of medical equipment and supplies to the disaster area. A “push” concept will be employed when feasible to expedite medical resupply to the disaster area from preidentified medical supply caches. Included in this response will be the HHS-requested support, as needed, of certain medical supplies.

g. Communications

National ESF #8 will establish communications necessary to effectively coordinate assistance.

h. Information Requests

Requests for information may be received at ESF #8 from various sources, such as the media and the general public, and they will be referred to the appropriate agency or JIC for response.

i. After-Action Reports

The HHS/ASPHEP will, on completion of the emergency, prepare a summary after-action report. The after-action report, which summarizes the major activities of ESF #8, will identify key problems, indicate how they were solved, and make recommendations for improving response operations in subsequent activations. Support agencies will assist in the preparation of the after-action report and endorse the final report.

V. Responsibilities

A. Primary Agency: Department of Health and Human Services

1. Provide leadership in directing, coordinating, and integrating overall Federal efforts to provide medical and public health assistance to the affected area.

2. Direct the staffing of the HHS SCC as necessary to support the emergency response operations.

3. Direct the activation and deployment of health/medical personnel, equipment, and supplies in response to requests for Federal health/medical assistance.

4. Provide HHS staffing at the NDMSOSC.

5. Provide human services assistance under the direction of the HHS RD.
B. Support Agencies

1. Department of Agriculture, Forest Service

Provide appropriate personnel, equipment, supplies, and food, coordinated through the National Fire Suppression Liaison Officer or representative, Fire and Aviation Management Office (located in Washington, DC), and the National Interagency Coordination Center (NICC) located in Boise, ID. Support will be primarily for communications and aircraft and the establishment of base camps for deployed Federal health and medical teams in the disaster area.

2. Department of Defense

   a. Alert GPMRC to provide DOD NDMS FCCs (Army, Air Force, and Navy) and VA NDMS FCCs reporting/regulating instruction to support disaster relief efforts.

   b. Alert DOD NDMS FCCs to activate NDMS area operations/patient reception plans; initiate bed reporting based on GPMRC instructions.

   c. In coordination with NDMSOSC, evacuate and manage patients as required from the disaster area to NDMS patient reception areas.

   d. In coordination with DOT and other transportation support agencies, transport medical personnel, equipment, and supplies into the disaster area.

   e. Provide logistical support to health/medical response operations.

   f. Provide Active Duty medical units for casualty clearing/staging and other missions as needed, including aeromedical evacuation; mobilize and deploy Reserve and National Guard medical units, when authorized and necessary to provide support.

   g. Coordinate patient reception and management in NDMS areas where military treatment facilities serve as local NDMS FCCs.

   h. Provide military medical personnel to assist HHS in activities for the protection of public health (such as food, water, wastewater, solid waste disposal, vectors, hygiene, and other environmental conditions).

   i. Provide available DOD medical supplies for distribution to mass care centers and medical care locations being operated for disaster victims.

   j. Provide available emergency medical support to assist State and local governments within the disaster area. Such services may include triage, medical treatment, and the use of surviving DOD medical facilities within the disaster area.

   k. Provide assistance in managing human remains, including victim identification and disposition.
1. Provide technical assistance, equipment, and supplies through the U.S. Army Corps of Engineers (USACE) as required, in support of HHS to accomplish temporary restoration of damaged public utilities affecting public health.

m. Immediately notify the Surgeons General of the Army, Air Force, and Navy if there is a likelihood that their support may be required.

n. Provide technical facility and clerical expertise to assess the physical condition of the medical treatment facilities.

3. **Department of Energy**

   a. Through the Radiation Emergency Assistance Center/Training Site (REAC/TS):
      
      (1) Provide 24-hour direct and/or consulting assistance in assessing and treating the health and medical effects of radiological exposure and contamination involving general and high-risk populations;

      (2) Offer intensive training to health professionals in medical management for radiological accidents;

      (3) Provide counseling to victims of radiological accidents; and

      (4) Provide technical advice and assistance regarding the handling and disposition of radiologically contaminated remains.

   b. Through the Radiological Assistance Program (RAP):
      
      (1) Provide regional resources (personnel, specialized equipment, and supplies) to evaluate, control, and mitigate radiological hazards to workers and the public;

      (2) Assist in the decontamination of victims; and

      (3) Assist State and local authorities in the monitoring and surveillance of the accident area.

   c. Through the Atmospheric Release Advisory Capability (ARAC), provide real-time transport, dispersion, and dose predictions of atmospheric releases of radioactive and hazardous materials that can be used by authorities in taking protective actions related to sheltering and evacuation of people.

   d. Through the Federal Radiological Monitoring and Assessment Center (FRMAC), to assist health and medical authorities in determining radiological dose information, provide coordinated gathering of radiological information and data; consolidated data sample analyses, evaluations, assessments, and interpretations; and technical information.

4. **Department of Homeland Security**

   a. Direct the activation of NDMS and the NDMSOSC as necessary to support the emergency response operations.
b. Direct the activation and deployment of NDMS health/medical personnel, equipment, and supplies in response to requests for Federal health/medical assistance.

c. Direct the activation of the NDMS patient evacuation system and coordinate the evacuation of patients from the disaster area when evacuation is deemed appropriate by State authorities.

d. Direct the activation of the NDMS definitive healthcare network and coordinate the provision of definitive healthcare through NDMS.

e. Coordinate NDMS to assist in establishing priorities for application of health and medical support.

f. Assist in providing NDMS communications support.

g. Assist in providing information/liaison with emergency management officials in NDMS FCC areas.

h. Provide logistics support as appropriate.

i. Identify and arrange for use of U.S. Coast Guard (USCG) aircraft and other assets in providing urgent airlift and other transportation support.

j. Provide communications support for medical command and control. This support will be coordinated through ESF #2 and other DHS assets.

5. **Department of Justice**

   a. Assist in victim identification, coordinated through the Federal Bureau of Investigation (FBI) HQ in Washington, DC.

   b. Provide State and local governments with legal advice concerning the identification of the dead.

   c. Provide HHS and DHS/NDMS with relevant intelligence information of any credible threat or other situation that could potentially threaten public health. This support will be coordinated through FBI HQ in Washington, DC.

   d. Provide communication, transportation, and other logistical support to the extent possible. This support is provided through the FBI.

6. **Department of Transportation**

   a. Assist in identifying and arranging for all types of transportation, such as air, rail, marine, and motor vehicle.

   b. Provide casualty distribution assistance from DOT resources subject to DOT statutory requirements.

   c. Coordinate with the Federal Aviation Administration for air traffic control support for priority missions.
7. **Department of Veterans Affairs**
   a. On direction of the NDMSOSC, alert VA NDMS FCCs to activate NDMS area operations/patient reception plans, initiate bed reporting based on GPMRC instructions, and coordinate patient reception, management, and the provision of inpatient care through NDMS hospitals in areas where VA medical centers serve as local NDMS FCCs.
   b. Assist in providing medical support to State and local governments within the disaster area. Such services may include triage, medical treatment, and the use of surviving VA medical centers within the disaster area.
   c. Provide available medical supplies for distribution to mass care centers and medical care locations being operated for disaster victims.
   d. Provide assistance in managing human remains, including victim identification and disposition.

8. **Agency for International Development, Office of Foreign Disaster Assistance**
   Provide assistance in coordinating international offers for health/medical support.

9. **American Red Cross**
   a. Provide emergency first aid, supportive counseling, healthcare for minor illnesses and injuries to disaster victims in mass care shelters, DFOs, selected disaster cleanup areas, and other sites deemed necessary by the primary agency.
   b. Assist community health personnel subject to the availability of staff.
   c. Provide supportive counseling for the family members of the dead and injured.
   d. Provide available personnel to assist in temporary infirmaries, immunization clinics, morgues, hospitals, and nursing homes.
   e. Acquaint families with available health resources and services, and make appropriate referrals.
   f. Provide blood and blood products through regional blood centers at the request of the appropriate agency.
   g. Provide coordination for uploading appropriate casualty/patient information from ESF #8 into the DWI system.

10. **Environmental Protection Agency**
    Provide technical assistance and environmental information for the assessment of the health/medical aspects of situations involving hazardous materials.
11. General Services Administration

Provide facilities, equipment, supplies, and other logistical support, including the acquisition of private sector ground and air transportation.

12. U.S. Postal Service

Assist in the distribution and transportation of medicine and pharmaceuticals to the general public affected by a major disaster or emergency as needed.

VI. References

I. Introduction

A. Purpose

Emergency Support Function (ESF) #9 — Urban Search and Rescue rapidly deploys components of the National Urban Search and Rescue (US&R) Response System to provide specialized lifesaving assistance to State and local authorities in the event of a major disaster or emergency. US&R operational activities include locating, extricating, and providing on-site medical treatment to victims trapped in collapsed structures.

B. Scope

The National US&R Response System is an integrated system of US&R task forces, Incident Support Teams (ISTs), and technical specialists.

1. The system is built around a core of task forces prepared to deploy immediately and initiate US&R operations on implementation of ESF #9 of the Federal Response Plan (FRP). These task forces are staffed primarily by local fire department and emergency services personnel who are experienced and trained in collapsed structure search and rescue operations. On activation by the Department of Homeland Security (DHS), US&R task forces become Federal assets.

2. ISTs provide coordination and logistical support to US&R task forces during emergency operations. They also conduct needs assessments and provide technical advice and assistance to State and local government emergency managers. Teams are formed with personnel from US&R task forces; Federal, State, and local government emergency response organizations; and private sector organizations.

3. Technical specialists provide expertise in various US&R disciplines. They are mobilized as needed from around the United States.
II. Policies

A. The National US&R Response System assists and augments State and local US&R capabilities. Personnel assigned to task forces of the National US&R Response System are highly trained and may possess specialized expertise and equipment not available to local responders.

B. As primary agency for ESF #9, DHS develops national US&R policy, provides planning guidance and coordination assistance, standardizes task force procedures, evaluates task force operational readiness, funds special equipment and training requirements, and reimburses task force costs incurred as a result of deployment under the FRP.

C. ESF #9 addresses only US&R. All other forms of search and rescue (e.g., water, wilderness, subterranean) are managed under different authorities and do not fall under the functional purview of the ESF.

III. Situation

A. Disaster Condition

Disasters and emergencies vary widely in scope, degree of devastation, and threat to human life. For example:

1. In situations that entail structural collapse, large numbers of people may require rescue and medical care;

2. Because the mortality rate among trapped victims rises dramatically after 72 hours, US&R must be initiated without delay;

3. During the response, rescue personnel may encounter extensive damage to the local infrastructure, such as buildings, roadways, public works, communications, and utilities. Such damage can create environmental safety and health hazards, such as downed power lines, unsafe drinking water, and unrefrigerated food;

4. Following an earthquake, aftershocks, secondary events, and/or other hazards (such as fires, tsunami, landslides, flooding, and hazardous materials releases) may compound problems and threaten both disaster victims and rescue personnel;

5. Weather conditions such as temperature extremes, snow, rain, and high winds may pose additional hazards for disaster victims and rescue personnel; and

6. In some circumstances, rescue personnel may be at risk from terrorism, civil disorder, or crime.

B. Planning Assumptions

In a major disaster requiring Federal US&R assistance:

1. State and local US&R organizations will be overwhelmed and will not be able to respond to all requirements;
2. Local residents, workers, and/or converging volunteers may initiate search and rescue efforts, but will usually lack specialized equipment and training. Spontaneous volunteers will require coordination and direction within the local incident command structure;

3. Access to damaged areas will be limited. Some sites may be initially accessible only by air or water; and

4. Following an earthquake, both disaster victims and rescue personnel may be threatened by aftershocks, secondary events, and/or other environmental disturbances.

IV. Concept of Operations

A. General

DHS, as primary agency for ESF #9, will activate the National US&R Response System for any incident or anticipated incident that is determined likely to result in collapsed structures that would overwhelm existing State and local US&R resources. The likelihood of activation depends on the nature and magnitude of the event, the suddenness of onset, and the existence of US&R resources in the affected area.

B. Organization

1. National-Level Response Structure

   a. The National US&R Response System consists of US&R task forces, ISTs, and technical specialists. More than 5,000 individuals make up the national system. At the core of the system are 27 task forces sponsored by State and local government emergency response organizations and formed into a coherent, nationally deployable resource by DHS. Each task force comprises 62 individuals organized into 31 positions. The positions are organized into five functional teams (management, search, rescue, medical, and technical), with each team staffed to permit around-the-clock operations.

   b. ISTs are organized, trained, and mobilized by DHS Headquarters (HQ). In a disaster, one or more ISTs may be dispatched to the affected area to:

      (1) Conduct a comprehensive US&R needs assessment;

      (2) Provide technical US&R assistance, support, and advice to Federal, State, and local officials;

      (3) Provide US&R management and coordination assistance and expertise to the Emergency Support Team (EST) ESF #9 Leader, the Emergency Response Team (ERT) ESF #9 Leader, and the Federal Coordinating Officer (FCO) at the Disaster Field Office (DFO);

      (4) Under the direction of the ERT ESF #9 Leader, provide coordination of the operations of multiple task forces in the field; and
(5) Coordinate logistical support of deployed task forces beyond their initial 72-hour period of self-sufficiency with the RST, ERT, and EST Logistics Sections, ensuring compliance with DHS property management procedures.

c. Task force and IST resources may be supplemented with technical specialists in various US&R disciplines. When needed, technical specialists are mobilized by DHS.

2. Regional-Level Response Structure

Initial Federal field response to incidents that may require US&R assistance usually begins at the regional level. Each DHS Regional Office is responsible for staffing an ESF #9 position on its ERT. The Emergency Services Branch Chief or Operations Section Chief on the Advance Element of the ERT (ERT-A) may perform initial ESF #9 functions. Extended US&R operations will require supplemental staffing and deployment of national-level resources by DHS.

C. Notification

1. Headquarters

a. Notification of incidents with the potential for structural collapse may be received by DHS from a number of sources, including the DHS Secretary’s Operations Center, Mobile Emergency Response Support (MERS) Detachment Operations Centers, regional offices, national news media, State or local governments, and National US&R Response System members. Upon notification of an incident, US&R Response System staff will immediately notify ESF #9 EST staff, support contractors, DHS’s Military Support Liaison Officer, and the Department of Health and Human Services’ Office of Emergency Response of a potential need for US&R response. EST staff also will notify DHS’s Office of Financial Management of the potential need to activate task force, IST, and EST support agreements.

b. When the need for US&R assets has not firmly been established, the EST may issue an advisory to all National US&R Response System task forces, indicating that an event has occurred that may require the deployment of US&R assets. EST staff may also begin alerting IST regular or Advance Element (IST-A) staff of the potential for immediate deployment. Activation Orders for IST or IST-A staff will be issued by the EST when required.

c. As soon as the need for US&R assets has been established, EST staff will develop recommendations for DHS management on the type and quantity of resources to be alerted or activated. When approved, Activation Orders for task forces and IST members will be issued by the EST Director. Activation Orders specify that task forces should fully mobilize and be prepared to depart from their predesignated point of departure airfield within 6 hours. In addition to activation of task forces and IST members, additional task forces may be issued Alert Orders,
placing them in a state of heightened readiness to respond if subsequently activated. Alert Orders will generally state the timeframe within which activation decisions are expected.

2. Regions

If not previously notified, EST staff will notify the DHS Regional Office responsible for the affected area. Copies of all advisories and Alert and Activation Orders issued by the EST will be transmitted to the regional US&R point of contact (POC) for the affected region, as well as for those regions whose resident task forces have been alerted or activated. Generally, the regional US&R POC for the affected region will maintain close contact with the EST and the ERT-A during the initial response period. Initial recommendations on US&R resources to be alerted or activated will be coordinated with the regional US&R POC. Regional US&R POCs for regions with alerted or activated task forces will generally be in contact with the sponsoring States and the task forces themselves.

D. Response Actions

1. Initial Actions

   a. Headquarters

      (1) Immediately following initiation of operations, EST staff in the ESF #9 cell will establish and maintain a chronological log of US&R events and information obtained from the field. During the initial stages of the disaster or emergency, the EST will serve as the single POC for responding task forces and IST members for situation information and response status of US&R resources.

      (2) Initial staff in the EST will develop commitment documents and activate support agreements for supplemental staffing of the ESF #9 cell in the EST. The level of staffing will depend on the nature and magnitude of the incident and the response actions already under way.

      (3) When Alert and Activation Orders are issued to task forces and IST members, EST staff will develop commitment documents to ensure response costs are reimbursed, in accordance with task force memorandums of agreement (MOAs) and support agreements for the reimbursement of IST members.

      (4) EST staff will ensure passenger manifests are prepared by the task forces and ISTs and forwarded to the EST for recordkeeping purposes. A related requirement is the verification that documentation required for legal and liability purposes (e.g., Application for Federal Employment, Appointment Affidavit, Employee Transmittal Sheet) is on file for each individual being deployed. If required documentation is not on file, EST staff will work directly with task force leaders and IST Commanders to obtain it prior to
deployment of the task force or IST. This documentation ensures legal protections are available to all responders.

(5) EST staff will also prepare Requests for Federal Assistance (RFAs) that generate mission assignments for air transport of task forces from their predesignated departure airfields to Base Support Installations (BSIs), mobilization centers, or other aerial ports of debarkation designated by the ERT. These RFAs will be coordinated with ESF #1 — Transportation and the Movement Coordination Center at DHS. IST members normally deploy via commercial air carriers; however, unique circumstances of a particular disaster or emergency may result in issuance of mission assignments to other Federal agencies for their transport. Ground transport of task force and IST members within the affected area may involve the use of commercial or Federal carriers between any of the following locations, as the situation dictates: aerial port of debarkation, BSI, mobilization center, staging area, operating site(s).

(6) EST staff will also develop cost estimates and commitment documents to provide funding for commercial credit cards that have been issued to selected ESF #9 Leaders within the National US&R Response System. These credit cards are used to support immediate needs that arise during task force and IST deployments. They provide limited interim procurement authority until ESF #9 resources in the field can be fully integrated into a functioning DFO staffed with qualified procurement specialists.

(7) EST staff will collect assessment information from damage assessment teams, IST-A members, DHS regional officials, and State and local government officials for inclusion in situation reports and for decision making regarding the need for US&R resources.

b. Regions

(1) At the onset of the disaster or emergency, DHS officials from the affected region will designate an initial POC for ESF #9. This individual will generally be part of the ERT, and may be represented on the ERT-A. While US&R task forces and ISTs are activated at the national level, the regional ESF #9 contact has a critical role in providing information on the need for US&R resources. Regional officials have the lead role in processing State requests for Federal US&R assistance.

(2) The regional ESF #9 Leader also will take the lead in preparing for the arrival of task forces and IST members and ensuring the IST is fully incorporated into the region’s ERT structure. The regional ESF #9 Leader will provide overall management and coordination of all deployed US&R resources through the IST. The ESF #9 Leader will coordinate all US&R activities with the functional groups of the ERT. The ESF #9 Leader will keep the ESF #9 Leader in the EST informed of all US&R field activities.
2. Continuing Actions

a. Headquarters

(1) Based on recommendations developed by the ESF #9 Leader in the field and the IST, decisions will be made at the national level on the deployment of additional US&R resources. EST staff will issue additional advisories and Alert and Activation Orders as required.

(2) In the event that the disaster requires the use of all national-level US&R assets, the EST will be responsible for developing strategies for providing additional US&R support, including the use of international US&R assets, the deployment of other task forces from existing sponsoring organizations (without equipment), and the employment of US&R resources of unaffected States.

(3) The EST will act on unmet requirements for equipment and supplies that have been forwarded from the ESF #9 Leader in the field. The EST will forward issues involving competing requirements and scarce resource allocation to the Catastrophic Disaster Response Group (CDRG) as appropriate.

(4) The EST will use the demobilization plan developed by the IST as the basis for decisions on demobilization of US&R assets. Based on these decisions, the EST will issue Demobilization Orders to task forces and IST members. Demobilization Orders will include specific guidelines on personnel and equipment rehabilitation allowances for US&R assets. When coordinated with the EST, Demobilization Orders may be issued by the ERT.

b. Regions

(1) The ESF #9 Leader and IST Commander will establish contact with the local Incident Commander (IC) and develop a plan to integrate national US&R resources into the local incident command structure. The ESF #9 Leader will work with the local IC to develop written delegations of authority to national US&R resources as appropriate.

(2) In the event State and local emergency medical services resources are overwhelmed, the ESF #9 Leader on the ERT, in conjunction with the IST Commander and IST Medical Unit Leader, will coordinate with field representatives of ESF #8 — Health and Medical Services to develop procedures for the transfer of victims extricated from collapsed structures to Disaster Medical Assistance Teams (DMATs) for stabilization and transport to definitive medical care locations.

(3) The IST will develop a mechanism for resupply of task forces operating in the affected area. The ESF #9 Leader will work with regional ESFs to obtain required equipment and supplies. The ESF #9 Leader will pass unmet or competing requirements to the EST for further action.
(4) The ESF #9 Leader, in conjunction with the IST Commander, will continually monitor the situation and develop recommendations on additional resources needed, as well as demobilization of existing resources. The IST will develop a demobilization plan for the concurrence of the ESF #9 Leader. The demobilization plan will include recommended guidelines on personnel and equipment rehabilitation allowances for US&R assets. Recommendations contained in the demobilization plan will be passed to the EST for decision making at the national level.

(5) For incidents of extended duration, the ESF #9 Leader will issue a funding document to ensure feeding, shelter, salary reimbursement, and other logistical support of US&R task force and IST resources when required.

V. Responsibilities

A. Primary Agency: Department of Homeland Security

1. Serve as national-level ESF #9 coordinator.

2. Establish, maintain, and manage the National US&R Response System. This responsibility includes predisaster activities such as training, equipment purchase, and evaluation of operational readiness.

3. Dispatch one or more ISTs to the affected area(s).

4. Manage US&R task force deployment to, employment in, and redeployment from the affected area.

5. Coordinate logistical support for US&R assets during field operations.

6. Develop policies and procedures for the effective use and coordination of US&R assets.

7. Provide status reports on US&R operations throughout the affected area.

8. Under the National Disaster Medical System (NDMS),
   a. Provide administrative support to US&R task force medical teams to:
      (1) Ensure medical team personnel who are not Federal employees have appropriate and valid licenses to practice in their States, and they are provided Federal tort claims liability coverage for the practice of medicine;
      (2) Develop an appropriate pay scale for US&R task force medical team personnel; and
      (3) Register medical teams of each National US&R Response System task force as specialized teams under the NDMS.
b. Provide operational support to US&R task force medical teams and IST from ESF #8 — Health and Medical Services, as requested by DHS, to provide liaisons; medical supplies, equipment, and pharmaceuticals; supporting personnel; and veterinary support; and

c. Provide NDMS patient evacuation and continuing care after entrapped victims are removed from collapsed structures by US&R task force personnel, when State and local emergency medical services resources are overwhelmed.

B. Support Agencies

1. Department of Agriculture, Forest Service
   a. Develop standby agreements with US&R task forces to provide equipment and supplies from the National Interagency Cache System at the time of deployment.
   b. Develop contingency plans for use of National Interagency Fire Center contract aircraft by ESF #9 during disasters.

2. Department of Defense
   a. Serve as primary source for the following assistance:
      (1) Fixed-wing transportation of US&R task forces and ISTs from base locations to mobilization centers or BSIs. Target time frame for airlift missions is 6 hours from the time of task force activation;
      (2) Rotary-wing transportation of US&R task forces and ISTs to and from isolated, surface-inaccessible, or other limited-access locations;
      (3) Through the U.S. Army Corps of Engineers (USACE), provide trained Structures Specialists and System to Locate Survivors (STOLS) teams to supplement resources of US&R task forces and ISTs; and
      (4) Through the USACE, provide predisaster training for US&R task force and IST Structures Specialists.
   b. Serve as secondary source for the following assistance:
      (1) Ground transportation of US&R task forces and ISTs within the affected area;
      (2) Mobile feeding units for US&R task forces and IST personnel; and
      (3) Portable shelter (i.e., tents) for use by US&R task force and IST personnel for eating, sleeping, and working.

3. Department of Health and Human Services

Provide operational support to US&R task force medical teams and IST from ESF #8 — Health and Medical Services, as requested by DHS.
4. Department of Justice
   a. Provide assistance with the development and maintenance of tort liability claims coverage for US&R task force and IST personnel while they are engaged in training, mobilization, deployment, and field operations.
   b. Provide Federal Tort Claims Act guidance and claims resolution services in support of US&R training activities and field deployments.

5. Department of Labor
   a. Provide assistance with the development and maintenance of workers’ compensation programs for US&R task force and IST personnel while they are engaged in training, mobilization, deployment, and field operations.
   b. Provide workers’ compensation guidance and claims resolution services during and following US&R field deployments.
   c. Provide skilled claims specialists during US&R field deployments.
   d. Provide policy guidance, interpretation, and assistance on compliance with Federal Occupational Safety and Health Administration regulations before and during US&R field deployments.

6. Agency for International Development, Office of Foreign Disaster Assistance
   Act as the single U.S. Government POC for coordinating the use of international search and rescue resources.

7. National Aeronautics and Space Administration
   a. Provide personnel in appropriate technical disciplines to support US&R task forces and ISTs.
   b. Provide and maintain training sites for use of US&R task forces and IST members.
   c. Assist DHS with identification as well as research and development of new technologies for technical search.
   d. Provide temporary use of facilities for mobilization centers and staging areas for US&R assets.

VI. References

III. Terms and Definitions

A. Aerial Port of Debarkation

Arrival airfield in or near the area affected by the disaster or emergency. In the National US&R Response System, also known as the point of arrival.

B. Aerial Port of Embarkation

Departure airfield in the vicinity of a US&R task force’s home base. In the National US&R Response System, also known as the point of departure.

C. Base Support Installation

Any military installation of any service or agency designated by the Department of Defense to provide civil authorities with specified, integrated support of disaster operations. The installation is normally located outside, but within relative proximity to, the disaster area.

D. Disaster Medical Assistance Team

The basic deployable unit of the NDMS, which is administered by the DHS. Staffed with physicians, nurses, other healthcare professionals, and support staff, DMAT capabilities include triage and stabilization of patients at a disaster site and provision of austere medical services at transfer points during transport to definitive medical care locations.

E. Incident Support Team

An overhead team used to conduct needs assessments, provide technical advice and assistance to State and local government emergency managers, coordinate the activities of multiple US&R task forces in the field, and provide logistical support for US&R task forces beyond their initial 72-hour period of self-sufficiency. The IST reports to the ESF #9 Leader on the ERT.

F. Incident Support Team — Advance Element

An advance element of the IST, used to conduct needs assessments, provide technical advice and assistance to State and local government emergency managers, and prepare for incoming US&R task force and IST resources. The IST-A reports to the IST Commander.

G. Memorandum of Agreement

Tripartite written agreement between DHS, the sponsoring organization for the US&R task force of the National US&R Response System, and the State of the sponsoring organization. The MOA outlines responsibilities of each signatory in the event of an activation of the
National US&R Response System. The MOA serves as the basis for reimbursement of task force operational expenditures during activation.

H. Mobilization Center

A temporary facility at which emergency services personnel and equipment are temporarily located pending assignment, release, or reassignment. A BSI may serve as a mobilization center.

I. Operating Site

The location of a structural collapse where US&R operations are being conducted.

J. Staging Area

A location set up at or near an incident where resources can be placed while awaiting a tactical assignment.

K. System to Locate Survivors

An acoustic listening device used by specially trained personnel from the USACE for the location of victims trapped in collapsed structures.
I. Introduction

A. Purpose

Emergency Support Function (ESF) #10 — Hazardous Materials provides Federal support to State and local governments in response to an actual or potential discharge and/or release of hazardous materials following a major disaster or emergency. As an element of the Federal Response Plan (FRP), ESF #10 may be activated under one of the following conditions:

1. In response to a disaster for which the President (through the Department of Homeland Security (DHS)) determines that Federal assistance is required to supplement the response efforts of the affected State and local governments, under the Robert T. Stafford Disaster Relief and Emergency Assistance Act; or

2. In anticipation of a major disaster or emergency that is expected to result in a declaration under the Stafford Act.

A Presidential declaration does not automatically activate ESF #10. DHS will determine, in consultation with affected States, the Environmental Protection Agency (EPA), and the U.S. Coast Guard (USCG), if appropriate, if such activation is required to supplement the efforts of State and local governments. (The USCG will be consulted in a disaster or emergency where the predominant damage is within its jurisdiction. As primary agency for the ESF, EPA also will be consulted in such cases.) Within the context of this ESF, the term “hazardous materials” is defined...
broadly to include oil; hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended; pollutants and contaminants defined under Section 101(33) of CERCLA; and certain chemical, biological, and other weapons of mass destruction (WMD). Federal response to releases of “hazardous materials” is carried out under the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) (40 Code of Federal Regulations (CFR) 300).

3. EPA will serve as the National Chair and lead agency for each activation of ESF #10, with close coordination with the USCG in geographic locations under USCG jurisdiction. EPA will be the ESF #10 Regional Chair in preparedness and for ESF #10 activations in response to a disaster or emergency affecting areas under EPA jurisdiction. The USCG will be the ESF #10 Regional Incident Chair for a disaster or emergency affecting only the areas under USCG jurisdiction. (Precise jurisdictional boundaries have been determined by EPA/USCG agreements and are described in the NCP as well as in greater detail in the Regional Oil and Hazardous Pollution Contingency Plans (RCPs).) The USCG will receive mission assignments directly from DHS for such responses.

(To provide a smooth interface with the response structure established under the NCP, regional incident-specific lead for ESF #10 may be transferred from one regional chair to the other if circumstances dictate.) In the event that an incident involves both EPA and USCG jurisdictions, EPA will assume the ESF #10 Incident Chair role, with the USCG serving as Vice Chair. Each agency will have the option of transferring the lead agency or specific tasks role to the other; however, the Incident Chair will retain responsibility for effectively addressing the ESF #10 tasks, both NCP and non-NCP.

B. Scope

1. ESF #10 provides for a coordinated response to actual or potential discharges and/or releases of hazardous materials by placing the response mechanisms of the NCP within the FRP coordination structure that ensures the most efficient and effective use of Federal resources. The ESF includes the appropriate response actions to prevent, minimize, or mitigate a threat to public health, welfare, or the environment caused by actual or potential hazardous materials incidents.

