

# FEMA COVID-19 Vaccine Distribution Update

---

In alignment with [President Biden's plan to respond to COVID-19](#), FEMA will work with other federal agencies to coordinate with state, tribal and territorial authorities and private sector partners and others to assist, augment and expedite vaccinations in the United States.

## Key Messages

- As of March 16, FEMA has provided more than **\$4.38 billion** to 40 states, Washington D.C., four tribes and five territories for expenses related to COVID-19 vaccination at 100% federal cost share. These [funds cover critical supplies, staffing, training and transportation needs](#) that support increased vaccination efforts.
- FEMA is working to speed up vaccinations by supporting states as they open community vaccine centers across the country, and working with its interagency partners continue to stand-up and provide support to additional sites daily. Each state determines its own vaccination priority groups and procedures. Community vaccination centers are led by states, but may be supported by the federal government, including FEMA.
- FEMA and its partners have established Mobile Vaccination Centers, including pop-up locations, to bring vaccines closer to the communities and people that need them. The mobile vaccination capability is another way FEMA is supporting communities and getting vaccine services to hard-to-reach and high-risk populations who cannot access services from larger, fixed sites. [Learn more about the efforts to make the vaccine available to all on FEMA.gov.](#)
  - FEMA has already worked with federal and local partners to hold more than 500 mobile events. We continue to partner with federal, state, local, tribal, and territorial partners to support mobile vaccination centers.
- Working with state governments FEMA, will open additional federal community vaccination center pilot sites, which include both federal support and supplemental vaccine allocation:
  - Today, a federal community vaccination center pilot site will open in Cleveland, Ohio. Within the next two weeks, federal community vaccination center pilot sites will open in Atlanta, Georgia and Detroit, Michigan.
- Find out where, when and how to get a vaccine in your community and get more information from [your local health department](#) and a [list of places where adults can get a vaccine](#). Visit FEMA.Gov for information on FEMA's vaccination support efforts.
