

Hurricane Dorian: FEMA and Additional Storm-Related Resources

Updated September 3, 2019

Introduction

This Insight provides a brief overview of [emergency and major declarations](#) and federal assistance programs potentially available to those affected by Hurricane Dorian. It also lists resources for forecast information, hurricane and flooding information, and selected CRS reports on federal emergency management policy.

The National Oceanic and Atmospheric Administration (NOAA) has issued [watches and warnings](#) for Hurricane Dorian, a storm east of the central Florida and north of Grand Bahama Island on September 3. The storm reached hurricane strength as it passed east of Puerto Rico on Wednesday, August 28. The forecast on September 3 anticipates Dorian continuing to move towards and along the southeastern U.S. coast over the course of the week. NOAA expects these areas to experience tropical storm and hurricane conditions, including life-threatening storm surge, destructive waves, and potential flash floods and isolated tornadoes.

President Donald J. Trump signed an emergency declaration for Puerto Rico (August 27), the U.S. Virgin Islands (August 28), Florida (August 30), Georgia (September 2) and South Carolina (September 2). Other emergency declarations may be forthcoming. As authorized under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (P.L. 93-288, as amended; [42 U.S.C. §§5121 et seq.](#)), the President may issue an emergency declaration in anticipation of an incident to support state and local efforts to save lives, protect property, and lessen or avert the incident from becoming a major disaster. As Hurricane Dorian makes landfall, and the storm warrants further federal assistance, the President may issue a [major disaster declaration](#). This allows for a broad range of federal assistance programs to be made available to state, local, and territorial governments, private nonprofit organizations, and individuals through the Federal Emergency Management Agency (FEMA) and other federal agencies.

FEMA has announced the following preparations and responses for Hurricane Dorian:

- Florida, Georgia, and South Carolina have issued mandatory evacuations for jurisdictions in Dorian's predicted path.

IN11160

- Commodities such as water, shelf stable meals, blankets, cots, generators, and fuel are strategically staged and are ready to support requests from states or tribes.
- FEMA established staging areas in locations throughout the Southeast: Maxwell Air Force Base in Alabama, Marine Corps Logistics Base Albany and Warner Robbins Air Force Base in Georgia, Fort Bragg in North Carolina, and Joint Base Charleston in South Carolina.
- Two FEMA Incident Management Assistance Teams, a FEMA Urban Search and Rescue Team, three Mobile Emergency Response Teams, and a mobile emergency operations vehicle are at the Florida Emergency Operations Center in Tallahassee.
- FEMA Urban Search and Rescue Teams are deployed to Georgia and Florida, and additional teams are being mobilized along with swift water rescue resources. Ambulance strike teams are preparing to support medical evacuations if needed.
- Five Disaster Medical Assistance Teams are deployed and ready to support state and tribal requests.

Types of FEMA Assistance Provided for Major Disasters

FEMA provides three major categories of assistance for major disasters:

- *Public Assistance* (PA) provides grants to tribal, state, territorial, and local governments, and certain private nonprofit organizations, for emergency protective measures, debris removal operations, and repair or replacement of damaged public infrastructure.
- *Individual Assistance* (IA) provides aid to affected individuals and households, and can take the form of housing assistance, other needs assistance, crisis counseling, case management services, legal services, and disaster unemployment assistance.
- *Hazard Mitigation Assistance* (HMA) funds mitigation and resiliency projects and programs, typically across the entire state or territory.

The forms of assistance authorized by a major disaster declaration may vary by the [designated areas](#), per the declaration (subject to amendment). The President can also amend major disaster declarations to decrease the state [cost-share requirements](#) for some PA grants.

National Flood Insurance Program

The [National Flood Insurance Program \(NFIP\)](#) is the primary source of flood insurance coverage for residential properties. Homeowners and tenants with NFIP flood insurance can make flood damage claims using the normal [NFIP claims process](#). There does not have to be an emergency or disaster declaration in order to make an NFIP claim.

As of July 31, 2019, the NFIP had \$6.004 billion available (\$4.897 billion in the National Flood Insurance Fund and \$1.107 billion in the reserve fund), as well as \$9.9 billion of [borrowing authority](#) from the Treasury and up to \$2.12 billion of [reinsurance](#) for a single flood event with losses over \$4-\$6 billion.