2. This ESF establishes the lead coordination roles, the division and specification of responsibilities among Federal agencies, and the national and on-site response organization that may be brought to bear in response actions, including description of the organizations, response personnel, and resources that are available. This ESF is applicable to all Federal departments and agencies with responsibilities and assets to support State and local response to actual or potential discharges and/or releases of hazardous materials.
3. Response to oil discharges and hazardous substance releases will be carried out in accordance with the NCP. The NCP effectuates the response powers and responsibilities created by CERCLA, and the authorities established by Section 311 of the Clean Water Act (CWA), as amended by the Oil Pollution Act (OPA). Under the NCP, an On-Scene Coordinator (OSC), designated by EPA, the USCG, Department of Defense (DOD), or Department of Energy (DOE), would undertake Federal response actions. Appropriate response actions under the NCP include efforts to detect, identify, contain, clean up, or dispose of released hazardous materials. The actions can include stabilization of berms, dikes, or impoundments; capping of contaminated soils or sludge; use of chemicals and other materials to contain or retard the spread of the release or to mitigate its effects; drainage controls; fences, warning signs, or other security or site control precautions; removal of highly contaminated soils from drainage areas; removal of drums, barrels, tanks, or other bulk containers that contain hazardous substances; and other measures as deemed necessary.

4. In addition, ESF #10 may respond to actual or threatened releases of hazardous materials not typically responded to under the NCP but that, as a result of the disaster or emergency, pose a threat to public health or welfare or to the environment. Appropriate ESF #10 response activities to such hazardous materials incidents include, but are not limited to, household hazardous waste collection, permitting and monitoring of debris disposal, water quality monitoring and protection, air quality sampling and monitoring, and protection of natural resources.

C. Relation to Existing Response under the National Contingency Plan, the National Response System, and the National and Regional Response Teams

1. Coordination of response actions carried out under this ESF is in accordance and does not conflict with the NCP duties and responsibilities of the National Response Team (NRT) and Regional Response Teams (RRTs) as carried out through the National Oil and Hazardous Substances Response System (NRS). The NRS is a highly organized network of agencies, programs, and resources with authorities and responsibilities in hazardous materials response. Key components of the NRS include the NCP, the NRT/RRT’s, the National Response Center (NRC), and Area Contingency Plans. States participate in the NRS at the regional level.

2. The NRT, comprised of 16 Federal agencies with major environmental and public health responsibilities for oil and hazardous substance releases, is the primary vehicle for coordinating Federal agency activities under the NCP. The NRT carries out national planning and response coordination and oversees the NRS. EPA chairs the NRT, while the USCG serves as Vice Chair. At the headquarters (HQ) level, activities under this ESF provide a bridge between the NRT and the Catastrophic Disaster Response Group (CDRG). The NRT participates in FRP-activation preparedness activities under this ESF and is expected to be closely involved in
response activities if this ESF is activated. EPA is the Regional Chair of ESF #10 for incidents within its jurisdiction. For disasters that occur where the USCG has jurisdiction, the USCG is the Regional Incident Chair of ESF #10. (EPA would remain the National Chair with active USCG participation and support at the CDRG.)

3. The RRTs comprise regional representatives of the Federal agencies on the NRT as well as a representative from each State within the region and are co-chaired by EPA and the USCG. The RRTs serve as planning and preparedness bodies before a response. During a response, RRTs marshal their respective agency response resources and provide coordination and advice to the Federal OSC(s). Each RRT participates in preparedness activities under this ESF and is expected to be closely involved in response activities if this ESF is activated. At the regional level, activities under this ESF provide a bridge between the on-site OSC-directed NCP response (with RRT support) and the overall FRP disaster response activities carried out at the Disaster Field Office (DFO) and managed by a Federal Coordinating Officer (FCO). The OSCs will carry out their responsibilities under the NCP to coordinate, integrate, and manage the Federal effort to detect, identify, contain, clean up, or dispose of or minimize releases of oil or hazardous substances, or prevent, mitigate, or minimize the threat of potential releases. Their efforts will be coordinated under the direction of the ESF Regional Incident Chair, who is also the EPA or USCG RRT Co-Chair.

4. If the FRP is invoked and there are hazardous materials releases necessitating the activation of this ESF, the NRT/RRTs would carry out their duties and responsibilities as put forth in the NCP and agency implementing procedures. Those efforts will focus largely on specific oil and hazardous substances releases that may occur throughout the affected geographic area. There is a need, however, for a single coordination mechanism for the Federal hazardous materials response as provided through this ESF because:

a. It is likely that there will be several releases occurring simultaneously, making heavy demands on response resources. To make the best use of limited resources and to ensure the most efficient overall response, damage information must be gathered quickly, analyzed, and response priorities established as soon as possible;

b. Information on response activities must be provided to the DFO and the FCO on a continuous basis. In some cases, this information could be coming in from more than one State or region. To avoid confusion, this information should flow from the response site to the ESF #10 Regional Chair, to the FCO, and to the ESF #10 National Chair; and

c. Many agencies represented on the NRT/RRT also will be involved in responding to the disaster under other ESFs; hence, there may be conflicting demands on their agency resources. For example, DOD, which has provided personnel and equipment for NCP responses in the past, is also a support agency to the other 11 ESFs. There may be heavy and conflicting demands on DOD resources. Any
resource conflicts affecting ESF #10 will be resolved at the DFO with the FCO and the ESF Chair, then through national ESF #10, and lastly at the CDRG level.

5. EPA will carry out the overall management of preparedness and response coordination activities for this ESF. The USCG, in coordination with EPA, will carry out the management of preparedness and response coordination activities for this ESF in those affected areas where the USCG has jurisdiction. Such assistance will include the responsibility as Regional Vice Chair or Incident Chair of this ESF.

II. Policies

A. National Contingency Plan

The NCP serves as the basis for planning and use of Federal resources for responding to releases or threats of releases of oil or hazardous substances. Response actions under this ESF will follow the policies, procedures, directives, and guidance developed to carry out provisions in the NCP.

B. ESF Regional Chair

During nonemergency operations, the EPA Co-Chair of the RRT will chair the regional ESF. The USCG Co-Chair of the RRT will serve as Vice Chair of the regional ESF. Both the Regional Chair and Vice Chair will be involved in planning for implementation of ESF #10.

C. Support Agencies

To the extent possible at both the HQ and regional levels, support agency representatives to this ESF should be those personnel also assigned to the NRT or RRT(s). Where such dual assignments are not possible, each ESF representative is to maintain close coordination with the agency’s NRT/RRT representative.

D. Multiple Response Actions

When, because of multiple response actions, more than one Federal OSC is involved in implementing response, the ESF will be the mechanism through which close coordination will be maintained among all agencies and OSCs. The EPA Regional Chair of this ESF will ensure response actions within its jurisdiction are properly coordinated and carried out. In cases where more than one USCG district falls within an EPA region, USCG HQ will select the Regional Incident Chair of the ESF. The USCG Regional Incident Chair of the ESF will ensure response actions within USCG jurisdiction are properly coordinated and carried out.
E. Terrorism Incidents

If the Terrorism Incident Annex to the FRP is activated, ESF #10 will provide assistance during the crisis management and consequence management phases as specified in the annex.

III. Situation

A. Disaster Condition

A natural or other disaster could result in numerous situations in which hazardous materials are released into the environment. Fixed facilities (e.g., chemical plants, tank farms, laboratories, operating hazardous waste sites) that produce, generate, use, store, or dispose of hazardous materials could be damaged so severely that existing spill control apparatus and containment measures are not effective. Hazardous materials that are transported may be involved in rail accidents, highway collisions, or waterway mishaps. Abandoned hazardous waste sites could be damaged, causing further degradation of holding ponds, tanks, and drums. The damage to, or rupture of, pipelines transporting materials that are hazardous if improperly released will present serious problems. Disaster recovery procedures could generate hazardous materials threats to the public health or welfare or to the environment. Terrorism incidents could occur involving WMD.

B. Planning Assumptions

1. States and localities will be overwhelmed by the extent of the response effort required to assess, mitigate, monitor, clean up, and dispose of hazardous materials released into the environment.

2. There will be numerous incidents occurring simultaneously in separate locations, both inland and along coastal waters.

3. Standard communications equipment and practices (e.g., telephone lines and radio) will be disrupted or destroyed.

4. Response personnel, cleanup crews, and response equipment will have difficulty reaching the site of a hazardous materials release because of the damage sustained by the transportation infrastructure (i.e., roads, rails, bridges, airports).

5. Additional response/cleanup personnel and equipment will be needed to supplement existing capabilities and to provide backup or relief resources.

6. Even if the disaster does not cause an actual release, there will be considerable concern about facilities that are located in or near the affected area. These facilities will need to be assessed and monitored by ESF #10. Information submitted in compliance with Title III of the Superfund Amendments and Reauthorization Act (SARA), the Clean Air Act Amendments of 1990, the Oil Pollution Act of 1990, and the Hazardous Materials Transportation Uniform Safety Act of 1990 will be useful in identifying such facilities.
7. Laboratories responsible for analyzing hazardous materials samples may be damaged or destroyed.

8. Air transportation will be needed for damage reconnaissance and to transport personnel and equipment to the site of a release.

9. Emergency exemptions will be needed for disposal of contaminated material.

10. ESF #10 responders should expect to be self-sufficient in the early days of the response.

11. Incidents involving WMD will require additional coordination procedures and the need to follow specialized response actions. A WMD response might begin as a routine response action and then later be determined a WMD incident.

12. When a discharge or release involves radioactive material, the Federal response will be consistent with the Federal Radiological Emergency Response Plan (FRERP) or the NCP as deemed appropriate by the Lead Federal Agency (LFA). The FRERP response is coordinated by the LFA, which is the agency that owns, authorizes, regulates, or is otherwise responsible for the source, facility, or radiological activity causing the emergency, and for responding to that emergency.

IV. Concept of Operations

A. Scope

1. EPA will serve as the National Chair and lead agency for each activation of ESF #10, with close coordination with the USCG in geographic locations under USCG jurisdiction. EPA will be the ESF #10 Regional Chair in preparedness and for ESF #10 activations in response to a disaster or emergency affecting areas under EPA jurisdiction. The USCG will be the ESF #10 Regional Incident Chair for a disaster or emergency affecting only areas under USCG jurisdiction.

2. The operational response prescribed in the NCP and any agency implementing procedures that contribute to response will be coordinated through this ESF. This ESF will promote an efficient, coordinated, and effective response to discharges or releases of hazardous materials that threaten human health, welfare, or the environment. In conjunction with the State, the ESF will coordinate the provision of support and the overall management to the various response sites to ensure actions are taken to mitigate, clean up, and dispose of hazardous materials and minimize the impact of the incidents. The ESF promotes close coordination with Federal, State, and local officials to establish priorities for response support.

3. This ESF requires documentation of all response activities to support after-action requirements and justify actions taken by primary and support agencies.

4. Upon activation of ESF #10, one or more OSCs will coordinate and direct oil and hazardous substance removal actions. Depending on the location of the incident(s), the OSC(s) may be provided by either EPA, USCG, DOD, or DOE. The Regional
Chair of this ESF is responsible for coordinating OSCs to make the best use of response resources and to avoid gaps or overlaps in response actions.

B. Organization

Figure ESF #10-1 depicts the national and regional organizational structure for this ESF for situations in which oil and/or hazardous substance incidents occur and the NCP is implemented.

**Figure 10-1 — ESF #10 National and Regional Structure**
1. National-Level Response Support Structure

a. This ESF will be implemented under the direction of the Director, Chemical Emergency Preparedness and Prevention Office (CEPPO), Office of Solid Waste and Emergency Response, EPA, who will also serve as the Chair for this ESF. For Coastal Zone response, this ESF will also be implemented under the coordinated direction between the Chief, Office of Response, USCG, and the Director of CEPPO consistent with Section I.A of this annex.

b. The Chair, or a designated alternate, will represent the ESF in all interactions with the CDRG and will maintain liaison with the ESF Regional Chair.

c. Following an initial situation assessment, the ESF Chair (in consultation with the ESF Vice Chair if appropriate) will determine which agencies will be required to continue to provide representatives to the ESF on a 24-hour basis (either by telephone or in person) during the emergency response period. The EPA CEPPO and/or USCG Office of Response will provide administrative support to this ESF as appropriate. ESF #10 will operate from EPA and, as appropriate, USCG HQ. ESF support agencies will have representatives available immediately by telephone on a 24-hour basis.

   (1) EPA will operate this ESF from the EPA HQ Emergency Operations Center (EOC).

   (2) Where the USCG has jurisdiction, the USCG will operate from the USCG HQ Office of Response.

d. ESF #10 will be represented on the Emergency Support Team (EST) by a pre-designated EPA HQ and/or USCG HQ representative and, if necessary, by select representatives of other ESF support agencies. The purpose of the ESF #10 EST representative is to provide national-level coordination and liaison among ESFs at HQ and to provide accurate ESF technical information to ESF #5 — Information and Planning and the CDRG. The EST ESF #10 representative will be in direct contact with the ESF #10 Chair at EPA HQ or USCG representatives at USCG HQ as appropriate.

   The EPA ESF #10 Chair, who is also the ESF #10 CDRG representative, will determine national-level policy relating to the response effort in close coordination with the USCG. The USCG will also provide representation at CDRG meetings as necessary. The ESF #10 Chair will provide guidance and direction to regional response elements as necessary on issues such as inter-regional resource use, allocation, and mobilization.

e. Policies and procedures in the NCP will be adhered to in carrying out an oil/hazardous substance response. In certain circumstances, some administrative procedures in the NCP can be streamlined during the immediate response phase. The ESF Chair will consult the NRT for advice and assistance in carrying out
activities under this ESF. Likewise, the ESF Regional Chair will consult the RRT for such advice or assistance.

f. In some cases (see Sections I.B and III.A), ESF #10 may respond to releases or threatened releases of hazardous materials not typically responded to under the NCP. Applicable policies and procedures in the NCP will be adhered to in carrying out these hazardous materials responses.

2. Regional-Level Response Structure

a. The EPA RRT Co-Chair will serve as the Regional Chair of this ESF. The USCG Co-Chair of the RRT will serve as Vice Chair of the regional ESF.

b. For responses occurring solely in areas of USCG jurisdiction, the USCG RRT Co-Chair will serve as the Regional Incident Chair of this ESF.

c. The ESF Regional Chair will represent the ESF in its dealings with the FCO and will maintain close coordination with support agencies, other on-scene ESFs, National Chair of the ESF, OSCs, RRT, and State officials.

d. The regional-level ESF comprises the regional representatives of those Federal agencies listed in Section V of this ESF.

e. In the event of a multi-State incident, the ESF Regional Chair will designate an ESF #10 coordinator for each State. Designees will coordinate response efforts in the assigned State, representing the ESF at the DFO. Designees will closely coordinate decisions with the ESF #10 Chair.

f. The Regional Chair will designate a representative to the Advance Element of the Emergency Response Team (ERT-A) and, in conjunction with the ESF support agencies, determine the staffing requirements for the full ERT at the DFO. In addition to that of the primary agency, staffing at the DFO may include the USCG, DOD, Department of Commerce (DOC)/National Oceanic and Atmospheric Administration (NOAA), and Department of Health and Human Services (HHS).

g. In the DFO, the Regional Chair will be the primary coordination point between the ESF #10 response activities and the FCO.

h. When the Terrorism Incident Annex is activated, the Regional Chair will ensure ESF #10 response activities are fully integrated and coordinated with the Federal Bureau of Investigation’s (FBI’s) Joint Operations Center (JOC).

i. The Regional Chair will support Federal OSCs provided by EPA for discharges and releases into or threatening areas under EPA jurisdiction, the USCG for discharges or releases into or threatening areas of USCG jurisdiction, DOD for hazardous substance releases from DOD facilities and vessels, or DOE for hazardous substance releases from DOE facilities.
j. The OSC directs oil and hazardous substance response efforts and coordinates all other Federal efforts at the scene of a discharge or release. Specific response efforts are noted in the NCP and include actions taken as soon as possible to prevent, minimize, or mitigate a threat to public health or welfare, or the environment.

k. The OSC is supported by a Federal emergency response network that includes the NRT, RRT, and special forces and teams (e.g., National Strike Force, Environmental Response Team, Scientific Support Coordinators, District Response Groups, Radiological Emergency Response Teams, and Supervisor of Salvage and Diving (SUPSALV — Department of the Navy)), which can provide technical assistance, advice, and other services and additional support for cleanup and disposal of released material.

l. The OSC should consult as needed with the RRT in carrying out response activities and keep the RRT informed of response actions. To the extent possible, the RRT representative also will be the agency’s representative to this ESF.

m. OSC efforts will be coordinated with other appropriate Federal, State, local, or private response agencies. All OSCs involved in implementing this ESF will maintain close coordination with the Regional Chair to ensure the response is consistent with Federal priorities.

C. Notification

1. DHS will notify the National ESF Chair of a potential or actual FRP or ESF #10 activation.

2. DHS will notify the National Response Center of a potential or actual FRP or ESF #10 activation. The NRC will notify the HQ and Regional Chairs of this ESF and other appropriate Federal and State personnel or their designees. Alternatively, the EPA Region and/or USCG District may be notified of an alert of a potential ESF #10 activation by their corresponding DHS region.

3. In cases where other Federal assets are initially notified of an incident, they are responsible for contacting the NRC and DHS directly.

4. Upon notification, all ESF members will contact their parent agencies, remain in 24-hour telephone contact with the ESF (e.g., the EST at the national level and the Regional Support Team (RST) at the regional level), and be prepared to report to that location as required.
D. Response Actions

1. Initial Actions

a. The National Chair of this ESF will convene appropriate agency representatives within 2 hours of notification to develop a plan for providing the technical support required. This can be conducted via emergency conference call or by physically locating at the EPA or USCG EOC as appropriate.

b. The national ESF will focus initially on the following actions:

(1) Confirm that members of national and regional ESF staffs have been notified;
(2) Ensure the EPA EOC or USCG EOC is primed to support Federal response activities;
(3) Establish communications with the affected regional ESF;
(4) Establish communications with designated backup regions and with other appropriate State and regional elements;
(5) Coordinate with other national-level ESFs, especially ESF #5;
(6) Identify extent of hazardous materials incidents;
(7) Identify initial resource requirements; and
(8) For terrorism incidents, provide support as required during the crisis management and consequence management phases while continuing to carry out NCP response actions.

c. The regional-level ESF will become operational upon notification from the DHS region. Initial actions coordinated under the regional ESF include:

(1) Alert members of the regional ESF;
(2) Deploy ESF representatives to the ERT-A and to the ERT;
(3) Coordinate and communicate with the national ESF at the EST;
(4) Establish communication with the RST and/or State EOC (according to regional plans) to obtain initial damage estimates;
(5) Establish communications with EPA backup regions. The EPA ESF #10 Regional Chair will request assistance for backup by calling other EPA regions for support. Backup regions should coordinate with EPA HQ before deploying to the disaster and work through EPA HQ to obtain any additional resources required. Where the USCG has jurisdiction, it will establish communications with primary predesignated USCG backup districts. USCG-designated backup districts are expected to provide initial response support behind the affected district. Backup districts should
coordinate with USCG HQ before deploying to the disaster and work through USCG HQ to obtain any additional resources required; and

(6) Assess the situation, including the nature, amount, and locations of real or potential releases of hazardous materials; pathways to human and environmental exposure; probable direction and time of travel of the materials; potential impact on human health, welfare, safety, and the environment; types, availability, and location of response resources, technical support, and cleanup services; and priorities for protecting human health and welfare, and the environment.

d. Upon identification of releases or potential releases of oil and hazardous substances, the Regional Chair of this ESF will coordinate closely with the OSC(s) and the RRT (if convened) to develop and implement a response strategy.

2. Continuing Actions

Upon becoming fully operational and throughout the response period, the ESF support agency representatives (national and regional) will coordinate with their agencies to meet ESF needs and carry out ESF actions. The regional ESF, under the direction of the ESF Regional Chair, will:

a. Receive damage information from reconnaissance teams, other ESFs, and Federal, State, and local agencies;

b. In coordination with Federal, State, and local agencies, identify support requirements and establish response priorities;

c. Validate priorities and identify resources required;

d. Work with State and local governments and other Federal agencies to maximize use of available regional assets and identify resources required from outside the region; and initiate actions to locate and move resources into the disaster area (transport of resources to be coordinated with ESF #1 — Transportation);

e. Continue to coordinate on-scene response operations through this ESF as expressed in Section I.C, including stabilization of berms, dikes, or impoundments; capping of contaminated soil or sludge; use of chemicals and other materials to contain or retard the spread of the release or mitigate its effects (e.g., safety fences); drainage controls to ensure proper drainage; fences, warning signs, or other security or site control precautions; removal of highly contaminated soil from drainage or other areas; and removal of drums, barrels, tanks, or other bulk containers that contain hazardous materials;

f. Because of the potential for response to numerous simultaneous events, OSCs will, as time permits, coordinate all significant actions with the ESF Regional Chair. Significant actions are considered those that relate to competition for and commitment of resources not under their control, recommendations to State
officials as to protective actions, or the impact on other response activities or priorities;
g. Maintain close coordination with the DFO to share information and ensure effective response to requests for assistance. The regional ESF will provide written situation reports to the ESF #10 National Chair on a regular basis as specified at the time of response (at a minimum, every shift change); and
h. For terrorism incidents, provide support as required during crisis management and consequence management while continuing to carry out ESF #10 response actions.

V. Responsibilities

A. Primary Agency: Environmental Protection Agency, with the U.S. Coast Guard as Regional Incident-Specific Chair During Certain Events

1. Maintain close coordination between HQ and the affected regional office(s); the USCG, as appropriate; the CDRG; the EST; other ESFs; and the NRT.
2. Provide damage reports and assessments to support ESF #5.
3. Facilitate resolution of any conflicting demands for hazardous materials response resources. Coordinate (through HQ) the program of backup support from other regions to the affected area.
4. Provide technical, coordination, and administrative support and personnel, facilities, and communications for this ESF.
5. Coordinate, integrate, and manage the overall Federal effort to detect, identify, contain, clean up, or dispose of or minimize releases of oil or hazardous substances, or prevent, mitigate, or minimize the threat of potential releases.
6. Provide expertise on environmental effects of oil discharges or releases of hazardous substances, pollutants, or contaminants and environmental pollution control techniques.
7. Provide OSCs.
8. Provide Chair for NRT and Co-Chairs for RRTs.

B. Support Agencies

During the planning or implementation of a response, the Federal agencies listed are prepared to provide the following assistance in their respective areas of expertise. The assistance provided by each agency is consistent with its capability and legal authority.

1. Department of Agriculture

   a. Ensure the purity and wholesomeness of meat and meat products, poultry and poultry products, and egg products.
b. Prevent the distribution of contaminated meat and meat products, poultry and poultry products, and egg products.

c. Measure, evaluate, and monitor the impact of the emergency incident on natural resources under the U.S. Department of Agriculture’s (USDA’s) jurisdiction.

d. Provide predictions of the effects of pollutants on soil and their movements over and through soil.

e. Assist in developing protective measures and damage assessments.

f. Assist in providing livestock feed.

g. Assist in the disposition of livestock and poultry affected by radiation.

h. Assist, in coordination with HHS, EPA, and USCG, in the production, processing, and distribution of food.

i. Provide information and assistance to farmers.

2. Department of Commerce, National Oceanic and Atmospheric Administration

   a. Acquire and disseminate weather data, forecasts, and emergency information.

   b. Provide expertise on natural resources and coastal habitat, the environmental effects of oil and hazardous substances, and appropriate cleanup and restoration alternatives.

   c. Coordinate scientific support for responses in coastal and marine areas, including assessments of the hazards that may be involved.

   d. Predict pollutant movement, dispersion, and characteristics (atmospheric or marine) over time.

   e. Provide information on meteorological, hydrological, ice, and oceanographic conditions for marine, coastal, and inland waters.

   f. Provide charts and maps for coastal and territorial waters and the Great Lakes.

3. Department of Defense

   a. Direct response actions for releases of hazardous substances from its vessels, facilities, and vehicles.

   b. Provide personnel and equipment to other Federal organizations and State and local governments (such as SUPSALV), as requested, if consistent with DOD operational requirements.

4. Department of Energy

   a. Direct response actions for releases of hazardous substances from its vessels, facilities, and vehicles.
b. Provide advice in identifying the source and extent of radioactive releases relevant to the NCP, and in the removal and disposal of radioactive contamination.

5. Department of Health and Human Services
   a. Provide assistance on all matters related to the assessment of health hazards at a response and protection of response workers and the public health.
   b. Determine whether illnesses, diseases, or complaints may be attributable to exposure to a hazardous substance.
   c. Establish disease/exposure registries and conduct appropriate testing.
   d. Develop, maintain, and provide information on the health effects of toxic substances.

6. Department of Homeland Security, U.S. Coast Guard
   a. Assist ESF #10 primary agency (EPA) in preparedness and response coordination activities for ESF #10. Such assistance may include responsibility as Regional Vice Chair of this ESF during preparedness and as Regional Incident Chair of ESF #10 during response.
   b. Provide the Federal OSCs for response to oil and hazardous substance events occurring within its jurisdiction.
   c. Provide Vice Chair for the NRT and Co-Chairs for RRTs.
   d. Within its jurisdiction, coordinate, integrate, and manage the overall Federal effort to detect, identify, contain, clean up, or dispose of or minimize releases of oil or hazardous substances; prevent, mitigate, or minimize the threat of potential releases.
   e. Maintain the National Response Center.
   f. Manage the National Strike Force, which comprises three strike teams located on the Pacific, Atlantic, and Gulf coasts, to provide technical advice, assistance, and communications support for response actions.
   g. Offer expertise in domestic and international port safety and security, maritime law enforcement, ship navigation, and the manning, operation, and safety of vessels and marine facilities.
   h. Maintain continuously staffed facilities that can be used for command, control, and surveillance of oil discharges and hazardous substance releases occurring within its jurisdiction.

7. Department of the Interior
   Provide assistance and expertise in fish and wildlife resources, geology and hydrology, earthquakes and other natural hazards, minerals, soils, vegetation, mining activities, identification of hazardous substances, biological and general natural resources, cultural resources, matters affecting lands administered by the Department of the Interior (DOI),
and matters affecting Indian lands and resources, national parks, wildlife refuges, and fish hatcheries.

8. **Department of Justice**

Provide expert advice on complicated legal questions arising from the Federal response.

9. **Department of Labor, Occupational Safety and Health Administration**

Provide advice and consultation to EPA and other NRT/RRT agencies, as well as to the OSC, regarding hazards to persons engaged in response activities. The Occupational Safety and Health Administration (OSHA) also may take any other action necessary to ensure employees are properly protected. Any questions about occupational safety and health at these sites may be referred to the OSHA Regional Office.

10. **Department of State**

Provide advice and assistance in coordinating an international response when a discharge or release crosses international boundaries or involves foreign flag vessels.

11. **Department of Transportation**

Provide expertise on all modes of transporting oil and hazardous substances, including information on the requirements for packaging, handling, and transporting regulated hazardous materials.

12. **Nuclear Regulatory Commission**

Coordinate the Federal effort to mitigate the radiological consequences of an emergency involving a facility licensed by the Nuclear Regulatory Commission (NRC) or an Agreement State in accordance with the FRERP. The NRC and EPA will coordinate their responses to an emergency involving both a radiological and chemical release in accordance with joint NRC/EPA implementing procedures.

C. **Other Agencies**

Other Federal agencies may be called on to provide advice and assistance as needed.

**VI. References**

F. National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 CFR 300.

G. Executive Order (EO) 12580, Superfund Implementation.

H. EO 11735, Assignment of Functions Under Section 311 of the Federal Water Pollution Control Act, as amended.

M. Joint Contingency Plan in the Bering and Chukchi Seas, October 17, 1989 (U.S./U.S.S.R.).

N. Superfund Amendments and Reauthorization Act of 1986, including the Emergency Planning and Community Right-to-Know Act (SARA Title III) of 1986.

VII. Terms and Definitions

A. Comprehensive Environmental Response, Compensation, and Liability Act, as amended

More popularly known as “Superfund,” CERCLA was passed to provide the needed general authority for Federal and State governments to respond directly to hazardous substances incidents.

B. District Response Group

Established in each USCG District, the District Response Group is primarily responsible for providing the OSC technical assistance, personnel, and equipment during responses typically involving marine zones.

C. Environmental Response Team

Established by EPA, the Environmental Response Team includes expertise in biology, chemistry, hydrology, geology, and engineering. The Environmental Response Team provides technical advice and assistance to the OSC for both planning and response to discharges and releases of oil and hazardous substances into or threatening the environment.

D. Hazardous Materials

Under this ESF, hazardous materials are defined broadly to include oil, CERCLA hazardous substances, pollutants and contaminants as defined in Section 101(33) of CERCLA, and certain chemical and biological WMD. Federal response to hazardous materials is carried out under the NCP.
E. Hazardous Substances

Under this ESF, hazardous substances are defined by Section 101(14) of CERCLA.

F. National Oil and Hazardous Substances Pollution Contingency Plan

The NCP (40 CFR 300) administers the response powers and capabilities authorized by CERCLA and Section 311 of the CWA. The NCP applies to all Federal agencies and provides for efficient, coordinated, and effective response to discharges of oil and releases of hazardous substances, pollutants, and contaminants.

G. National Response Center

A national communications center for activities related to oil and hazardous substance response actions. The National Response Center, located at USCG HQ in Washington, DC, receives and relays notices of oil and hazardous substances releases to the appropriate Federal OSC. The 24-hour number is 1 (800) 424-8802, or in Washington, DC, (202) 267-2675.

H. National Response Team

The NRT, comprised of the 16 Federal agencies with major environmental and public health responsibilities, is the primary vehicle for coordinating Federal agency activities under the NCP. The NRT carries out national planning and response coordination and is the head of a highly organized Federal oil and hazardous substance emergency response network. EPA serves as the NRT Chair (Director, Chemical Emergency Preparedness and Prevention Office), and the USCG serves as Vice Chair.

I. National Strike Force

The National Strike Force consists of three strike teams established by the USCG on the Pacific, Atlantic, and Gulf coasts. The strike teams can provide advice and technical assistance for oil and hazardous substances removal, communications support, special equipment, and services.

J. On-Scene Coordinator

The Federal official predesignated to coordinate and direct hazardous substance removal actions. Depending on the location of the incident, the OSC may be provided either by EPA, USCG, DOD, or DOE. OSCs from DOD and DOE will be used to coordinate and direct actions at their respective agency facilities.

K. Radiological Emergency Response Teams

EPA’s Office of Indoor Air and Radiation provides Radiological Emergency Response Teams (RERTs) to support and respond to incidents or sites containing radiological hazards. These teams provide expertise in radiation monitoring, radionuclide analyses, radiation health physics, and risk assessment. RERTs can provide both mobile and fixed laboratory support during a response.
L. Regional Response Teams

Regional counterparts to the NRT, the RRTs comprise regional representatives of the Federal agencies on the NRT and representatives of each State within the region. The RRTs serve as planning and preparedness bodies before a response, and provide coordination and advice to the Federal OSC during response actions.

