Enactment is assumed in June 2022.

H.R. 7790 would provide supplemental funding for fiscal year 2022 for the Food and Drug Administration (FDA) to address the current shortage of FDA-regulated infant formula and medical foods in the United States. The legislation would designate that funding as an emergency requirement in keeping with section 4001(a)(1) and section 4001(b) of S. Con. Res. 14 (117th Congress), the concurrent resolution on the budget for fiscal year 2022.
