Introduction

This fact sheet is intended to offer Members information on extant Department of Defense (DOD) reform proposals being considered during the FY2017 National Defense Authorization Act debates. As such, it includes key provisions incorporated in H.R. 4909, the FY2017 National Defense Authorization Act (NDAA) reported by the House Armed Services Committee on May 4, 2016 (H.Rept. 114-537), and S. 2943, the FY2017 National Defense Authorization Act reported by the Senate Armed Services Committee on May 18, 2016 (S.Rept. 114-255). Wherever possible, it also includes the Administration's views. For more information on the defense reform debates, see CRS Report R44474, *Goldwater-Nichols at 30: Defense Reform and Issues for Congress*, by Kathleen J. McInnis.

Background

Thirty years after its enactment, Congress reviewed the 1986 Goldwater-Nichols Department of Defense Reorganization Act as well as the broader organization and structure of the contemporary Department of Defense (DOD). Most observers agree that in principle a comprehensive review of the Goldwater-Nichols legislation is warranted at this juncture. Further, a broad consensus appears to exist among observers that DOD must become considerably more agile while retaining its strength in order to enable the United States to meet a variety of critical emerging national security challenges. However, a variety of views exist on the kinds of specific reform proposals that ought to be adopted, in part stemming from differing views on the nature of the organizational challenges besetting the Department of Defense.

The House Armed Services Committee formally expressed its diagnosis of the defense reform challenge in H.Rept. 114-537, stating

The committee recognizes that security challenges have become more transregional, multi-domain, and multi-functional; that U.S. superiority in key warfighting areas is at risk with other nations' technological advances; and that the Department of Defense lacks the agility and adaptability necessary to support timely decisionmaking and the rapid fielding of new capabilities... The proposals contained in this subtitle are focused on increasing accountability and oversight, enhancing global synchronization and joint operations, and strengthening strategic thinking and planning, while preserving civilian control of the military and the role of the Chairman of the Joint Chiefs of Staff as the principal, independent military advisor to the President and the Secretary of Defense.

While the Senate Armed Services Committee declined to state its formal view on the overall goals for its defense reform agenda in S.Rept. 114-255, Chairman John McCain noted

The focus of Goldwater-Nichols was operational effectiveness, improving our military's ability to fight as a joint force. The challenge today is strategic integration. By that, I mean improving the ability of the Department of Defense to develop strategies and integrate military power globally to confront a series of threats, both states and non-state actors, all of which span multiple regions of the world and numerous military functions.¹

This sentiment appears to provide a logical underpinning for a number of the defense reform proposals presented in S. 2943.

¹ Remarks by Senator John McCain, Senate Armed Services Committee Holds Hearing on the Defense Department Budget Posture, *Congressional Quarterly*, March 1, 2016.

The Obama Administration appeared to take a somewhat more conservative view of defense reform, arguing that what is needed today is an “update” of provisions contained in the Goldwater-Nichols legislation rather a more fundamental redesign of key components of DOD.² As then-Secretary of Defense Ashton Carter stated at the Center for Strategic and International Studies on April 5, 2016:

This year, as Goldwater-Nichols turns 30, we can see that the world has changed since then – instead of the Cold War and one clear threat, we face a security environment that’s dramatically different from the last quarter-century. It’s time that we consider practical updates to this critical organizational framework, while still preserving its spirit and intent. For example, we can see in some areas how the pendulum between service equities and jointness may have swung too far, as in not involving the service chiefs enough in acquisition decision-making and accountability; or where subsequent world events suggest nudging the pendulum further, as in taking more steps to strengthen the capability of the Chairman and the Joint Chiefs to support force management, planning, and execution across the combatant commands, particularly in the face of threats that cut across regional and functional combatant command areas of responsibility, as many increasingly do.³

The following table organizes the various legislative proposals included in the “Title IX–Department of Defense Organization and Management” sections of both H.R. 4909 and S. 2943. It also includes selected related provisions from other sections of legislation. As the Obama Administration did not send formal legislative proposals to Congress to inform these debates, when possible and appropriate the table refers to recommendations formulated by DOD in conjunction with its own Goldwater-Nichols review.⁴ This report has been updated with relevant provisions incorporated in the FY2017 National Defense Authorization Act (P.L. 114-328).