M. Scientific Support Coordinator

Under the direction of the Federal OSC, a Scientific Support Coordinator (SSC) leads a team of scientists that provide scientific support for response operational decisions and for coordinating on-scene scientific activity. Generally, an SSC is provided by NOAA in coastal zones and by EPA in the inland zone.

N. Supervisor of Salvage and Diving

SUPSALV is a salvage, search, and recovery operation established by the Department of Navy. SUPSALV has extensive experience to support response activities, including specialized salvage, firefighting, and petroleum, oil, and lubricants offloading. SUPSALV, when available, will provide equipment for training exercises to support national and regional contingency planning.
Emergency Support Function #11
Food Annex

Primary Agency: Department of Agriculture, Food and Nutrition Service
Support Agencies: Department of Defense
Department of Health and Human Services
Department of Homeland Security
American Red Cross
Environmental Protection Agency
General Services Administration

I. Introduction

A. Purpose

Emergency Support Function (ESF) #11 — Food identifies, secures, and arranges for the transportation of food assistance to affected areas following a major disaster or emergency or other event requiring Federal response.

B. Scope

To accomplish this function, activities will be undertaken to identify food assistance needs in the aftermath of a major disaster or emergency. These activities will include coordinating with State, local, and voluntary organizations to determine food assistance needs; obtaining appropriate food supplies; arranging for transportation of those food supplies to designated staging areas within the disaster area; and authorizing disaster food stamp assistance.

II. Policies

A. ESF #11 will be activated upon notification of occurrence of a potential or actual major disaster or emergency.

B. Actions undertaken by ESF #11 will be guided by and coordinated with State and local disaster officials.

C. Food supplies secured and delivered by ESF #11 will be suitable for either household distribution or congregate meal service as appropriate.

D. Transportation and distribution of food supplies within the affected area will be arranged by Federal, State, local, and voluntary organizations.

E. ESF #11 will coordinate with, and support as appropriate, agencies responsible for ESF #6 — Mass Care involved in mass feeding.

F. ESF #11 will encourage the use of congregate feeding arrangements as the primary outlet for disaster food supplies.
G. Priority will be given to moving critical supplies of food into areas of acute need and then to areas of moderate need.

H. ESF #11, upon notification that commercial channels of trade have been restored, may authorize the use of disaster food stamp program procedures.

III. Situation

A. Disaster Condition

A significant disaster or emergency may deprive substantial numbers of people access to food or the means to prepare food. In addition to substantial disruption to the commercial food supply and distribution network, a major disaster may destroy, partially or totally, food products stored in the affected area.

B. Planning Assumptions

1. Approval of requests from the Governor or disaster relief organizations for release of State-controlled food may be given by telephone, radio, or written communications, depending on circumstances, within 12 hours of the disaster or emergency.

2. Within the disaster area, the following conditions will exist:
   a. Fifty percent of the food processing and distribution capabilities is disrupted;
   b. Seventy-five percent of the water supply is unusable, requiring juices or potable water supplies to be made available to the affected population. (Note: Potable water will be supplied by ESF #3 — Public Works and Engineering); and
   c. There is a near-total disruption of energy sources (e.g., electricity and gas). The only sources available are oil for generators and propane tanks. Most commercial cold storage and freezer facilities are inoperable.

3. On the fringes of the geographic areas affected will be schools and small institutions having large inventories estimated to be sufficient to feed up to 10,000 people for 3 days and supply their fluid needs for 1 day (i.e., a minimum of 1,800 calories and 3 gallons of liquid per day per person).

IV. Concept of Operations

A. General

1. Under the general coordination of the Food and Nutrition Service’s (FNS’s) Disaster Task Force, ESF #11 will operate under existing U.S. Department of Agriculture (USDA) authorities and regulations, as well as the Stafford Act, to provide disaster food supplies to designated disaster staging areas and/or authorize the issuance of disaster food stamps.

2. At all times, requests for food, including types, amounts, and destination locations, will be processed through FNS’s Disaster Task Force. It is expected that the regional
level of the Disaster Task Force will be the point of contact (POC) for all State-initiated requests for food assistance.

3. After initial State food assistance requests are forwarded to the ESF, the Disaster Task Force will coordinate efforts to obtain and transport foods and/or authorize disaster food stamps. During the first 72 hours following a notification of a major disaster or emergency, this ESF will be staffed at least in FNS Headquarters (HQ) and affected regional offices around the clock. After this time, continuation of 24-hour operations will be reconsidered by the Administrator of FNS and the FNS Disaster Coordinator, who is the official POC within the FNS Disaster Task Force for any matter pertaining to ESF #11.

B. Organization

1. National-Level Response Support Structure

At the national level, FNS’s Disaster Task Force will assume primary responsibility for all ESF activity. Because each support agency will be represented on the Emergency Support Team (EST) at the Department of Homeland Security (DHS) HQ and the Emergency Response Team (ERT) at the Disaster Field Office (DFO), the FNS Disaster Coordinator will maintain 24-hour contact with those representatives as necessary at those locations for the duration of the emergency response period. Support agency representatives will have sufficient knowledge of the capabilities and resources of their agencies, with appropriate authorities to commit resources to the response effort.

2. Regional-Level Response Structure

   a. The FNS Regional Disaster Coordinator is the POC within the Regional Office and will represent this ESF in its dealings with the Federal Coordinating Officer (FCO).

   b. The regional level of the Disaster Task Force will have a representative present or available for duty at the DFO on a 24-hour basis for the duration of the emergency response period.

C. Notification

1. The DHS Secretary’s Operations Center will notify the USDA Emergency Coordinator of implementation of the Federal Response Plan (FRP). USDA then will notify the FNS Disaster Coordinator. The FNS Disaster Coordinator will notify appropriate HQ officials, regional office(s), and ESF support agencies.

2. The Disaster Coordinator will attend any meeting of the Catastrophic Disaster Response Group (CDRG) and be available as necessary for the duration of the initial response period.
D. Response Actions

1. Initial Actions
   a. Determine the critical needs of the affected population in terms of number of people, their locations, and usable food preparation facilities for congregate feeding.
   b. Catalog available resources of food, transportation, equipment, storage, and distribution facilities and be able to locate these resources geographically.
   c. Evaluate the adequacy of available resources relative to need on a geographical basis.
   d. Ensure all identified USDA food is fit for human consumption.
   e. Coordinate shipment of USDA food to staging areas within the disaster area.
   f. Initiate direct market procurement of critical food supplies not available from existing inventories.

2. Continuing Actions
   a. Expedite requests, if any, for emergency issuance of food stamps after access to commercial food channels has been restored.
   b. Establish logistical links with organizations involved in long-term congregate meal services.
   c. Establish need for, and effect replacement of, food products transferred from existing FNS program inventories.

V. Responsibilities

A. Primary Agency: Department of Agriculture

1. Determine the availability of USDA foods, including raw agricultural commodities (e.g., wheat, corn, oats, rice) that could be used for human consumption; assess damage to food supplies.

2. Coordinate with State officials to determine food needs of the population in the affected areas based on the following categories: acutely deficient, moderately deficient, self-sufficient, and surplus supplies.

3. At the discretion of the Secretary of Agriculture, and upon request by the State, approve emergency issuance of food stamps for up to 30 days to qualifying households within the affected area.

4. At the discretion of the Secretary of Agriculture, make emergency food supplies available to households for take-home consumption in lieu of food stamps for qualifying households.
5. Provide damage information to ESF #5 — Information and Planning on a regular basis.

6. Develop a plan of operation that will ensure timely distribution of food in good condition to the proper location.

7. Ensure the appropriate officials establish and maintain an information flow to the national-level ESF. These designees will ensure requirements for food assistance are known and accomplished.

B. Support Agencies

All agencies included in support roles are necessary to ensure all Federal sources of food are included, along with agencies necessary to ensure logistical support and determine that the food is not a health hazard.

1. Department of Defense
   a. Assess the availability of Department of Defense (DOD) food supplies and storage facilities capable of storing dry, chilled, and frozen food.
   
   b. Assess the availability of DOD transportation equipment, material handling equipment, and personnel for support. This responsibility will be confined to the posts, camps, and stations within or adjacent to the disaster area.
   
   c. Arrange for the delivery and distribution of resources identified in Sections B.1.a and b to areas designated by the ESF.

2. Department of Health and Human Services
   a. Determine which foods are fit for human consumption and identify potential problems of contaminated foods (e.g., radiation, chemical, bacterial, viral).
   
   b. Provide health education in the areas of food preparation and storage.

3. Department of Homeland Security
   Provide demographic information about the disaster area and information on State, local, and private sources of food. This information will assist the ESF in determining types and quantities of food that FNS will need to provide.

4. American Red Cross
   a. Identify and assess the requirements for food and distribution services on a two-phase basis: critical emergency needs immediately after the disaster and longer term sustained needs after the emergency phase is over.
   
   b. Coordinate the food distribution efforts of other voluntary organizations.

5. Environmental Protection Agency
   Assist with determining the suitability of food resources for human consumption and identify potential hazardous materials impacts on the food supply.
6. General Services Administration

Lend support to FNS for any necessary procurement efforts to meet the needs of the affected population.

VI. Resource Requirements

A. Transportation Resources

Truck, rail, air, and sea resources for the transportation of food, including refrigeration and cold storage capacity.

B. Food Resources

1. Food supplies in Federal, State, and local government-owned storage facilities.
2. Food supplies available for immediate procurement.

C. Mobilization/Staging Areas

Facilities and personnel to offload, store, allocate, and reload for shipments to food preparation/distribution sites within the disaster area.

VII. References

B. 7 CFR 280, Food Stamp Regulations.
C. FNS Instruction 708-2, Emergency Food Assistance.
D. FNS Instruction 708-5, Disruption of Commercial Channels of Food Distribution in Disaster Areas.
E. FNS Instruction 708-6, Definition of Disaster Organizations.
F. FNS Notice 86-43, FNS Disaster Task Forces.

VIII. Terms and Definitions

Food and Nutrition Service Disaster Task Force

The Food Security Act of 1985 (Public Law 99-198) requires the Secretary of Agriculture to establish a Disaster Task Force to assist States in implementing and operating various disaster food programs. The FNS Disaster Task Force coordinates the FNS overall response to disasters and emergencies. It operates under the general direction of the Administrator of FNS. The FNS Disaster Task Force consists of the Administrator, Associate Administrator, Disaster Coordinator, Deputy Administrator for Management, Deputy Administrator for Governmental Affairs and Public Information, representatives from the food stamp and special nutrition programs, and representatives from regional office(s) affected by the disaster.

The FNS Disaster Task Force expedites approval of disaster designation requests and policy clarifications. It also maintains liaison with DHS.
Emergency Support Function #12
Energy Annex

Primary Agency: Department of Energy
Support Agencies: Department of Agriculture, Rural Utilities Service
Department of Defense
Department of Homeland Security
Department of the Interior
Department of State
Department of Transportation, Office of Pipeline Safety
Nuclear Regulatory Commission
Tennessee Valley Authority

I. Introduction

A. Purpose

Emergency Support Function (ESF) #12 — Energy helps restore the Nation’s energy systems following a major disaster, emergency, or other significant event requiring Federal response assistance. In addition, the Department of Energy (DOE) members of ESF #12 provide direct coordination with all other department response elements.

B. Scope

ESF #12 gathers, assesses, and shares information on energy system damage and estimations on the impact of energy system outages within affected areas. Additionally, this ESF works closely with and aids in meeting requests for assistance from State and local energy officials, energy suppliers, and deliverers.

Within the ESF #12 agencies are a variety of assets and resources that may be used in response to any event involving energy or multihazard problems. “Energy” includes producing, refining, transporting, generating, transmitting, conserving, building, and maintaining energy systems and system components; “multihazard” includes radiological materials, weapons of mass destruction (WMD), and terrorism incidents.

Damage to an energy system in one geographic region may affect energy supplies in other regions that rely on the same delivery systems. Consequently, energy supply and transportation problems can be intra-State, inter-State, and international.

II. Policies

A. Upon activation of ESF #12, DOE Headquarters (HQ) will establish the HQ Emergency Management Team (EMT).
B. DOE HQ will assign personnel to temporary duty at the Department of Homeland Security (DHS) HQ, Regional Operations Center (ROC), and Disaster Field Office (DFO) as needed.

C. The ESF #12 priority will be to save lives, protect property, and assist other ESFs by aiding in the restoration of damaged energy systems.

D. Within 24 hours of implementation of the Federal Response Plan (FRP) or on instruction from DHS, DOE HQ will start submitting situation reports to DHS.

III. Situation

A. The suddenness and devastation of a disaster, either natural or manmade, may sever key energy lifelines, constraining supply in affected areas and most likely adversely impacting adjacent areas, especially those with supply links to the directly affected areas. Such an event also could affect transportation, communications, and other lifelines needed for public health and safety.

B. Basic planning assumptions for such an event:
   1. There may be widespread and possibly prolonged electric power failures;
   2. The transportation and telecommunications infrastructures may be affected; and
   3. Delays in the production, refining, and delivery of petroleum-based products may occur as a result of loss of commercial electric power.

C. ESF #12 response and restoration activities:
   1. Serve as the focal point within the Federal Government for receipt of reports on damage to energy supply and distribution systems and requirements for system restoration;
   2. Advise Federal, State, and local authorities on priorities for energy restoration, assistance, and supply;
   3. Assist industry, State, and local emergency response actions;
   4. Assist Federal departments and agencies by locating fuel for transportation, communications, emergency operations, and national defense;
   5. Recommend Federal actions to conserve fuel and electric power; and
   6. Provide energy supply information and guidance on the conservation and efficient use of energy to Federal, State, and local governments and to the public.
IV. Concept of Operations

A. National Level

1. Assess fuel and electric power damage, energy supply and demand, and identify requirements to repair energy systems:
   a. Coordinate closely with Federal and State officials to establish priorities to repair damaged energy systems, and coordinate the provision of temporary, alternate, or interim sources of emergency fuel and power; and
   b. Obtain current information regarding damage to energy supply and distribution systems and assess the requirements for restoration.
2. Provide timely and credible energy supply forecasts.
3. Provide technical experts on energy supply production and delivery to coordinate energy information exchange.
4. Coordinate with other ESFs to provide timely and accurate energy impact information, recommend options to mitigate impacts, and coordinate repair and restoration of energy systems.
5. Operate around-the-clock from the DOE HQ Operations Center (OC), telephone (202) 586-8100.

B. Regional Level

1. Appoint a person to represent ESF #12 in its dealings with the Federal Coordinating Officer (FCO), the State Coordinating Officer (SCO), and any other pertinent Federal, State, and local officials.
2. Obtain information regarding energy impacts and provide input to situation and other reports to the national ESF through the DOE OC.
3. Coordinate with Federal and State officials and energy industries in the region regarding priorities to repair damaged energy systems.
4. Through the DOE OC, provide direct coordination with all other DOE response elements.

C. Response Actions

1. DOE’s HQ EMT will:
   a. Activate DOE’s disaster response procedures;
   b. Brief the ESF #12 representative to the Catastrophic Disaster Response Group (CDRG);
   c. Assign, as necessary, staff representation to the Emergency Support Team (EST) at DHS;
d. Arrange, as necessary, for ESF #12 representation at the regional level; and
e. Use available information to determine the status and assess the energy impacts of the disaster, including resources needed to respond.

2. At the regional level, ESF #12 will:
   a. Receive and respond to requests for information from States, local governments, other Federal agencies, and industry;
   b. Assist the FCO and SCO to establish priorities to repair damage;
   c. Identify needed resources to repair or restore damaged energy systems; and
d. Provide periodic situation and any other reports as directed by DOE HQ.

V. Responsibilities

A. Primary Agency: Department of Energy

1. Serve as the focal point for issues and policy decisions relating to energy in all response and restoration efforts.
2. Monitor energy system damage and repair work.
3. Collect, assess, and provide information on energy supply, demand, and prices; contribute to situation and after-action reports.
4. Identify supporting resources needed to restore energy systems.
5. Deploy DOE response teams as needed to affected area(s) to assist in response and restoration efforts.
6. Review and sponsor, to DHS, the energy industry’s requests for Telecommunications Service Priority (TSP) assignments to provision new services.

B. Support Agencies

1. Department of Agriculture, Rural Utilities Service
   a. Provide advice regarding the restoration of electrical power in Rural Utilities Service (RUS)-financed systems. This includes estimating system damage, available supply, and the need for local assistance.
   b. Provide emergency credit to RUS-financed rural electrification systems.
   c. Identify surplus power available from RUS-financed systems and other sources, and help make it available to areas of need.

2. Department of Defense
   a. Director of Military Support
      Report damage assessment and recommend priorities to ESF #12 for restoring energy service to critical defense facilities.
b. **U.S. Army Corps of Engineers**

   Coordinate emergency power team taskings with power-system restoration activities to assist in setting priorities and ensure time and resources are not wasted in providing support to a facility that is about to have its power restored.

3. **Department of Homeland Security**

   a. Assist DOE in its efforts to aid the energy industry to provide new services or to restore existing services that are assigned TSP restoration priorities.

   b. Assess damage to telecommunications identified by DOE as essential for energy system restoration (Electrical Service Priorities).

4. **Department of the Interior**

   a. **Bureau of Land Management**

      (1) Provide information on energy production and supply on Federal lands.

      (2) Assess damage to production and transmission systems.

      (3) Provide engineering and technical support as necessary.

   b. **Bureau of Reclamation**

      (1) Provide technical assistance for assessment of hydroelectric facilities and flood control actions as they affect energy production.

      (2) Use Bureau of Reclamation personnel to assist in repair of damaged hydropower generation facilities.

      (3) Modify operations at Bureau of Reclamation facilities to increase electrical generation to supplement losses in areas damaged by a disaster.

      (4) Use hydroelectric plants’ internal restart capabilities to assist in restoring the power system if blackouts occur.

   c. **Minerals Management Service**

      (1) For offshore facilities, provide energy production and well reserve information.

      (2) Assess energy production damage and projected repair schedules for offshore facilities.

      (3) Provide engineering and technical support as necessary.

5. **Department of State**

   a. Coordinate with foreign nations and international organizations for assistance and information regarding energy supply and system damage.

   b. Assist in implementation of emergency-related international energy agreements.
6. Department of Transportation, Office of Pipeline Safety
Respond to requests for waiver of restrictions to meet emergency requirements.

7. Nuclear Regulatory Commission
Report power status of nuclear power plants in affected areas.

8. Tennessee Valley Authority
   a. Assess supply, system damage, and repair requirements within the Tennessee Valley Authority.
   b. Supply surplus power as required to the power grid.
   c. Supply critical replacement parts and equipment as requested.
   d. Supply technical expertise as requested.
I. Introduction

A. This portion of the Federal Response Plan (FRP) describes the structure and coordination activities to implement the array of Federal disaster programs, support, and technical services that directly assist individuals, families, businesses (including farms), and State and local governments to recover from the effects of a major disaster or emergency declared by the President. The fundamental assumption is that recovery is a cooperative effort among Federal, State, local, and voluntary agencies and the private sector in partnership.

B. Sometimes disaster events require only the implementation of Federal and State recovery and mitigation programs, such as disaster loans, the Hazard Mitigation Grant Program, or Disaster Housing. They may not require Federal emergency response actions, or only limited Federal response actions. For this reason, this new part of the FRP has been included. It has two purposes:

1. To describe separately the coordination and implementation of recovery programs that occur outside the FRP’s Emergency Support Function (ESF) structure; and

2. To document the linkages that exist among response, recovery, and mitigation activities.

II. Definition of Terms, Scope

A. “Recovery activities” refer to actions by disaster victims that enable them to begin the process of rebuilding their homes; replacing property; resuming employment; restoring their businesses; permanently repairing, rebuilding, or relocating public infrastructure; and mitigating future disaster losses. It also refers to Federal Government programs of assistance, support, and technical services that facilitate disaster victims’ recovery actions — such as grants and low-interest loans for repair or replacement of homes, businesses, property, and infrastructure; technical assistance; and education and information.

B. Recovery activities can begin immediately after a Presidential declaration. When search and rescue, lifesaving, and emergency measures are well under way or nearly complete, individuals, families, and businesses seek funding and services to repair or replace their damaged property. State and local governments plan the rebuilding of infrastructure and services, and seek sources of funding for sustainable redevelopment of their communities. The Federal Government collaborates with the State in planning and coordinating the implementation of recovery programs to support families, businesses, and governments and initiates the delivery of recovery services.
C. Recovery activities should be carried out in the context of long-term redevelopment of viable, disaster-resistant communities. In this context, recovery activities include implementation of postdisaster mitigation programs and opportunities for disaster victims at all levels to make wise rebuilding decisions.

III. Policies

A. Federal Authorities

1. The Robert T. Stafford Disaster Relief and Emergency Assistance Act is the authority for implementation of the FRP, including the recovery functions detailed in this document and the National Flood Insurance Program (NFIP). The Department of Homeland Security’s (DHS’s) authorities derive in part from the Stafford Act.

2. Other Federal agencies have separate legislation and independent authorities to declare a disaster and to provide assistance. Examples include the Small Business Administration (SBA), whose Administrator is empowered by the Small Business Act of 1953 to declare a disaster for the purpose of providing disaster loan assistance based on physical damage and economic injury; and the U.S. Department of Agriculture (USDA), whose Secretary (and other agency officials) may designate counties eligible for various types of emergency loans for physical damage and crop losses. Where these actions occur independently outside a Presidential declaration, the FRP does not apply.

3. Some agencies’ programs are specifically designed for disaster relief, such as the SBA disaster loan program. Others, e.g., the Department of Housing and Urban Development (HUD) Community Development Block Grant program, are not designed as disaster assistance resources but may be used by grantees, in whole or in part, to address disaster recovery needs. Supplemental appropriations may be required to provide the necessary funding.

B. Coordination and Planning as Key Elements in Recovery

1. The Stafford Act assigns to DHS the principal coordination function — the interactive process by which multiple Federal assistance programs are reviewed, initiated, implemented, and delivered to address the unique needs of a particular disaster area. (DHS also is responsible for funding, managing, and delivering certain Stafford Act programs.) Systematic coordination among Federal agencies and States is necessary before and during a disaster to ensure effective, efficient delivery of the array of recovery programs that can aid disaster victims in alleviating damage, hardship, loss, and suffering. The Federal coordination process must operate effectively, beginning “bottom up” in the field at the Disaster Field Office (DFO), with the Federal Coordinating Officer (FCO) and staff interacting with State and local governments and being supported by headquarters (HQ) to resolve major policy and resource issues. The President assigns the FCO and the Governor names a State Coordinating Officer (SCO) to focus interagency coordination.
2. Before a disaster, interagency planning and coordination provide a foundation for strengthening relationships among Federal and State agencies, voluntary organizations, and private sector entities; identifying inconsistencies and overlaps in recovery programs; streamlining program delivery; furthering intergovernment partnerships; and improving customer service. Coordination is critical to promote efficient, timely, consistent Federal action. A structured approach to recovery planning also incorporates mitigation activities and lays the groundwork for the State to oversee longer term redevelopment and reconstruction that promote sustainable development.

3. Interagency meetings facilitate understanding and familiarity with recovery programs and priorities. Contacts can be fostered in predisaster meetings and in meetings during disaster operations with recovery counterparts. Meetings in both settings serve to:
   a. Share management information and assessments;
   b. Identify short-term and more protracted needs;
   c. Discuss resource allocation issues, including funding;
   d. Identify critical environmental issues;
   e. Resolve program duplication issues;
   f. Discuss and resolve timing issues (e.g., establishment of centers and workshops, issuance of public information);
   g. Establish priorities and report progress in meeting established priorities;
   h. Identify and resolve overlaps or shortfalls in Federal or State programs as they arise in the field;
   i. Discuss and suggest solutions for issues arising from Community Relations contacts; and
   j. Ensure coordinated Federal activities that promote community sustainability.

4. The involvement of voluntary organizations and private sectors at the national, State, and local levels is critical to the success of a disaster recovery mission. Voluntary organizations, including the American Red Cross, the Mennonite Disaster Service, The Salvation Army, and other organizations, are encouraged to provide leadership and to coordinate with Federal, State, and local governments in recovery planning and program implementation.

Voluntary Agency Liaisons at DHS regional offices serve as the principal linkages between DHS and voluntary organizations, and as conveners and coordinators of voluntary organization local consortiums. These liaisons assist in supporting community-based long-term recovery organizations, aid in developing State-based voluntary coalitions called Voluntary Organizations Active in Disaster (VOADs), and coordinate between the FCO and voluntary organizations during disaster
operations. A counterpart national organization known as the National Voluntary Organizations Active in Disaster (NVOAD) serves as a forum for nonprofit disaster relief organizations to meet in disaster preparedness periods to discuss emergency management issues, share disaster experiences, and develop organizational relationships.

C. Determination of Recovery Program Priorities

1. The overall responsibility for recovery rests with State and local governments. The FRP recognizes the primacy of State and local governments in defining recovery requirements and identifying needs. The Federal Government’s role is to complement and supplement State, local, and private resources to facilitate recovery.

2. State and local governments define recovery priorities in the public sector. However, the FCO is charged with making a management information assessment of the needs caused by the disaster or emergency. This assessment builds on the Preliminary Damage Assessment in that it provides to program managers at all levels of government the information needed to implement, manage, and staff disaster assistance programs and to prioritize the types of assistance most urgently needed. The management assessment should be conducted jointly (as appropriate) between Federal and State agencies, and continue as needed until the programs not only are in operation but are being appropriately implemented.

D. Recovery Concepts and Requirements

As response phases into recovery, and when the Federal partners begin to coordinate recovery program priorities, certain Federal laws and requirements must be used as guidance in initiating and implementing recovery programs.

1. Floodplain Management, Flood Insurance, Environmental Protection, Historic Preservation

Under Executive Order (EO) 11988, Floodplain Management, all Federal agencies are required to take action to reduce the risk of flood loss; minimize or eliminate the impact of flooding on human safety, health, and welfare; and restore and preserve the natural and beneficial functions of floodplains while carrying out their programs and activities. Federal agency implementation of EO 11988 is critical during recovery because reconstruction or repair activities offer opportunities for economically feasible flood loss-reduction.

Implementation of floodplain management measures through local community participation in the NFIP also is a key component of recovery operations. Local floodplain management ordinances may require repair and reconstruction activities to meet prudent construction code requirements that mitigate future losses. Flood insurance policies now provide additional coverage to assist in paying the costs of bringing existing construction into compliance with current codes.
The Office of Management and Budget and the Council on Environmental Quality jointly issued a policy guidance memorandum on February 18, 1997, titled Floodplain Management and Procedures for Evaluation and Review of Levee and Associated Restoration Projects, which emphasized the need to consider nonstructural alternatives to flood protection during recovery and the need for coordination at all levels of government. The goal is “to achieve a rapid and effective response to damaged flood and floodplain management systems that will minimize risk to life and property, while ensuring a cost-effective approach to flood damage mitigation and floodplain management and the protection of important environmental and natural resource values that are inherent to the floodplain and adjacent lands.”

This policy reflects the fact that recovery should take place in a climate of attention to floodplain management considerations (the Flood Disaster Protection Act of 1973, as amended), EO 11988, environmental considerations (the National Environmental Policy Act (NEPA) of 1969, as amended, and other associated environmental laws), and flood insurance purchase and maintenance requirements (National Flood Insurance legislation, including the National Flood Insurance Reform Act of 1994). NEPA provides an umbrella under which agencies review compliance with a host of Federal environmental legislation and other related issues, such as floodplain and wetlands management, endangered species, historic preservation, and environmental justice issues.

Some response activities are exempt from specific NEPA review requirements but must still comply with other environmental statutes. As recovery programs get under way, compliance with environmental legislation deepens, but for the vast majority of projects the environmental review process is expedited through the use of categorical exclusions. DHS and other Federal agencies follow their agency regulations, which specify the level of review required for specific recovery program activities.

In siting temporary or permanent structures, the Federal and State agencies agree to comply, within the bounds of recovery program laws and regulations, with the spirit and letter of floodplain management and environmental legislation as a way of protecting people, property, and structures against future threats. Federal and State agencies also are encouraged to preserve properties with a historical significance as part of the assistance decision-making process.

2. Mitigation and Risk Management

a. Federal agencies commit to assist in rebuilding structures and facilities and restoring land in a way that minimizes risk of future damage and achieves the goal of building disaster-resistant communities. The terms that describe these concepts — “mitigation” and “risk management” — are often used as a unit when they are defined as “sustained actions taken to reduce or eliminate long-term risk to people, property, and structures from hazards and their effects.” The concepts of mitigation and risk management are based on the premise that money spent on mitigation will save significant future money by reducing the vulnerability of individuals, businesses, and communities to future disasters. Mitigation is critical to the responsibility of all Federal agencies to provide short-
term and long-term solutions to minimize the effects of disasters. The Deputy FCO for Mitigation (DFCO-M) has a leadership role in promoting the concepts and programs of mitigation and risk management. Mitigation — as a concept translated into functional programs — should permeate all recovery activities undertaken at the State, local, and even individual levels, regardless of the source of funding for activities or projects.

b. Nonstructural alternatives to building and repairing structures and restoring former capability should be considered as mitigation/risk management opportunities (e.g., property acquisition, relocation of flood-threatened structures, insurance, insurance revenue plans). Through early planning and consultation with Federal agencies that have statutory mitigation authorities, agencies should also recognize the balance between objectives in recovery planning, such as those involved with temporary measures versus permanent restorative work. State and local governments will be provided information and technical assistance required for the careful community recovery planning that will result in future disaster-resistant communities. It is critical to incorporate mitigation and risk management concepts and activities into recovery planning.

3. Other Crosscutting Requirements

In addition to the objectives of floodplain management, environmental protection, historic preservation, mitigation, and risk management, agencies must remain cognizant of additional crosscutting statutory and other reasonable protections in facilitating or providing resources for disaster recovery. These considerations include civil rights, environmental justice, fair housing, affordable housing, sustainable development, seismic safety, affordable insurance, disaster-resistant communities, Federal and State coastal zone management requirements, drought-resistant crop planting, and crop insurance.

IV. Planning Considerations

A. Planning for recovery begins before a disaster. Recovery coordination necessary to implement disaster assistance programs takes place when lifesaving and emergency operations may still be ongoing. The requirements for staffing to be devoted to recovery operations are determined as early as possible.

B. State and local governments are responsible for identifying needs, establishing recovery priorities, and requesting appropriate assistance; for contributing cost shares as established by law and regulation; for dealing with land use, floodplain management, development, and permitting and land-use waiver issues; and for identifying sites for temporary facilities. State and local resources to carry out these responsibilities may be overwhelmed, requiring Federal technical and financial assistance.

C. In a major disaster of significant impact, the establishment of the formal recovery processes (teeregistration for Disaster Housing, SBA disaster loans, and grants; opening of Disaster Recovery Centers (DRCs)) and implementation of the other agencies’
recovery programs should be well-planned and coordinated, and should start as early as practicable.

D. Information-sharing protocols, including formal coordination meetings, are critical for interagency coordination, good customer relations, and program implementation.

E. The Lead Federal Agency (LFA) (usually DHS) has responsibility for coordinating (rather than directing or managing) the implementation and funding processes of other Federal agency programs. DHS does not fund programs that are within the authorities of another Federal agency, or other agencies’ participation in disaster operations.

F. Mitigation programs and choices are most effective and economical if implemented in the early stages of recovery or before a disaster occurs (such as buying insurance or adopting appropriate codes through participation in the NFIP or planning efforts with NFIP Flood Mitigation Assistance funds).

G. The concept of sustainability brings a relatively new approach to environmental, economic, and social thought and has the potential to enhance the achievement of mitigation goals in the postdisaster (as well as predisaster) environment. Sustainability is development that maintains or enhances economic opportunity and community well-being while respecting, protecting, and restoring the natural environment upon which people and economies depend. Sustainable redevelopment is simply the application of the concepts and practices of sustainable development to the disaster recovery process.

V. Concept of Operations

A. General

1. Federal agencies operate as a team in disaster recovery, bringing to the table the resources of their agencies to address identified needs. The President’s disaster program is coordinated by DHS. Agencies share their program information and make their assistance available through the coordination mechanism of the FRP when a Presidential declaration is made.

2. The initiation of recovery programs is based on the fact that response actions are well under way (or have not been needed) and recovery actions would not interfere with ongoing response activities; that the communities and families affected are ready for the decision making that the programs require; that effective, coordinated, Federal-State recovery planning continues to take place; and that communications and support facilities for effective recovery have been restored. The FCO makes use of coordination meetings with State and local officials, along with Federal agency recovery officials, to identify priorities and programs requested, identify and resolve funding issues, and review the milestones for program delivery. Milestones should be established only after consultation with all major programs.

3. Recovery program funding is provided directly to the affected State, locality, business, or individual/family. Where assistance is provided to a State for community/infrastructure recovery programs, the State administers the grant and
passes the funding to affected communities. (This method contrasts with the funding mechanisms used for response activities that include procurement from commercial sources and issuance of mission assignments to agencies providing direct Federal assistance.)

B. Recovery Organization in the Disaster Field Office

The Emergency Response Team (ERT) Operations Section in the DFO includes a Human Services Branch and an Infrastructure Support Branch. These branches, along with the DFCO-M, form the program part of the recovery organization. The Operations Section Chief is the central coordination point for Federal and State agencies and voluntary organizations in the implementation of recovery programs. (These responsibilities may be delegated to the Human Services Branch or Infrastructure Support Branch, and also may be accomplished by the DFCO-M.) In addition, liaisons among the Human Services and Infrastructure Support Branches and the Mitigation organization may be appointed for intra-agency coordination. Agencies having recovery programs and support and technical services will be included in the ERT organization. The structure will expand or contract as appropriate, depending on the nature of the disaster recovery needs. Where no response component is established, the operation may be scaled back to include only the Human Services Branch and/or the Infrastructure Support Branch and/or the Mitigation organization.

1. Human Services Branch

   a. This branch is staffed by the Individual Assistance Officer (IAO), other program officers, DRC personnel, program liaisons, and others. It is led by the IAO, whose functions are to:

   (1) Assist the FCO to assess individual, family, and business needs in the disaster area and, working with State and local officials and other Federal agencies, initiate programs that address those needs;

   (2) Initiate advertisement of DHS’s toll-free teleregistration service and establish one or more DRCs. Openings should be coordinated with the program delivery needs of all Federal and State agencies, including SBA;

   (3) Coordinate program implementation with agencies and organizations;

   (4) Initiate delivery of the individual assistance programs authorized by the Stafford Act;

   (5) Plan and coordinate with the National Processing Service Centers (NPSCs) the receipt and processing of applications for the Disaster Housing program; refer cases to the State for processing in the Individual and Family Grant (IFG) program; and coordinate with SBA the delivery of its disaster loan programs;
(6) In coordination with the NPSCs, ensure policies and procedures are in place to prevent and rectify duplication of benefits or receipt of excessive assistance; and

(7) Perform grant management functions with respect to grant programs for individuals/families that are implemented by DHS and the State.

b. Where the size of the disaster warrants, the IAO may appoint Assistant or Deputy IAOs, or the Individual Assistance Officer, to manage the specific program groups within the In Human Services Branch. DHS staff, along with representatives from the State and Federal agencies with assistance programs in each of these groups, should staff the branch:

(1) ESF #6 — Mass Care and ESF #11 — Food. In a recovery operation that also involves response, these ESFs will be included in the Human Services Branch. See the appropriate ESF annex for details and responsibilities;

(2) Disaster Housing Group. A DHS representative leads this group, along with appropriate State representation, especially if a portion of the mission is to be performed by the State. Functions such as policy coordination, resource identification, and manufactured housing operations (including environmental review), and tasks such as project monitoring and pre-placement interviewing are among the responsibilities of the group;

(3) IFG Group. The IFG program is funded jointly by DHS and the State, but is administered by the State. DHS and the State should co-lead this function, which consists of technical assistance to the State, training, funding, grant management, and program monitoring;

(4) Program Coordination Group. This group handles the issues not enumerated above. Particularly important is the function of coordination with SBA and the Farm Services Agency (and other USDA Federal and State agencies). Other agencies that can be coordinated through this group include the Internal Revenue Service, Social Security Administration, Department of Health and Human Services, Department of Labor, and Young Lawyers Division of the American Bar Association. Program emphases include SBA disaster loans, farm programs, tax counseling, Social Security check replacement, Crisis Counseling Assistance and Training, stress management counseling programs, Disaster Unemployment Assistance, and Disaster Legal Services. Establishment of application, intake, or counseling sites to accommodate these and other applicable programs should be coordinated within the group;

(5) Donations Management Group. Where the State is prepared to handle donations management, this function should be led by the State. Otherwise, it should be led jointly by the State and DHS. Functions include setting up a toll-free telephone number, matching donated goods and services with validated needs, setting up a Donations Coordination Team,
and overseeing the shipping, receiving, and distribution of goods and services;

(6) Voluntary Organization Coordination Group. DHS’s Voluntary Agency Liaisons lead this function, which is focused on starting case assistance to address unmet needs, working with voluntary organizations to develop community-based long-term recovery organizations to manage case assistance related to unmet needs, and coordinating volunteers. Representatives from national, State, and local voluntary organizations with programs applicable in the disaster area should staff this function, as far as practicable; and

(7) Agencies offering support and technical services in the human services arena will also staff the Human Services Branch.

2. Infrastructure Support Branch

The Infrastructure Support Branch is headed by the Infrastructure Support Branch Chief and is staffed with Public Assistance Officers, Public Assistance Coordinators, and Project Officers who are responsible for the administration and proper operation and delivery of assistance to State and local applicants. Personnel from ESF #3 — Public Works and Engineering and response representatives from ESF #12 — Energy also staff the branch. Staff from other agencies offering support and technical services also may be attached to the branch, as well as liaison with the DFCO-M. The Infrastructure Support Branch Chief’s functions are to:

a. Coordinate the implementation and management of recovery programs between and among Federal and State officials;

b. Serve as technical infrastructure program advisor to the FCO;

c. Supervise other Federal agencies providing direct Federal assistance under a DHS mission assignment;

d. Coordinate the completion of mission assignments;

e. Identify mitigation opportunities; and

f. Work with the Public Assistance Officer to carry out recovery functions for programs authorized under the Stafford Act.

3. Mitigation Operations

a. The Deputy FCO for Mitigation leads this organization, which is staffed with program specialists, field coordinators, and technicians. Activities include:

(1) Coordinating between and among Federal and State officials the implementation and management of mitigation activities;

(2) Providing technical assistance in execution of the Early Implementation Strategy;
(3) Providing technical support to the IAO, Infrastructure Support Branch Chief, and Community Relations staff;

(4) Planning comprehensively for hazard mitigation;

(5) Addressing environmental consequences of the disaster, including those in coastal zones;

(6) Mapping hazards and analyze risks, which may be done by interagency hazard mitigation teams;

(7) Accomplishing cost-benefit analysis and training;

(8) Assisting communities to develop building codes;

(9) Developing and delivering training and education programs;

(10) Disseminating public awareness and information materials at DRCs;

(11) Establishing Reconstruction Information Centers (RICs) to offer mitigation and reconstruction information assistance;

(12) Identifying disaster-specific mitigation issues, strategies, opportunities, and measures;

(13) Working within DHS and other Federal agencies to coordinate opportunities for long-term recovery with State and local planning officials, when appropriate; and

(14) Assisting communities to promote sustainable development.

b. As the Human Services and Infrastructure Support Branches begin early assessments of needs during response, it is also critical that the Mitigation organization assemble and coordinate relevant Federal and State agencies to assess mitigation program needs and match Federal and State resources and programs to meet those needs. This early implementation strategy sets goals for all mitigation partnership players and provides a platform for ongoing coordination and revision of the strategy as necessary.

c. Several Federal mitigation-related programs (e.g., the NFIP, the Hazard Mitigation Grant Program, and the Earthquake Program) are administered through existing grant mechanisms and standing relationships with State and local governments. These relationships, as well as those established by the FRP and potential relationships with agencies involved in recovery activities, increase the opportunity for communication and coordination of mitigation in the aftermath of a disaster.

d. To achieve optimum effectiveness, mitigation resources and coordination within the recovery context in a DFO should flow through the centralized function of the DFCO-M, using staff of response operations. After DFO closure, the coordination function is transferred to the Mitigation Division of the DHS Regional Office or another LFA office. Mitigation operations have the flexibility
Federal Response Plan

VI. Assistance to Individuals, Families, and Businesses

This section describes the initiation and coordination of programs providing recovery assistance directly to individuals, families, and businesses. It also describes the initiation of the process by which individuals gain access to Disaster Housing, IFG, and disaster loan programs (administered by DHS, DHS-State, and SBA respectively). Other Federal agencies, as well as State and voluntary organizations, also have programs that may be available to disaster victims. A matrix outlining these programs is included at the end of this annex.

A. Program Initiation

Some recovery programs for individuals, families, and businesses are automatically triggered by the specific language of the President’s declaration. Others, such as the Nuclear Regulatory Commission’s insurance benefit program in the event of a nuclear incident and certain farm benefit programs operated by USDA, do not require a Presidential declaration, but may require a State or local request. Still others, such as the Crisis Counseling Assistance and Training program, may be available following a Presidential declaration if needed and upon the Governor’s request and specific agency approval. During the initial field-level coordination meetings of recovery agencies, program representatives should advise the FCO on whether any of the needed programs must be requested separately. Plans should be made for:

1. Providing technical assistance to the State for requesting these programs;
2. Arranging for damage or management information assessments;
3. Arranging for any State cost-sharing required by law or regulation; and
4. Noting and observing any timeframes associated with those requests.

B. Combined Registration and Inspection for Housing, Disaster Loans, and Individual and Family Grant Assistance

1. DHS establishes a toll-free registration telephone number (often known as tele-registration) to give individuals, families, and businesses access to three widely used programs: the Disaster Housing program, the SBA disaster loan program, and the IFG program administered by the State. Teleregistration service is available in a variety of languages. The telephone bank also offers referrals to many other Federal, State, local, and voluntary organization programs and resources. Agencies having local offices should supply information to DHS about how to contact them as soon as possible after a disaster declaration, or, ideally, during predisaster planning meetings or conferences.

2. DHS provides inspection services both for the Disaster Housing program and to assist States in administering the IFG program. Inspectors verify the extent of
damages and the value of losses to housing and other personal property. DHS refers
applications and inspection information to SBA for its information in addressing
housing and personal property needs. Finally, DHS assists SBA by making addi-
tional determinations about whether the applicant should be referred to SBA for a
disaster loan based on criteria provided by SBA, and by making subsequent referrals
of SBA loan denials to the State for meeting unmet needs.

3. DHS processes Disaster Housing and IFG applications at NPSCs, which operate
another critical customer service, the helpline. Assistance is available through this
toll-free telephone number in determining the status of applications and obtaining
referrals to sources of assistance other than Disaster Housing, disaster loans, and IFG.
Federal, State, local, and private organizations should provide timely and accurate
referral information to helpline staff.

4. DRCs may be opened to provide on-site information services. These may vary in
each disaster and include taking applications, serving as a forum for State and local
agencies’ disaster programs, assisting families and businesses to fill out SBA disaster
loan applications, answering status questions, or providing reconstruction and
mitigation information. Federal agencies often are represented in DRCs to offer and
explain programs that are tailored to meet disaster victims’ and service providers’
needs (e.g., HUD’s section 203(k) mortgage assistance programs for disaster victims).
The FCO and IAO will coordinate with Federal, State, voluntary, and private-sector
partners who offer services to establish, identify the purposes of, staff, and set the
days and hours of operation of these centers.

C. Program Procedures of Other Agencies

Other Federal, State, local, and voluntary organizations have established procedures for
accepting and processing disaster applications. They may have toll-free telephone lines or
sites where individuals, families, and businesses may receive information and application
assistance for their specific recovery programs. Components of other agency programs
should be coordinated with the FCO and his or her staff (the ERT Operations Section
Chief, IAO, and/or Infrastructure Support Branch Chief), State and local government staff,
and DHS, so consistent decision making and public information may be provided. Public
affairs offices of Federal and State agencies and voluntary organizations should be advised of
all recovery activities. Coordination meetings among agencies offering assistance are ideal
forums in which to ensure customers receive accurate, timely service for identified needs.

D. Sequence of Assistance Delivery and Duplication of Benefits

1. Disaster assistance programs for individuals, families, and businesses often overlap in
their coverage and purpose. Section 312 of the Stafford Act, Duplication of Benefits,
requires that no person, business concern, or other entity receive Federal disaster
assistance for any part of a loss that has been covered by any other program,
insurance, or any other source. DHS has established a policy for preventing and
rectifying duplication. The duplication of benefits policy excludes expendable items
from being considered duplicative. Expendable items include clothing, linens, and basic kitchenware. No checks for duplication need to be made for such items. See 44 CFR 206.191 for a more complete explanation.

2. The policy includes the concept of a sequence of delivery, which establishes the order in which the major forms of overlapping assistance should be provided. The agency that has primary responsibility for delivering a certain type of assistance should provide that assistance first, and may do so without regard to other agencies with similar assistance that are lower in the sequence. Agencies are not prohibited from disrupting the sequence to expedite the recovery of an applicant. However, the agency that disrupts the sequence must take the corrective action. The sequence of delivery is:

a. Voluntary organizations’ emergency assistance; insurance proceeds (including additional living expense benefits);
b. Disaster Housing assistance, including rental assistance, funds for minimal repairs, and provision of housing units;
c. SBA disaster loans for individuals and nonfarm businesses, and USDA disaster loans for agricultural enterprises;
d. IFG awards;
e. Voluntary organizations’ additional assistance (i.e., nonemergency) benefits; and
f. Other programs that are not primarily intended for disaster recovery (e.g., DHS’s Cora C. Brown Fund and DHS’s mitigation and property acquisition programs).

An example of duplication of benefits is that DHS, the primary agency in the delivery of Disaster Housing assistance, provides funds for minimal repairs (e.g., a new window or door to make a home habitable). SBA might also include funds for these two items in a loan. This would be a duplication. To rectify it, SBA would be required to recoup the loan or reduce the loan amount by the dollar value of the window or door.

3. DHS’s disaster assistance automated information and processing system is a decision-making tool that aids DHS, SBA, the State, and voluntary organizations in preventing and rectifying duplication of benefits. Because assistance requests, approvals of assistance, and insurance benefit information are shared, agency decision makers can avoid awarding assistance already provided. Agencies other than DHS, SBA, the State, and certain voluntary organizations do not normally have access to DHS’s information-sharing system. However, such agencies may request information from DHS if an applicant has requested their assistance and authorized DHS to release the information, and if the voluntary organization intends to deliver a benefit that duplicates housing or personal property repair or replacement or delivers medical or death benefits.
VII. Assistance to State and Local Governments

The overall responsibility for accomplishing recovery of public facilities, infrastructure, and essential government services rests with State and local governments. Insurance and Federal agency disaster assistance are supplemental and are not meant to supplant State and local prerogatives, programs, or responsibilities.

There is a broad array of Federal assistance programs for disaster recovery in the public sector. This section describes the delivery system and coordination of recovery assistance programs, many of which are delivered in the form of grants, loans, and direct payments to State and local governments, certain private nonprofit (PNP) organizations, and Indian Tribes. Some forms of State and local assistance are provided as a “pass through” for aiding individuals and families. Others are intended to address recovery needs for planning and support/technical services to augment the capacity of State and local governments.

Much of the Federal recovery assistance directed to State and local governments is directed toward rehabilitation, reconstruction, replacement, or relocation of housing; repairing, replacing, or rebuilding damaged public facilities (e.g., public buildings, utilities, roads, bridges, water control facilities) and infrastructure; and mitigation planning and reconstruction management, incorporating mitigation concepts. This section describes the early coordination mechanisms for activating the appropriate recovery programs and delivering program assistance efficiently and effectively.

A. Coordination Issues in Assistance for State and Local Governments

1. Federal agencies with direct recovery and mitigation programs for State and local governments normally initiate and implement their programs concurrently with DHS’s Public Assistance program. Some Federal programs overlap in coverage and purpose, and may be initiated and operated in various ways.

2. The ERT Operations Section Chief will be the primary focal point for the coordination of Federal recovery assistance to State and local governments, with advice and assistance from the DFCO-M. He or she may delegate the coordination responsibility to the Infrastructure Support Branch Chief (or DHS Public Assistance Officer) when program or operational issues are limited to State and local assistance programs (such as duplication of benefits, duplication of effort, or program timing). The Public Assistance Officer and Federal and State recovery agencies work together to identify and resolve these issues. Field coordination activities include:
   a. Sharing management information and assessments;
   b. Identifying needs;
   c. Identifying program gaps or funding shortfalls; and
   d. Resolving program duplication issues.

For example, if restoration of public highways is at issue regarding which Federal program should fund its repair, the involved agencies (the Federal Highway
Administration, Bureau of Indian Affairs, or DHS) coordinate the determination of which agency should provide funding, based on current legislation, regulations, and purpose of the requested funds.

B. Duplication of Benefits

1. Section 312 of the Stafford Act, Duplication of Benefits, also applies to DHS’s Public Assistance program when it states that the head of each Federal agency will ensure no person, business concern, or other entity will receive Federal assistance if it has received financial assistance under any other program or from insurance.

2. DHS’s Public Assistance program benefits are supplemental to insurance, which is primary. Actual and anticipated insurance recoveries will be deducted from otherwise eligible costs, thus preventing any duplication of benefits.

3. Additionally, DHS generally does not fund permanent repair projects when another Federal agency has specific authority to restore facilities damaged or destroyed by an event that is declared a major disaster.

4. Other Federal agencies also are governed by legislation outlining measures to prevent duplication of benefits. The principle involved is that the agencies are charged not to make their Federal funds available for uses the cost of which may be reimbursable by a primary disaster funding source in the sequence of delivery. For example, some costs for repair or replacement of infrastructure are generally first borne by insurance or DHS’s Section 406 program, rather than HUD’s Community Development Block Grant program or the Economic Development Administration’s grant programs.

VIII. Accessing Federal Assistance

A. Major Federal disaster recovery programs and support/technical services are summarized in the following matrix. Included is assistance to individuals, families, businesses, and State and local governments.

B. For more detailed information, State and local officials should consult the interagency publication, Disaster Assistance: A Guide to Recovery Programs (November 1995). They also may contact the appropriate Federal agency’s representative in the DFO or the Federal agency’s local field office.
Recovery Function to the Federal Response Plan, January 2003

The following abbreviations are used throughout this matrix:

- Presidential declaration (PD)
- Available without declaration (AWD)
- Federal agency (F)
- State agency (S)
- Locality (L)
- Individual/family (I)
- Nonprofit organization (N)
- Indian Tribe (T)
- Business (B)
- Not provided (N/P)

</table>
I. Introduction

A. Purpose

This annex provides guidance on the Community Relations (CR) function to expedite Federal, State, and local governments’ ability to help citizens and communities recover from the effects of a major disaster. The CR function deploys field officers into affected communities after a major disaster to gather and disseminate information about the disaster response and recovery process. CR serves as a direct link to these communities and works in close coordination with other program elements to develop and deliver messages related to the availability of Federal disaster assistance.

B. Scope

This annex discusses the policies, responsibilities, and concept of operations for the CR element in a potential, imminent, or federally declared disaster.

II. Policies

A. The CR function is responsible for assessing and documenting the social, political, and cultural aspects of a disaster area that might affect the disaster response and recovery effort.

B. The CR function is designed to ensure the citizens of disaster-affected communities are aware of available Federal disaster assistance programs and how to access them.

III. Planning Assumptions

A. CR management and field officers will deploy simultaneously with other initial disaster response elements as warranted by the situation.

B. Up-to-date resource databases will be available to provide established contacts, relationships, and rosters of local government officials and appropriate community groups and organizations.

C. Current, accurate, and accessible geographic and demographic databases are readily available.

D. CR will coordinate with all elements of the Emergency Response Team (ERT) to ensure information disseminated in the field is timely and consistent.
IV. Concept of Operations

A. General

1. Preparation by Department of Homeland Security (DHS) regional staff for an anticipated or actual event will include coordinating with the affected State(s), collecting relevant information on the situation, alerting required staff, and deploying CR personnel to, or near, the affected area.

2. In coordination with other staff elements, an initial CR Plan, with disaster-specific guidance and objectives, will be prepared jointly by the CR Coordinator and the appropriate State official at the beginning of each disaster operation.

3. The CR function will be performed jointly by Federal and State personnel, when available, working to achieve the objectives specified in the CR Plan. Field teams will be organized and dispersed throughout the affected area. They will include trained Federal, State, and, if necessary, locally hired persons who know the community. The cultural, racial, and ethnic makeup of the affected population (including languages spoken) will be taken into consideration to the extent possible when making field team assignments.

4. The CR element coordinates closely with the affected State(s) to identify community leaders (e.g., grassroots, political, religious, educational, business, labor, ethnic) and neighborhood advocacy groups to assist in the rapid dissemination of information, identify unmet needs, establish an ongoing dialogue and information exchange, and facilitate collaborative Federal, State, and local planning and mutual support for disaster recovery.

B. Organization

CR is a staff element of the ERT. The CR Coordinator reports directly to the Federal Coordinating Officer (FCO). A functional organization chart is shown in Figure CR-1. Major CR functions can be expanded or streamlined to meet the needs of the disaster.

1. Community Relations Operations

The CR Operations element is responsible for organizing and managing the CR field component, which interfaces with local governments, community organizations, and disaster victims. The field component may be divided into geographic areas and sectors, depending on the size and nature of the disaster.

Area Managers are assigned to disasters that affect a large geographic area and/or have a large number of sector teams. Area Managers assist in the supervision of sector teams to maintain an appropriate management span of control and enhance day-to-day communications. Each CR sector will have an assigned Sector Manager who reports to the Field Operations Chief or Area Manager as appropriate. An appropriate number of field officers are assigned to each sector.
2. Community Relations Support

Depending on the size and nature of a disaster, the CR function may include an Information element, an Administrative/Logistics Liaison, and/or a Training Liaison. The Information element manages the timely flow of CR information to and from the FCO, the CR field component, and other Disaster Field Office sources. The Administrative/Logistics Liaison provides short-term logistics support to field officers and coordinates the long-term administrative and personnel activities of the CR function. The Training Liaison identifies training needs and provides disaster-specific orientation and training, supported by the Disaster Field Training Office.

C. Notification

In response to an anticipated or actual regional event, CR staff will be notified, activated, and deployed through the regional CR cadre manager. Regions may request additional staff through DHS Headquarters (HQ) at any time. Staff from other DHS regions and HQ may be used to augment regional CR operations in large disasters as needed.

D. Response Actions

The number of CR field officers and extent of involvement throughout disaster response and recovery operations will be governed by the CR Plan and any subsequent amendments. Specific activities and responsibilities of CR field officers will be in accordance with procedures and guidance contained in the CR Operations Manual and CR Field Operations Guide.
IV. Responsibilities

A. Primary Agency: Department of Homeland Security

1. In conjunction with the disaster-affected State, ensure an efficient and reliable flow of disaster-related information between victims and public and private organizations that provide assistance.

2. Supply the CR function with a staff of trained personnel.

3. Ensure the CR function promotes equal access to disaster assistance consistent with the Stafford Act and Title VI of the Civil Rights Act.

4. Establish and adhere to standardized procedures that provide for a consistent level of CR services to disaster victims.

B. Support Agencies

1. Department of Justice, Community Relations Service

The CR Service of the Department of Justice (DOJ), through a DHS mission assignment, can provide conciliation and mediation training and technical assistance in matters of race, color, or national origin; conflict resolution; problem solving; cultural awareness; and community tension assessments.

2. Corporation for National Service

The Corporation for National Service (CNS) is responsible for providing assistance to States and collaborating agencies to perform specific functions for disadvantaged or special-needs disaster victims. CNS, through a memorandum of understanding with DHS, can be provided a DHS mission assignment to support the CR function. CNS can provide teams of trained personnel to be strategically placed in areas of heaviest need to assist senior citizens, the physically or mentally disabled, and low-income populations. CNS includes AmeriCorps USA, Volunteers in Service to America, National Civilian Community Group, and Retired Senior Volunteer Program.

V. References

B. Community Relations Field Operations Guide.
I. Introduction

A. Purpose

This annex provides guidance on congressional liaison activities in support of the Federal Government’s response to a major disaster or emergency requiring Federal assistance. Under the Federal Response Plan (FRP), the purpose of the congressional liaison function is to coordinate the dissemination of information to Members and committees of Congress and advise agency officials of congressional concerns, anticipated congressional action, and legislative developments.

B. Scope

This annex applies to all agencies with responsibilities under the FRP.

II. Policies

A. The Department of Homeland Security (DHS) will coordinate its congressional liaison activities with other FRP agencies to ensure consistency of the “Federal message” throughout the response.

B. Staffing in support of congressional liaison activities in the field will be determined in part by the number of States and congressional districts affected.

C. Each Federal agency will designate a congressional relations specialist in Washington, DC, as required.

D. In a large-scale or catastrophic disaster, each Emergency Support Function (ESF) primary agency may deploy at the request of DHS a Congressional Affairs Representative (CAR) to the field.

III. Planning Assumptions

A. There will be immediate and continuous demand from Members of Congress for information on the impact, magnitude, and damage resulting from the disaster.

B. Initial reports of damage may be fragmented and provide an incomplete picture of the extent of the damage. This will adversely affect the ability to provide timely information to Members of Congress in the initial stages of the disaster response.

C. The State will generally be the most authoritative source of vital information regarding damage and initial response needs.
IV. Concept of Operations

A. General

1. Effective congressional liaison requires integrated and mutually supportive action by the following DHS congressional affairs staff:
   a. Congressional Relations Officer (CRO), designated by DHS. The CRO is located at DHS Headquarters (HQ) and is a member of the Emergency Support Team (EST);
   b. Congressional Liaison Officer (CLO), located with the Federal Coordinating Officer (FCO) at the Disaster Field Office (DFO); and
   c. Deputy Congressional Liaison Officer (DCLO), located in the Joint Information Center (JIC) or the Congressional Affairs Office at the DFO if necessary.

2. Integrated Federal interaction with the Congress requires a coordinated interagency congressional liaison effort:
   a. At the HQ level, the DHS CRO will conduct daily coordination sessions, if necessary, with congressional liaison staff from each Federal agency involved; and
   b. In a large-scale or catastrophic disaster, FRP primary agencies may deploy a CAR to the field at the request of DHS. Each CAR will work at the DFO under the direction of the DHS DCLO. The CAR is responsible for monitoring all Federal activities for that ESF, providing appropriate information to the affected congressional offices, and responding to incoming congressional inquiries.

B. Organization

1. National-Level Response Structure
   a. The CRO will provide congressional relations support to the Catastrophic Disaster Response Group (CDRG) and the EST. The CRO will have primary responsibility for coordinating all congressional events in the Washington, DC, area pertaining to the disaster response and recovery operations. The CRO will:
      (1) Serve as primary congressional liaison advisor to DHS HQ response officials;
      (2) Support the efforts of the congressional liaison activities in the field;
      (3) Coordinate the timing and content of information to Washington, DC, congressional offices;
      (4) Serve as a conduit for information requests received by DHS in Washington, DC, from congressional offices;
      (5) Coordinate the flow of information between DHS and the Federal response and recovery effort;
(6) Coordinate with the Washington, DC, congressional liaisons of other Federal agencies to ensure consistency of the Federal message and logistical coordination;

(7) Provide input through DHS to the White House Legislative Affairs Office on overall Federal congressional relations; and

(8) Coordinate, within DHS and among the Federal agencies, information pertaining to legislative developments (such as hearings) or background material for special legislation.

b. The DHS Office of Congressional and Legislative Affairs will serve as primary congressional liaison advisor to DHS HQ response and recovery officials. This office will:

(1) Provide logistical support to the CRO;

(2) Answer incoming inquiries from congressional offices;

(3) Assist the CRO in developing written materials for presentations and making congressional notifications; and

(4) Receive information from the CRO and electronically provide data to congressional affairs officers of the involved agencies.

2. Field-Level Response Structure

a. The CLO will deploy from DHS and will report to the FCO. Collocated with the FCO, the CLO will manage Federal congressional liaison activities in the field. The CLO will:

(1) Serve as primary congressional liaison advisor to the FCO and DHS on-site response officials;

(2) Manage congressional liaison staff and operations in the field;

(3) Serve as congressional liaison on the Emergency Response Team (ERT);

(4) Support congressional liaison activities in Washington, DC, and serve as primary contact for the HQ CRO in the field;

(5) Coordinate congressional and other dignitary trip requirements generated from both Washington, DC, and the field;

(6) Coordinate with other Federal agency personnel to ensure consistency of the Federal message;

(7) Provide information to the HQ CRO for reports to the White House Legislative Affairs Office on Federal congressional relations for the disaster response;

(8) Coordinate with the FCO in the development of policy and its impact on the congressional delegation;
(9) Serve as a base for background information on Members of Congress and their previous experiences with the Federal agencies during disasters; and

(10) Develop strategies for the FCO on issues and impediments regarding the delivery of Federal programs during disasters.

b. The DCLO will report to the CLO. The DCLO will establish operations at the discretion of the FCO or CLO in either the JIC or the Congressional Affairs Office in or near the disaster area and will:

(1) Manage Federal congressional liaison operations for the CLO;
(2) Monitor events in the JIC and DFO to keep the CLO current;
(3) Ensure prompt notification to congressional offices of significant events, including coordinating the timing and content of information;
(4) Serve as a conduit for information requests received by DHS in the field from congressional offices; and
(5) Manage inquiry and notification tracking systems.

c. In a large-scale or catastrophic disaster, a CAR may be deployed if necessary by each ESF primary agency to the disaster site. (The DCLO will interface with ESF #5 — Information and Planning.) Each CAR will report to the DCLO. The CAR will:

(1) Monitor the activities of the primary and support agencies of the CAR’s ESF;
(2) Make congressional notification calls, in conjunction with the DCLO;
(3) Respond to congressional inquiries pertaining to ESF areas of responsibility; and
(4) Provide support and congressional feedback to the DCLO.

C. Response Actions

1. Headquarters Level

a. Congressional Relations Officer

(1) Initial Actions

(a) Establish immediate priorities based on information about the extent and impact of damage, State request(s) for assistance, the scope of Federal efforts, congressional offices representing the affected area, and staffing of response operations at DHS HQ, the DFO, and other field locations in conjunction with the DHS Office of Congressional and Legislative Affairs.
(b) Establish a system for keeping the DHS Office of Congressional and Legislative Affairs informed on issues and the progress of response and recovery operations.

(c) Establish contact with congressional offices representing affected areas to provide information on the DHS mission and activities, the Federal-State relationship in recovery operations, and where to obtain information on Federal activities and the daily congressional briefing.

(d) Provide profiles of Members and feedback from contacts with congressional offices to the EST Director.

(e) Establish and monitor tracking systems for open requests from congressional offices and blanket notifications.

(f) Serve as contact with HQ CROs from other Federal agencies and maintain channels of communication through daily meetings and conference calls.

(g) Organize an initial interagency congressional briefing within 18 hours of the event and conduct daily briefings thereafter. (Briefings need not be open to the press.) The target audience is Members and staff from any congressional office representing the affected area, and staffs from committees for appropriations, disaster relief, and authorization.

(h) Work with agency Public Affairs Officers (PAOs), including actions such as obtaining all press releases and schedules of JIC press conferences, exchanging pertinent response and recovery information, etc.

(2) Continuing Actions

(a) Coordinate Federal information to support legislative initiatives.

(b) Present information to committee staff through the Director, DHS Office of Congressional and Legislative Affairs, in support of agency legislative requests.

(c) Arrange field trips for Members of Congress and staff. Coordinate with the CDRG, EST Director, congressional liaisons from other Federal agencies, DHS Office of Emergency Information and Media Affairs, and DHS CLO.

(d) Conduct daily conference calls and/or briefings with congressional liaisons of other Federal agencies to review notifications and developments (field and HQ) of the past 24 hours, coordinate congressional interagency briefings, and identify information needs, including congressional requests for testimony or legislative technical assistance.
(e) Conduct briefings for Members of Congress and their staffs as required.

(f) Coordinate summary reports of Federal congressional relations activities for the White House Legislative Affairs Office.

(g) Manage the flow and timing of release of congressional affairs information between HQ and the DFO.

b. Office of Congressional and Legislative Affairs

(1) Initial Actions

(a) Compile lists (e.g., telephone, fax, Internet, address) of congressional offices representing the area affected by the disaster.

(b) Make logistical arrangements for daily congressional briefings on Capitol Hill.

(c) Verify list of Federal agency personnel assigned to perform disaster recovery congressional relations.

(d) Collect information to communicate to the field (e.g., biographies of Members, maps of congressional districts, historical data on districts).

(2) Continuing Actions

(a) Distribute information to CLOs in the field (DHS and other Federal agencies).

(b) Track, respond to, and/or assist in congressional inquiries and notifications.

(c) Attend JIC press conferences.

(d) Maintain constant communications with the CLO, DCLO, CRO, and DHS Office of Emergency Information and Media Affairs to ensure timely exchange of information.

2. Field Level

a. Congressional Liaison Officer

Initial and continuing response actions of the CLO include:

(1) Obtain information on impact of disaster, damage assessments, State requests for assistance and areas requested, anticipated Federal response and agencies involved, immediate problems and priority issues, logistical information on the JIC and DFO operations, etc.;

(2) Discuss with the FCO congressional priorities and congressional involvement to date, CRO operations, expected level of involvement by the FCO in congressional matters, etc.;
(3) Contact and work with the DHS CRO, PAO on site, regional congressional point of contact, and congressional offices representing the affected area;

(4) Develop an operations plan to cover priorities, staffing (including the DCLO’s role in the JIC/DFO), and a daily strategy for proactive congressional liaison;

(5) Establish and monitor systems to obtain information for Members of Congress, track incoming congressional inquiries and notifications, and determine reporting requirements;

(6) Meet with the DCLO and ESF CARs to review congressional relations strategy, operations, etc.;

(7) Within 18 hours of setup and with the participation of the FCO, conduct an initial briefing of Members of Congress and their staffs on the Federal role, Federal-State relationship, what can be expected from the Federal Government, and the role of the congressional offices in recovery. Include priorities, accomplishments to date, anticipated actions, Federal-State-local operations, process for accepting donations, contact for 24-hour notification, etc.;

(8) Provide to the FCO summaries on Members affected (including expected level of their involvement), impact on their districts and other significant issues, biographical sketches of Members (including their affiliation, term in office, major committee assignments and leadership positions, and location of district offices);

(9) Maintain logs of CLO/DCLO actions and provide summary information to the FCO and DHS HQ;

(10) Schedule daily coordination meetings with the PAO and attend FCO meetings with other Federal agencies (including ERT meetings);

(11) Develop itineraries and coordinate logistics with FCO staff, other Federal agency representatives, State staff, and the PAO in preparation for visits by Members and staffs; and

(12) Monitor rumor control activities and outreach feedback and take appropriate action.

b. Deputy Congressional Liaison Officer

Initial and continuing response actions of the DCLO include:

(1) On arriving at the disaster scene, contact the CLO to be briefed on all aspects of the operation to date, strategies, procedures, etc.;

(2) Set up operations in the JIC or Congressional Affairs Office as directed by the CLO, ensuring space and equipment are ready for operations;
(3) Develop a plan of operations (including priorities, staffing, the DCLO’s role in the JIC or Congressional Affairs Office, congressional follow up resulting from JIC conferences, etc.);

(4) Develop procedures to obtain public information as soon as it is cleared by the JIC, as well as “canned” and new information developed by Federal agencies;

(5) Establish and maintain a tracking system for congressional inquiries and notification, log of CLO actions taken, filing system (by Member) to collect information for use in profiles and background, etc.;

(6) In coordination with the CAR(s) and Deputy PAO, prepare timely factsheets for use by Members’ offices; and

(7) Prepare summary reports and submit daily to the CLO.

c. **Congressional Affairs Representative**

Initial and continuing actions of agency CARs include:

(1) Supporting the DCLO in establishing priorities, preparing notification statements for DCLO approval, making congressional notification calls, providing feedback on congressional reaction, etc.;

(2) Establishing contact with operational staff or ESF agencies and monitoring ESF activities;

(3) Maintaining input to congressional inquiry and notification tracking systems; and

(4) Responding in a timely fashion to congressional inquiries pertaining to the ESF of responsibility.
I. Introduction

A. Purpose

This annex provides guidance on the Federal role in Donations Management in a major disaster or emergency. Any reference to donated goods and services in this annex means unsolicited goods and unaffiliated volunteer services.

1. State and local governments have primary responsibility for the management of unsolicited goods and unaffiliated volunteers.

2. The Federal Government supports State and local governments and voluntary organizations in establishing a system to manage and control donated goods and services. The system will provide a method for any potential donor to consult and negotiate with donations specialists prior to the collection and sending of goods and volunteers.

B. Scope

This guidance applies to all agencies with direct and indirect donations responsibilities under the Federal Response Plan (FRP).

II. Policies

A. Full use of existing voluntary organization Donations Management resources is encouraged before the assistance of the Federal or State governments is sought.

B. The role of the Federal Government is always in support of the disaster-affected State and local governments. State and local governments, in coordination with Voluntary Organizations Active in Disaster (VOAD), are ultimately in charge of Donations Management.

C. Federal and State governments look principally to those voluntary organizations with established donations structures already in place to receive and deliver appropriate donated goods to disaster victims.

D. Necessary response activities for Donations Management that may be undertaken by the Department of Homeland Security (DHS) before a Presidential declaration will be closely coordinated with State officials.

E. The Federal Government encourages cash donations to recognized nonprofit voluntary organizations with disaster experience.
F. The Federal Government encourages individuals interested in volunteering their personal services to affiliate with a recognized nonprofit voluntary organization to facilitate their involvement in disaster relief activities.

III. Planning Assumptions

A. Donations Management response activities are necessary before a Presidential disaster declaration and hence require rapid coordination to mitigate potential donations problems in the response phase of disaster operations.

B. In the event of a disaster causing large-scale loss of life and destruction of property, donors (domestic and foreign) will offer assistance of virtually any kind, including cash, goods, equipment and loan of equipment, and the services of individuals.

C. Offers of assistance will be made directly to all levels of government — Federal, State, and local — as well as to voluntary organizations.

D. In less-than-large-scale or “high-visibility” disasters, Donations Management will be handled by voluntary organizations with or without Federal or State involvement.

IV. Concept of Operations

A. General

1. Management of donations requires a cooperative effort by Federal, State, and local governments; voluntary and community-based organizations; the business sector; and the media.

2. DHS supports the State Donations Coordinator and voluntary organizations. The affected State and local governments, in conjunction with their voluntary organization partners, are in charge of developing Donations Management plans and managing the flow of goods and services during disaster response and recovery operations.

3. Federal support provided by DHS (as the Federal coordinating agency for Donations Management) and other Federal agencies may include:
   a. Enhanced voluntary organization coordination;
   b. Assistance in establishing a Donations Coordination Team and a Donation Coordination Center;
   c. Technical and managerial support;
   d. A national network of information and contacts to assist donations specialists in the field; and
   e. Donations Management software and communications support as necessary.
B. National-Level Responsibilities

1. Department of Homeland Security
   a. Make early contact with the key Donations Coordinators of the national voluntary organizations and the affected region for donations situation assessment.
   b. Based on the affected region’s request for assistance, provide donations program guidance, a Donations Coordinator, and other assistance as appropriate.
   c. Continue to provide support and assistance to the field, especially regarding international offers of assistance, large corporate offers, or politically sensitive collection drives.
   d. With the appropriate Federal agencies, coordinate international offers of assistance that meet acceptance criteria established by the affected State and DHS.
   e. DHS/U.S. Customs Service, in coordination with the EST donations specialist and the Department of State, Office of Diplomatic Contingency Programs (DOS-A/DCP), expedite the entry of approved donated items into the United States.
   f. DHS/Immigration and Naturalization Service, in coordination with the Emergency Support Team (EST) donations specialist and DOS-A/DCP as necessary, expedite the entry of approved individuals into the United States.

2. Department of State
   The DOS-A/DCP serves as the conduit to all American embassies and consulates worldwide, providing them with information on DHS, State, and voluntary organization policies and procedures on donated goods and services.
   a. As required, coordinate all actions and special issues with related agencies (e.g., Agency for International Development, U.S. Information Agency) concerning foreign offers of assistance and special requirements.
   b. Serve as the coordinating agency on DOS actions for domestic disasters under the FRP.
   c. Inform the EST donations specialist of offers being made by foreign governments and provide assistance as necessary.
   d. Coordinate with the EST donations specialist to ensure all foreign donors receive acknowledgment of the assistance they provide.

C. Regional-Level Responsibilities

1. Department of Homeland Security
   a. On establishment of a Regional Operations Center, the region designates a point of contact (POC) for donations at that facility.
b. At the State Emergency Operations Center (EOC), other State facility, or Disaster Field Office, the DHS Donations Coordinator assists the State Donations Coordinator as needed in:

1. Establishing a Donations Coordination Team;
2. Setting up a Donation Coordination Center, including a donations hotline;
3. Ensuring the appropriate donations receiving and distribution facilities are established and operating effectively;
4. Coordinating with DHS-State Emergency Information and Media Affairs staff on public service announcements, press releases, and other media-related support;
5. Coordinating with DHS Voluntary Agency Liaison (VAL), congressional affairs, community relations, logistics, Defense Coordinating Officer, and other Federal agencies as necessary; and
6. Preparing input for situation reports, briefings, and VIP visits as necessary.

2. **Department of Transportation**
   a. Arrange for transportation as necessary.
   b. Provide information on transportation routes.
   c. Provide guidance and support on transportation rules, regulations, and requirements as needed.

3. **Department of Defense**
   Provide logistical support and other resources as needed and available.

4. **General Services Administration**
   Provide equipment, supplies, services, and facilities as needed.

V. **Reference**

The Donations Management Guidance Manual (DHS 278) includes information on preparedness and planning, checklists, standard operating procedures, Donations Management flow diagrams, public information materials, and voluntary organization POCs.

VI. **Terms and Definitions**

A. **Donation Coordination Center**

Facility from which the Donations Coordination Team operates. It is best situated in or close by the State EOC for coordination purposes. It must have enough rooms for a telephone bank, processing by team members of calls from prospective donors, and negotiating the shipping and receiving of needed items.
B. Donations Coordination Team

A Donations Coordination Team comprises representatives of voluntary organizations and State and local governments who have a vested interest in the effective management of unsolicited donated goods and voluntary services. The team is managed by the State emergency management agency. Its mission is to implement the State Donations Management Plan, with the goal of keeping unneeded goods and services out of the disaster area.

C. DHS Voluntary Agency Liaison

Each DHS region and DHS offices in Hawaii and Puerto Rico have a DHS VAL. There is also a VAL at the National Emergency Training Center in Emmitsburg, MD. The VAL is responsible for providing advice on voluntary organization coordination and assisting States in developing State VOAD. In disaster operations, the VAL assists the local leadership in convening broad-based meetings at which voluntary organizations, DHS, and the State share information about the status of response and recovery activities.

D. In-Kind Donations

Donations other than cash (usually materials or professional services) for disaster survivors.

E. National Voluntary Organizations Active in Disaster

National Voluntary Organizations Active in Disaster (NVOAD) is the umbrella organization of established and experienced voluntary organizations that provide disaster services in all phases of emergency management. NVOAD fosters cooperation, communication, coordination, and collaboration among voluntary organizations. It also encourages close working partnerships among voluntary organizations and government at all levels. It is not operational as an organization.

F. Unaffiliated Volunteer

Also known as a “spontaneous” or “emergent” volunteer; an individual who is not formally associated with a recognized voluntary disaster relief organization.

G. Undesignated Goods

Largely unsolicited, donated items that are not addressed to a specific recipient.

H. Unsolicited Goods

Donated items that have not been requested by government officials, voluntary disaster relief organizations, or other donations-related personnel.

I. Voluntary Organizations Active in Disaster

VOAD is a coalition of voluntary organizations organized at State and local levels. In non-disaster periods, it meets to discuss emergency management issues and encourage cooperation, communication, coordination, and collaboration among voluntary organizations. In the response period, each individual organization functions independently, yet cooperatively.
This page intentionally left blank.
Financial Management
Support Annex

I. Introduction

A. Purpose

This annex provides basic financial management guidance to Federal departments and agencies that respond to a major disaster or emergency under the provisions of the Federal Response Plan (FRP). Its intent is to ensure funds are provided expeditiously and financial operations are conducted in accordance with established law, Federal policies, regulations, and standards.

B. Scope

This annex is applicable to all Federal agencies with responsibilities under the FRP.

II. Operating Assumptions

The financial management organization and operations described in this annex are based on the following assumptions:

A. Expenditures from the Federal Disaster Relief Fund (DRF) may be required. To ensure proper accountability of these funds, Federal financial principles, policies, regulations, and management and internal controls will be applied;

B. Under the provisions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the President may direct any Federal agency, with or without reimbursement, to use the authorities and resources granted to it under Federal law (including personnel, equipment, supplies, facilities, and managerial, technical, and advisory services) in support of State and local assistance efforts;

C. Upon the occurrence of an event that results in a Presidential major disaster or emergency declaration, funding may be made available from the DRF; and

D. Federal agencies will be reimbursed for eligible work or services performed under a mission assignment (MA) issued by the Department of Homeland Security (DHS).

III. Responsibilities

A. Department of Homeland Security Chief Financial Officer

1. The DHS Chief Financial Officer (CFO) serves as the senior Federal financial official under the FRP. The CFO’s responsibilities are to:

   a. Oversee all financial management activities relating to the operations of the DRF to ensure sound financial management practices and standards are applied;
b. Coordinate DHS’s requests for disaster funding with the Office of Management and Budget (OMB) and Congress, ensure adequate funding levels are maintained to meet projected expenditures for specific disaster declarations, and ensure all funds expended from the DRF are in accordance with generally accepted accounting principles for Federal agencies, the General Accounting Office (GAO) Policy and Procedures Manual, Title 2 and Title 7, the Government Accounting Standards Board, and Federal Accounting and Standards Advisory Board, as well as Treasury Department procedures and guidelines; and

c. Serve as the primary advisor to the Chairman of the Catastrophic Disaster Response Group (CDRG) on financial matters involving the DRF and keep the CDRG informed on the status of funds made available for the disaster operation.

2. The CFO will appoint a Comptroller from a cadre of qualified individuals to oversee Disaster Field Office (DFO) financial operations.

3. The CFO will ensure expeditious processing of all documented requests for reimbursement from Emergency Support Function (ESF) primary agencies; ESF support agencies whose bills are submitted through, and approved by, the primary agency; and other agencies tasked directly by DHS.

4. The CFO will apply proper financial principles, policies, regulations, and management and internal controls for the expenditure of funds appropriated to the DRF.

B. Comptroller

1. To further strengthen financial controls over DHS disaster activities, the Comptroller function was established. The Comptroller will serve as the senior financial advisor to the Federal Coordinating Officer (FCO) and will be accountable to the CFO for financial management and reporting. The Comptroller also may be deployed to the Regional Operations Center (ROC) before the DFO opens.

2. The Comptroller’s responsibilities include but are not limited to:
   a. Timely processing of funding requests (Requests for Allocations);
   b. Preparing Requests for Allocation Advice;
   c. Working with DHS program staff to ensure adequate funding levels are maintained to meet expenditures;
   d. Monitoring expenditures, including tracking funds at object and subobject code levels; tracking and reporting commitments, obligations, and disbursements against the disaster-specific fund from not only the DFO but also any other site; reviewing each commitment to ensure proper expenditure of funds;
   e. Reporting funding activity to the FCO/Disaster Recovery Manager (DRM) and CFO on a regular basis;
   f. Providing policy guidance to the FCO/DRM and his or her staff;
g. Managing the financial oversight of DHS disaster response and recovery activities; and

h. Providing the FCO/DRM with the necessary expertise and authority essential for effective fiscal management of expenditures from initial disaster response activities to closure of the DFO.

3. Functions under the Comptroller’s purview include fund control activities; financial document control; mission assignment reviewing, processing, and tracking; travel; and acquisition.

C. Department of Homeland Security Regional Director

1. The DHS Regional Director (RD) of an affected region serves as the financial official responsible for stewardship of DHS funds for a specific State’s disaster or emergency situation.

2. The RD’s responsibilities are to:

   a. Ensure administrative control of the DRF. The existing regional financial processing unit supports disaster financial operations prior to the establishment of a DFO;

   b. Prepare budget estimates for disaster funding requirements and request allocation of funds; and

   c. Authorize the commitment, obligation, and payment of funds provided under the provisions of the Stafford Act.

3. The RD may delegate authority to the FCO/DRM to carry out the responsibilities of the RD.

4. After the DFO closes, the RD may revoke his or her delegation of authority to the FCO/DRM and resume performance of the financial management responsibilities vested in the FCO/DRM.

D. Federal Coordinating Officer/Disaster Recovery Manager

The FCO/DRM is delegated authority by the RD to exercise the authority vested in the RD for a major disaster or emergency. Therefore, all of the financial authorities vested in the RD are vested in the FCO/DRM. The FCO/DRM can delegate authority for approval of specific financial management transactions to other DHS officials.

1. The FCO/DRM is responsible for project management, which may be delegated to designated Project Officers. For procurement of equipment and supplies, the Logistics Section will provide Project Officers, unless otherwise agreed on between the Logistics Section Chief, the Comptroller, and the mission-assigned agency.
2. DHS officials who are delegated MA signature authority are referred to as Federal Approving Officials (FAOs). In addition, every MA has a designated Project Officer who is responsible for performing project management responsibilities on behalf of the FCO/DRM.

E. Department of Homeland Security Office of Inspector General

The DHS Office of Inspector General’s (OIG’s) responsibilities are to:

1. Assist the FCO in preventing and detecting fraud, waste, and abuse;
2. Serve as the point of contact (POC) with other Federal, State, and local law enforcement agencies on law enforcement matters;
3. Ensure the integrity of delivery of disaster assistance;
4. Respond to, and investigate allegations of, fraud and other criminal activity affecting DHS; and
5. Recommend to the OIGs of other agencies audits of agency performance and financial management of MAs.

F. Other Federal Agencies

1. Other Federal agencies providing disaster assistance under their own authorities independent of the Stafford Act are to use their own funding.
2. Other Federal agencies providing assistance under the Stafford Act via MAs may seek reimbursement from DHS for eligible costs incurred during performance of the mission.
3. The General Services Administration (GSA) may function as a procurement agent to obtain goods and services for Federal agencies other than DHS. In these cases, GSA arrangements are independent of DHS and all obligations incurred for goods and services for other Federal agencies will be billed directly to the ordering agency. Other Federal agencies should request reimbursement from DHS only after receipt of a bill.
4. Other Federal agencies receiving reimbursement from DHS for goods and services furnished under the provisions of the Stafford Act are to record such funds to the appropriation used to cover the expenditure.
5. Each ESF primary agency, in conjunction with its support agencies, should advise the FCO/DRM of the amount and distribution of funding required in support of the ESF.
6. Each ESF primary agency is responsible for tasking support agencies by completing a subtasking document that describes the work to be performed, estimates date of completion, and establishes a funding limitation. The ESF primary agency is responsible for monitoring the work progress of a subtasked support agency and
approving the request for reimbursement submitted by the support agency, through the primary agency, to DHS.

7. Each ESF primary agency should review all requests for reimbursement for goods and services from subtasked agencies. The ESF primary agency Project/Program Administrator will certify to DHS that the expenditures claimed have been reviewed and are relevant to the mission assigned, and that costs are reasonable and supported by documentation.

8. Each Federal agency involved is responsible for:
   a. Maintaining documentation to support requests for reimbursement;
   b. Notifying DHS when a task is completed;
   c. Submitting partial or final reimbursement requests within 90 days of completing a task. Final bills should be marked “Final”;
   d. Providing monthly status reports to DHS;
   e. Identifying a staff-level POC for financial coordination with the Office of Financial Management/Disaster Finance Center (OFM/DFC), and identifying a headquarters (HQ)-level POC for billing and reimbursement issues that cannot be resolved at the staff level; and
   f. Applying proper financial principles, policies, regulations, and management and internal controls to ensure full accountability for the expenditure of DRF funds.

G. Certifying Officer

A certifying officer is an individual designated in writing with responsibility and authority to verify that payments are legal, proper, and credible. A certifying officer is accountable for and may be required to personally reimburse the Federal Government for any illegal or otherwise improper payment made because of his or her inaccurate certification to a disbursing officer. In accordance with 31 U.S. Code (U.S.C.) 3528, the ESF primary agency, in consultation with its support agencies’ Project/Program Administrators, will be held accountable for the computations and supporting records for reimbursement requests for goods and services performed under an MA issued by DHS. Any illegal, improper, or incorrect reimbursement resulting from a false, inaccurate, or misleading certification will be resolved in accordance with guidance from GAO.

IV. Concept of Operations

A. Disaster Field Office

Upon issuance of a disaster declaration, a Comptroller will be deployed to the site to immediately begin overseeing policies and procedures for financial management and internal controls. The operations and functions in the Comptroller’s Office will include:

1. The Comptroller, who is accountable to the CFO for financial management and reporting of DRF activities;
2. The Finance Branch Chief/Deputy Comptroller, who will report to the Comptroller and oversee the Finance Office. Duties include supervising the Comptroller’s staff, providing the Comptroller with financial reports, ensuring the timely processing of funding requests, establishing and maintaining a system to accurately track and monitor financial documents, and ensuring adherence to DHS and other Federal financial policies, procedures, and regulations;

3. The Funds Control Group, which will process funding requests (Requests for Allocation) on a timely basis; monitor commitments, obligations, and expenditures; track funds; monitor program funding levels; identify trends in commitments and obligations; report funding activity; and inform program points of contact on the status of funding levels. The group will notify program managers when funding increases are necessary and coordinate the increase with OFM;

4. The MA Group, which will coordinate MAs, process Requests for Federal Assistance (RFAs), identify costs associated with direct Federal assistance, obtain approvals, and track and process financial documentation required for monitoring expenditures, including the tracking of funds at object and subobject code levels. The MA Group also will be responsible for providing pertinent financial documentation and information to the OFM/DFC to allow timely reimbursement of invoices and the coordination of State cost-share billings;

5. The Travel Group which will prepare travel vouchers using the Travel Manager System, perform quality assurance reviews, and transmit travel information to the OFM/DFC; and

6. The Acquisition Group, which will be responsible for Disaster Contracting and Disaster Grants Management. Contracting responsibilities include the full range of preaward and award functions in support of Regional Contracting Officers. Grants management responsibilities include establishing consistent practices and providing guidance regarding grants management.

B. Emergency Support Team

The designated Finance Branch Chief is the CFO’s representative to the Emergency Support Team (EST) and serves as the liaison between the EST and DHS. The Finance Branch Chief provides the EST Director with the necessary expertise and authority essential for effective fiscal management of expenditures from the DRF during initial disaster response activities.

C. Disaster Finance Center

The OFM/DFC, located in Berryville, VA, will:

1. Process all DRF payments;

2. Serve as the POC for inquiries relating to bill processing and payments;
3. Receive and review bills prior to processing payments to ensure proper documentation supports the expenditures claimed;

4. Initiate chargebacks to DHS’s account for On-Line Payments and Collections (OPAC) system payments that are not supported with documentation;

5. Perform periodic reviews of open obligations to ensure accuracy and timeliness;

6. Provide financial management reports on DRF activities;

7. Track emergency aid (identified on the RFA) and bill the State cost-share portions; and

8. Track and initiate closeout procedures for each MA.

V. **Funding**

A. **Reimbursable Budget Authority**

1. FRP agencies may submit to OMB an annual estimate of the amount of reimbursable budget authority required to carry out their responsibilities under the Stafford Act. The Stafford Act authorizes reimbursement for the delivery of interagency work or services to provide disaster assistance. Eligible expenses incurred in the execution of MA issued under the authority of the Stafford Act should be charged to the other Federal agency’s reimbursable account. Agencies will request reimbursement from DHS.

2. When DHS issues an MA to provide goods and services in support of Federal, State, and local assistance efforts, it has incurred an obligation. As work is completed, agencies should request reimbursement for goods and services rendered.

3. An interagency agreement is the funding mechanism used between agencies to provide goods and services on a reimbursable basis. Under the Stafford Act, the interagency agreement is referred to as an MA and is executed using an obligating document called an RFA. MAs are similar to interagency agreements, except they are exempt from the Economy Act and are governed by the Stafford Act.

B. **Department of Homeland Security State Agreement**

Federal funding to a State will be authorized under the individual DHS-State Agreement and passed to the State by electronic funds transfer through the Payments Management System (PMS) operated by the Department of Health and Human Services (HHS). After DHS enters the authorized amount in the HHS PMS, the recipient State requests the funds transfer via computer communications to HHS. This DHS payment process is commonly referred to as “SmartLink” and is administered by OFM.
C. Cost Projections for Funding Requirements

Cost projections strengthen financial management of the DRF and determine funding requirements. The projections do not represent a request for budget authority for the respective agencies.

1. After initial response operations begin, DHS organizations and ESF primary agencies, in consultation with support agencies, will estimate their total funding requirements for the duration of disaster operations.

2. The process of developing these projections should begin with the lowest operational level (i.e., DHS program/administrative staff and ESF agencies in the field) and build upward. Agency officials operating closely with State officials and the FCO/DRM will have the best insight into the demands for Federal assistance. Cost projections for the field will be forwarded to the DHS CFO, where HQ-level resource requirements may be added. Any unresolved issues regarding resource estimates will be presented to the CDRG for discussion and recommendations.

3. Cost projections for funding of disaster operations in the field must be developed by State (for a multi-State disaster), by ESF, by agency, and by major object class, if known (as described in OMB Circular A-11, Preparation and Submission of Budget Estimates (Part 1)).

VI. Financial Controls, Guidance, and Organization

A. General

Timely financial support for response activities is crucial in saving lives and protecting property. Expeditious means will be employed to provide financial management support to achieve operational objectives. Agencies are responsible for developing and maintaining a cost-effective system of management controls to ensure Federal Government activities are managed effectively, efficiently, economically, and with integrity to prevent fraud, waste, and abuse.

B. Management Controls and Automated Systems

1. When entrusted with or statutorily made responsible for public funds, Federal Government employees are, in effect, trustees for the taxpayers. These “accountable officers” include authorized certifying officers, civilian and military disbursing officers, collection officers, and other employees who by virtue of their employment are responsible for or have custody of Federal Government funds. These officials are personally liable for the loss or improper payment of the funds for which they are accountable. They will ensure all bills are properly documented when recommending approval/disapproval of expenditures from the DRF.

2. Each ESF primary agency is responsible for establishing effective administrative control of funds and segregation of duties for proper management controls. A responsible official of each agency should be designated as the Project/Program
Administrator to ensure actions taken and costs incurred are consistent with the MAs issued by DHS. These same officials validate requests to DHS for reimbursement of eligible expenditures.

3. Special care must be taken throughout the disaster operations to maintain logs, formal records, and file copies of all expenditures from the DRF to provide accountability and justification for reimbursement.

C. Financial Organization at Department of Homeland Security Headquarters

1. The CFO will provide financial management support to the field. When the EST is activated to support a disaster, the CFO will appoint a representative to serve on the EST.

2. The CFO will serve as the financial POC for the Chairman of the CDRG, providing advice on financial management relating to the disaster.

D. Financial Organization in the Field

1. The CFO’s office provides financial management support to the field.

2. As the CFO’s on-site representative at the DFO, the Comptroller will provide the FCO the necessary expertise and authority essential for effective fiscal management and will provide financial policy guidance to primary and support agencies at the DFO.

3. DHS personnel rostered for financial positions on the Emergency Response Team are activated and deployed to the DFO to support financial management operations.

4. Federal agencies performing work under the Stafford Act must be prepared to process financial transactions in support of their own operations. Whether other Federal agency financial transactions are processed at the DFO or another location, the agency should designate a financial liaison to the DFO. The liaison should be a financial management professional or someone knowledgeable of the agency’s financial operations. A financial liaison will ensure expeditious dissemination of financial guidance and information.
VII. *Reimbursement of Federal Agencies*

A. **General**

Under the statutory authority of the Stafford Act, MAs to other Federal agencies provide the authority to perform work, provide services, and acquire materials, within a funding limitation, on a reimbursable basis. Agencies can request reimbursement for eligible expenditures from DHS. All requests for reimbursement must contain adequate documentation to support expenditures being reimbursed. All requests for reimbursement will be processed by the OFM/DFC.

B. **Mission Assignments**

After the occurrence of any event that may result in a declared major disaster or emergency requiring Federal assistance, DHS may selectively task some or all of the ESFs of the FRP. When an ESF is tasked to do work, an MA is issued to the primary agency with a funding limitation and the requirements for the task(s) to be performed. DHS also may task agencies directly for work outside the scope of the ESFs.

1. MAs are work orders to other Federal agencies directing performance of specified tasks. Predeclaration authority for MAs at HQ resides with the Secretary of DHS and in the regions with the Regional Director. Upon activation, MA authority may be delegated to the EST and RST Director. Upon declaration, the RD appoints a DRM, usually the FCO. The vehicle used to obligate funds for disaster relief to other Federal agencies for authorized expenditures is the RFA.

2. Separate MAs should be issued for the three basic forms of emergency aid, i.e., direct Federal assistance, Federal operations support, and technical assistance. To allow for the proper accounting requirements associated with the cost-share program, the RFA should be marked with the appropriate form of emergency aid, the date and time of receipt of request, and should designate the percentage of State cost-share. Federal agencies should break down the charges indicating the specific county(ies) where the work was actually performed. No county breakout is needed if a cost-share waiver has been extended stipulating 100 percent Federal funding for all the affected counties. The DHS Project Officer will notify agencies if the county breakout is required.

3. ESF primary agencies may subtask support agencies as necessary to accomplish these tasks. The primary agency will alert its support agencies that their assistance may be required. If a primary agency decides that the services of a support agency are needed in accordance with the requirements of the Stafford Act, the primary agency issues a subtasking document with a funding limitation to the support agency.

4. Federal agencies may provide disaster assistance under the provisions of an MA. However, as a State becomes capable of resuming its own disaster operation responsibilities, MAs may be terminated and the work continued by the State. The State may file a claim with DHS.
5. Agencies tasked by DHS will submit monthly progress reports to DHS, including cost data when an MA takes more than 60 days to complete. The status report will include the status of the work being performed, status of the MA obligation amount, total obligations against that amount, projected expenditures, and the anticipated/actual completion date. Agencies should submit the last bill, marked “Final,” no later than 90 days after completion of the MA.

6. The Project Officer will monitor the work in coordination with the tasked agency. DHS may determine to discontinue the MA at any time by written notification to the tasked agency, specifying a termination date and requesting a final billing, accompanied by an MA transmittal form marked “Final.”

7. DHS will reimburse Federal agencies for eligible costs associated with providing assistance under an MA, and will collect the State cost-share portion of the costs when applicable. Payments to vendors by other Federal agencies should be made to comply with the Prompt Payment Act. Interest penalty payments are the responsibility of the other Federal agency and only will be reimbursed when caused by DHS.

C. Expenditures Eligible for Reimbursement

1. Policies and procedures for reimbursement of other Federal agencies are described in DHS regulations 44 Code of Federal Regulations (CFR) 206, Subpart A, Section 206.8. Paragraph C of this section specifically states which costs are eligible for reimbursement. The Secretary, DHS, or RD may approve the reimbursement of costs that are contained in this paragraph.

2. In accordance with 44 CFR 206, Subpart A, Section 206.8, Paragraph C, regular labor for permanent Federal agency personnel and overhead costs are not eligible for reimbursement, except when the costs incurred would normally be paid from a trust, revolving, or other fund.

   a. Agencies that qualify and may be seeking reimbursement for overhead must submit certified annual overhead rate proposals to the OFM/DFC for approval prior to requesting reimbursement. OMB Circular No. A-87, Cost Principles for State, Local, and Indian Tribal Governments, will be used as a guideline for these proposals.

   b. The Financial Manager of the agency requesting reimbursement of either regular labor of permanent Federal agency personnel or overhead costs must provide written certification with the bill, stating that costs would normally be paid from a trust, revolving, or other fund.

   c. Cost of Federal assistance provided by agencies performing work pursuant to disaster assistance authorities independent of the Stafford Act are not eligible for reimbursement.
D. Methods of Reimbursement

The preferred methods for reimbursing Federal agencies are Treasury’s OPAC system and electronic funds transfer.

E. Reimbursement for Property

Agencies providing support under the authority of the Stafford Act will account for personal property in accordance with the requirements contained in the Logistics Management Support Annex to the FRP. Management controls for the procurement of personal property should provide reasonable assurance that:

1. Obligations and costs are in compliance with applicable laws;
2. Funds, property, and other assets are safeguarded against fraud, waste, loss, or unauthorized use; and
3. Expenditures in support of agency operations are properly authorized and recorded to maintain accountability over the assets.

F. Reimbursement Requests and Closeout

1. To ensure fiscal accountability and improve the accuracy of the DRF, agencies may submit bills on a monthly basis regardless of the billing amount. Agencies may submit a series of partial bills or one final bill; however, agencies should submit a final bill no later than 90 days after completion of the MA, or upon written notification from DHS that the MA is terminated. If no further requests for reimbursement are forthcoming, the agency must submit a letter stating such.
2. Separate reimbursement requests are required for each individual MA. Requests for reimbursement for amendments to the original MA may be consolidated because they relate directly to the initial tasking. Agencies may use computer-generated spreadsheets if all required data elements are incorporated in the spreadsheet. Agencies should submit proposed spreadsheets to the OFM/DFC and receive prior approval for use as a reimbursement document.
3. Requests for reimbursement must identify the disaster and MA number and break down charges by major object class. Agencies may be asked to provide invoices, receiving reports, timesheets, travel vouchers, and contracts to support labor costs, overtime, equipment, and similar charges. If regular time and overtime labor are billed, they should be identified separately on the invoice by either object class or description.
4. Requests for reimbursement for the three forms of emergency aid (direct Federal assistance, Federal operations support, and technical assistance) must be separated and reported by costs. Federal agencies should indicate date, time, and address (county) where work was performed for DHS to accurately bill the States for their cost-share portion.
5. Requests for reimbursement will be submitted by the ESF primary agency. The ESF primary agencies will receive and review requests for reimbursement from all sub-tasked agencies. ESF primary agency program officials will ensure bills are properly documented and recommend approval/disapproval according to whether the activity was properly authorized, goods were received, and services were provided. Approval is assurance that the expenditures claimed have been reviewed and are relevant to the MA, that the costs are reasonable and supported by records maintained by the respective agencies, and that the primary agency agrees that DHS should make payment to the support agency from the original obligation to the primary agency.

6. ESF primary agencies will return all disapproved requests for reimbursement with supporting documentation to the subtasked agency. Reasons for return will be noted on or attached to the reimbursement request. Primary agencies will forward all approved requests for reimbursement with supporting documentation to the OFM/DFC for payment and notify the subtasked agency of the disposition.

The mailing address for the OFM/DFC is:

DHS
Office of Financial Management
Disaster Finance Center
P.O. Box 800
Berryville, VA 22611
Attention: Mission Assignments

For Federal Express delivery the address is:

DHS
Building 708
19844 Blue Ridge Mountain Road
Bluemont, VA 22012
Attention: Mission Assignments

7. Organizations that do not fall under an ESF or that have been tasked directly by DHS will bill DHS directly.

8. All goods and services ordered by GSA for other Federal agencies, regardless of whether agencies are executing DHS-issued MAs, will be billed to the ordering agencies. GSA will use the ordering Federal agency’s fund citation and billing address to process procurements. The other Federal agency will pay its vendors and subsequently request reimbursement from DHS for costs incurred under the MA. All goods and services ordered by GSA on DHS’s behalf will be billed to DHS directly via OPAC, with reference to the associated disaster and obligation reference numbers.
9. The OFM/DFC will perform a financial review of the request for reimbursement and supporting documentation and forward to the Mission Assignment Coordinator (MAC) appointed for the particular disaster. The MAC will review the request for reimbursement with the designated Project Officer. Their comments will then be forwarded to the Federal Approving Official for final review and comment. All requests for reimbursement will be returned to the OFM/DFC with program signatures and comments. A chargeback will be initiated for disapproved OPAC costs and charges.

10. All MAs still open 1 year from the date of the disaster declaration will be reviewed by DHS's financial and program staff. The FCO/DRM will determine if the MA is still valid and the best source for accomplishing the work. Agencies will be required to:
   a. Identify MAs that should be closed and submit a final bill if necessary; or
   b. Identify MAs that should remain open, with revised completion dates, a description of remaining work to be completed, and the required funding to complete the work.

11. The OFM/DFC will deobligate the remaining obligated fund balance within 1 year from the date of the disaster declaration when status is not provided by the ESFs or when the FCO/DRM determines that the MA is no longer required. If it is later determined that the need for an MA exists, a new MA will have to be requested and approved by the FCO/DRM.

12. All documents supporting reimbursements received from MAs will be retained for 6 years and 3 months after final payment, in accordance with National Archives and Records Administration financial records management guidelines.

G. Resolution of Reimbursement Disputes

1. A disputed request for reimbursement, whether a dispute between DHS and an ESF primary agency or between an ESF and a support agency, will be forwarded to DHS's CFO for resolution.

2. Agencies will send disputed bills for goods and services with all applicable documents and reports to the OFM/DFC.

3. The OFM/DFC will prepare an administrative report and forward the disputed bill to the CFO. The CFO may request input from the program office before forwarding the request to the DHS Office of General Counsel, or other independent office, for resolution.
VIII. Audits

The DHS program office or OFM may request DHS's OIG to conduct an audit of MAs. DHS's OIG will recommend audits of MAs to the OIGs of other Federal agencies and will be available to perform audits at their request. Audits will focus on MAs that present the greatest risk of fraud, waste, or abuse. Agencies should be able to provide supporting documentation verifying that billed expenses were actually incurred in performing the MA. Agencies also will maintain source documentation that adequately supports all charges billed to DHS.

IX. Applicable Financial Management Reference Materials

Standard financial management policies and regulations are available in each Federal agency and should be used in responding to major disasters. General authorities and guidance on select financial operations include:

A. Department of Homeland Security

The Stafford Act is the basic authority for presidially declared major disasters and emergencies. Regulations guiding implementation of the Stafford Act are contained in 44 CFR 206.

B. General Accounting Office

The GAO Policies and Procedures Manual for Guidance of Federal Agencies is a codification of material previously issued as General Regulations, Accounting Systems Memorandums, Accounting Principles Memorandums, Circular Letters, Bulletins, and other regulations. The provisions of this manual are applicable to all Federal agencies.

C. Department of the Treasury

The Treasury Financial Manual for Guidance to Departments and Agencies (Treasury Financial Manual) is the official publication in which the Department of the Treasury (Treas) issues codified instructions for the areas of Accounting Forms (Part 1); Central Accounting and Reporting (Part 2); Payroll Deductions, Withholdings (Part 3); Disbursing (Part 4); Deposits (Part 5); and Other Fiscal Matters (Part 6).

D. General Services Administration

1. The Federal Travel Regulations, published by GSA, are applicable to all Federal agencies for determining per diem rates and eligible travel expenses.

2. The Federal Property Management Regulations include the policies and guidelines relating to property management and the use and disposal of property in all executive agencies (41 CFR 101).

3. The Federal Acquisition Regulation (FAR) sets forth the requirements for procuring supplies and services from government, private, and nonprofit sources. The policies in the FAR are followed by all Federal agencies. Although each agency has its own
internal supplement to the FAR, it cannot change the basic policies of the FAR (48 CFR) unless exempted by law.

E. Office of Management and Budget

OMB Circulars and Bulletins. Particular attention should be directed to requirements specified in Circular A-11, Preparation and Submission of Budget Estimates (Part 1); Circular A-34, Budget Execution; and Circular A-73, Audit of Federal Operations and Programs.

F. Other Federal Agencies

Federal agencies should use their respective financial manuals, directives, and instructions.
Logistics Management Support Annex

Federal Logistics Partners: Department of Agriculture, Forest Service
Department of Defense, U.S. Army Corps of Engineers
Department of Homeland Security
Department of the Interior
Department of Transportation
General Services Administration

I. Introduction

A. Purpose

This annex is an overview of disaster logistics management activities and how the Department of Homeland Security (DHS) performs its logistics mission under the Federal Response Plan (FRP).

B. Scope

1. This annex:
   a. Identifies the components of the Federal disaster logistics delivery structure;
   b. Provides a concept of operations for logistics management in support of the FRP; and
   c. Outlines DHS logistics management responsibilities and how they change as various Federal logistics providers become active during a major disaster.

2. For procedures used to execute various logistics functions, see related DHS or other Federal agency publications. (See also Section VII, References.)

3. DHS will use ESF #7 — Resource Support when activated or under the interagency agreements with the General Services Administration (GSA) to acquire medical, biohazard, or other specialized equipment, supplies, and services as required and appropriate.

C. Definition

1. Logistics management is the process of planning, preparing, implementing, and evaluating all logistics functions that support an operation or activity.

2. Effective logistics management ensures all functions are executed in a unified manner to reduce costs, ensure appropriate support actions, and decrease delivery time. Individual logistics functions and associated subfunctions include:
a. Materiel Management. Requisitioning, ordering, and sourcing (requirements processing); acquisition; asset visibility (resource tracking); receipt; storage and handling; security; accountability; inventory; deployment; issue and distribution; recovery; reuse; and disposition;

b. Property Management (Personal Property). Accountability, inventory, disposal, and record processing;

c. Facility Management. Facility selection and acquisition, building services, information systems, communications, fleet management, safety and health, and physical security; and

d. Transportation Management. Transportation prioritizing, ordering, sourcing, and acquisition; time-phasing plans; and movement coordination and tracking.

II. Policies

A. Logistics personnel will find appropriate, time-sensitive, and cost-effective ways to fill the requirements developed by operations personnel.

B. All Federal departments and agencies acting within the scope of the Robert T. Stafford Disaster Relief and Emergency Assistance Act will account for personal property in accordance with the Federal Property Management Regulations (41 Code of Federal Regulations (CFR) 4) and existing agency property management policies. This will occur whether property is acquired from an agency’s own stock, from available Federal excess, or purchased with money from the Disaster Relief Fund (DRF).

C. Prior to initiating orders for personal property (through mission assignment (MA) or acquisition channels), stock previously acquired from the DRF must be the first source if it can be used in a timely and cost-effective manner.

D. Requests by Federal agencies to procure personal (versus real) property in support of State tasking using the DRF will be passed to the Logistics Section of the Regional Support Team (RST), Emergency Response Team (ERT), or Emergency Support Team (EST) (during their respective activations); or DHS Headquarters (HQ) (when the RST, ERT, or EST are not activated) for processing and sourcing. This will ensure requests are not duplicated and procurements are made only when cost effective or time efficient.

E. If other Federal agency property is being used for response and recovery operations and this property is lost, damaged, stolen, or consumed, the agency will be reimbursed for the cost of such property if the required documentation is provided to DHS. Required documentation is outlined in the Federal Emergency Management Agency (FEMA) Manual 6150.1, Personal Property Management Program. The process for requesting reimbursement is detailed in the Financial Management Support Annex.

F. When agencies’ property costs are reimbursed from the DRF, ownership of the property acquired during the execution of an MA passes to DHS.
G. DHS will direct the disposition of all property owned by DHS, including items held by organizations that intend to request reimbursement for the item from the DRF. This could include transfer to DHS, retention by the agency, donation to State-local government, or excess through GSA.

1. Information systems and communications devices purchased through the DRF will be retrieved and returned following each disaster operation to the DHS Disaster Information Systems Clearinghouse (DISC). The DISC will rehabilitate and repackage items for reuse in other disaster operations.

2. Other equipment and supplies purchased with DRF money and issued to support responders and field facilities will be retrieved and returned following each disaster operation to one of the three DHS Territory Logistics Centers (TLCs) serving the East, Central, and West DHS territories. Returned items will be coordinated with DHS HQ. The TLC will rehabilitate and repackage equipment and supplies for reuse in other disasters as directed by DHS HQ. The exceptions are:
   
a. Equipment and supplies used by the Advance Element of the ERT that will be stored in the DHS Regional Offices; and

b. Nonstandard TLC-stocked or nonmission capable items that will be excessed or disposed of at the disaster site.

H. Property procured with funds from the DRF may be used only in support of disaster response and recovery activities, not for day-to-day operations.

III. Situation

To accomplish a smooth transition to disaster operations, DHS ensures a coordinated framework for Federal logistics management activities that includes logistics planning, preparedness, implementation, and evaluation in support of disaster operations.

A. Disaster Condition

1. The unpredictable nature of some disasters requires that Federal agencies be prepared at a moment’s notice to provide needed equipment, supplies, and services. DHS HQ maintains a base logistics capability that enables a rapid response to any disaster and is able to provide full logistics services to limited events without activating other Federal logistics partners; it can also provide immediate supplemental Federal support, as appropriate, in any disaster situation.

2. DHS will:
   
a. Ensure agency readiness to deliver critical Initial Response Resources (IRR) and responder support goods;

b. Participate in early planning and execution of disaster operations before the activation of other Federal agencies; and
c. Assume open actions and closeout responsibilities from demobilizing Federal logistics partners.

**B. Planning Assumptions**

1. Federal logistics support will be provided principally in support of Federal operations initiated through proper requests by the affected State. However, Federal logistics support and assets may be requested by the State in the form of Federal technical assistance if the logistics assets and capabilities of the affected local communities and State are overwhelmed.

2. During disaster operations, the execution of most logistics actions will be conducted through Emergency Support Function (ESF) and other Federal operations, such as ESF #1 — Transportation, ESF #2 — Communications, and ESF #7 — Resource Support and the Defense Coordinating Element.

3. DHS's logistics management capability will be established prior to ESF activation to ensure logistics activities are rapidly initiated and initial logistics services are provided until ESFs set up and begin operations. Once the ESFs and other Federal agencies are established, DHS logistics actions will complement ESF operations by preparing and deploying DHS-stored assets and handling the disposition of commodities at the end of the operation.

4. Policies and procedures for the Logistics Section of the ERT and EST will be standardized.

5. The operations element of the RST, ERT, and EST will rapidly make initial decisions on mobilization center support requirements and the IRR required. They also will activate personnel and resources in a timely manner.

**IV. Concept of Operations**

**A. Federal Disaster Logistics Delivery Structure**

1. The delivery structure for Federal disaster logistics depends on logistics partners that combine resources to support disaster operations. Figure LM-1 depicts Federal disaster logistics organizations and the respective disaster organizations that they support. Once a disaster event triggers the formation of disaster organizations, the day-to-day organizations listed in the first column of Figure LM-1 will staff and support the appropriate RST, ERT, and EST subelements listed in the second column.

2. In addition to these organizations, there are numerous fixed facilities and corresponding staffs that support the deployment of personnel and goods. The DHS HQ maintains the DISC, three TLCs, and Disaster Response Support Facilities (DRSFs), collocated with each Mobile Emergency Response Support (MERS) detachment. Each region also supports limited storage sites.
### B. Concept of Logistical Response Operations

The Federal disaster logistics community is brought together when an event, or the threat of an event, triggers the activation of response personnel. Logistics management is executed continuously. During the disaster operation, logistics managers should be the first involved and the last to leave the field.
Figure LM-2 illustrates the movement from a state of preparedness through a Disaster Operations Cycle to a return to a state of preparedness. It also shows how DHS logistics activities change as other Federal logistics providers become involved as the response requires more assets and support than can be provided by internal DHS assets and personnel alone.

**Figure LM-2 — Disaster Operations Cycle and Transition of Logistics Roles**

1. Operational Readiness Phase: Transition into Active Disaster Logistics Management
   a. Logistics personnel focus primarily on preparing goods for deployment.
   b. Logistics personnel begin to transition from day-to-day operations into active disaster logistics management activities, such as tracking deployments and processing requests for assets. Federal agency logistics staff begin to:
      (1) Anticipate initial requirements;
      (2) Participate in decision-making meetings;
      (3) Develop strategic logistics plans for consideration by the Operations Section Chief and other leadership; and
      (4) Establish communications and coordination among Federal logistics partners to begin initial planning to transport goods and to locate mobilization centers.
c. The DHS HQ generally performs readiness activities and prepares to transition into ERT and EST roles. DHS logistics elements also may be executing activities typically covered by ESFs #1 or #7, because they do not have the authority to act until they receive an activation notice and startup funding (which usually occurs during the next phase).

2. FRP Activation Phase: Federal Logistics Partners Transition to ESF Operations

a. Logistics providers are formally activated. Operations personnel form requirements, and logistics staff deploys teams as well as IRR and responder support goods. The field infrastructure for receiving personnel and goods is being developed, with mobilization centers being established and property management personnel arriving.

b. An interagency logistics team forms to ensure the rapid location, acquisition, and setup of key field facilities (including the Disaster Field Office (DFO) and mobilization centers); operation of the field Movement Coordination Center (MCC); and initiation of resource acquisition operations. At a minimum, this team would include representatives from the Department of Transportation (DOT), U.S. Army Corps of Engineers (USACE), GSA, Department of Agriculture/Forest Service (USDA/FS), and DHS Logistics.

c. As the core for the RST, ERT, and EST operations support, logistics personnel perform the following functions:

   (1) Track the movement of assets;
   (2) Set up the DFO and other field facilities;
   (3) Support the deployment and receipt of response assets, including IRR items;
   (4) Coordinate deployments through the MCC to the mobilization centers;
   (5) Translate operations-generated requirements into specifications; and
   (6) Analyze requisitions to determine cost-effective and timely means to meet requirements.

d. Except for managing and deploying DHS-held assets, DHS logistics elements transition all other hands-on execution activities, as required, to the other Federal logistics providers. DHS national and regional logistics personnel then assume a broader logistics management role through the RST, ERT, and EST Logistics Sections.

3. Operations Phase: Delivery of Assistance

a. Activated Federal logistics providers have the ability, authority, and funding to execute tasks including:

   (1) DOT manages the acquisition of transportation as the primary agency for ESF #1, administers the MCC to track shipments and deploying teams,
and furnishes Federal Aviation Administration and U.S. Coast Guard aircraft upon request.

(2) After coordinating with internal Federal sources, GSA procures resources needed by the responders and victims, locates and rents field facilities (e.g., DFO and mobilization centers), and arranges contracts for transportation in support of ESF #1.

(3) USDA/FS establishes receiving and distribution operations at the mobilization centers and supports a DHS property management team by executing property accountability on items stored at these locations.

(4) The Department of Defense (DOD) supports DOT and GSA as requested.

b. The ERT, RST, and EST logistics activities focus on providing and coordinating delivery of required resources to sustain operations. (Materiel management, property management, facility management, and transportation management constitute the majority of all logistics operations.) DHS’s role in hands-on execution diminishes during this phase.

4. Stand-Down Phase: Transfer of Responsibilities to DHS

a. As response operations begin to diminish, the Federal Coordinating Officer (FCO), RST Director, and EST Director demobilize the other Federal agencies from their respective operations.

b. The ERT, RST, and EST Logistics Sections assume the responsibility for and closeout of any logistics activities left unaccomplished by the other Federal agencies. (For example, as the USDA/FS demobilizes staff from the mobilization centers, the ERT and EST Logistics Sections work jointly to ensure all assets are disposed of in the disaster area, or are retrieved, refurbished, and returned to one of DHS’s TLCs or other designated storage sites.)

c. The EST Logistics Section, the key link to the TLCs, remains active for several days following demobilization of the other Federal partners from the EST. It eventually transitions personnel and work to DHS HQ. Once this is accomplished, DHS HQ closes out disaster activities by:

(1) Coordinating with the ERT Logistics Section, Regional Operations Support Division Director, and TLC managers on the disposal or retrieval, refurbishment, and retrograde of DHS assets;

(2) Maintaining proper property accountability processes; and

(3) Conducting internal after-action meetings while participating in ERT, RST, and EST after-action meetings.

d. Logistics personnel revise documents, collect and file paperwork, and develop and assign tasks to improve activities for the next event. DHS HQ may meet
with other Federal logistics providers to develop a corrective action plan to improve overall cost-effectiveness and efficiency.

V. **Organization of the Logistics Section**

The ERT Logistics Section and EST Logistics Section have been standardized in accordance with DHS policy and guidance. Both structures emphasize support to disaster operations, including the setup and operation of disaster-specific facilities.

A. **ERT Logistics Section**

The ERT Logistics Section has overall responsibility for planning, organizing, and directing logistics operations. The organization, shown in Figure LM-3, comprises various section-specific management and staff functions, as well as five branches — Coordination and Planning, Resource Management, Supply, Support Services, and Information Services.

![Logistics Section of the Emergency Response Team Organization](image)

*Figure LM-3 — Logistics Section of the Emergency Response Team Organization*
B. EST Logistics Section

The EST Logistics Section plans, organizes, and supports logistics operations. The organization, shown in Figure LM-4, performs six principal activities:

1. Supports the mobilization, deployment, initial operations, retrieval, and storage of DHS-owned national assets, including those dispatched as part of an initial response resources plan, until the ERT Logistics Section becomes fully operational;
2. Supports the mobilization, deployment, and retrograde of teams;
3. Supports the ERT Logistics Section;
4. Tracks deploying resources;
5. Aids in requisition processing, sourcing, ordering, and allocation as necessary; and
6. Coordinates information systems support to the EST.

![Figure LM-4 — Logistics Section of the Emergency Support Team Organization]

VI. Responsibilities

Refer to DHS publication 9380.1-PR, Logistics Management Operations Manual, for a detailed list of responsibilities.
VII. References

Additional information on DHS’s logistics management system may be found in a number of publications. The following include the most relevant:

D. DISC Operating Procedures, February 1996.

E. EST Logistics Section Operations and SOP Manual (unnumbered), July 1995 (under revision).

VIII. Terms and Definitions

A. Accountable Property

Property that (a) has an acquisition cost of $15,000 or more; (b) has a unique, identifiable serial number (e.g., computer or telecommunications equipment); or (c) is considered “sensitive” (i.e., easily pilfered), such as cellular telephones, pagers, and laptop computers.

B. Agency Logistics Center

An organization that provides centralized control, transportation, deployment, and accountability of all disaster support goods within the TLC network. The Agency Logistics Center (ALC) was developed to enhance readiness and response, improve accountability of disaster assets, and reduce overall disaster costs.

C. Asset Visibility

Monitoring of the inventory levels of all goods that can be used for disaster operations that are in storage sites and of their movements to designated locations. Resource tracking is a subcomponent of asset visibility because it views only a subset of the overall inventory and tracks assets as they are applied to a specific disaster.

D. Assets

See Resources.

E. Disaster Information Systems Clearinghouse

An organization that provides centralized control, deployment, and accountability of disaster information systems. The DISC is located at DHS’s Mount Weather Emergency Operations Center in Bluemont, VA.
F. Disaster Response Support Facility

A storage facility located near each DHS MERS detachment, which houses MERS vehicles and associated disaster support materiel.

G. Goods

Equipment and supplies.

H. Initial Response Resources

Critical goods provided to victims and all levels of government responders immediately after a disaster occurs. IRR goods are used to augment State and local capabilities. DHS is responsible for storing and maintaining a limited quantity of critical IRR goods, initiating the acquisition of nonstocked items through Federal logistics partners, and pre-positioning equipment and supplies when required. IRR goods include equipment (e.g., emergency generators and refrigerated vans) and supplies (e.g., food, water, personal hygiene items).

I. Logistics Information Management System

DHS’s official automated personal property management system.

J. Mobilization Center

The designated location at which response personnel and resources are received from the point of arrival and pre-positioned for deployment to a local staging area or directly to an incident site as required. A mobilization center also provides temporary support services, such as food and billeting, for response personnel prior to their deployment.

K. Personal Property

Any property other than real property, which includes land, buildings, and other structures owned or leased by the Federal Government. In this annex, personal property is used interchangeably with equipment, supplies, and goods.

L. Requirements Processing

Analysis of requests for goods or technical services, translating these requests into meaningful specifications, completing requisite paperwork (e.g., Request for Federal Assistance Form or DHS Form 40-1), and entering the request into the resource tracking system. Alternately known as the resource ordering process.

M. Resource Tracking

Monitoring the processing of requirements, source selection, movement, receipt, distribution, use, and recovery of goods, tactical teams, and technical service personnel for a specific operation. The resource tracking function is a subcomponent of DHS’s overall asset visibility system because it focuses only on the movement of a small group of items, teams, and personnel from the Federal Government’s resources.
N. Resources

All personnel and major goods available, or potentially available, for assignment to operations. Resources are described by kind and type.

O. Territory Logistics Centers

TLCs are DHS’s strategically located logistics centers that support disaster operations through a variety of preparedness and response measures. These centers serve as storage sites for strategic disaster supplies and equipment, including initial supplies of certain IRR goods and prepackaged kits to support disaster field facilities. Skilled logistics personnel may be supplied from these centers to support disaster operations. Three geographically dispersed TLCs are located at Fort Gillem, GA; Fort Worth, TX; and Moffett Field, CA.
I. Introduction

A. Purpose

This annex provides guidelines to minimize the risk of injury or illness to federally deployed personnel who are involved in disaster response, recovery, or mitigation operations.

B. Scope

1. This annex applies to all personnel, regardless of agency affiliation, who are deployed to the field or any other location in response to or in anticipation of either a Federal disaster declaration or a Federal disaster exercise, whether on or off duty, and whether on or off federally controlled premises. For the purposes of this annex, “federally deployed personnel” means full-time and part-time Federal employees, Disaster Assistance Employees, reservists, local hires, and any other federally controlled personnel, whether staff, managers, or executives, who are working in response, recovery, or mitigation in support of a federally declared disaster or Federal disaster exercise. These personnel may be deployed at disaster sites, at interim staging points, or in support functions at headquarters (HQ) (Emergency Support Team), regional offices (Regional Support Team), or other locations. In some cases, deployed personnel will include employees and volunteers with recognized voluntary organizations who have been deployed under the Federal Response Plan (FRP).

2. The goal of this annex is to ensure deployed personnel work and reside in as safe and healthful an environment as possible. This annex:

   a. Provides a point of reference for identifying and addressing the safety and health hazards that may threaten personnel involved in disaster response, recovery, or mitigation, whether in an actual disaster or a disaster exercise;

   b. Delineates responsibilities for protecting personnel from these hazards and for providing prompt and effective remedial actions if and when a disaster-related illness or injury takes place;

   c. Develops and implements a standard reporting system to centrally document the occurrence of disaster-related illnesses and injuries; and

   d. Ensures the signatory agencies of the FRP take all reasonable steps to protect deployed personnel from disaster-related hazards, including, but not limited to, compliance with safety and health standards established by the Occupational Safety and Health Administration (OSHA) and other regulatory bodies.
II. **Policies**

A. In accordance with applicable OSHA and other agency regulations, all signatory agencies to the FRP are responsible for protecting the safety and health of their personnel deployed to a disaster or disaster exercise. This includes, for example, allocating sufficient resources for safety and health protection, training staff, purchasing protective clothing and equipment as needed, and correcting unsafe or unsanitary conditions.

B. The Department of Homeland Security (DHS) will carry out safety and health activities applicable to a disaster or exercise to include the following:

1. Consistent with the Incident Command System (ICS) organizational structure, inclusion of a qualified Disaster Safety Officer (DSO) as a member of the Federal Coordinating Officer’s (FCO’s) Command Staff;

2. Identification and coordination of abatement of hazards that may be encountered at a disaster or exercise site; and

3. Provision of basic safety and health training and information for all deployed personnel.

C. Tasked agencies will provide personal protective equipment (PPE) for all their staff needing such equipment. Agencies will ensure these individuals are fitted and trained in the use of their PPE prior to using the equipment.

D. The DSO will implement a system to report, investigate, and recommend remediation for accidents, injuries, and illnesses related to the disaster or the exercise. This system should include centralized collection and maintenance of safety- and health-related documentation and records. Workers’ compensation reports may contribute to the reporting system but should not be construed as sole fulfillment of this requirement.

E. The DSO will provide written evaluations, after-action reports, and exit reports on the disaster safety and health activities. The DSO will include input from other agency safety personnel as appropriate.

III. **Situation**

A. **Disaster Conditions**

The requirement for rapid response to a disaster increases the risk that personnel may be deployed with inadequate information about the safety and health hazards that they may face. Initial hazard assessments may be revised after a more comprehensive assessment. Immediate access to survey instrumentation and proper PPE may be required to protect the safety and health of deployed personnel. Some safety and health problems that might be encountered in a disaster include the following:

1. Safety Problems. Wet or uneven floors or carpets, broken walkways, or unlit parking lots; sharp edges on equipment in crowded work areas; falling objects from unsecured or improperly stacked cabinets in office work areas; blocked fire doors or emergency

---

SH - 2  Occupational Safety and Health Support Annex  January 2003
escape routes; lack of emergency lighting; electrical cables strung across floors or hanging from ceilings; unprotected or ungrounded electrical circuits; traffic safety issues such as driver fatigue, unfamiliar roads, or disaster-related road hazards; hazards relating to construction equipment and operations; hazards encountered by field inspectors in and around damaged or unsafe structures; and fire or other hazards created by poor housekeeping.

2. Health Problems. Ergonomic issues related to lifting and carrying, seating, or video display terminals; repetitive motion injury from using power tools, computers, or other equipment; reactions to particulate matter, chemicals, radioactive materials, or microbial contaminants such as fungi from mildewed carpets; exposure to asbestos or other contaminants that cause delayed or long-term health effects; infectious diseases (including vector-borne illnesses) that may be aggravated by crowded work spaces, poor ventilation, or poor air quality; exposure to weather extremes without adequate protective gear or time to become acclimated to the conditions; damage to eyes, hearing, or respiratory system as a result of failure to wear protective goggles, earplugs, or breathing apparatus; fatigue, stress, or hypoglycemia from poor nutrition or inadequate rest breaks; and exposure to diseases indigenous to the disaster area.

B. Planning Assumptions

1. The FCO is responsible for protection of the health and safety of deployed personnel. The FCO is represented in this regard on a day-to-day basis by the DSO.

2. The DSO will coordinate occupational safety and health-related activities overall. As indicated in Emergency Support Function #8 — Health and Medical Services, the Centers for Disease Control and Prevention (CDC) of the Department of Health and Human Services (HHS) assists in monitoring emergency worker health and safety. The DSO will request mission assignments as needed for CDC, as well as for other agencies, such as OSHA.

3. All signatory agencies participating in disaster activity will:
   a. Ensure their deployed staff observes all normal safety and health practices of their respective agencies;
   b. Provide safety staff, equipment, and training for specialized field responders such as firefighters, Urban Search and Rescue task forces, Disaster Medical Assistance Teams, etc.; and
   c. Cooperate with the DSO in implementing disaster occupational safety and health activities.

4. Commensurate with the length and nature of the disaster, participating agency safety officers will form an Interagency Health and Safety Coordinating Committee coordinated by the DSO to meet as required to enhance the overall safety and health of deployed personnel.
IV. **Concept of Operations**

For the purposes of this annex, emergency operations have been divided into three phases: (1) the readiness phase, during which a disaster declaration is considered imminent; (2) the operations phase, during which response actions are under way; and (3) the stand-down phase, during which operations are being significantly reduced and ultimately terminated.

**A. Phase I: Readiness**

1. Readiness phase activities will include:
   a. Collecting relevant information on the situation;
   b. Alerting required staff; and
   c. Deploying to, or near, the potential disaster location as appropriate.

2. Upon imminent or actual declaration of a disaster, a DSO will be designated, along with a roster of replacement DSOs to rotate throughout disaster operations if necessary.

3. The DSO, as part of the Advance Element of the Emergency Response Team (ERT-A), will inspect and approve field facilities prior to leasing to ensure compliance with all applicable safety, health, and fire criteria. In addition, the DSO will identify any other probable safety and health hazards that could be expected to be found on initiation of on-site disaster response operations. The DSO will establish liaison with safety and health personnel of CDC, OSHA, and other agencies as needed. No personnel should be deployed to the scene of an emergency that may involve a response to hazardous materials until the DSO has coordinated PPE with those agencies leading a response under another plan.

4. Prior to Federal deployment, the DSO will:
   a. Obtain information on probable disaster-related safety and health hazards;
   b. Provide procedures and coordinate the acquisition of equipment to mitigate the effects of the anticipated hazards to the greatest degree possible; and
   c. Ensure all deployed personnel are informed about potential hazards and mitigation measures that may be employed.

**B. Phase II: Operations**

During operations, the DSO will:

1. Ensure a safe and healthful working and living environment is maintained for staff during the disaster;

2. Establish a system for accomplishing required follow-up activity after the disaster;
3. Establish and maintain a visible safety and health presence at the disaster site and at all support sites, including mobilization centers, the Disaster Field Office warehouse, and Disaster Recovery Centers;

4. Integrate safety and health activity into the operating routine of the FCO command structure;

5. Identify, investigate, and coordinate abatement of safety and health problems;

6. Mobilize resources in fields such as radiological safety, industrial hygiene, safety engineering, and other specialties as needed;

7. Ensure deployed personnel are aware of anticipated hazards, their potential impacts, and possible prevention or countermeasures;

8. Establish and maintain liaison among Federal, State, and local officials concerned with safety and health; and

9. Collect and review information for required reports.

C. Phase III: Stand Down

1. The DSO, upon approval by the DHS Designated Agency Safety and Health Official (DASHO), will ensure the disaster safety operation has a smooth closeout or transition to a successor responsible authority by:
   a. Concluding DSO functions and activities;
   b. Providing follow-up information to deployed personnel; and
   c. Evaluating and documenting the effectiveness of the disaster safety and health effort:
      (1) Debrief deployed personnel on safety and health issues applicable to the disaster;
      (2) Produce a written evaluation of the safety and health initiative, including accomplishments, concerns and issues, lessons learned, and recommendations, for inclusion in the disaster after-action report;
      (3) Complete all required reports; and
      (4) Forward all safety and health documentation to the DHS DASHO.

2. The DHS DASHO will:
   a. Provide follow-up recommendations to the Secretary, DHS and, as required, to FRP signatory agencies; and
   b. Monitor follow-up actions.

3. The FCO will provide written safety and health recommendations for future FCOs to the DASHO and to the Secretary, DHS.
V. Responsibilities

All signatory agencies, managers, and supervisors will, to the best of their ability, provide and maintain a safe and healthful workplace for all deployed personnel at all times and follow prescribed safety and health criteria. Following are the responsibilities of FRP signatory agencies in ensuring safety and health protection for disaster personnel:

A. Department of Homeland Security

1. Establish disaster-specific safety and health guidance and policies for deployed personnel in cooperation with HHS, OSHA, and other agencies.

2. Establish a Federal Interagency Occupational Safety and Health Committee comprised of safety staff of deploying agencies to monitor and coordinate disaster safety and health operations.

B. Department of Labor, Occupational Safety and Health Administration

Make available safety and health specialists to provide safety-specific assistance to affected disaster response agencies as required by the FCO. Requirements may include safety consultation and training programs, air contaminant sampling and analysis, and other safety services preparatory to, during, and/or following disaster operations under the FRP.

C. Department of Health and Human Services

Coordinate a wide range of clinical, medical, and health-specific assistance, as required by the FCO. Requirements may include the following:

1. Identify endemic or other potential disease-causing entities that may be present at the disaster site. Advise deployed personnel of the hazards and the appropriate countermeasures;

2. Provide health inspections of disaster workplaces as required;

3. Establish and staff emergency-care clinic facilities to be used by personnel on site. These clinics should be able to triage, treat, and arrange for transportation to off-site centers for severe medical emergencies;

4. Perform environmental surveillance to detect and counteract infectious diseases;

5. Inspect and ensure food safety;

6. Develop and issue disease alerts to personnel, as needed, before, during, and after the disaster;

7. Provide technical assistance to DHS’s Stress Management Program; and

8. Provide other health assistance and/or other services as specified by the FCO preparatory to, during, and/or following disaster operations under the FRP.
D. General Services Administration

Obtain and maintain suitable, safe, and healthful working facilities for deployed personnel. These facilities must meet all applicable safety, health, and fire criteria.

E. Other Signatory Agencies

Appoint representatives as needed to provide safety and health service oversight for requirements unique to their specific operations.

VI. References

VII. Terms and Definitions

A. After-Action Report

Following Federal response to a disaster under the FRP, DHS will coordinate an after-action report documenting the Federal response effort. Each Federal agency involved in the response will keep records of its activity to assist in preparing the after-action report.

B. Designated Agency Safety and Health Official

The DASHO is responsible for the management of the occupational safety and health program within an agency, and is so designated or appointed by the head of the agency. The DASHO is the agency’s policy-level advocate for the safety and health of its personnel.

C. Disaster Safety Officer

The DSO is appointed by the DHS DASHO and represents the DHS DASHO in all occupational safety and health matters within the context of the disaster or the exercise. Serves on the staff of, and reports to, the FCO, but also provides ongoing safety and health status reports to the DHS DASHO.
This page intentionally left blank.
I. Introduction

A. Purpose

This annex provides guidance on carrying out the public affairs function in support of the Federal Government’s response to a major disaster or emergency.

B. Scope

The mission of public affairs is to contribute to the well-being of the community following a disaster by disseminating accurate, consistent, timely, and easy-to-understand information. Specific objectives are to:

1. Instill confidence that government will conduct response and recovery operations quickly, effectively, and efficiently;
2. Provide critical information about how to apply for assistance and the location and status of life-sustaining shelters and resources; and
3. Provide authoritative information to deal with unsubstantiated rumors.

II. Policies

A. The Department of Homeland Security (DHS) is responsible for implementing Federal public affairs activities after a major disaster or emergency. DHS will develop strategic plans and policies, provide liaison with the directors of public affairs for other Federal agencies and the White House press office, and determine the need for a Joint Information Center (JIC).

B. In a major disaster or emergency, a JIC will be established as a central point for coordination of emergency public information, public affairs activities, and media access to information about the latest developments. The JIC is a physical location where Public Affairs Officers (PAOs) from involved agencies come together to ensure the coordination and release of accurate and consistent information that is disseminated quickly to the media and the public.

1. A JIC may be established at DHS Headquarters (HQ) and/or near the scene of the disaster. Release of information between the two will be well coordinated to the maximum extent possible.

2. Only one primary Federal JIC will be in a major disaster area, preferably collocated with the Disaster Field Office (DFO), either in the same structure or an adjacent...
structure. This close proximity is designed to facilitate the JIC’s access to sources of information about the disaster operation and enable leadership access to the JIC.

3. HQ and on-scene JICs may be established through the execution of other Federal emergency operations plans or under special procedures.

C. Before its release, Federal, State, and local disaster information will be coordinated to the maximum extent possible to ensure consistency and accuracy.

D. All Federal agencies may use their own mechanisms for releasing information. No editorial or policy control is exercised by the coordinating PAO over other agencies’ release of information about their own policies, procedures, or programs.

E. State and local governments, as well as voluntary and private responding organizations, are encouraged to participate in and share the resources of the JIC. If collocating at the JIC is not feasible, all organizations are encouraged to conduct their information activities in cooperation with the JIC.

III. Situation

A. After a major disaster, normal means of communications in the affected area may be destroyed or severely disrupted; therefore, only limited and incomplete information may be expected from the area until communications can be restored.

B. The period immediately following a major disaster is critical in setting up the large and complex mechanism that will be needed to respond to the emergency public information and news requirements generated by the disaster.

IV. Concept of Operations

A. Organization

The primary organizational elements of a JIC may vary depending on the size of the disaster and the location of the JIC (HQ or on scene). Generally, these elements include:

1. The chief spokesperson for DHS in an HQ JIC is the DHS Director of Media Affairs, or a designee, who fields inquiries from national news media. The chief spokesperson in an on-scene JIC is the lead PAO, who may be operating from a Regional Operations Center (ROC) until a JIC is set up in the disaster area. The lead PAO will consult the DHS Director of Media Affairs to ensure a smooth transition to field operations;

2. Media Relations serves as the primary point of contact (POC) for the media for information regarding all disaster response, recovery, and mitigation programs provided by DHS, the State, and other Federal, State, local, and voluntary agencies. This includes providing the media accurate and timely information on disaster operations, working with members of the media to encourage accurate and constructive news coverage, monitoring media coverage to ensure critical messages are being
reported, and identifying potential issues or problems that could have an impact on public confidence in the response and recovery effort;

3. Creative Services gathers information about response, recovery, and mitigation operations and develops and produces information for dissemination by the JIC to the print and broadcast media;

4. Multilingual Operations ensures non-English-speaking populations receive accurate and timely information about disaster response, recovery, and mitigation programs through appropriate media and in their languages to the extent possible; and

5. Special Projects plans and executes projects such as print and broadcast media public service campaigns, video documentation, surveys, special productions, and logistical support of public meetings and presentations.

B. Headquarters-Level Response Structure

1. The DHS Director of Media Affairs will:
   a. Serve as the White House liaison for all media activities in major disasters and emergencies;
   b. Coordinate public affairs policy, planning, and operations for disaster response in consultation with other agency public affairs directors;
   c. Represent DHS on an HQ interagency group, comprised of the senior public affairs representatives from each JIC member agency, which comes together periodically to help guide the policies of the JIC and coordinate significant JIC activities; and
   d. Manage overall HQ JIC operations and activities.

2. Federal information released after a disaster is coordinated by and disseminated from HQ offices through the establishment of a JIC in Washington, DC, in consultation with the RST media affairs team, until an on-scene JIC is operational in the disaster area. Depending on space requirements and availability, the HQ JIC will be located at DHS, with backup locations available at nearby agencies.

3. Once the on-scene JIC is operational, it will assume primary responsibility for originating and coordinating Federal information released to the media and the public. The HQ JIC will continue to operate as long as necessary as a satellite of the on-scene JIC, and will provide information services to media in the Washington, DC, area.

4. DHS HQ will provide centralized services to support the JIC in the field. These services include production of the Recovery Times newsletter and daily updates for the media, DHS Radio Network, national media monitoring and analysis, JIC reports, Internet services, and nationwide broadcast fax.
C. Regional-Level Response Structure

1. The on-scene lead PAO serves as the primary POC in the field, handling public information responsibilities in support of the Federal Coordinating Officer (FCO). The lead PAO also oversees hour-to-hour JIC operations (in a particularly large-scale disaster, a JIC Coordinator may assume responsibility for JIC operations).

2. The on-scene JIC should be located where members of the news media are likely to gather. If the DFO is at a remote site, a fully staffed satellite JIC should be established to work with the on-site media. Authority to release public information will remain at the primary JIC.

3. The primary functions of the on-scene JIC are to:
   a. Provide response and recovery information to individuals, families, and businesses and industries directly or indirectly affected by the disaster;
   b. Monitor news coverage to ensure accurate information is being disseminated;
   c. Take action to correct misunderstandings, misinformation, and incorrect information concerning the disaster response, recovery, and mitigation operations that appear in the news media;
   d. Ensure non-English-speaking populations receive accurate and timely information about disaster response, recovery, and mitigation operations through appropriate news media and, to the extent possible, in their languages;
   e. Use a broad range of resources to disseminate information to disaster victims and the general public, including the Recovery Times newsletter, DHS Radio Network, DHS Recovery Radio, Recovery Channel, broadcast fax, and the Internet, as well as traditional print and broadcast news media;
   f. Maintain contact with and gather information from Federal, State, local, and voluntary organizations taking part in disaster response operations;
   g. Handle appropriate special projects such as news conferences and press operations for disaster area tours by DHS officials and others;
   h. Provide public affairs support and advice to the FCO and FCO staff; and
   i. Coordinate with the Logistics Section to provide basic facilities, such as communications, office space, and supplies, to assist the news media in disseminating information to the public. (These facilities are provided as long as the FCO determines their provision to be in the public interest.)
V. Response Actions

A. Initial Actions

On notification that a major disaster or emergency has occurred, the Director of Media Affairs at DHS HQ will:

1. Contact counterparts at other Federal agencies to determine whether there is to be unilateral response to news media or a coordinated response, with one agency serving to articulate the Federal response;

2. Determine the need for a JIC after consulting other Federal agencies;

3. Contact the regional PAO of the affected area (or other regional official; or, failing to reach the region, contact the State PAO), to relay information on Federal interagency plans; and

4. Coordinate with the FCO and the Emergency Support Team in assigning a lead PAO to deploy to the disaster site and assume public information responsibilities at the JIC.

B. Continuing Actions

1. The Director of Media Affairs will:
   a. Provide advice and support to the Catastrophic Disaster Response Group and keep it apprised of all public affairs actions;
   b. Serve as the focal point for all incoming information from the on-scene lead PAO and JIC; and
   c. Ensure JIC procedures in the DHS Emergency Information Field Guide are put into action.

2. The lead PAO will:
   a. Assume the on-scene lead PAO role on arrival at the disaster area. At that time the DHS regional PAO will assume a key management position (either deputy or special assistant, as specified by the Public Affairs Emergency Response Team roster). A JIC Coordinator may assume responsibility for the hour-to-hour operations of the JIC;
   b. Represent the FCO (or FCO’s deputy) with the media, public, and other agencies; and
   c. Serve as an advisor to the FCO and implement public affairs policies and procedures as established by the Director of Media Affairs.

3. Each person representing a JIC member organization will function in two capacities:
   a. Represent the agency in carrying out its public affairs mission; and
   b. Provide public affairs services in support of the various JIC missions.

I. Introduction

Presidential Decision Directive (PDD)-39, U.S. Policy on Counterterrorism, establishes policy to reduce the Nation’s vulnerability to terrorism, deter and respond to terrorism, and strengthen capabilities to detect, prevent, defeat, and manage the consequences of terrorist use of weapons of mass destruction (WMD). PDD-39 states that the United States will have the ability to respond rapidly and decisively to terrorism directed against Americans wherever it occurs, arrest or defeat the perpetrators using all appropriate instruments against the sponsoring organizations and governments, and provide recovery relief to victims, as permitted by law.

Responding to terrorism involves instruments that provide crisis management and consequence management. “Crisis management” refers to measures to identify, acquire, and plan the use of resources needed to anticipate, prevent, and/or resolve a threat or act of terrorism. The Federal Government exercises primary authority to prevent, preempt, and terminate threats or acts of terrorism and to apprehend and prosecute the perpetrators; State and local governments provide assistance as required. Crisis management is predominantly a law enforcement response.

“Consequence management” refers to measures to protect public health and safety, restore essential government services, and provide emergency relief to governments, businesses, and individuals affected by the consequences of terrorism. State and local governments exercise primary authority to respond to the consequences of terrorism; the Federal Government provides assistance as required. Consequence management is generally a multifunction response coordinated by emergency management.

Based on the situation, a Federal crisis management response may be supported by technical operations, and by Federal consequence management, which may operate concurrently (see Figure TI-1). “Technical operations” include actions to identify, assess, dismantle, transfer, dispose of, or decontaminate personnel and property exposed to explosive ordnance or WMD.
Figure TI-1 —Relationship Between Crisis Management and Consequence Management

A. Purpose

This annex ensures the Federal Response Plan (FRP) is adequate to respond to the consequences of terrorism within the United States, including terrorism involving WMD. This annex:

1. Describes crisis management. Guidance is provided in other Federal emergency operations plans;

2. Defines the policies and structures to coordinate crisis management with consequence management; and

3. Defines consequence management, which uses the FRP process and structure, supplemented as necessary by resources normally activated through other Federal emergency operations plans.

B. Scope

This annex:

1. Applies to all threats or acts of terrorism within the United States that the White House determines require a response under the FRP;

2. Applies to all Federal departments and agencies that may be directed to respond to the consequences of a threat or act of terrorism within the United States; and
3. Builds on the process and structure of the FRP by addressing unique policies, situations, operating concepts, responsibilities, and funding guidelines required for response to the consequences of terrorism.

II. Policies

A. PDD-39 validates and reaffirms existing lead agency responsibilities for all facets of the U.S. counterterrorism effort.

B. The Department of Justice (DOJ) is designated as the lead agency for threats or acts of terrorism within U.S. territory. DOJ assigns lead responsibility for operational response to the Federal Bureau of Investigation (FBI). Within that role, the FBI operates as the on-scene manager for the Federal Government. It is FBI policy that crisis management will involve only those Federal agencies requested by the FBI to provide expert guidance and/or assistance, as described in the PDD-39 Domestic Deployment Guidelines (classified) and the FBI WMD Incident Contingency Plan.

C. The Department of Homeland Security (DHS) is designated as the lead agency for consequence management within U.S. territory. DHS retains authority and responsibility to act as the lead agency for consequence management throughout the Federal response. It is DHS policy to use FRP structures to coordinate all Federal assistance to State and local governments for consequence management.

D. To ensure there is one overall Lead Federal Agency (LFA), PDD-39 directs DHS to support DOJ (as delegated to the FBI) until the Attorney General transfers the overall LFA role to DHS. DHS supports the overall LFA as permitted by law.

III. Situation

A. Conditions

1. FBI assessment of a potential or credible threat of terrorism within the United States may cause the FBI to direct other members of the law enforcement community and to coordinate with other Federal agencies to implement a prerelease response.

   a. FBI requirements for assistance from other Federal agencies will be coordinated through the Attorney General and the President, with coordination of National Security Council (NSC) groups as warranted.

   b. DHS will advise and assist the FBI and coordinate with the affected State and local emergency management authorities to identify potential consequence management requirements and with Federal consequence management agencies to increase readiness.

2. An act that occurs without warning and produces major consequences may cause DHS to implement a post-release consequence management response under the FRP. DHS will exercise its authorities and provide concurrent support to the FBI as appropriate to the specific incident.
B. Planning Assumptions

1. No single agency at the Federal, State, local, or private-sector level possesses the authority and expertise to act unilaterally on many difficult issues that may arise in response to a threat or act of terrorism, particularly if WMD are involved.

2. An act of terrorism, particularly an act directed against a large population center within the United States involving WMD, may produce major consequences that would overwhelm the capabilities of many State and local governments almost immediately.

3. Major consequences involving WMD may overwhelm existing Federal capabilities as well, particularly if multiple locations are affected.

4. Federal, State, and local responders will define working perimeters that may overlap. Perimeters may be used to control access to the area, target public information messages, assign operational sectors among responding organizations, and assess potential effects on the population and the environment. Control of these perimeters may be enforced by different authorities, which will impede the overall response if adequate coordination is not established.

5. If appropriate personal protective equipment is unavailable, entry into a contaminated area (i.e., a Hot Zone) may be delayed until the material dissipates to levels that are safe for emergency response personnel. Responders should be prepared for secondary devices.

6. Operations may involve geographic areas in a single State or multiple States, involving responsible FBI Field Offices and Regional Offices as appropriate. The FBI and DHS will establish coordination relationships as appropriate, based on the geographic areas involved.

7. Operations may involve geographic areas that spread across U.S. boundaries. The Department of State is responsible for coordination with foreign governments.

IV. Concept of Operations

A. Crisis Management

(Source: FBI, National Security Division, Domestic Terrorism/Counterterrorism Planning Section)

1. PDD-39 reaffirms the FBI’s Federal lead responsibility for crisis management response to threats or acts of terrorism that take place within U.S. territory or in international waters and that do not involve the flag vessel of a foreign country. The FBI provides a graduated, flexible response to a range of incidents, including:

   a. A credible threat, which may be presented in verbal, written, intelligence-based, or other form;

   b. An act of terrorism that exceeds the local FBI field division’s capability to resolve;
c. The confirmed presence of an explosive device or WMD capable of causing a significant destructive event, prior to actual injury or property loss;

d. The detonation of an explosive device, use of a WMD, or other destructive event, with or without warning, that results in limited injury or death; and

e. The detonation of an explosive device, use of a WMD, or other destructive event, with or without warning, that results in substantial injury or death.

2. The FBI notifies DHS and other Federal agencies providing direct support to the FBI of a credible threat of terrorism. The FBI initiates a threat assessment process that involves close coordination with Federal agencies with technical expertise, to determine the viability of the threat from a technical standpoint as well as tactical and behavioral standpoints.

3. The FBI provides initial notification to law enforcement authorities within the affected State of a threat or occurrence that the FBI confirms as an act of terrorism.

4. If warranted, the FBI implements an FBI response and simultaneously advises the Attorney General, who notifies the President and NSC groups as warranted, that a Federal crisis management response is required. If authorized, the FBI activates multiagency crisis management structures at FBI Headquarters (HQ), the responsible FBI Field Office, and the incident scene (see Figure TI-2). Federal agencies requested by the FBI, including DHS, will deploy a representative(s) to the FBI HQ Strategic Information and Operations Center (SIOC) and take other actions as necessary and appropriate to support crisis management. (The FBI provides guidance on the crisis management response in the FBI WMD Incident Contingency Plan.)

5. If the threat involves WMD, the FBI Director may recommend to the Attorney General, who notifies the President and NSC groups as warranted, to deploy a Domestic Emergency Support Team (DEST). The mission of the DEST is to provide expert advice and assistance to the FBI On-Scene Commander (OSC) related to the capabilities of the DEST agencies and to coordinate follow-on response assets. When a Joint Operations Center (JOC) is formed, DEST components merge into the JOC structure as appropriate. (The FBI provides guidance on the DEST in the PDD-39 Domestic Deployment Guidelines (classified).)

6. During crisis management, the FBI coordinates closely with local law enforcement authorities to provide a successful law enforcement resolution to the incident. The FBI also coordinates with other Federal authorities, including DHS.
7. The FBI Field Office responsible for the incident site modifies its Command Post to function as a JOC and establishes a Joint Information Center (JIC). The JOC structure includes the following standard groups: Command, Operations, Support, and Consequence Management. Representation within the JOC includes some Federal, State, and local agencies (see Figure TI-3).

8. The JOC Command Group plays an important role in ensuring coordination of Federal crisis management and consequence management actions. Issues arising from the response that affect multiple agency authorities and responsibilities will be addressed by the FBI OSC and the other members of the JOC Command Group, who are all working in consultation with other Federal, State, and local representatives. Although the FBI OSC retains authority to make Federal crisis management decisions at all times, operational decisions are made cooperatively to the greatest extent possible. The FBI OSC and the Senior DHS Official at the JOC will provide, or obtain from higher authority, an immediate resolution of conflicts in priorities for allocation of critical Federal resources (such as airlift or technical operations assets) between the crisis management and the consequence management response.
9. A DHS representative coordinates the actions of the JOC Consequence Management Group, expedites activation of a Federal consequence management response should it become necessary, and works with an FBI representative who serves as the liaison between the Consequence Management Group and the FBI OSC. The JOC Consequence Management Group monitors the crisis management response to advise on decisions that may have implications for consequence management, and to provide continuity should a Federal consequence management response become necessary. Coordination will also be achieved through the exchange of operational reports on the incident. Because reports prepared by the FBI are "law enforcement sensitive," DHS representatives with access to the reports will review them, according to standard procedure, to identify and forward information to Emergency Support Function (ESF) #5 — Information and Planning that may affect operational priorities and action plans for consequence management.

B. Consequence Management

1. Prerelease

a. DHS receives initial notification from the FBI of a credible threat of terrorism. Based on the circumstances, DHS HQ and the responsible DHS region(s) may implement a standard procedure to alert involved DHS officials and Federal agencies supporting consequence management.
b. DHS deploys representatives with the DEST and deploys additional staff for the JOC, as required, to provide support to the FBI regarding consequence management. DHS determines the appropriate agencies to staff the JOC Consequence Management Group and advises the FBI. With FBI concurrence, DHS notifies consequence management agencies to request that they deploy representatives to the JOC. Representatives may be requested for the JOC Command Group, the JOC Consequence Management Group, and the JIC.

c. When warranted, DHS will consult immediately with the Governor’s Office and the White House to determine if Federal assistance is required and if DHS is permitted to use authorities of the Robert T. Stafford Disaster Relief and Emergency Assistance Act to mission-assign Federal consequence management agencies to predeploy assets to lessen or avert the threat of a catastrophe. These actions will involve appropriate notification and coordination with the FBI, as the overall LFA.

d. DHS HQ may activate an Emergency Support Team (EST) and may convene an executive-level meeting of the Catastrophic Disaster Response Group (CDRG). When DHS activates the EST, DHS will request FBI HQ to provide liaison. The responsible DHS region(s) may activate a Regional Support Team (RST) and deploy a representative(s) to the affected State(s). When the responsible DHS region(s) activates an RST, the region(s) will notify the responsible FBI Field Office(s) to request a liaison.

2. Post-Release

a. If an incident involves a transition from joint (crisis/consequence) response to a threat of terrorism to joint response to an act of terrorism, then consequence management agencies providing advice and assistance at the JOC prerelease will reduce their presence at the JOC post-release as necessary to fulfill their consequence management responsibilities. The Senior DHS Official and staff will remain at the JOC until the FBI and DHS agree that liaison is no longer required.

b. If an incident occurs without warning that produces major consequences and appears to be caused by an act of terrorism, then DHS and the FBI will initiate consequence management and crisis management actions concurrently. DHS will consult immediately with the Governor’s Office and the White House to determine if Federal assistance is required and if DHS is permitted to use the authorities of the Stafford Act to mission-assign Federal agencies to support a consequence management response. If the President directs DHS to implement a Federal consequence management response, then DHS will support the FBI as required and will lead a concurrent Federal consequence management response (see Figure TI-4).
c. The overall LFA (either the FBI or DHS when the Attorney General transfers the overall LFA role to DHS) will establish a JIC in the field, under the operational control of the overall LFA’s Public Information Officer, as the focal point for the coordination and provision of information to the public and media concerning the Federal response to the emergency. Throughout the response, agencies will continue to coordinate incident-related information through the JIC. DHS and the FBI will ensure appropriate spokespersons provide information concerning the crisis management and consequence management responses. Before a JIC is activated, public affairs offices of responding Federal agencies will coordinate the release of information through the FBI SIOC.
d. During the consequence management response, the FBI provides liaison to either the RST Director or the Federal Coordinating Officer (FCO) in the field, and a liaison to the EST Director at DHS. Although the RST Director or FCO retains authority to make Federal consequence management decisions at all times, operational decisions are made cooperatively to the greatest extent possible.

e. As described previously, resolution of conflicts between the crisis management and consequence management responses will be provided by the Senior DHS Official and the FBI OSC at the JOC or, as necessary, will be obtained from higher authority. Operational reports will continue to be exchanged. The FBI liaisons will remain at the EST and the RST or DFO until DHS and the FBI agree that a liaison is no longer required.

3. Disengagement

a. If an act of terrorism does not occur, the consequence management response disengages when the Secretary, DHS, in consultation with the FBI Director, directs DHS HQ and the responsible region(s) to issue a cancellation notification by standard procedure to appropriate DHS officials and FRP agencies. FRP agencies disengage according to standard procedure.

b. If an act of terrorism occurs that results in major consequences, each FRP component (the EST, CDRG, RST, and DFO if necessary) disengages at the appropriate time according to standard procedure. Following FRP disengagement, operations by individual Federal agencies or by multiple Federal agencies under other Federal plans may continue to support the affected State and local governments with long-term hazard monitoring, environmental decontamination, and site restoration (cleanup).

V. Responsibilities

A. Department of Justice

PDD-39 validates and reaffirms existing lead agency responsibilities for all facets of the U.S. counterterrorism effort. DOJ is designated as the overall LFA for threats or acts of terrorism that take place within the United States until the Attorney General transfers the overall LFA role to DHS. DOJ delegates this overall LFA role to the FBI for the operational response. On behalf of DOJ, the FBI will:

1. Consult and advise the White House, through the Attorney General, on policy matters concerning the overall response;

2. Designate and establish a JOC in the field;

3. Appoint an FBI OSC to manage and coordinate the Federal operational response (crisis management and consequence management). As necessary, the FBI OSC will convene and chair meetings of operational decision makers representing lead State and local crisis management agencies, DHS, and lead State and local consequence
management agencies to provide an initial assessment of the situation, develop an action plan, monitor and update operational priorities, and ensure the overall response (crisis management and consequence management) is consistent with U.S. law and achieves the policy objectives outlined in PDD-39. The FBI and DHS may involve supporting Federal agencies as necessary; and

4. Issue and track the status of actions assigned by the overall LFA.

**B. Department of Justice, Federal Bureau of Investigation**

Under PDD-39, the FBI supports the overall LFA by operating as the lead agency for crisis management. The FBI will:

1. Determine when a threat of an act of terrorism warrants consultation with the White House, through the Attorney General;

2. Advise the White House, through the Attorney General, when the FBI requires assistance for a Federal crisis management response, in accordance with the PDD-39 Domestic Deployment Guidelines;

3. Work with DHS to establish and operate a JIC in the field as the focal point for information to the public and the media concerning the Federal response to the emergency;

4. Establish the primary Federal operations centers for the crisis management response in the field and Washington, DC;

5. Appoint an FBI OSC (or subordinate official) to manage and coordinate the crisis management response. Within this role, the FBI OSC will convene meetings with operational decision makers representing Federal, State, and local law enforcement and technical support agencies, as appropriate, to formulate incident action plans, define priorities, review status, resolve conflicts, identify issues that require decisions from higher authorities, and evaluate the need for additional resources;

6. Issue and track the status of crisis management actions assigned by the FBI; and

7. Designate appropriate liaison and advisory personnel to support DHS.

**C. Department of Homeland Security**

Under PDD-39, DHS supports the overall LFA by operating as the lead agency for consequence management until the overall LFA role is transferred to DHS. DHS will:

1. Determine when consequences are “imminent” for the purposes of the Stafford Act;

2. Consult the Governor’s Office and the White House to determine if a Federal consequence management response is required and if DHS is directed to use Stafford Act authorities. This process will involve appropriate notification and coordination with the FBI, as the overall LFA;
3. Work with the FBI to establish and operate a JIC in the field as the focal point for information to the public and the media concerning the Federal response to the emergency;

4. Establish the primary Federal operations centers for consequence management in the field and Washington, DC;

5. Appoint a RST Director or FCO to manage and coordinate the Federal consequence management response in support of State and local governments. In coordination with the FBI, the RST Director or FCO will convene meetings with decision makers of Federal, State, and local emergency management and technical support agencies, as appropriate, to formulate incident action plans, define priorities, review status, resolve conflicts, identify issues that require decisions from higher authorities, and evaluate the need for additional resources;

6. Issue and track the status of consequence management actions assigned by DHS;

7. Designate appropriate liaison and advisory personnel to support the FBI; and

8. As needed, provide assets of the National Disaster Medical System and/or the Metropolitan Medical Response System.

D. Federal Agencies Supporting Technical Operations

1. Department of Defense

As directed in PDD-39, the Department of Defense (DOD) will activate technical operations capabilities to support the Federal response to threats or acts of WMD terrorism. DOD will coordinate military operations within the United States with the appropriate civilian lead agency(ies) for technical operations.

2. Department of Energy

As directed in PDD-39, the Department of Energy (DOE) will activate technical operations capabilities to support the Federal response to threats or acts of WMD terrorism. In addition, the FBI has concluded formal agreements with potential LFAs of the Federal Radiological Emergency Response Plan (FRERP) that provide for interface, coordination, and technical assistance in support of the FBI’s mission. If the FRERP is implemented concurrently with the FRP:

   a. The Federal OSC under the FRERP will coordinate the FRERP response with the DHS official (either the RST Director or the FCO), who is responsible under PDD-39 for coordination of all Federal support to State and local governments;

   b. The FRERP response may include on-site management, radiological monitoring and assessment, development of Federal protective action recommendations, and provision of information on the radiological response to the public, the White House, Members of Congress, and foreign governments. The LFA of the FRERP will serve as the primary Federal source of information regarding on-site radiological conditions and off-site radiological effects; and
c. The LFA of the FRERP will issue taskings that draw on funding from the responding FRERP agencies.

3. **Department of Health and Human Services**

As directed in PDD-39, the Department of Health and Human Services (HHS) will activate technical operations capabilities to support the Federal response to threats or acts of WMD terrorism. HHS may coordinate with individual agencies identified in the HHS Health and Medical Services Support Plan for the Federal Response to Acts of Chemical/Biological (C/B) Terrorism to use the structure, relationships, and capabilities described in the HHS plan to support response operations. If the HHS plan is implemented:

a. The HHS on-scene representative will coordinate, through the ESF #8 — Health and Medical Services Leader, the HHS plan response with the DHS official (either the RST Director or the FCO), who is responsible under PDD-39 for on-scene coordination of all Federal support to State and local governments;

b. The HHS plan response may include threat assessment, consultation, agent identification, epidemiological investigation, hazard detection and reduction, decontamination, public health support, medical support, and pharmaceutical support operations; and

c. HHS will issue taskings that draw on funding from the responding HHS plan agencies.

4. **Environmental Protection Agency**

As directed in PDD-39, the Environmental Protection Agency (EPA) will activate technical operations capabilities to support the Federal response to acts of WMD terrorism. EPA may coordinate with individual agencies identified in the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) to use the structure, relationships, and capabilities of the National Response System as described in the NCP to support response operations. If the NCP is implemented:

a. The Hazardous Materials On-Scene Coordinator under the NCP will coordinate, through the ESF #10 — Hazardous Materials Chair, the NCP response with the DHS official (either the RST Director or the FCO), who is responsible under PDD-39 for on-scene coordination of all Federal support to State and local governments; and

b. The NCP response may include threat assessment, consultation, agent identification, hazard detection and reduction, environmental monitoring, decontamination, and long-term site restoration (environmental cleanup) operations.
VI. Funding Guidelines

A. As stated in PDD-39, Federal agencies directed to participate in the resolution of terrorist incidents or conduct of counterterrorist operations bear the costs of their own participation, unless otherwise directed by the President. This responsibility is subject to specific statutory authorization to provide support without reimbursement. In the absence of such specific authority, the Economy Act applies, and reimbursement cannot be waived.

B. DHS can use limited predeployment authorities in advance of a Stafford Act declaration to “lessen or avert the threat of a catastrophe” only if the President expresses intention to go forward with a declaration. This authority is further interpreted by congressional intent, to the effect that the President must determine that assistance under existing Federal programs is inadequate to meet the crisis, before DHS may directly intervene under the Stafford Act. The Stafford Act authorizes the President to issue “emergency” and “major disaster” declarations.

1. Emergency declarations may be issued in response to a Governor’s request, or in response to those rare emergencies, including some acts of terrorism, for which the Federal Government is assigned in the laws of the United States the exclusive or preeminent responsibility and authority to respond.

2. Major disaster declarations may be issued in response to a Governor’s request for any natural catastrophe or, regardless of cause, any fire, flood, or explosion that has caused damage of sufficient severity and magnitude, as determined by the President, to warrant major disaster assistance under the Stafford Act.

3. If a Stafford Act declaration is provided, funding for consequence management may continue to be allocated from responding agency operating budgets, the Disaster Relief Fund, and supplemental appropriations.

C. If the President directs DHS to use Stafford Act authorities, DHS will issue mission assignments (MAs) through the FRP to support consequence management.

1. MAs are reimbursable work orders, issued by DHS to Federal agencies, directing completion of specific tasks. Although the Stafford Act states that “Federal agencies may [emphasis added] be reimbursed for expenditures under the Act” from the Disaster Relief Fund, it is DHS policy to reimburse Federal agencies for eligible work performed under MAs.

2. MAs issued to support consequence management will follow DHS’s Standard Operating Procedures for the Management of Mission Assignments or applicable superseding documentation.

D. DHS provides the following funding guidance to the FRP agencies:

1. Commitments by individual agencies to take precautionary measures in anticipation of special events will not be reimbursed under the Stafford Act, unless mission-assigned by DHS to support consequence management; and
2. Stafford Act authorities do not pertain to law enforcement functions. Law enforce-
ment or crisis management actions will not be mission-assigned for reimbursement
under the Stafford Act.

VII. References

unclassified extract may be obtained from DHS.
C. PDD-62, Protection Against Unconventional Threats to the Homeland and Americans
Overseas (classified).
D. FBI WMD Incident Contingency Plan.
E. HHS Health and Medical Services Support Plan for the Federal Response to Acts of
Chemical/Biological Terrorism.

VIII. Terms and Definitions

A. Biological Agents

The FBI WMD Incident Contingency Plan defines biological agents as microorganisms or
toxins from living organisms that have infectious or noninfectious properties that produce
lethal or serious effects in plants and animals.

B. Chemical Agents

The FBI WMD Incident Contingency Plan defines chemical agents as solids, liquids, or
gases that have chemical properties that produce lethal or serious effects in plants and
animals.

C. Consequence Management

DHS defines consequence management as measures to protect public health and safety,
restore essential government services, and provide emergency relief to governments,
businesses, and individuals affected by the consequences of terrorism.

D. Credible Threat

The FBI conducts an interagency threat assessment that indicates the threat is credible and
confirms the involvement of a WMD in the developing terrorist incident.

E. Crisis Management

The FBI defines crisis management as measures to identify, acquire, and plan the use of
resources needed to anticipate, prevent, and/or resolve a threat or act of terrorism.
F. Domestic Emergency Support Team

PDD-39 defines the DEST as a rapidly deployable interagency support team established to ensure the full range of necessary expertise and capabilities are available to the on-scene coordinator. DHS is responsible for the DEST in domestic incidents.

G. Lead Agency

The FBI defines lead agency, as used in PDD-39, as the Federal department or agency assigned lead responsibility to manage and coordinate a specific function — either crisis management or consequence management. Lead agencies are designated on the basis of their having the most authorities, resources, capabilities, or expertise relative to accomplishment of the specific function. Lead agencies support the overall LFA during all phases of the terrorism response.

H. Nuclear Weapons

The Effects of Nuclear Weapons (DOE, 1977) defines nuclear weapons as weapons that release nuclear energy in an explosive manner as the result of nuclear chain reactions involving fission and/or fusion of atomic nuclei.

I. Senior Department of Homeland Security Official

The official appointed by the Secretary of DHS or his representative to represent DHS on the Command Group at the JOC. The Senior DHS Official is not the FCO.

J. Technical Operations

As used in this annex, technical operations include actions to identify, assess, dismantle, transfer, dispose of, or decontaminate personnel and property exposed to explosive ordnance or WMD.

K. Terrorist Incident

The FBI defines a terrorist incident as a violent act, or an act dangerous to human life, in violation of the criminal laws of the United States or of any State, to intimidate or coerce a government, the civilian population, or any segment thereof in furtherance of political or social objectives.

L. Weapon of Mass Destruction

Title 18, U.S.C. 2332a, defines a WMD as (1) any destructive device as defined in Section 921 of this title, [which reads] any explosive, incendiary, or poison gas, bomb, grenade, rocket having a propellant charge of more than four ounces, missile having an explosive or incendiary charge of more than one-quarter ounce, mine, or device similar to the above; (2) poison gas; (3) any weapon involving a disease organism; or (4) any weapon that is designed to release radiation or radioactivity at a level dangerous to human life.
Appendix A
Terms and Definitions

Terms and definitions in the Federal Response Plan (FRP) generally are consistent with current terminology used in the emergency management community. A number of these terms are defined below. Others are defined in the Basic Plan and individual annexes. Many of these terms are cross-referenced in this appendix.

**Accountable Property.** See Logistics Management Support Annex.

**Action Plan.** See ESF #5.

**Aerial Port of Debarkation.** See ESF #9 (military synonym for point of arrival).

**Aerial Port of Embarkation.** See ESF #9 (military synonym for point of departure).

**After-Action Report.** See Occupational Safety and Health Support Annex.

**Agency Emergency Coordinator (AEC).** See ESF #8.

**Agency Logistics Center (ALC).** See Logistics Management Support Annex.

**Assembly Point.** A designated location for responders to meet, organize, and prepare their equipment prior to moving to the point of departure. Because emergency teams, organizations, and resources involved in a disaster or emergency can originate from a variety of geographic locations, each typically has its own Assembly Point.

**Asset Visibility.** See Logistics Management Support Annex.

**Assets.** See Logistics Management Support Annex.

**Atmospheric Release Advisory Capability (ARAC).** See ESF #8.

**Base Camp.** The designated location under State or local control within the disaster area that is equipped and staffed to provide sleeping facilities, food, water, and sanitary services to response personnel.

**Base Support Installation.** See ESF #9.

**Biological Agents.** See Terrorism Incident Annex.

**Casualty Collection Point (CCP).** See ESF #8.

**Catastrophic Disaster Response Group (CDRG).** See Basic Plan, pages 10 and 23.

**Chemical Agents.** See Terrorism Incident Annex.
Civil Air Patrol (CAP). See ESF #5.

Civil Transportation Capacity. See ESF #1.

Contingency Plan. See ESF #5.

Credible Threat. See Terrorism Incident Annex.

Defense Coordinating Officer (DCO). See Basic Plan, page 15.

Designated Area. The geographic area designated under a Presidential major disaster declaration that is eligible to receive disaster assistance in accordance with the provisions of the Stafford Act.

Direct Federal Assistance. Is provided to the affected State and local jurisdictions when they lack the resources to provide specific types of disaster assistance either because of the specialized nature of the assistance, or because of resource shortfalls (e.g., providing debris removal, potable water, emergency medical services, urban search and rescue).

Disaster Field Office (DFO). See Basic Plan, pages 15 and 19.

Disaster Medical Assistance Team (DMAT). See ESFs #1, #8, and #9.

Disaster Mortuary Operational Response Team (DMORT). See ESF #8.

Disaster Safety Officer (DSO). See Occupational Safety and Health Support Annex.
Disaster Transportation Management System (DTMS). See ESF #1.
District Response Group. See ESF #10.
Donation Coordination Center. See Donations Management Support Annex.
Donations Coordination Team. See Donations Management Support Annex.
DOT Crisis Coordinator. See ESF #1.

Emergency Medical Response Team (EMRT), VA. See ESF #8.
Emergency Response Team (ERT). See Basic Plan, pages 9, 18, and 19.
Emergency Support Team (EST). See Basic Plan, pages 10, 21, 22, 23, and 24.

Emergency. As defined in the Stafford Act, an emergency is any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property, public health, and safety, and includes emergencies other than natural disasters.

Environmental Response Team. See ESF #10.

Essential Elements of Information (EEI). See ESFs #3 and #5.

Federal Coordinating Center (FCC), NDMS. See ESF #8.

Federal Operations Support. Is available to DHS or other Federal responding agencies when they require logistical or technical support of their Federal operations — ESF activation, personnel for preparing damage survey reports, equipment, and supplies for DFO and DRC operations.

Federal Radiological Monitoring and Assessment Center (FRMAC). See ESF #8.

Federally Arranged Transportation Support. See ESF #1.

Fire Suppression Support Coordinator. See ESF #4.

Food and Nutrition Service (FNS) Disaster Task Force. See ESF #11.

Functional Plan. See ESF #5.
Global Patient Movement Requirements Center (GPMRC). See ESF #8.

Governor’s Authorized Representative (GAR). See Basic Plan, page 7.

Hazardous Materials. See ESF #3, #4, #5, #8, #9, and #10.

Hazardous Substances. See ESF #10.

Incident Support Team (IST). See ESF #9.

Information Coordination Unit (ICU). See ESF #5.

In-Kind Donations. See Donations Management Support Annex.

Lead Federal Agency (LFA). See Basic Plan, page 11.

Long-Range Management Plan. See ESF #5.

Major Disaster. As defined under the Stafford Act, any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under this Act to
supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

**Management Support Team (MST), NDMS.** See ESF #8.

**Medical Emergency Radiological Response Team (MERRT), VA.** See ESF #8.

**Memorandum of Agreement (MOA).** See ESF #9.

**Mitigation.** Those activities designed to alleviate the effects of a major disaster or emergency or long-term activities to minimize the potentially adverse effects of future disaster in affected areas.

**Mobilization Center.** See ESF #9, Logistics Management Support Annex, and Occupational Safety and Health Support Annex.

**Monitoring Period.** See ESF #5.

**Movement Coordination Center (MCC).** See Basic Plan, page 24, and ESFs #1 and #9.

**National Disaster Medical System (NDMS).** See ESFs #8 and #9.

**National Disaster Medical System Operations Support Center (NDMSOSC).** See ESF #8.

**National Fire Suppression Liaison Officer.** See ESFs #4 and #8.

**National Interagency Coordination Center (NICC).** See ESFs #4 and #8.

**National Oil and Hazardous Substances Pollution Contingency Plan (NCP).** See ESF #10.

**National Processing Service Center (NPSC).** See Recovery Function Annex.

**National Response Center.** See ESF #10.

**National Response Team (NRT).** See ESF #10.

**National Security Council (NSC).** See Terrorism Incident Annex.

**National Strike Force.** See ESF #10.

**National Voluntary Organizations Active in Disaster (NVOAD).** See Donations Management Support Annex and Recovery Function Annex.

**Nuclear Regulatory Commission (NRC).** See ESFs #5, #10, and #12.

**Nuclear Weapons.** See Terrorism Incident Annex.

**On-Scene Commander (OSC).** See Terrorism Incident Annex.

**On-Scene Coordinator (OSC).** See ESF #10.

**Operating Site.** See ESF #9.

**Operational Period.** See ESF #5.
Patient Reporting Activity (PRA). See ESF #8.

Point of Arrival (POA). The designated location (typically an airport) within or near the disaster-affected area where newly arriving staff, equipment, and supplies are initially directed. Upon arrival, personnel and other resources are dispatched to either the DFO, a mobilization center, a staging area, or directly to a disaster site. (See Aerial Port of Debarkation.)

Point of Departure (POD). The designated location (typically an airport) outside the disaster-affected area from which response personnel and resources will deploy to the disaster area. (See Aerial Port of Embarkation.)

Preliminary Damage Assessment (PDA). See Basic Plan, page 7.

Primary Agency. See Basic Plan, pages 1, 13, 15, and 29.

Radiation Emergency Assistance Center/Training Site (REAC/TS). See ESF #8.

Radiological Assistance Program (RAP). See ESF #8.

Radiological Emergency Response Team. See ESF #10.

Recovery. Activities traditionally associated with providing Federal supplemental disaster relief assistance under a Presidential major disaster declaration. These activities usually begin within days after the event and continue after response activity ceases. Recovery includes individual and public assistance programs that provide temporary housing assistance, as well as grants and loans to eligible individuals and government entities to recover from the effects of a disaster.

Regional Emergency Coordinator (REC). See ESFs #2, #7, and #8.

Regional Evacuation Point (REP). See ESF #8.

Regional Emergency Transportation Coordinator (RETCO). See ESF #1.

Regional Operations Center (ROC). See Basic Plan, pages 17 and 18.

Regional Response Teams (RRTs). See ESF #10.

Regional Support Team (RST). See Basic Plan, page 17.

Regional/Area Fire Coordinator. See ESF #4.

Resources. See Logistics Management Support Annex.
Response. Activities to address the immediate and short-term effects of an emergency or disaster. Response includes immediate actions to save lives, protect property, and meet basic human needs. Based on the requirements of the situation, response assistance will be provided to an affected State under the FRP using a partial activation of selected ESFs or the full activation of all ESFs to meet the needs of the situation.

Scientific Support Coordinator. See ESF #10.

Secretary’s Command Center (SCC), HHS. See ESF #8.

Situation Assessment. See ESF #4, #5, #8, and #10.

Situation Report (SITREP). See ESFs #5 and #8.

Situation Room. See ESF #5.

Staging Area. See ESFs #9 and #11.

State Coordinating Officer (SCO). See Basic Plan, page 7.

Status Briefing. See ESF #5.

Strategic Information and Operations Center (SIOC). See Terrorism Incident Annex.

Strategic Plan. See ESF #5.

Supervisor of Salvage and Diving (SUPSALV). See ESF #10.

Support Agency. See Basic Plan, pages 13 and 29.

System to Locate Survivors (STOLS). See ESF #9.

Technical Assistance. Is provided to State and local jurisdictions when they have the resources but lack the knowledge and skills needed to perform a required activity (such as mobile-home park design and hazardous material assessments).

Terrorist Incident. See Terrorism Incident Annex.

Like all emergency plans, the Federal Response Plan (FRP) is a dynamic document, constantly being refined and updated to reflect lessons learned from actual disaster experience. This appendix establishes procedures for changing and revising the FRP.

**Types of Changes.** Changes include additions of new or supplementary material and deletions. No proposed change should contravene authorities or other plans now contained in statute or regulation.

**Format for Changes.** To facilitate review and coordination of proposed changes, use the original text and show new material (additions) by shading or redlining; show deletions by strikeouts.

**Coordination and Approval.** Any signatory agency may propose and develop a change to the FRP. The agency proposing the change has the responsibility to coordinate it among the primary and support agencies of each affected Emergency Support Function (ESF) and any associated agency program areas as required. The proposing agency then must:

- Obtain the official written approval for the change from the appropriate senior officials of the affected agencies; and
- Provide the final change to the Department of Homeland Security (DHS), Washington, DC 20472 for tracking, review, and official issuance.

**Notice of Change.** After coordination has been accomplished, including receipt of the necessary signed approval supporting the final change language, DHS will issue an official Notice of Change.

- The notice will specify the date, number, subject, purpose, supersession, background, and action required, and provide the change language on one or more numbered and dated insert pages that will replace the previous pages in the FRP. (Record changes to the FRP on the page provided at the front of the document.)
- Once published, the changes will be considered part of the FRP for operational purposes pending a formal revision and reissuance of the entire document.
- Interim changes can be further modified or updated using the above process.

**Distribution.** DHS will distribute each Notice of Change to all signatory agencies, DHS Headquarters and Regional Offices, and State emergency management offices. Notices of Change to other organizations will be provided upon request.

**Reissuance of the FRP.** DHS is responsible for coordinating periodic reviews and revisions of the FRP. It will distribute a revised FRP for concurrence and request the signature of the head or a designated senior official of each participating agency.
Appendix D
Overview of a Disaster Operation

This overview illustrates response and recovery actions Federal agencies likely will take to help State and local governments that are overwhelmed by a major disaster or emergency. Key operational components that could be activated include the Regional Operations Center (ROC), Emergency Response Team — Advance Element (ERT-A), National Emergency Response Team (ERT-N), Emergency Support Team (EST), Emergency Response Team (ERT), Disaster Field Office (DFO), Catastrophic Disaster Response Group (CDRG), and Disaster Recovery Center (DRC).

See next page.
1. The Federal Emergency Management Agency’s (FEMA’s) Operations Center (FOC) continually monitors potential disasters and emergencies. When advance warning is possible, the Department of Homeland Security (DHS) may deploy, and may direct Federal agencies to deploy liaison officers and personnel to a State Emergency Operations Center to assess the emerging situation. A Regional Operations Center (ROC) may be activated, fully or partially. Facilities, such as mobilization centers, may be established to accommodate personnel, equipment, and supplies.

2. Immediately after a disaster, local jurisdictions respond using available resources and notify State response elements. As information emerges, they also assess the situation and State assistance if needed. The State reviews the situation, mobilizes State resources, and informs the DHS Regional Office of actions taken. The Governor declares a state of emergency, activates the State emergency operations plan, and requests a Presidential disaster declaration. The State and DHS jointly conduct a Preliminary Damage Assessment to validate the State’s request and determine the kind of Federal assistance needed.

3. After the declaration, a ROC, staffed by regional personnel, coordinates initial regional and field activities such as deployment of an ERT-A. The ERT-A assesses the impact of the event, gauges immediate State needs, and makes preliminary arrangements to set up operational field facilities. (If regional resources appear to be overwhelmed or if the event has potentially significant consequences, DHS may deploy an ERT-N.)

4. An interagency EST, comprised of Emergency Support Function (ESF) representatives and DHS support staff, carries out initial activation and mission assignment operations and supports the ROC from DHS Headquarters (HQ).

5. A Federal Coordinating Officer (FCO), appointed by the Secretary, DHS on behalf of the President, coordinates Federal activities. The FCO works with the State Coordinating Officer to identify requirements.

6. The FCO heads the interagency ERT. The ERT works with the affected State and conducts field operations from the DFO. ESF primary agencies assess the situation and identify requirements. Under DHS mission assignments or their own authorities, agencies supply goods and services to help the State respond effectively.

7. The Catastrophic Disaster Response Group (CDRG), comprising representatives from Federal Response Plan signatory agencies, convenes at DHS HQ when needed to provide guidance and policy direction on coordination and operational issues. The EST supports the CDRG and coordinates with the ERT.

8. As immediate response priorities are met, recovery activities begin in the field. Federal and State agencies helping with recovery and mitigation convene to discuss State needs.

9. Teleregistration is activated and has a toll-free telephone number disaster victims can call to apply for assistance. A toll-free disaster helpline is established to answer common questions. One or more Disaster Recovery Centers (DRCs) may be opened where victims can obtain information about disaster assistance, advice, and counsel. The affected area is inspected to determine the extent of damage, and funds for approved assistance are obligated.

10. Concurrently, Applicant Briefings are conducted for local government officials and certain private nonprofit organizations to inform them of available assistance and how to apply. Applicants must first file a Request for Public Assistance. Eligible applicants will then be notified and will define each project on a Project Worksheet, which details the scope of damage and a cost estimate for repair to a predisaster condition. The Project Worksheet will be used as the basis for obligating funds to the State for eligible projects.

11. Throughout response and recovery, mitigation staff at the DFO examines ways to maximize mitigation measures. Hazard Mitigation Site Survey Teams contact local officials to identify potential projects and suggest which ones should be included in an early implementation strategy. The strategy, produced in cooperation with Federal, State, and local officials, focuses on viable opportunities to provide funds, technical assistance, and staff support to incorporate mitigation into the repair and replacement of damaged or destroyed housing and infrastructure.

12. As the need for full-time interagency coordination at the DFO ceases, the ERT plans for selective release of Federal resources, demobilization, and closeout. Federal agencies then work directly with their grantees from their regional or HQ offices to administer and monitor individual recovery programs, support, and technical services.
Figure APP-D — Overview of a Disaster Operation
## BASIC PLAN

### EMERGENCY SUPPORT FUNCTION ANNEXES
- ESF #1 - Transportation
- ESF #2 - Communications
- ESF #3 - Public Works and Engineering
- ESF #4 - Firefighting
- ESF #5 - Information and Planning
- ESF #6 - Mass Care
- ESF #7 - Resource Support
- ESF #8 - Health and Medical Services
- ESF #9 - Urban Search and Rescue
- ESF #10 - Hazardous Materials
- ESF #11 - Food
- ESF #12 - Energy

### RECOVERY FUNCTION ANNEX

### SUPPORT ANNEXES
- Community Relations
- Congressional Affairs
- Donations Management
- Financial Management
- Logistics Management
- Occupational Safety and Health
- Public Affairs

### INCIDENT ANNEXES
- Terrorism
